126	194	ZSWTRNS	M	Statistical entry for SWEPCo TX

Supporting Schedules:

Explanation: Provide a copy of the utility's detailed chart of accounts and subaccounts including plant in the same level of detail required in E-17. Include a detailed description of each account/subaccount.

Line No.	G/L Account	Account Description	Additional Description
1	1010001	Plant in Service	A. This account shall include the original cost of production plant (steam, nuclear, hydro and other), included in accounts 310 to 346, owned and used by the utility in its utility operations, and having an expectation of life in service of more than one year from date of installation, including such property owned by the utility but held by nominees. B. The cost of additions to and betterments of property leased from others, which are includible in this account, shall be recorded in subdivisions separate and distinct from those relating to owned property (Refer to Account 1011001). Effective 7/1/02 - the Account title was changed from "Plant in Service - Production" to "Plant in Service". The business units were unbundled between Generation, Transmission, Distribution, & Nuclear - so the detail was kept
2	1010002	Plant In Service-Transmission	A. This account shall include the original cost of transmission plant, included in accounts 350 to 359, owned and used by the utility in its utility operations, and having an expectation of life in service of more than one year from date of installation, including such property owned by the utility but held by nominees. B. The cost of additions to and betterments of property leased from others, which are includible in this account, shall be recorded in subdivisions separate and distinct from those relating to owned property (Refer to Account 1011002).
3	1010003	Plant In Service-Distribution	A. This account shall include the original cost of distribution plant, included in accounts 360 to 373, owned and used by the utility in its utility operations, and having an expectation of life in service of more than one year from date of installation, including such property owned by the utility but held by nominees. B. The cost of additions to and betterments of property leased from others, which are includible in this account, shall be recorded in subdivisions separate and distinct from those relating to owned property (Refer to Account 1011003).
4	1010004	Plant In Service - Gen & Misc	A. This account shall include the original cost of general and miscellaneous plant, included in accounts 389 to 399, owned and used by the utility in its utility operations, and having an expectation of life in service of more than one year from date of installation, including such property owned by the utility but held by nominees. B. The cost of additions to and betterments of property leased from others, which are includible in this account, shall be recorded in subdivisions separate and distinct from those relating to owned property (Refer to Account 1011004).
5	1010006	Dolet Hills FAS 143 ARO Asset	This account shall include the amount of the FAS 143 ARO assets that are not kept in PowerPlant .
6	1011001	Capital Leases	A. This account shall include the amount recorded under capital leases for plant leased from others and used by the utility in its utility operations. B. The production plant property (steam, nuclear, hydro and other) included in this account shall be classified separately according to the detailed accounts (310 to 346) prescribed for utility plant in service. Effective 7/1/02 - the Account title was changed from "Capital Leases - Production" to "Capital Leases". The business units were unbundled between Generation, Transmission, Distribution, & Nuclear - so the detail was kept by business unit instead of by account.
7	1011004	Capital Leases - Gen & Misc	A. This account shall include the amount recorded under capital leases for plant leased from others and used by the utility in its utility operations. B. The general & miscellaneous property included in this account shall be classified separately according to the detailed accounts (389 to 399) prescribed for general & miscellaneous plant in service.
8	1011006	Prov-Leased Assets	This account shall include the amount recorded under capital leases for accumulated provision for amortization of production plant property (steam, nuclear, hydro and other). Effective 7/1/02 - the Account title was changed from "rov-Leased Assets-Production" to "rov-Leased Assets". The business units were unbundled between Generation, Transmission, Distribution, & Nuclear - so the detail was kept by business unit instead of by account.
9	1050001	Held For Fut Use	This account shall include the original cost of production plant (steam, nuclear, hydro and other), including land and land rights, owned and held for future use in production service under a definite plan for such use, to include: (1) Property acquired, including land and land rights, but never used by the utility in production service, but held for such service in the future under a definite plan, and (2) property, including land and land rights previously used by the utility in service, but retired from such service and held pending its reuse in the future, under a definite plan, in production service. Effective 7/1/02 - the Account title was changed from "Held for Fut Use-Production" to "Held for Fut Use". The business units were unbundled between Generation, Transmission, Distribution, & Nuclear - so the detail is kept by business unit instead of by account.

Explanation: Provide a copy of the utility's detailed chart of accounts and subaccounts including plant in the same level of detail required in E-17. Include a detailed description of each account/subaccount.

Line No.	G/L Account	Account Description	Additional Description
			For Elimination BU's use ONLY no charges should be processed by Non-Elimination BU's (Operating Co's). Process Functional Property Split on Elimination BU's in PeopleSoft. We will split property by Transmission, Distribution & General from current classification of Production on the Elimination BU's.
10	1050003	Held For Fut Use-Distribution	This account shall include the original cost of distribution plant, including land and land rights, owned and held for future use in distribution service under a definite plan for such use, to include: (1) Property acquired, including land and land rights, but never used by the utility in distribution service, but held for such service in the future under a definite plan, and (2) property, including land and land rights previously used by the utility in service, but retired from such service and held pending its reuse in the future, under a definite plan, in distribution service. 14	1060004	Const Not Classifd-Gen&Misc	This account shall include the total balance of work orders for general and miscellaneous plant which have been placed in service but have not been completed and classified for transfer to the detailed electric plant accounts.
15	1070001	CWIP - Project	This account shall include the balance of work orders in process of construction. The functional 1070 balance is maintained by project ID in the PowerPlant Asset Management System. NOTE: Charges to this Balance Sheet account by AEPSC (company number 61) will be passed to the AEPSC Billing System for billing to Client companies.

Southerwestern Electric Power Company **Schedule E-9**
Chart of Accounts
Test Year Ending December 31, 2018
Docket No. 19-008-U

Explanation: Provide a copy of the utility's detailed chart of accounts and subaccounts including plant in the same level of detail required in E-17. Include a detailed description of each account/subaccount.

Line No.	G/L Account	Account Description	Additional Description
16	1080001	A/P for Deprec of Plt	This account shall include the total accumulated provision for depreciation of production plant (steam, nuclear, hydro and other), which will include the provision for depreciation expense, the book cost of the property retired and the cost of removal and salvage related to the asset retired. Effective 7/1/02 - the Account title was changed from "A/P for Deprec of Plt-Productn" to "A/P for Deprec of Plt". The business units were unbundled between Generation, Transmission, Distribution, & Nuclear - so the detail was kept by business unit instead of by account. This account reflects the balance work orders in Retirement Work in Progress. The functional 1080 balance is maintained by project ID in the PowerPlant asset management system.
17	1080005	RWIP - Project Detail	NOTE: Charges to this Balance Sheet account by AEPSC (company number 61) will be passed to the AEPSC Billing System for billing to Client companies.
18	1080011	Cost of Removal Reserve	Cost of Removal Reserve
19	1080012	Dolet Hills FAS 143 ARO Deprec	This account shall include all depreciation amounts for the FAS 143 ARO assets that are not kept in PowerPlant . FIN-47 requires establishing asset retirement obligations for property where our companies have accrued a removal reserve from rate regulated depreciation studies. This account will contain the cumulative effect of implementing the new accounting rule and will have monthly amounts posted representing depreciation and accretion from the ARO assets and liabilities.
20	1080013	ARO Removal Deprec - Accretion	Description change per CF# 7025 effective 1/1/10, was ARO Removal Accretion.
21	1080155	Unrecovered Plant	This account should include the remaining NBV of generating plants/units which have been considered probable for abandonment where companies have been granted the ability to recover the remaining NBV of the plant/unit over the life of another generating facility or unit(s) (i.e. Tanner's Creek Plant in I&M). For FERC reporting, this account should be mapped to Accumulated Provision for Depreciation. For GAAP/SEC reporting, this account should be mapped to Regulatory Assets (similar to FERC account 182.2 Unrecovered Plant).
22	1110001	A/P for Amort of Plt	This account shall include the total accumulated provision for amortization of production plant (steam, nuclear, hydro and other). Effective 7/1/02 - the Account title was changed from "A/P for Amort of Plt-Productio" to "A/P for Amort of Plt". The business units were unbundled between Generation, Transmission, Distribution, & Nuclear - so the detail was kept by business unit instead of by account.
23	1140001	Plant Acquisition Adj	This account is used to track Plant Acquisition Adj
24	1150001	Amrtz of Plt Acqt Adj	This account is used to track Amrtz of Plt Acqt Adj
25	1160007	OthElecPltAdjTurkImprmnt-EPIS	To record activity related to Turk Impairment in EPIS
26	1160008	TurkAFUDCReverseTXCap-EPIS	This account will be used to reverse the AFUDC that is related to the expenditures that are over the Texas jurisdictional cap. This account will need to be mapped to Electric Plant in Service for SEC Reporting
27	1160009	AmortTurkImprmnt&AFUDCReversal	This account will be used for the amortization of Turk Impairment costs and Turk AFUDC reversal until a rate order is received. This account should be mapped to Accumulated Provision for Amortization for reporting purposes
28	1160012	Turk Imprmnt-AuxBoiler	To Record Louisiana exposure related to the Turk Auxilary Boiler per final order in the PUCT Docket No. 40443.
29	1160013	Turk Imprmnt-AuxBoiler Amort	Amortization on the Louisiana exposure related to the Turk Auxilary Boiler per final order in the PUCT Docket No. 40443
30	1160016	TX Trans Veg Mgmt Cost Wrteoff	To record the activity related to the write-off of the Texas portion of capitalized transmission vegetation management costs.

Operating, maintenance and depreciation expenses and ad valorem taxes on utility-owned transportation equipment used to transport oil from the point of acquisition to the unloading point. 5. Lease or rental costs of transportation equipment used to transport oil from the point of acquisition to the unloading point.
92	1510016	Coal Inv on Hand Transp	This account is used to track Coal Inv on Hand Transp
93	1510017	Lignite Inv on Hand Inc Transp	This account is used to track Lignite Inv on Hand Inc Transp
94	1510018	Coal Survey Adjustment	For coal survey adjustments that are to be amortized to coal expense over several months in accordance with State regulations
95	1510020	Fuel Stock Coal - Intransit	Estimated value of coal (including Lignite) which the Company has title to but has not been unloaded at the plant or is otherwise not available for consumption.
96	1520000	Fuel Stock Exp Undistributed	A. This account may include the cost of labor and of supplies used and expenses incurred in unloading fuel from the shipping medium and in the handling thereof prior to its use, if such expenses are sufficiently significant in amount to warrant being treated as a part of the cost of fuel inventory rather than being charged direct to expense as incurred. B. Amounts included herein shall be charged to expense as the fuel is used to the end that the balance herein shall not exceed the expenses attributable to the inventory of fuel on hand. ITEMS Labor: 1. Procuring and handling of fuel. 2. All routine fuel analyses. 3. Unloading from shipping facility and putting in storage. 4. Moving of fuel in storage and transferring from one station to another. 5. Handling from storage or shipping facility to first bunker, hopper, bucket, tank or holder of boiler house structure. 6. Operation of mechanical equipment, such as locomotives, trucks, cars, boats, barges, cranes, etc. Supplies and Expenses: 1. Tools, lubricants and other supplies. 2. Operating supplies for mechanical equipment. 3. Transportation and other expenses in moving fuel. 4. Stores expenses applicable to fuel. This account includes the cost of individual business and professional memberships; see Account 4265004 for social memberships and related expenses and see Account 9302000 for corporate memberships such as for industry dues, e.g., EEI. NOTE: Charges to this Balance Sheet account by AEPSC (company number 61) will be passed to the AEPSC Billing System for billing to Client companies.

Explanation: Provide a copy of the utility's detailed chart of accounts and subaccounts including plant in the same level of detail required in E-17. Include a detailed description of each account/subaccount.

Line No.	G/L Account	Account Description	Additional Description
97	1540001	M&S - Regular	A. This account shall include the cost of materials purchased primarily for use in the utility business for construction, operation and maintenance purposes. It shall also include the book cost of materials recovered in connection with construction, maintenance or the retirement of property, such materials being credited to construction, maintenance or accumulated depreciation provision, respectively, and included herein as follows: (1)Reusable materials consisting of large individual items shall be included in this account at original cost, estimated if not known. The cost of repairing such items shall be charged to the maintenance account appropriate for the previous use; (2) Reusable materials consisting of relatively small items, the identity of which (from the date of original installation to the final abandonment or sale thereof) cannot be ascertained without undue refinement in accounting, shall be included in this account at current prices new for such items. The cost of repairing such items shall be charged to the appropriate expense account as indicated by previous use; (3) Scrap and nonusable materials included in this account shall be carried at the estimated net amount realizable therefrom. The difference between the amounts realized for scrap and nonusable materials sold and the net amount at which the materials were carried in this account, as far as practicable, shall be adjusted to the accounts credited when the materials were charged to this account. B. Materials and supplies issued shall be credited hereto and charged to the appropriate construction, operating expense, or other account on the basis of a unit price determined by the use of cumulative average, first-in-first-out, or such other method of inventory accounting as conforms with accepted accounting standards consistently applied. ITEMS 1. Invoice price of materials less cash or other discounts. 2. Freight, switching or other transportation charges when practicable to include as part of the cost of particular materials to which they relate. 3. Customs duties and excise taxes. 4. Costs of inspection and special tests prior to acceptance. 5. Insurance and other directly assignable charges. Note A: Where expenses applicable to materials purchased cannot be directly assigned to particular purchases, they may be charged to a stores expense clearing account (account 163, Stores Expense Undistributed), and distributed therefrom to the appropriate account. Note B: When materials and supplies are purchased for immediate use, they need not be carried through this account but may be charged directly to the
98	1540004	M&S - Exempt Material	This account shall include the cost of materials purchased primarily for use in the utility business for construction, operation and maintenance purposes that are stored in remote locations instead of the storerooms.
99	1540006	M&S - Lime and Limestone	This account shall include the cost of lime and limestone purchased for use in the utility power plants.
100	1540013	Transportation Inventory	This account shall be used to track Transportation M & S Inventory for Fleet Vehicle Maintenance.

Amounts recorded in this account shall be amortized over the life of each respective issue under a plan which will distribute the amount equitably over the life of the security.
143	1810102	Unamort Debt Exp-PCB Ins	This account will contain expenses relating to Pollution Control or Installment Purchase Contract Bonds that are not part of the original issuance costs. Example: insurance premiums. These costs will be amortized over the life of the premium.

Explanation: Provide a copy of the utility's detailed chart of accounts and subaccounts including plant in the same level of detail required in E-17. Include a detailed description of each account/subaccount.

Line No.	G/L Account	Account Description	Additional Description
144	1823000	Other Regulatory Assets	A. This account shall include the amounts of regulatory-created assets, not includible in other accounts, resulting from the ratemaking actions of regulatory agencies. (See Definition No. 30.) B. The amounts included in this account are to be established by those charges which would have been included in net income determinations in the current period under the general requirements of the Uniform System of Accounts but for it being probable that such items will be included in a different period(s) for purposes of developing the rates that the utility is authorized to charge for its utility services. When specific identification of the particular source of a regulatory asset cannot be made, such as in plant phase-ins, rate moderation plans, or rate levelization plans, Account 407.4, Regulatory Credits shall be credited. The amounts recorded in this account are generally to be charged, concurrently with the recovery of the amounts in rates, to the same account that would have been charged if included in income when incurred, except all regulatory assets established through the use of Account 407.4 shall be charged to Account 407.3, Regulatory Debits, concurrent with the recovery of the amounts in rates. C. If rate recovery of all or part of an amount included in this account is disallowed, the disallowed amount shall be charged to Account 426.5, Other Deductions, or Account 435, Extraordinary Deductions, in the year of the disallowance.
145	1823010	Energy Efficiency Recovery	This account shall include the amounts of regulatory-created asset applicable to energy efficiency recovery.
146	1823075	Def Exp Selling Price Variance	This account is used to record a regulatory asset resulting from cost under-recovery due to selling price
147	1823077	Unreal Loss on Fwd Commitments	This account shall include the amounts of regulatory-created asset applicable to unrealized loss on forward committments.
148	1823099	Asset Retirement Obligations	New accounting in 2003 for Asset Retirement Obligations will require that expense be recorded at the time of implementation for the cumulative change in accounting principle for non-regulatory obligations. Regulated companies will be permitted to defer the cumulative change in a regulatory asset account. This account will be used to track the regulatory asset amount related to asset retirement obligations.
149	1823108	Reg Asset - Rate Case Expenses	Regulatory Asset for Rate Case Expenses
150	1823149	Unrecovered Fuel Cost - LA	This account shall include the amounts of regulatory created asset applicable to recovered fuel cost as a result of ratemaking actions. Segregation of fuel cost by state jurisdiction for reporting purposes.
151	1823150	Unrecovered Fuel Cost - AR	This account shall include the amounts of regulatory created asset applicable to recovered fuel cost as a result of ratemaking actions. Segregation of fuel cost by state jurisdiction for reporting purposes.
152	1823165	REG ASSET FAS 158 QUAL PLAN	This account is used to track Other Comprehensive Income (OCI) - Minimum Pension Liability, Qualified Pension Plan for regulated business units (SFAS 71).
153	1823166	REG ASSET FAS 158 OPEB PLAN	This account is used to track Other Comprehensive Income (OCI) - Minimum Pension Liability, OPEB (Other Post Employement Benefits) for regulated business units (SFAS 71).

155	1823219	Under Recovered EAC - LA	Under Recovered Environmental Adjustment Clause (EAC) Rule for Louisiana (LA). The EAC Rule applies to only those pollutants regulated by the United States EPA at the time of Commission adoption, namely, SO2 and NOx. Utilities are required to make a specific request before any other environmental cost for new pollutants can be recovered und the EAC, such as greenhouse gas emission und the Clean Air Act, or any new Federal Legislation.
156	1823241	Valley District Due Diligence	Deferal of Valley District Due Diligence related O&M expenses for five (5) years, with these expenses being included in the rates of SWEPCO pursuant to the terms of an extended FRP or base rate case
157	1823299	SFAS 106 Medicare Subsidy	In 2013, when AEP lost the Medicare Part D subsidy tax benefit, the Company replaced prior year's current retiree prescription drug Medicare Part D subsidy for Medicare-eligible retirees with another government plan known as an Employer Group Waiver Plan (EGWP). As a result, the SFAS 109 asset previously recorded in Account 1823301 is to be transferred to a non-tax related Regulatory Asset for future recovery in AEP's various regulatory jurisdictions.
158	1823301	SFAS 109 Flow Thru Defd FIT	This account has been added for the sole purpose to provide detailed information from the income tax system and interface with the General Ledger. This account shall contain the balance of the regulatory asset related to the SFAS 109 flow through deferred federal income tax.

Explanation: Provide a copy of the utility's detailed chart of accounts and subaccounts including plant in the same level of detail required in E-17. Include a detailed description of each account/subaccount.

Line No.	G/L Account	Account Description	Additional Description
			This account has been added for the sole purpose to provide detailed information from the income tax system and interface with the General Ledger.
159	1823302	SFAS 109 Flow Thru Defrd SIT	This account shall contain the balance of the regulatory asset related to the SFAS 109 flow through deferred state income tax.
160	1823306	Net CCS FEED Study Costs	In June 2011, management approved a billing among AEP operating companies based on megawatt allocation percentages for generating units that could potentially benefit from carbon capture storage (CCS). Management's decision was consistent with requests for recovery of an allocated share of the FEED (Front End Engineering and Design) study costs in VA, OH, and pending applications in MI and IN. This regulatory account will be used to properly classify charges given uncertainty of future construction . Since AEP has postponed the project and we have started requesting recovery of the balance in some of our jurisdictions, we need a regulatory asset account for these Net CCS FEED Study Costs
161	1823324	LA FRP Asset	Regulatory Asset to track receivables due to LPSC orders.
162	1823348	Louisiana Vegetation Managemnt	To Track Louisiana Vegetation Management per LPSC Dkt U-32220.

Explanation: Provide a copy of the utility's detailed chart of accounts and subaccounts including plant in the same level of detail required in E-17. Include a detailed description of each account/subaccount.

Line No.	G/L Account	Account Description	Additional Description
590	4500000	Forfeited Discounts	This account shall include the amount of discounts forfeited or additional charges imposed because of the failure of customers to pay their electric bills on or before a specified date.
591	4510001	Misc Service Rev - Nonaffil	This account shall include revenues for all miscellaneous services and charges billed to customers which are not specifically provided for in other accounts
592	4540001	Rent From Elect Property - Af	This account shall include rents received from associated companies for the use of land, buildings, and other
593	4540002	Rent From Elect Property-NAC	This account shall include rents received from non-associated companies for the use of land, buildings, and other property.
594	4540004	Rent From Elect Prop-ABD-Nonaf	This account shall include rents received from nonassociated companies for the use of land, buildings, and other property associated with Associated Business Development activities.
595	4540005	Rent from Elec Prop-Pole Attch	This account shall include rents received from non-associated companies in connection with joint use and pole attachment rental contracts.
596	4560010	Oth Elect Rev - Royalties	This account shall include other revenues derived from electric operations applicable to non-associated companies - royalties.
597	4560012	Oth Elect Rev - Nonaffiliated	This account shall include other revenues derived from electric operations applicable to nonaffiliated companies.
598	4560013	Oth Elect Rev-Trans-Nonaffil	This account shall include other revenues derived from electric operations applicable to transmission.
599	4560015	Other Electric Revenues - ABD	This account shall include other revenues derived from electric operations applicable to Associated Business Development.
			This account is intended solely for use by CSW Energy, CSW International and their subsidiaries.
600	4560025	Plant Operations O/H Revenues	This account shall contain all revenues related to revenues earned from the contractual operationns overhead billed for plants operated on behalf of external parties.
601	4560041	Miscellaneous Revenue-NonAffil	To track miscellaneous revenue from non-affiliated companies.
602	4560102	Oth Elect Rev-Trans-ERCOT area	Account is to distinguish transmission revenue charges that were originally paid to Ercot for commerical operations.
603	4561008	SPP Non-Affil. Base Fundng Rev	Non-Affiliated revenue relating to transmission group billing for SPP base funding charges. Should map to same line as 4560080. Represents Non-Affiliated Base Funding revenue that transmission group is billing SPP.
604	4561009	SPP Affil. Base Funding Cost	Affiliated SPP Base Funding charges that are being paid by the generation group. Should map to same line as 4560096. Contra revenue booked on the generation companies relating to SPP Affiliated Base Funding revenue.
605	4561010	SPP Affl. Base Funding Rev	Affiliated revenue relating to transmission group billing for SPP base funding charges that are being paid by the generation group. Should map to same line as 4560091. Represents Affiliated Base Funding revenue that transmission group is billing generation in regards to SPP. (Mapped to Transmission Line 6)
606	4561011	SPP Pt to Pt Trans Serv Rev	To differentiate firm & nonfirm point to point transmission revenue with SPP-non affiliate. BUs 169,192,194,114. Move transmission revenue from acct 4560080 to 4561xxx
607	4561012	SPP Direct Assignment	To record direct assignment revenue with SPP - Non affiliated. BU 159, 194. Move transmission revenue from acct 4560082 to 4561xxx.
608	4561013	SPP Affiliated NITS Revenue	Affiliated revenue relating to transmission group billing for Network Transmission Service charges relating to SPP that are being paid by the generation group. Move Transmission revenue from acct 4560091 to 4561
609	4561014	SPP Ancillary Services	To record SPP Non-Affiliated Ancillary Services Revenue. Move transmission revenue from acct 4560092 to 4561xxx.
610	4561015	SPP Ancillary Schedule 1	Recording ancillary charges for the transmission group specifically from the SPP line Schedule 1. Move transmission revenue from acct 4560098 to 4561xxx
611	4561016	SPP Affiliated Trans NITS Cost	Affiliated transmission cost relating to SPP that are being paid by the generation group. Contra revenue booked on the generation companies relating to SPP Affiliated NITS revenue. Move transmission revenue from acct 4560096 to 4561xxx
612	4561017	Oth Elect Revenues - Ancillary	This account shall include other revenues derived from electric operations applicable to transmission - ancillary.
613	4561021	SPP NITS	To differentiate network integration transmission SVC with SPP Non affiliated. BU 169,192,194,114. Move transmission revenue from acct 4560081 to 4561xxx
614	4561038	SPP Pt to Pt Trans Affil Cost	To differentiate firm & nonfirm point to point transmission costs with SPP as an affiliate transaction. SPP = Southwest Power Pool
615	4561039	SPP Pt to Pt Trans Affil Rev	To differentiate firm & nonfirm point to point transmission revenue with SPP-Affiliate. SPP = Southwest Power Pool.
616	4561040	Affil. SPPAncillary Sch.1 Cost	Record affiliate ancillary transmission expense from the SPP line Schedule 1. SPP = Southwest Power Pool
617	4561041	Affil. SPPAncillary Sch. 1 Rev	Record affiliate ancillary revenue for the transmission group specifically from the SPP line Schedule 1.

Explanation: Provide a copy of the utility's detailed chart of accounts and subaccounts including plant in the same level of detail required in E-17. Include a detailed description of each account/subaccount.

Line No.	G/L Account	Account Description	Additional Description
618	4561042	SPP Base Funding - Contra	To defer the amount of 2017 SPP charges in excess of 2015 SPP charges beginning January 2017, not to exceed $4.5 Million. Amortization to begin in August 2018. Per LPSC STS Docket No. U-34200.
619	4561064	PROVISION RTO Rev WhslCus-NAf	To record the RTO provision associated with under/over collections of RTO revenue in current or prior years for Wholesale Customers (Formula Rate). This account is included in the ENEC calculation for APCo and WPCo.
620	5000000	Oper Supervision & Engineering	This account shall include the applicable portion of the cost of labor and expenses incurred in the general supervision, direction, planning, coordination, instruction and training in connection with the operation of steam power generating stations. It shall include the portion of services of personnel such as managers and assistants, supervisors, engineers, chief chemist, accounting supervisor, assistant and plant accounting personnel, secretaries and other staff employees and consultants. Include herein the general supervision and direction of work as it relates to operation only, but not the actual performance of such work or the immediate and direct supervision chargeable to other accounts appropriate for the work performed. Exclude from this account general clerical and stenographic work which is includible in Account 5060000, Miscellaneous Steam Power Expenses - All Other. Outside Services: Consultants' fees and expenses. This account is managed in ABMS. Activity and Benefiting Location are required.
621	5000001	Oper Super & Eng-RATA-Affil	This expense account will be used by the Generating companies to record the billings from USTI for the Relative Accuracy Test Audits (RATA). This is an affiliate expense account, which is established to faciliate intercompany eliminations.
622	5010000	Fuel	This account shall include the cost of labor, materials used, and expenses incurred in connection with fuel consumed which are not provided for in accounts 5010001, 5010003, 5010005, 5010008, 5010009, 5010010, 5010011, 5010012, or 5010013 (e.g. labor, materials, and expenses incurred in connection with ash disposal.) average delivered cost per ton at the close of the current month. Note: No direct charges are to be made to this account. Costs for activities described below will be initially recorded in Account 1510000, Fuel Stock. Coal - invoice cost. Discount expense on coal and freight invoices. Freight, switching, barging, demurrage, and other transportation and related taxes. Fuel oil - invoice cost Inventory adjustments to correct overages and shortages. Liability insurance on cargo and barge operations. Natural gas - invoice cost. Tipple and dumping charges on transfers from railroad cars to barges. Note: Invoice cost of coal, where appropriate, includes charges such as: Amortization of conveyor land Mine coal conveyor operation and maintenance Depletion of coal resources. Depreciation on equipment investment. Reclamation expense and cost of license. Real property taxes rental income and miscellaneous expenses.
623	5010001	Fuel Consumed	

Explanation: Provide a copy of the utility's detailed chart of accounts and subaccounts including plant in the same level of detail required in E-17. Include a detailed description of each account/subaccount.

Line No.	G/L Account	Account Description	Additional Description
624	5010003	Fuel - Procure Unload & Handle	This account shall include the cost of labor, materials used and expenses incurred in procuring, unloading and handling fuel consumed as cleared from Account 1520000, Fuel Stock Expenses Undistributed at the average cost per ton at the close of the current month. No direct charges are to be made to this account. Costs for activities described below will be initially recorded in Account 1520000, Fuel Stock Expenses Undistributed. 1. Labor and expenses associated with investigating sources of coal, fuel oil and natural gas supply, procurement activities, and the negotiation of contracts . 2. Checking moisture content of coal pile. 3. Controlling dust from coal in storage. 4. Cleaning coal bunkers to prevent or release jams. 5. Handling fuel from storage of shipping facility to bunker in the boiler house structure. 6. Moving coal in storage pile for fire prevention purposes. 7. Packing coal pile. 8. Processing invoices and related records for fuel placed in stock but excluding reports and records of fuel consumed. 9. Routine analysis of fuel before being consumed. 10. Routine testing and calibrating of coal conveyor scales and fuel meters and gauges. 11. Surveying coal pile and measuring fuel storage tanks. 12. Unloading fuel shipment from cars, barges or trucks into storage. 13. Weighing and recording truck coal. 14. Oil for thawing coal in coal cars or barges. 15. Rent of leased coal handling and storage equipment. 16. Stores expenses applicable to fuel. 17. Tools, lubricants, fuel and miscellaneous supplies used in connection with analyzing coal, dust control, packing and surveying coal pile, measuring fuel storage tanks, and operating coal handling equipment. Note: A. Operating fuel conveying, storage, weighing and processing equipment within the boiler plant shall be charged to account 5020000, Other Steam Expenses. B. Maintenance of fuel handling equipment shall be charged to Account 5120000 Maintenance of Boiler Plant.
625	5010012	Ash Sales Proceeds	This account will be used to segregate ash sales proceeds from ash disposal expenses.
626	5010013	Fuel Survey Activity	This account will be used for the distribution of Fuel Survey charges recorded by journal entry prepared by Fuel Accounting.
627	5010018	Lignite Consumed	This account is used to track Lignite Consumed
628	5010019	Fuel Oil Consumed	This account is used to track Fuel Oil Consumed
629	5010020	Nat Gas Consumed Steam	This account is used to record gas expenses at gas steam units. Changed title and description per CF #7053 on 2/1/10.
630	5010021	Transp Gas Consumed Steam	This account is used to record transportation for gas consumed at gas steam units. Changed description per CF#7053 effective 2/1/10. Prior description - This account will be used to record activity related to Gas Transportation Expenses
631	5010027	Gypsum handling/disposal costs	The account shall include the labor, material and expenses incurred for handling and disposal of gypsum from the FDG equipment
632	5010034	Gas Transp Res Fees-Steam	To record pipeline transportation reservation fees on gas steam boiler units.
633	5010035	Gas Transp Res Fees - CC	To record pipeline transportation reservation fees on gas combined cycle units.
634	5010036	Nat Gas Consumed CC	This account is used to record gas expenses for combined cycle units.
635	5010037	Transportation Gas CC	This account is used to record transportation for gas consumed at combined cycle units.
636	5020000	Steam Expenses	This account shall include the cost of labor, materials used and expenses incurred in production of steam for electric generation. Payroll Labor: Analyzing and treating water Cleaning filters Operating chlorinators Operating pumping station Pumping boiler compounds Unloading compound from cars to storage or tanks. Monitoring pollution Operating ash handling equipment Material: Boiler compounds Chemicals for analysis Chlorine and other chemicals Pumping supplies Water Note: Do not include in this account water used for general station purposes or the cost of maintaining water supply systems.
637	5020001	Lime Expense	This account is for recording lime used in the scrubbers to remove impurties in the emissions produced by the plants. The expense associated with Lime is increasing substantially and is a function of Scrubber and SCR
638	5020002	Urea Expense	This account is for recording urea used in the SCR's to remove impurties in the emissions produced by the plants. The expense associated with Urea is increasing substantially and is a function of Scrubber and SCR installations.
639	5020003	Trona Expense	This account is for recording Trona used in the SCR's to remove impurities in the emissions produced by the plants. The expense associated with TRONA is increasing substantially and is a function of Scrubber and SCR installations.
640	5020004	Limestone Expense	This account is to record use of limestone in either the FGD or combustion processes to help control the quality of emissions produced.
641	5020005	Polymer expense	This account is used by the power plants to capture the cost of polymer purchases. Polymers attract pollutants from scrubber waste.
642	5020006	Consumable Expense-Deferred	To defer environmentally related consumable expenses for future recovery through Virginia/Arkansas Environmental & Reliability cost recovery mechanism in account 502 normally as a credit.

Explanation: Provide a copy of the utility's detailed chart of accounts and subaccounts including plant in the same level of detail required in E-17. Include a detailed description of each account/subaccount.

Line No.	G/L Account	Account Description	Additional Description
643	5020007	Lime Hydrate Expense	Beginning January 2007, AEP will be receiving a new consumable called Lime Hydrate. Lime Hydrate will be trucked to the plants in small quantities and consumed upon receipt. Lime Hydrate is a mixture of lime (CaO) and water (H_2O) used in the Flue Gas Desulfurization process waste water treatment plant to treat the acidity in the waste (landfill) stream.
644	5020008	Activated Carbon	Capture costs associated with the purchase and transportation of Activated Carbon. This product will be used for mitigating Mercury emissions at Coal Fired Power Plants. This cost will start in 2010, but for forecasting/budgeting purposes we need the account established now.
645	5020013	Anhydrous Ammonia Expense	This account is for recording anhydrous ammonia used to control nitrogen oxide emissions produced by the plants. ITEMS Labor: 1. Procuring and handling of Anhydrous Ammonia. 2. All routine Anhydrous Ammonia analyses. 3. Unloading from shipping facility and putting in storage. 4. Moving of Anhydrous Ammonia in storage and transferring from one station to another. 5. Handling from storage or shipping facility to first bunker, hopper, bucket, tank, or holder of boiler house structure. 6. Operation of mechanical equipment, such as locomotives, trucks, cars, boats, barges, cranes, etc. Supplies and Expenses: 1. Tools, lubricants and other supplies. 2. Operating supplies for mechanical equipment. 3. Transportation and other expenses in moving Anhydrous Ammonia. 4. Stores expenses applicable to Anhydrous Ammonia.
646	5020014	Calcium Bromide Expense	This account will record the expense of the use of calcium bromide in a Dry Sorbent Injection process to reduce mercury emmissions.
647	5020016	Dolet Hills Misc Reagents	This account records miscellaneous Dolet Hills recoverable reagent/consumable expense including Dibasic Acid, Dust Suppression, Sand, Aqua Ammonia, Sodium Carbonate, and Emulsified Sulfur.This excludes those reagents/consumables recorded in accounts 5020002 (Urea), 5020003 (Trona), 5020005 (Thickener Polymer), 5020007 (Hydrated Lime), 5020008 (Activated Carbon), 5020013 (Anhydrous Ammonia), and 5020028 (Sodium Bicarbonate).
648	5020025	Steam Exp Environmental	This account shall include the portion of costs related to any environmental projects that would otherwise be charged to account 5020000. This excludes costs for lime that are charged to 5020001, urea charged to 5020002, trona charged to 5020003 or limes.
649	5050000	Electric Expenses	This account shall include the cost of labor, materials used and expenses incurred in operating prime movers, generators, and their auxiliary apparatus, switch gear and other electric equipment to the points where electricity leaves for conversion for transmission or distribution. Payroll Labor: Inspecting, checking, testing and operating the following: Control valves (without disassembly). Condensers, circulating water systems and other auxiliary apparatus. Crib house water alarm. Generator cooling system. Meters, gauges and instruments. Turbine generator units and associated auxiliaries. Also include herein: Changing charts on recording and measuring devices. Replenishing nitrogen gas to maintain pressure. Material: Circulating water purification supplies. Cooling water purchased. Generator cooling, gases, hydrogen. Generator and motor brushes. Gauge glasses and

Explanation: Provide a copy of the utility's detailed chart of accounts and subaccounts including plant in the same level of detail required in E-17. Include a detailed description of each account/subaccount.

Line No.	G/L Account	Account Description	Additional Description
650	5060000	Misc Steam Power Expenses	This account shall include the cost of labor, materials used and expenses incurred in the operation of steam power generating stations which are not specifically provided for or not readily assignable to other steam power generating accounts. Payroll Labor: 1. Checking and filing records pertaining to plant land, boundaries, building and equipment owned by the utility and in operation. Includes deeds and easements previously acquired. 2. Preparing, maintaining and filing: Details for yearly tax reports. Operation and maintenance forecasts and reports. Time reports and payroll records Work orders and completion reports. Activities relating to air and water pollution control such as: Recording results of chemical analysis. Preparing and filing reports and applications. Operation of refuse water treatment system. Other Labor: 1. Care of grounds including snow removal, cutting grass, etc. 2. Building service including cleaning floors, washing windows, insect control, etc. 3. Inspecting and repairing small hand tools and general use. 4. Inspecting all fire extinguishers and refilling those under 15 lbs. (dry) and under 2-1/2 gallons (liquid). 5. Guarding and patrolling station and yard. 6. Taking temperature reading of the river for possible contamination. 7. Clean septic tanks. Materials: 1. Cafeteria supplies 2. Fuel for heating 3. Gaskets, gauge glasses (Note A) 4. General laboratory supplies 5. Guard Uniforms 6. Janitor supplies 7. Lamps - indicating 8. Light Bulbs 9. Log sheets and charts 10. Meter supplies 11. Office supplies 12. Packing 13. Rope 14. Small fire extinguishers 15. Tools-small, portable (Note B) 16. Refills for fire extinguishers 17. Training materials and supplies All Other: 1. Communication Service 2. Postage 3. Research and Development expenses 4. Costs related to the Amos Simulator as billed to the AEP System generating plants by Appalachian and Ohio Power Companies. Note: Special gauge glasses and special gaskets which are purchased for particular equipment, and are relatively expensive and generally installed by maintenance labor, shall be charged to the appropriate maintenance accounts. Cost of and repairs to small tools used exclusively for maintenance should be charged to the maintenance accounts appropriate for the equipment. This account includes the cost of individual business and professional memberships; see Account 4265004 for social memberships and related expenses and see Account 9302000 for corporate memberships such as for industry dues, e.g., EEI.
651	5060001	Dresden Misc Steam Pwer Exp	APCo's Virginia Generation Rate Adjustment Clause (G-RAC original case number PUE-2011-00036), and West Virginia Expanded Net Energy Costs (ENEC original Case number 11-0265-E-PC) related to miscellaneous steam power expense associated with the Dresden Generating Plant over/under accounting. Subsequent case numbers will not be included in this description.
652	5060003	Removal Cost Expense - Steam	For AEP's non-regulated companies, expensing of costs related to the removal of the Company's property, plant and equipment in accordance with FASB 143. A new account sub-point needs to be established under account 506 for the non-regulated steam generation companies, also a new account sub-point is needed under account 859 for the gas transportation companies and a new sub-point for LIG Liquids under account 776.
653	5070000	Rents	This account shall include all rents of property, used, occupied, or operated in connection with steam power generation including rents paid to associated companies on spare parts, such as interchangeable turbine rotors, accessories and other equipment used, or held for use, in connection with steam power generation. All Other: Rents paid to others for the use of buildings. Rents paid to others for the use of land and rights-of-way.
654	5070006	Rents - Associated	To record inter-company rent transactions for usage of buildings by associated companies that have no ownership interest in the building.
655	5080017	IPP Oper - Training/Travel	This account is intended solely for use by CSW Energy, CSW International and their subsidiaries.
656	5090001	Allowance Consumption - NOx	This account will track the Consumption cost attributed with NOx allowances for compliance
657	5090002	Allowance Expenses	To record expenses related to EPA Allowances not directly assignable to Consumption
658	5090008	Deferred Enviro Emission Costs	Defer Environmental Emission Cost related to the Environmental Adjustment Clause and Environmental Certification Rule (EAC Rule). The EAC Rule applies to only those pollutants regulated by the United States EPA at the time of Commission adoption, namely, SO2 and NOx. Utilities are required to make a specific request before any other environmental cost for new pollutants can be recovered under the EAC, such as greenhouse gas emission under the Clean Air Act, or any new Federal Legislation.
659	5090012	CSAPR AN NOx Cons. Exp	This account will track the consumption cost attributed with Cross State Air Pollution Rule (CSAPR) Annual NOx allowances for compliance purposes
660	5090013	CSAPR Seasonal NOx Cons. Exp	This Account will track the consumption cost attributted with Cross State Air Pollution Rule (CSAPR) seasonal NOx allowances for compliance purposes

Explanation: Provide a copy of the utility's detailed chart of accounts and subaccounts including plant in the same level of detail required in E-17. Include a detailed description of each account/subaccount.

Line No.	G/L Account	Account Description	Additional Description
661	5100000	Maint Supv & Engineering	This account shall include the applicable portion of the cost of labor and expenses incurred in the general supervision, direction, planning coordination, instruction and training in connection with the maintenance of steam power generating stations, but not the actual performance of such maintenance work itself or the immediate and direct supervision chargeable to other accounts appropriate for the work performed. It shall include the portion of services of personnel such as managers and assistants, supervisors, engineers, chief chemist, accounting supervisor, assistant and plant accounting personnel (except general and stenographic work directly assignable to other specific activities) secretaries and staff employees and consultants.
662	5100001	Dresden Maint Sup& Engineer	APCo's Virginia Generation Rate Adjustment Clause (G-RAC original case number PUE-2011-00036), and West Virginia Expanded Net Energy Costs (ENEC original Case number 11-0265-E-PC) related to general supervision, direction, planning coordination, instruction and training in connection with the maintenance of steam power generating station expenses associated with the Dresden Generating Plant over/under accounting. Subsequent case numbers will not be included in this description.
663	5110000	Maintenance of Structures	This account shall include the cost of labor, materials used, and expenses incurred in the maintenance of buildings, structures, fixtures and improvements at steam power generating stations, the book cost of which is includible in Account 311, Structures and Improvements. Detail breakdown of this account can be obtained from the equipment class field of the Activity Based Management System (ABMS).
664	5120000	Maintenance of Boiler Plant	This account shall include the cost of labor, materials used, and expenses incurred in the maintenance of boiler plant equipment at steam power generating stations, the book cost of which is includible in Account 312, Boiler Plant Equipment. Detail breakdown of this account can be obtained from the equipment class field of the Activity Based Management System (ABMS).
665	5120025	Maint of Blr Plt Environmental	This account shall include the portion of costs related to any environmental projects that would otherwise be charged to account 5120000.
666	5130000	Maintenance of Electric Plant	This account shall include the cost of labor, material used, and expenses incurred in the maintenance of steam turbines, generators and generator units, auxiliary apparatus, and accessory electric equipment, the book cost of which is includible in account 313, 314, and 315. Detail breakdown of this account can be obtained from the equipment class field of the Activity Based Management System (ABMS).
667	5140000	Maintenance of Misc Steam Plt	This account shall include the cost of labor, materials used, and expenses incurred in the maintenance of miscellaneous steam power generating station equipment, the book cost of which is includible in Account 316, Miscellaneous Power Plant Equipment. Detail breakdown of this account can be obtained from the equipment class field of the Activity Based Management System (ABMS).
668	5460000	Oper Supervision & Engineering	This account shall include the cost of labor and expenses incurred in the general supervision and direction of the operation of other power generating stations. Direct supervision of specific activities such as fuel handling, engine and generator operation, etc., shall be charged to the appropriate account.
669	5470001	Fuel - Gas Turbine	This account shall include the cost delivered at the station of all fuel used in gas turbines.
670	5470003	Gas Transp Res Fees - CT	To record pipeline transportation reservation fees on gas combustion turbine units
671	5470004	Fuel - Gas Turb - Purch / Hand	To track purchasing and handling costs related to fuel for gas turbines
672	5470005	Gas Transp Fees - CT	To record pipeline transportation fees on gas combustion turbine (CT) units.
			This account shall include the cost of labor, materials used, and expenses incurred in operating prime movers, generators, and electric equipment in other power generating stations, to the point where electricity leaves for conversion for transmission or distribution. Payroll Labor: Supervising other power generation operation. Operating prime movers, generators, and auxiliary apparatus, switching, and other electric equipment. Keeping plant log and records, and preparing reports on plant operations. Testing, checking, cleaning, oiling, and adjusting equipment. Materials and Expenses: Dynamo, motor, and generator brushes. Lubricants and control system oils. Water for cooling engines and generators.
673	5480000	Generation Expenses	This account was inactive between 12/1/1999 and 1/1/2001. It was reactivated to meet CSW mapping requirements.

Explanation: Provide a copy of the utility's detailed chart of accounts and subaccounts including plant in the same level of detail required in E-17. Include a detailed description of each account/subaccount.

Line No.	G/L Account	Account Description	Additional Description
674	5490000	Misc Other Pwer Generation Exp	This account shall include the cost of labor, materials used, and expenses incurred in the operation of other power generating stations which are not specifically provided for or are not readily assignable to other generation expense accounts. Payroll Labor: General clerical and stenographic work. Guarding and patrolling plant and yard. Building service. Care of grounds, including snow removal, cutting grass, etc. Miscellaneous labor. Material and Expenses: Building service supplies. First aid supplies and safety equipment. Communication service. Employees' service facilities expenses. Office supplies Transportation expense. Meals, traveling, and incidental expenses. Fuel for heating. Water for fire protection or general use. Miscellaneous supplies such as hand tools, etc. This account was inactive from 12/1/1999 through 9/1/2000.
675	5530001	Maint of Gen Plant - Gas Turb	This account shall include the cost of labor, materials used and expenses incurred in maintenance of plant applicable to gas turbines, the book cost of which is includible in account 343, Prime Movers, account 344. Generators, and account 345, Accessory Electric Equipment.
676	5540001	Maint of Oth Pwr Gen Plt-GT	This account shall include the cost of labor, materials used and expenses incurred in maintenance of gas turbine power generation plant, the book cost of which is includible in account 346, Miscellaneous Power Plant Equipment.
677	5550000	Purchased Power	This account shall include the cost, at the point of delivery, to the utility, of electricity purchased for resale, including charges for readiness to serve.
678	5550001	Purch Pwr-NonTrading-Nonassoc	This account shall include the cost at the point of delivery of non-trading power purchased for resale. this includes: (1) OVEC Purchases pursuant to Section 9.01 of the Intercompany Power Agreement dated July 10, 1953 (2) System Purchases to serve Internal Load.
679	5550003	Purchased Power - Cogeneration	This account shall include the amounts charged for energy received from non-associated companies, under interchange agreements, whereby the utility both delivers energy to and receives energy from another for the purpose of achieving efficient utilization of productive capacity. Records shall be maintained to show, by months, the charges under each interchange agreement.
680	5550023	Purch Power Capacity -NA	This account is used to track Purch Power Capacity -NA
681	5550024	Purchase Power ERCOT	This account is used to track Purchase Power ERCOT
682	5550026	Purchase Power - Fuel - ERCOT	This account will be used to record activity related to Purchase Power - Fuel - ERCOT
683	5550032	Gas-Conversion-Mone Plant	To record labor, capacity and M&S charges for Mone Plant
684	5550047	Purchase Power Wind Energy	REcord the purchase of Wind Energy
685	5550054	Purch Power ERCOT-Non-ded	This account is used to track Purchase Power ERCOT - Non-dedicated
686	5550066	SPP Rev. Neutrality Ded-Purch	To record SPP Dedicated Revenue Neutrality purchases in a separate 555xxxx account.
687	5550113	Cleco PP for Valley - Other	This account will used to capture the OTHER charges of the purchase power. Vemco was purchased by SWEPCO in Oct. 2010. VEMCO has a long term PP agreement with Cleco which needs to be separately reported for regulatory recovery in LA
688	5550128	SPP Net Purch that serve OSS	This account shall include only the value of SPP net purchases on an hourly or 5 min interval that serve off system sales for PSO and SWEPCO. This account is to be used to report in FERC Form1 (Annual) and Form3 (Quarterly) reports (effective beginning April 1, 2014) amounts applicable to net hourly or 5 min interval purcahse amounts which should be reported to the FERC as being in account 555 Purchase Power. Note: Financial Reporting should map this account to Operating Revenue for SEC reporting purposes. This activity should continue to be netted in revenue per accounting policy.
689	5550130	SPP Net Marginal Losses LSE	To accommodate Load Serving Entity (LSE) Net Marginal Losses in the SPP Integrated Market so amounts are presented in the correct EEI Reporting line.
690	5550131	SPP Congestion Costs LSE	To accomodate Load Serving Entity (LSE) Congestion Costs in the SPP Integrated Market so amounts are presented in the correct EEI Reporting line.
691	5550133	SPP TCR's & ARR's LSE	To accommodate Load Serving Entity (LSE) Transmission Congestion Rights (TCR) and Auctions Revenue Rights (ARR) in the SPP Integrated Market so amounts are presented in the correct EEI Reporting line.
692	5550136	SPP MakeWholePymt Charge Gross	To record Load Serving Entity (LSE) Gross Make Whole Payment Charges in the SPP Integrated Market
693	5550138	SPP MakeWholePymt Credit (Net)	To accommodate Load Serving Entity (LSE) Net Make Whole Payment in the new SPP Integrated Market so amounts are presented in the correct EEI Reporting line.
694	5550320	SPP Net Regulation LSE	To accommodate Load Serving Entity (LSE) Net Regulation in the new SPP Integrated Market so amounts are presented in the correct EEI Reporting line.

Explanation: Provide a copy of the utility's detailed chart of accounts and subaccounts including plant in the same level of detail required in E-17. Include a detailed description of each account/subaccount.

Line No.	G/L Account	Account Description	Additional Description
695	5550321	SPP Net Spinning Reserve LSE	To accommodate Load Serving Entity (LSE) Net Spinning Reserve in the new SPP Integrated Market so amounts are presented in the correct EEI Reporting line.
696	5550324	SPP Net Supp Reserve LSE	To accommodate Load Serving Entity (LSE) Net Supply Reserve in the new SPP Integrated Market so amounts are presented in the correct EEI Reporting line.
697	5550325	SPP Contingency Costs LSE	To accommodate Load Serving Entity (LSE) Contingency Costs in the new SPP Integrated Market so amounts are presented in the correct EEI Reporting line.
698	5560000	Sys Control & Load Dispatching	This account shall include the applicable portion of the salaries and expenses incurred by personnel of the System Operating Department in the performance of duties and responsibilities in connection with system control and load dispatching relating to the generating function. Utilities having an interconnected electric system (as exits in AEP System) or operating under a central authority which controls the production and dispatching of electricity may apportion these costs to this account and Account 5610000, Load Dispatching - Transmission and Account 5810000, Load Dispatching - Distribution. Also include in this account the applicable portion of salaries and expenses (includes Moving Expenses) of personnel of the System Operating Department such as: Chief System Load Coordinator (Chief System Load Dispatchers) System Load Coordinator (System Load Dispatcher) Chief Regional Dispatcher at generating station Regional Dispatchers (Station Operators) at generating stations Where, due to organizational structure, employees of the System Operating Department perform duties directly related to Human Resources Department functions, such portion of their salaries and expenses applicable should be charged to the Human Resources Department function accounts appropriate. Payroll Labor: 1. Allocating loads to plants and interconnections with others. 2. Arranging and controlling clearances for construction, maintenance, test and emergency purposes. 3. Assisting with educational program of job training for system operators, load dispatchers and plant operators. 4. Calculating steam requirements in relation to system loading of plants. 5. Calculating steam and hydraulic production cost rates including interchange. 6. Contact other utilities on energy transfer, purchase, sales and reactive interchange. 7. Controlling system voltages. 8. Directing switching. 9. Follow meteorological data system daily in connection with hydro plant operation. 10. Handle contracts pertaining to hydro operation with governmental authorities. 11. Hydro plant scheduling in maintaining reservoir level at various hydro plants. 12. Obtaining reports on weather and special events. 13. Preparing, checking, reviewing or supervising: A. Cost analysis and savings on purchase and interchange with other companies. B. Generating Equipment Service Record - Turbines and Boilers from daily logs. C. Interchange statements covering capacity and energy transactions with associated and foreign utilities. D. Load data reports, system load forecasts, etc. E. Operating practices and procedures for changes and revisions and reviewing with operating personnel. (steam and hydro) F. Plant summaries, operating performance, costs and data for billing and budget purposes. G. Production and operating cost reports and comparative statements for past periods. H. Summaries of energy classifications in pool and interchange accounts. I. Switching diagrams for expansion of plant before actual operation. J. Work on incremental plant studies.
699	5570000	Other Expenses	This account shall be charged with any production expenses, including expenses incurred directly in connection with the purchase of electricity, which are not specifically provided for in the other production expense accounts. Charges to this account shall be supported so that a description of each type of charge will be readily available. Payroll Labor: Charge hereto the cost of labor incurred in relation to cogeneration, independent power producers, and small power producers (excluding activities performed with customers having parallel generation). Chargeable activities include: Planning and coordinating activities related to purchasing or wheeling power from a proposed project. Billing purchased power or wheeling charges. Service arrangement for the installation or maintenance of such a project. Documenting project events, status, etc., estimates, contracts, and reports.
700	5570004	Deferred Fuel	This account is used to track Deferred Fuel
701	5570010	OH Auction Exp - Incremental	To record incremental Ohio Auction related expenses which are expected to be recovered from Ohio FAC ratepayers. This account should be mapped to Other Generation Op Exp (Other Operation) for SEC reporting.

Explanation: Provide a copy of the utility's detailed chart of accounts and subaccounts including plant in the same level of detail required in E-17. Include a detailed description of each account/subaccount.

Line No.	G/L Account	Account Description	Additional Description
702	5600000	Oper Supervision & Engineering	This account shall include the applicable portion of the cost of labor and expenses incurred in the general supervision, direction, planning, coordination, instruction and training in connection with the operation of the transmission system. It shall include the portion of services of personnel such as the System, Division and District Supervisors, Engineers, Superintendents, General Foremen, Consultants and Secretarial work for this group. Include herein the general supervision and direction of work as it relates to operation only, but not the actual performance of such work or the immediate and direct supervision chargeable to other accounts appropriate for the work performed. In the case of fixed classification employees, such percentage of their time applicable, as determined by periodic time studies, shall be classified to the intercompany overhead work orders established under Account 10710, Construction Work in Progress and sub account 108XXXX, Retirement Work in Progress under Account 108, Accumulated Provision for Depreciation of Electric Plant in Service. Exclude from this account general clerical and stenographic work includible in Account 5660000, Miscellaneous Transmission Expenses - All
703	5611000	Load Dispatch - Reliability	New Transmission Accounts required to comply with FERC Orders 668 and 668-A. Please note that the new Accounts 561.X are replacing current PeopleSoft Account 5610000. No later than after 2006 is closed, we will want to invalidate Account 5610000. If any charges do trickle into 5610000 in 2007, they should be reclassified to the new PeopleSoft account for FERC Account 561.2, and then Account 5610000 should be permanently inactivated.
704	5612000	Load Dispatch-Mntr&Op TransSys	New Transmission Accounts required to comply with FERC Orders 668 and 668-A. Please note that the new Accounts 561.X are replacing current PeopleSoft Account 5610000. No later than after 2006 is closed, we will want to invalidate Account 5610000. If any charges do trickle into 5610000 in 2007, they should be reclassified to the new PeopleSoft account for FERC Account 561.2, and then Account 5610000 should be permanently inactivated.
705	5613000	Load Dispatch-Trans Srvc&Sched	New Transmission Accounts required to comply with FERC Orders 668 and 668-A. Please note that the new Accounts 561.X are replacing current PeopleSoft Account 5610000. No later than after 2006 is closed, we will want to invalidate Account 5610000. If any charges do trickle into 5610000 in 2007, they should be reclassified to the new PeopleSoft account for FERC Account 561.2, and then Account 5610000 should be permanently inactivated.
706	5614002	SPP Admin-SSC&DS	SPP administrative service fees for scheduling, system control and dispatching services. This account shall include the costs billed to the transmission owner, load serving entity or generator for scheduling, system control and dispatching service. Include in this account service billings for system control to maintain the reliability of the transmission area in accordance with reliability standards, maintaining defined voltage profiles, and monitoring operations of the transmission facilities.
707	5614005	ERCOT Admin-SSC&DS	ERCOT administrative service fees for scheduling, system control and dispatching services. This account shall include the costs billed to the transmission owner, load serving entity or generator for scheduling, system control and dispatching service. Include in this account service billings for system control to maintain the reliability of the transmission area in accordance with reliability standards, maintaining defined voltage profiles, and monitoring operations of the transmission facilities. New FERC rules require recording administration fees for RTO's to new accounts.
708	5614006	SPP Transmission Charges	This account will record Non-Admin fee SPP transmission charges, such as point to point transmission costs and impact studies.
709	5614007	RTO Admin Default LSE.	To record RTO costs when a market participant defaults on its payment obligations with the RTO and is socialized across all participants. This administrative fee relates to the LSE (load serving entity)
710	5615000	Reliability,Plng&Stds Develop	New Transmission Accounts required to comply with FERC Orders 668 and 668-A. This account is initially to apply to RTOs only, since RTOs would likely be performing this work. The FERC in its final order concluded that to the extent a utility performs similar work, the utility also must use Account 561.5. Please note that the new Accounts 561.X are replacing current PeopleSoft Account 5610000. No later than after 2006 is closed, we will want to invalidate Account 5610000. If any charges do trickle into 5610000 in 2007, they should be reclassified to the new PeopleSoft account for FERC Account 561.2, and then Account 5610000 should be permanently inactivated.
711	5616000	Transmission Service Studies	New Transmission Accounts required to comply with FERC Orders 668 and 668-A. This new account is to record the cost of studies for transmission service request and generator service request, respectively. Studies that are reimbursable from a specific customer should be initially charged to account 186, Miscellaneous Deferred Debits, subject to billing in Account 143, Other Accounts Receivable, and studies associated with a capital project should be charged in accordance with property accounting procedures.

Explanation: Provide a copy of the utility's detailed chart of accounts and subaccounts including plant in the same level of detail required in E-17. Include a detailed description of each account/subaccount.

Line No.	G/L Account	Account Description	Additional Description
712	5618002	SPP Admin-RP&SDS	SPP administrative service fees for reliability planning and standards development services. This account shall include the costs billed to the transmission owner, load serving entity, or generator for system planning of the interconnected bulk electric transmission system. Include also the costs billed by the regional transmission service provider for system reliability and resource planning to develop long-term strategies to meet customer demand and energy requirements. This account shall also include fees and expenses for outside services incurred by the regional transmission service provider and billed to the load serving entity, transmission owner or generator.
713	5620001	Station Expenses - Nonassoc	transmission substations and switching stations, the book cost of which is includible in Account 353, Station Equipment. If transmission station equipment is located in or adjacent to a generating station, the cost of labor, material used and expenses incurred applicable to transmission operation shall be charged to this account. Payroll Labor: 1. Adjusting station equipment where such adjustment primarily affects performance, such as regulating the flow of a coolant, changing voltage of regulator or changing taps or connections on station transformers. Also inspecting, testing and calibrating station equipment for the purpose of checking its performance. Note: When the foregoing work requires extensive disassembling and reassembling of equipment,is done to prevent or correct trouble or failure, or is incidental to maintenance work, it should be charged to the appropriate maintenance account. 2. Clearing snow or ice from transmission station walks, roads or parking areas. 3. Cleaning grounds and station buildings, including janitor service. 4. General inspection of transmission stations. 5. Guarding and patrolling station equipment and yard. 6. Inspecting and servicing storage batteries. 7. Inspecting, cleaning and keeping record of tools used around station. 8. Inspecting all fire extinguishers and refilling those under 15 lbs. (dry) and under 2-1/2 gallons (liquid). Note:Refilling fire extinguishers larger than 1 quart size and the cost of chemical used shall be charged to the maintenance account appropriate for their use. 9. Mowing grass, weeding, attending flowers and shrubbery, etc. 10. Oiling and greasing equipment when done as part of routine operation. 11. Operating switching and other station equipment. 12. Preparing station log, records and special reports associated with the operation of transmission station equipment. 13. Reading station meters (other than customer metering). 14. Removing foreign objects from transmission station equipment, such as kites, tree branches, etc., when done incidental to regular operating duties. 15. Replacing burned out lamps. 16. Reporting load conditions or requirements as requested. 17. Resetting and winding time clocks for station lights. 18. Routine check of load or voltage. 19. Routine checking, inspecting and testing at transmission stations for radio and television interference. 20. Sampling and testing lubricants or hydraulic control oils. (Sampling and testing insulating oils should be charged to maintenance.) 21. Switching to clear lines for repair or inspection. (Time of diversified employees shall be charged to Account 5710006, Maintenance of Overhead Conductors and Devices.) 22. Testing public telephone at transmission station. 23. Watch engineer at transmission station. 24. Calibrate relays, potential devices. 25. Check automatic reclosing of oil and air circuit breakers with respect to performance of relays. 26. Check automatic operation of motor operated

Explanation: Provide a copy of the utility's detailed chart of accounts and subaccounts including plant in the same level of detail required in E-17. Include a detailed description of each account/subaccount.

Line No.	G/L Account	Account Description	Additional Description
714	5630000	Overhead Line Expenses	This account shall include the cost of labor, materials used, and expenses incurred in the operation of overhead transmission lines. This account shall also include the cost of labor and expenses incurred in the general inspecting, testing and patrolling of transmission overhead lines when done on a routine basis for the purpose of checking the condition, efficiency and performance of property and equipment, where no trouble is known to exist or is anticipated and only relatively minor repairs and adjustments, if any, are found to be necessary. Patrolling to locate and clear known trouble should be charged to the maintenance account appropriate for the equipment. Payroll Labor: 1. Checking sleet conditions on transmission lines. 2. General inspecting and patrolling to observe the condition and performance of towers, poles, conductors and devices on overhead transmission lines. 3. Removing foreign objects such as kites, branches and birds from overhead transmission lines, incidental to routine patrolling. 4. Repairing fences or other property damaged by patrolmen on routine patrol. 5. Routine scheduled patrols. 6. Answering fire calls. 7. Electrolysis surveys. 8. Inspecting and adjusting line testing equipment, such as voltmeter, ammeters, watt meters, etc. 9. Inspecting and repairing line tools if not chargeable to maintenance. 10. Inspecting and testing lighting arresters, circuit breakers, switches and grounds. 11. Inspecting and testing transmission line insulators in storage. 12. Load test of circuits. 13. Routine checking, inspecting and testing of overhead transmission lines for radio telephone and television interference. 14. Routine voltage surveys made to determine the condition or efficiency of transmission system including installing and removing test equipment. 15. Time on duty to protect lines due to dynamiting or other nearby construction except when company construction. 16. Transferring loads, switching and reconnecting circuits and equipment for operating purposes. (Switching for construction or maintenance purposes is not includible in this account.) Outside Services: 1. Aerial patrolling. (Regular scheduled flights) Materials: 1. Operating supplies such as instrument charts, rubber goods, etc. 2. Small, portable tools, testing equipment, safety equipment, first aid kits and medical supplies.
715	5640000	Underground Line Expenses	This account shall include the cost of labor, materials used, and expenses incurred in the general inspecting and testing of transmission underground lines when done on a routine basis for the purpose of checking the condition, efficiency and performance of property and equipment, where no trouble is known to exist or is anticipated and only relatively minor repairs and adjustments, if any, are found to be necessary. Payroll Labor: 1. Electrolysis surveys. 2. Inspecting and adjusting line testing equipment such as voltmeters, ammeters, watt meters, etc. 3. Inspecting and testing lighting arresters, circuit breakers, switches and grounds. 4. Load tests of circuits. 5. Regulation and addition of oil or gas in high-voltage cable systems. 6. Routine inspection and cleaning of manholes, conduit, network and transformer vaults. 7. Routine voltage surveys made to determine the condition or efficiency of underground transmission system. Material: 1. Operating supplies such as instrument charts, rubber goods, etc. 2. Small, portable tools, testing equipment, safety equipment, first aid kits and medical
716	5650001	Transmssn Elec by Others-Assoc	This account shall include amounts payable to associated companies for the transmission of the utility's electricity over transmission facilities owned by others. All Other: 1. Payments for the use of transmission facilities.
717	5650002	Transmssn Elec by Others-NAC	This account shall include amounts payable to nonassociated companies for the transmission of the utility's electricity over transmission facilities owned by others. All Other: 1. Payments for the use of transmission
718	5650009	SPP Affiliated Transmission Ex	Expense will relate to affiliated transmission SPP expense billed by AEP transmission group for the generating companies. Activity will need to be mapped to the same financial lines as 5650001 - Transmission Elec Other - Assoc.
719	5650013	SPP Affil. Base Funding Exp	Expense will relate to affiliated SPP base funding transmission expense billed by the AEP transmission group for the generating companies. Activity will need to be mapped to same financial lines as 5650009. Represents net Affiliated SPP Base Funding expense that generation is recording. Accounting records a business unit as either a net expense or revenue (not grossed up). (Mapped to O&M expense)
720	5650014	SPP Non-Affil Base Funding Exp	Expense will relate to non-affiliated SPP base funding transmission expense billed to the generating companies. Activity will need to be mapped to same financial lines as 5650002. Represents Non-Affiliated SPP Base Funding expense. (Mapped to O&M expense)
721	5650016	PJM NITS Expense - Affiliated	To track all affiliated expenses related to PJM Network Integration Transmission Services
722	5650020	PROVISION RTO Affl Expense	To record the RTO provision associated with under/over collections of RTO revenues in current or prior years for RTO expenses.
723	5650046	SPP Transmission Expense	Transmission expense and other charges (impact studies as an example) attributed to SPP

Explanation: Provide a copy of the utility's detailed chart of accounts and subaccounts including plant in the same level of detail required in E-17. Include a detailed description of each account/subaccount.

Line No.	G/L Account	Account Description	Additional Description
724	5650047	SPP Pt to Pt Trans Affil Exp	To differentiate firm & nonfirm point to point transmission expense with SPP as an affiliate transaction. SPP = Southwest Power Pool
725	5650048	Affil. SPPAncillary Sch. 1 Exp	Record affiliate ancillary transmission expense from the SPP line Schedule 1. SPP = Southwest Power Pool
726	5650052	SPP Transmission - Contra	To defer the amount of 2017 SPP charges in excess of 2015 SPP charges beginning January 2017, not to exceed $4.5 Million. Amortization to begin in August 2018. Per LPSC STS Docket No. U-34200.
727	5660000	Misc Transmission Expenses	This account shall include the cost of labor, materials used and expenses incurred in transmission office operations and transmission expenses not elsewhere provided for. Payroll Labor: Building service including care of grounds, snow removal, cutting grass, etc. Miscellaneous transmission labor. Time of right-of-way agent when not chargeable to a specific work order. Material: Cleaning supplies for building and yard service. Salt for water softening purposes. Small portable tools, testing equipment, safety equipment, first aid supplies. Office supplies Metal signs on right-of-way. All Other: Communication services for transmission stations and engineering offices. Leased telephone circuits Postage Leased equipment Taxes Water Research and development expenses. Note: Include herein labor and expense in connection with strike preparation applicable to the Transmission function. This account includes the cost of individual business and professional memberships; see Account 4265004 for social memberships and related expenses and see Account 9302000 for corporate memberships such as for
728	5660004	SPP FERC Assessment Fees	FERC assesment fees relating to AEP entrance into SPP RTO. Account should be reported in the 566XXXX series.
729	5660008	R.King Trans Cnter Exp - Affil	Billing of specified costs at A. Ray King Transmission Training Ctr in Pataskala to West Transmission Companies (from Ohio Power Transmission) per the AEP System Transmission Center Agreement.
730	5670001	Rents - Nonassociated	This account shall include rents of nonassociated companies property of others used, occupied or operated in connection with the transmission system. All Other: 1. Rental of buildings used for transmission system purposes. 2. Rental paid for transmission line rights-of-way. 3. Rental paid to railroads for transmission line crossing permits. Note: A. Rents paid for property devoted to operations for which clearing accounts are used shall be charged to the appropriate clearing accounts. B. Rents, which are irregular or infrequent, paid for the use of equipment on specific construction, retirement or maintenance projects, shall be charged to the accounts appropriate for the work performed. C. Exclude from this account and include in Account 5650001 or Account 5650002, Transmission of Electricity By Others, amounts payable to associated and non-associated utilities for the transmission of energy over transmission facilities owned by these other associated and non-
731	5670002	Rents - Associated	This account shall include rents of associated companies property of others used, occupied or operated in connection with the transmission system. All Other: 1. Rental of buildings used for transmission system purposes. 2. Rental paid for transmission line rights-of-way. 3. Rental paid to railroads for transmission line crossing permits. 4. Rental paid to associated companies for interchangeable spare parts and equipment. Note: A. Rents paid for property devoted to operations for which clearing accounts are used shall be charged to the appropriate clearing accounts. B. Rents, which are irregular or infrequent, paid for the use of equipment on specific construction, retirement or maintenance projects, shall be charged to the accounts appropriate for the work performed. C. Exclude from this account and include in Account 5650000, Transmission of Electricity By Others, amounts payable to associated and non-associated utilities for the transmission of energy over transmission facilities owned by these other associated and non-associated utilities.
732	5680000	Maint Supv & Engineering	This account shall include the applicable portion of the cost of labor and expenses incurred in the general supervision, direction, planning, coordination, instruction and training in connection with the maintenance of the transmission system. It shall include the portion of services of personnel such as the Region and District Supervisors, Engineers, Superintendents, General Foremen, Consultants and Secretarial work for this group. Include herein the general supervision and direction of work as it relates to maintenance only, but not the actual performance of such work or the immediate and direct supervision chargeable to other accounts appropriate for the work performed. Exclude from this account general clerical and stenographic work includible in Account 5660000, Miscellaneous Transmission Expenses - All Other. Note: For billings involving relocation of transmission facilities, the portion of the overheads added to the billings which relate to Operating Expenses is to be credited 2/3 to this account and 1/3 to Account 920003, Administrative and General Salaries Transferred. The remaining portion of the total overheads included in the billings is to be credited to Account 1080000, Retire of Electric Plant in Service.

Explanation: Provide a copy of the utility's detailed chart of accounts and subaccounts including plant in the same level of detail required in E-17. Include a detailed description of each account/subaccount.

Line No.	G/L Account	Account Description	Additional Description
733	5690000	Maintenance of Structures	This account shall include the cost of labor, material used and expenses incurred in the maintenance of transmission structures, the book cost of which is includible in Account 352, Structures and Improvements Payroll Labor: Maintenance labor on the following equipment: Air conditioning and ventilating system. Building lighting, plumbing and heating system. Company-owned railroad siding (other than transformer track). "Danger" and warning signs. Fence enclosing land and building. Operator's cottage and grounds. Retaining walls for station land. Station buildings, control, oil storage, etc. Walks, drives and parking areas. Well pumps, piping and related equipment. Yard lighting system. Also include other maintenance labor such as: Ditching station property to maintain drainage and sewage systems. Inspecting station structure and improvements for maintenance purposes. Making and installing property corner monuments or markers at transmission stations. Repairing tools used for maintenance work. Replacing gravel on station yard or driveway and regrading. Replacing shrubbery, turf, fertilizing grass and chemical killing of weeds. Material: Lumber, gravel, plumbing supplies, etc. Small portable tools, safety equipment, first aid kits and medical supplies.
734	5691000	Maint of Computer Hardware	New Transmission accounts required to comply with FERC Orders 668 and 668-A. This account is to record Maintenance of computer hardware on a transmission General Ledger Business Unit (GLBU).
735	5692000	Maint of Computer Software	New Transmission accounts required to comply with FERC Orders 668 and 668-A. This account is to record Maintenance for computer software on a transmission General Ledger Business Unit (GLBU).
736	5693000	Maint of Communication Equip	New Transmission accounts required to comply with FERC Orders 668 and 668-A. This account is to record Maintenance of communication equipment on a transmission General Ledger Business Unit (GLBU).
737	5700000	Maint of Station Equipment	This account shall include the cost of labor, material used and expenses incurred in maintenance of equipment in transmission stations other than that provided for in the other subdivisions of Account 570, Maintenance of Station Equipment. Payroll Labor: (Maintenance labor on the following equipment) Batteries - Storage (Station control) Battery charging equipment D-C distribution panels Storage batteries Capacitor Banks Carrier Current Relaying and Telemetering Carrier current relay sets Carrier current transfer trip sets Co-axial cable Coupling capacitors Line traps and tuners Note: Maintenance of carrier current telephone equipment should be charged to Account 9350020.. Communication - Public Address System Dead-end assemblies on incoming and outgoing lines (including cleaning of insulators) Fences (isolating particular pieces of equipment) Fire Protection Equipment, including housing Piping valves Foundations for equipment Instrument transformers Lightning arresters Meters and instruments (exclude billing meters) Oil (Insulating) Handling System Motors and drives Piping (oil, also oil and water drainage) Pumps Storage tanks Testing equipment Treating equipment Power, control wiring and grounding Cable, power and control Cable trench Conduit and fittings Duct runs Ground rods, cable and connectors Junction boxes Manholes Potheads Structures Structural steel Wood pole Fire walls Stairs and platforms Switchboards Meters and instruments Panels Relays Cabinets or cubicles Synchronous condensers and cooling towers (including associated pumps and auxiliary equipment) Transformer truck and R.R. track system Voltage regulators Also include other maintenance labor such as: Repainting station steel or pole structure and equipment (other than transformers, circuit breakers, buses and disconnects) Repairing or replacing "Danger" signs Repairing or replacing relays Repairing station tools, testing hot sticks, etc. Repairing station trailers Replacing cable or duct of less than a continuous circuit. Material: Bolts Fence material Minor replacement parts for equipment listed in this account Paint and brushes Refills for fire extinguishers 15 lbs. and over (dry) and 2-1/2 gallon and over (liquid) Tape Small portable tools, testing equipment, safety equipment, first aid kits and medical supplies Splicing material Gas for synchronous condensers All Other: Rental paid for emergency use of transmission power transformers. Rental paid for use of portable stations. State and city licenses for trailers used regularly for transporting transmission station equipment.
738	5710000	Maintenance of Overhead Lines	This account shall include the cost of labor, material used and expenses incurred in maintenance work on transmission overhead lines, the book cost of which is included in Accounts 354, Towers and Fixtures, 355, Poles and Fixtures, and 356, Overhead Conductors and Devices not elsewhere provided for in the other subdivisions of Account 5710000, Maintenance of Overhead Lines. Also include herein the cost of labor, material use and expenses incurred in the maintenance of roads and trails, the book cost of which is includible in Account 359, Roads and Trails and the maintenance work on publicly owned roads and trails when done by the utility at its own expense. Payroll Labor: Clearing brush from trails. Clearing drainage ditches. 3. Regrading roads. Removing snow from roads and trails. Repairing surface of roads. Repairing bridges and culverts. Repairing steps (stiles) over fences on trails. Repairing access and country roads to reach point of trouble. Material: Cement Gravel Lumber Small, portable tools, testing equipment, safety equipment, first aid kits and medical supplies.

Explanation: Provide a copy of the utility's detailed chart of accounts and subaccounts including plant in the same level of detail required in E-17. Include a detailed description of each account/subaccount.

Line No.	G/L Account	Account Description	Additional Description
739	5720000	Maint of Underground Lines	underground lines, including costs of the entire entrance to a substation (excluding any above ground support structure) and the first pot head of termination on a tower or pole outside the station, the cost of which is includible in Account 357, Underground Conduit and Account 358, Underground Conductors and Devices. Payroll Labor: 1. Cleaning ducts, manholes and sewer connections. 2. Excavating, back filling, hauling dirt, brick, gravel, etc. and repairing pavement due to maintenance of underground lines. 3. Inspecting and testing for faults and performance after maintenance. 4. Investigating extent of damage to determine what maintenance is necessary as a result of flood, storm or excavation by others, etc. 5. Minor alterations of handholds, manholes or vaults. 6. Moving of changing position of conduit. 7. Protection at openings for maintenance work on underground lines. 8. Refastening, repairing or moving racks and ladders in vaults. 9. Refireproofing cables and repairing supports. 10. Repainting conduit, ducts, etc. 11. Repairing and cleaning tools used on underground transmission line maintenance. 12. Repairing cable bonding system. 13. Repairing electrolysis preventive devices for cables. 14. Repair grounds. 15. Repairing line testing equipment. 16. Replacing pavement, curbs and walks after maintenance work. 17. Repairing property of others damaged (planned or unavoidable) while performing maintenance work. 18. Repairing of moving junction boxes and pot heads. 19. Replacing pot head compound. 20. Retaping, repairing, replacing (less than a retirement unit), reconnecting splicing, repainting and changing location of any of the following: A. Conductor (buried) section of less than 600 feet. B. Conductors (in conduit) less than circuit between two manholes or between manhole and pole. C. Conductor (submarine) less than submerged length of cable between terminal chambers or manholes. 21. Sampling, testing, changing, purifying and replenishing insulating oil. 22. Special testing and checking of underground lines to locate trouble known to exist. 23. Transferring loads, switching and reconnecting circuits and equipment for maintenance purposes. Material: 1. Representative list of principal items: Conduit and ducts (concrete, brick, title, iron, plastic or fiber pipe, etc.) (A section of conduit between two manholes or between a manhole and a pole is a retirement unit.) Manholes and vaults (a complete manhole, splicing chamber or cable vault is a retirement unit.) Cable racks Covers Foundation Frame Grating Hangers and other manhole accessories Hatchways Ladders Lighting system Sewer connections, drains, traps, valves, etc. Sump pumps Ventilating equipment* * A complete installation at one location is a retirement unit. Risers Conductors and Devices Bus bars Conductor (all types-buried, submarine or in underground conduit)* Cable splices and terminations Circuit breakers** Connectors
740	5730000	Maint of Misc Trnsmssion Plt	This account shall include the cost of labor, materials used and expenses incurred in the maintenance of owned or leased plant which is assignable to transmission operations and is not provided for elsewhere. Payroll Labor: 1. Cleaning, inspecting, repairing and repainting transmission line department tools and work equipment, such as: Air compressorsDerricksSurveying equipment Hoists Power sawsWelding apparatus Pumps Vises Safety platforms 2. Repairing office furniture and equipment used by the Transmission Department is stations or offices. Material: Small, portable tools, testing equipment, safety equipment, first aid kits and medical supplies.
741	5757002	SPP Admin-MAM&SC	SPP administrative service fees for market administration, monitoring and compliance services. This account shall include the costs billed to the transmission owner, load serving entity or generator for market administration, monitoring and compliance services.
742	5800000	Oper Supervision & Engineering	This account shall include the applicable portion of the cost of labor and expenses incurred in the general supervision, direction, planning, coordination, instruction and training in connection with the operation of the distribution system. It shall include the portion of services of personnel such as the Region and District Supervisors, Engineers, Superintendents, General Foremen, Consultants and Secretarial work for this group. Include herein the general supervision and direction of work as it relates to operation only, but not the actual performance of such work or the immediate and direct supervision chargeable to other accounts appropriate for the work performed. In the case of fixed classification employees, such percentage of their time applicable, as determined by periodic time studies, shall be classified to the intra-company overhead work orders established under Account 1070000, Construction Work in Progress and sub account 1080000, Retirement of Electric Plant in Service under Account 108000, Accumulated Provision for Depreciation of Electric Plant in Service. Exclude from this account and include in Account 5860001, Meter Expenses - Supervision, the general supervision of the Meter Department activities pertaining to operation. Also exclude general clerical and stenographic work includible in Account 5860002, Meter Expenses - Office Salaries and Expenses and 5880000, Miscellaneous Distribution Expenses - All Other as appropriate. Note: For billings involving work on the property of others, credit this account with 2/3 of the overheads added to the billings. (The remaining 1/3 of the overheads is to be credited to Account 9200003, Administrative and General Salaries Transferred.)

Explanation: Provide a copy of the utility's detailed chart of accounts and subaccounts including plant in the same level of detail required in E-17. Include a detailed description of each account/subaccount.

Line No.	G/L Account	Account Description	Additional Description
743	5810000	Load Dispatching	This account shall include the cost of labor, materials used and expenses incurred in load dispatching operations pertaining to the distribution of electricity. Include herein the applicable portion of duties and responsibilities performed by supervisory personnel of the System Operating Department related to the Distribution function. If load dispatchers and their assistants are stationed at a distribution station and a part of their time is devoted to the operation of that station, their time shall be apportioned between this account and the appropriate distribution station account on and equitable basis. Payroll Labor: 1. Arranging and controlling clearances for construction, maintenance, test and emergency purposes. 2. Assisting in all new practices and procedures for improvement of dispatching operations related to the distribution function. 3. Assisting with educational program of job training for system operators and load dispatchers. 4. Checking primary bus voltage at various points on the system. 5. Checking line loading and reactive flows. 6. Checking existing operating practices and procedures for any changes or revisions. 7. Checking switching diagrams on existing and new jobs for operating features. 8. Checking switching diagrams for expansion of facilities, distribution stations and lines before actual operation. 9. Continuous checks on daily, weekly and monthly basis of district and system peaks. 10. Controlling system voltages. 11. Directing switching. 12. Explaining and checking operating manual procedures with operating personnel over the system. 13. General operation of distribution lines and distribution stations over the system. Working closely with supervisor, operators and dispatchers. 14. Obtaining reports on weather and special events. 15. Preparing, Checking, Reviewing or Supervising: A. Load data reports, load forecasts, etc. B. Operating diagrams and procedures, switching diagrams, etc. C. Work on incremental plant studies. 16. Reviewing operating orders and procedures for operating manual. 17. Supervising on-job training of office and field trainees. 18. Supervising operation and switching on major outage. Outside Services: 1. Charge by associated companies. 2. Cost of Weather and Special Events Reports (portion) Material: Forms and supplies used in the preparation of distribution dispatching records and reports. All Other: Communication - Leased telephone circuits for use by system operating department the function of which are: A. Supervisory control - Observation of conditions at remote generating plant or substation and control of functions at that point. B. Alarms - One way signal for indication of abnormal
744	5820000	Station Expenses	stations, the book cost of which is included in Account 362, Station Equipment. Payroll Labor: 1. Adjusting station equipment where such adjustment primarily affects performance, such as regulating the flow of a coolant, changing voltage of regulator or changing taps or connections on station transformers. Also inspecting, testing and calibrating station equipment for the purpose of checking its performance. Note: When the foregoing work requires extensive disassembling and reassembling of equipment, or is done to prevent or correct trouble or failure, or is incidental to maintenance work, it should not be charged to this account but to the appropriate maintenance account. 2. Clearing snow or ice from distribution station walks, roads or parking areas. 3. Cleaning grounds and station buildings, including janitor service. 4. General inspection of distribution stations. 5. Guarding and patrolling station equipment and yard. 6. Inspecting and servicing storage batteries. 7. Inspecting, cleaning and keeping record to tools used around station. 8. Inspecting all fire extinguishers for distribution stations and refilling those of 1 quart size or smaller. Note: Refilling fire extinguishers of larger than 1 quart size and the cost of chemical shall be charged to the appropriate maintenance account. 9. Mowing grass, weeding, attending flowers and shrubbery. 10. Oiling and greasing equipment when done as a part of routine operation. 11. Operating switching and other station equipment. 12. Preparing station log, record and special reports associated with the operation of distribution station equipment. 13. Reading station meters (other than customer metering). 14. Removing foreign objects from distribution station equipment such as kites, tree branches, etc., when done incidental to regular operating duties. 15. Replacing burned out lamps. 16. Reporting load conditions or requirements as requested. 17. Resetting and winding time clocks for station lights. 18. Routine checking of load or voltage. 19. Routine checking, inspecting and testing at distribution station for radio and television interference. 20. Sampling and testing lubricants or hydraulic control oils. Sampling and testing insulating oils should be charged to maintenance. 21. Switching to clear lines for repair or inspection. (Time of diversified employees shall be charged to Account 5930004, Maintenance of Overhead Conductors and Devices.) 22. Testing public telephone at distribution station. 23. Watch engineer at distribution station. 24. Calibrate relays, potential devices. 25. Check automatic reclosing of oil and air circuit breakers with respect to performance of relays. 26. Check automatic operation of motor-operated switches with respect to performance of relays. 27. Check tripping of oil and air circuit breakers. 28. Clean and adjust relays, relay parts and devices. 29. Inspect station control wiring system for

Line No.	G/L Account	Account Description	Additional Description
745	5830000	Overhead Line Expenses	distribution lines not provided for in the other subdivisions of Account 5830000, Overhead Line Expenses. The following should also be included herein: The general inspecting, testing and patrolling of distribution overhead primaries, secondaries and services when done on a routine basis for the purpose of checking the condition, efficiency and performance of property and equipment, where no trouble is know to exist or is anticipated and only relatively minor repairs and adjustments, if any, are found to be necessary. Patrolling to locate and clear know trouble should be charged to the maintenance account appropriate for the equipment. Testing and inspecting line oil switches, line reclosers, sectionalizers, and line capacitor banks (switched and fixed) on a routine basis for the purpose of checking the condition and performance where no trouble is know to exist and only relatively minor repairs and adjustments, if any, are found to be necessary. Testing and inspecting this equipment in connection with a planned maintenance program or testing and inspecting to locate and clear trouble when know to exist or to determine the extent of damage and what repairs are necessary, should be charged to the maintenance account appropriate for the equipment, Account 5930005, Maintenance of Line Reclosers and Sectionalizers. Metering loads and voltages, or computing loads, power factors, voltages and fault currents from correlated data, on distribution overhead primaries, secondaries and service when done for the purpose of checking the condition, efficiency and performance of portions of the distribution system and equipment where no line equipment trouble is known to exist, or is anticipated, and only relatively minor repairs and adjustments, if any, are found to be necessary. Payroll Labor: Checking sleet conditions on distribution lines. General inspecting and patrolling to observe the condition and performance of poles, conductors and devices on overhead distribution lines. Removing foreign objects such as kites, branches and birds from overhead distribution lines and services incidental to routine patrolling. Repairing fences or other property damaged by patrolmen on routine patrol. Routine scheduled patrols. Checking circuit continuity and making insulation tests. Checking operation sequences, time delays, time-current characteristics. Inspecting tank working parts, contacts, and control for signs of deterioration, flashover, sludge, etc. Reading counters. Removing and reinstalling oil switches, line reclosers and sectionalizers or otherwise by-passing or isolating this equipment for inspection. Sampling oil for dielectric test. Tabulating records and compiling reports relating to the foregoing work when done by employees performing the testing and inspecting. Inspecting all fixed and switched capacitor banks. Note: The following pertain to labor for work as covered by item 3 in the preceding test of this account. Changing tapes or charts on testing equipment and reading and recording data shown by such
746	5840000	Underground Line Expenses	This account shall include the cost of labor, materials used and expenses incurred in the operation of underground distribution lines. Also include the immediate and direct supervision of such work. Payroll Labor: 1. Checking operating performance and condition of underground installations after excavation by others involving gas, water or heating mains. 2. Checking load on transformers, cables and customers' service. 3. Clearing snow or water from transformer vaults and manholes. 4. Inspecting and adjusting line testing equipment. 5. Making electrolysis surveys. 6. Making load tests and voltage surveys on underground distribution system for general operating conditions. 7. Measuring ground resistance on underground distribution system. 8. Routine checking and testing of switches, potheads, cables and accessories. 9. Routine inspecting and testing of company underground distribution lines to prevent radio and television interference (not customer complaint). 10. Routine inspection of subway ducts, manholes, sewer connections, wire connections and cable splices. 11. Locating Company's underground distribution facilities at request of contractor or customer. Material: 1. Instruments charts. 2. Small, portable tools, testing equipment, safety equipment, first aid kits and medical

Line No.	G/L Account	Account Description	Additional Description
747	5850000	Street Lighting & Signal Sys E	This account shall include the cost of labor, materials used and expenses incurred in the operation of the overhead and underground street lighting and signal systems, including traffic, fire and police signal systems when owned or operated by the company. Include herein renewing lamps and washing globes and reflectors on the street lighting system. Also include herein maintenance of street lighting and signal systems owned by the customer, when work is done regularly as a part of the service contract. Note: Both operation and maintenance expense in connection with street lighting and signal systems owned by the customer, when service contract does not provide for such work, shall be charged to Account 5870000, Customer Installation Expenses - All Other. Payroll Labor: 1. Inspecting and attending time clocks. 2. Inspecting circuits, ducts, manholes, etc., after building wrecking, moving or steam shovel operations. 3. Inspecting and testing street lighting panel at generating station. 4. Making voltage tests. 5. Opening or closing street lighting cutouts. 6. Removing foreign objects from street lighting circuits such as kites, branches, etc. when not in connection with maintenance. 7. Routine patrolling, inspecting and testing of street lighting circuits, transformers and accessories. 8. Routine testing and adjusting of photoelectric controls used for street lighting. 9. Testing and inspecting grounds on circuit and transformers. 10. Trimming branches from trees to provide better lighting on walks when done incidental to routine patrolling and inspecting of lighting circuits. 11. Renewing burned out or defective lamps. 12. Washing street lighting globes and reflectors. Materials: 1. Incandescent, mercury vapor and fluorescent lamps and cleaning supplies. 2. Small,, portable tools, testing equipment, safety equipment, first aid kits and medical supplies 3. Cards and report forms. 4. Film cutouts. 5. Lamp socket pullers.
748	5860000	Meter Expenses	This account shall include only the cost of labor, materials used and expenses incurred in operations related to customer meters and associated equipment not elsewhere provided for in the other subdivisions of Account 5860000, Meter Expenses. Payroll Labor: Initial field investigation for defective demand meters. (Time spent on corrective measures is to be classified to the account appropriate for the work performed). Material: Meter seals and sealing presses. Small, portable tools, testing equipment, safety equipment, first aid kits and medical supplies.
749	5870000	Customer Installations Exp	This account shall include the cost of labor, materials used and expenses incurred in work on customers' premises other than that provided for in subdivisions of Account 5860000, Meter Expenses and in other subdivisions of this Account 5870000, Customer Installation Expenses. Include herein operation and maintenance of street lighting and signal systems owned by the customer, when service contract does not provide for such work. Note: Operation and maintenance of street lighting and signal systems owned by the customer, when work is done regularly as a part of the service contract, shall be charged to Account 5850000, Street Lighting and Signal System Expenses. Payroll Labor: Changing customers' equipment due to change from direct to alternating current. Changing customers' wiring or equipment due to voltage change. Changing voltage of customers' equipment. Inductive, coordination testing of customers' equipment for noise in telephone lines. Inspecting customer-owned line. Inspecting customers' installations (inside work) on dealers' sales. Inspecting customers' installations for code compliance. Installing and removing equipment leased or loaned to customer when chargeable to Account 372, Leased Property on Customers' Premises. Installing sanding machine service and box. Investigating fire on customers' premises with or at request of the fire department. Investigating, setting, removing and reading check meters on unauthorized use of electric energy. Also disconnecting service if occasioned by current diversion. Investigating and reporting to Customers Services Department on customer-owned station, line or other equipment. Investigating use of energy on inactive meter. Layout of work to be done on customers' premises. Locating and clearing grounds on customers' wiring. Marking customer-owned equipment as to ownership, etc. Measuring ground resistance on customers' premises. Opening and closing customers' transformer cutouts in order that customer can make repairs to his equipment. Repairing customers' line switch. Repairing street lighting standard, or fixtures, maintained but not owned, by company where no billing is involved. Repairing service between curb line and customers' line switch (customers' portion). Reporting unauthorized use of current. Testing voltage on customer-owned line or equipment. Work performed on load side of meter for which no charge is made but which tends to improve our service. Replacing burned out or defective lamps and low voltage fuses. Routine inspecting and testing of lighting units. Washing globes. Disconnecting dusk-to-dawn lighting when the premises are vacated. "No Power" service calls. Outside Services: Include charges by associated companies. Material: Materials and equipment such as motors, switches, wire, etc., (when cost is borne by company) installed in connection with changes in voltage or from DC to AC. Small, portable tools, testing equipment, safety equipment, first aid kits and medical supplies. Cleaning supplies. Lamp and fuse renewals - "No Power" service calls. All Other: Reward, or bonus, paid employee for

Explanation: Provide a copy of the utility's detailed chart of accounts and subaccounts including plant in the same level of detail required in E-17. Include a detailed description of each account/subaccount.

Line No.	G/L Account	Account Description	Additional Description
			This account shall include the cost of labor, materials used and expenses incurred in distribution office operations not elsewhere provided for. Payroll Labor: Answering phone in service dispatcher's office, receiving trouble calls and preparing investigation orders. Standby and answering telephone for trouble calls during storm. Time of radio dispatcher receiving customer complaints. Time of janitor cleaning distribution offices. Time of driver of auto delivering and picking up mail, reports, materials and supplies relating to the distribution operation. Time of right-of-way agent not assignable to a specific work order and when investigating and settling disputes pertaining to existing lines. Material: Cleaning supplies Salt for water softening purposes. Small, portable tools, testing equipment, safety equipment, first aid kits and medical supplies. Office supplies. Metal signs on right-of-way. All Other: Communication service for distribution stations and engineering offices. Leased telephone circuits and lines Postage applicable to distribution operations Rentals paid under lease agreement for mobile radios and communication equipment used by distribution personnel. Personal property taxes. Water service rental Research and development expenses. Note: Include herein labor and expense in connection with strike preparation applicable to the distribution function.
750	5880000	Miscellaneous Distribution Exp	This account includes the cost of individual business and professional memberships; see Account 4265004 for social memberships and related expenses and see Account 9302000 for corporate memberships such as for industry dues, e.g., EEI.
751	5890001	Rents - Nonassociated	This account shall include rents of nonassociated companies property of others used, occupied, or operated in connection with the distribution system. 1. Rental paid for pole attachments. 2. Rental of buildings for distribution system operations. 3. Rentals for highway or railroad crossings for distribution lines. 4. Charges by telephone or other utility companies for increased height in poles or other facility changes requested by the electric operating company as necessary for joint company use. (See Note C) 5. Rental of underground ducts for underground conductors. Note A: Rents paid for property devoted to operations for which clearing accounts are used shall be charged to the appropriate clearing accounts. Note B: Rents, which are irregular or infrequent, paid for the use of equipment on specific construction, retirement, or maintenance projects, shall be charged to the accounts appropriate for the work performed. Note C: When facility changes are caused by highway relocation, changes shall be initially recorded in the appropriate Other Work in Progress work order for subsequent billing to the State Highway Department.
752	5890002	Rents - Associated	This account shall include rents of associated companies property of others used, occupied, or operated in connection with the distribution system. 1. Rental paid for pole attachments. 2. Rental of buildings for distribution system operations. 3. Rentals for highway or railroad crossings for distribution lines. 4. Charges by telephone or other utility companies for increased height in poles or other facility changes requested by the electric operating company as necessary for joint company use. (See Note C) 5. Rental of underground ducts for underground conductors. Note A: Rents paid for property devoted to operations for which clearing accounts are used shall be charged to the appropriate clearing accounts. Note B: Rents, which are irregular or infrequent, paid for the use of equipment on specific construction, retirement, or maintenance projects, shall be charged to the accounts appropriate for the work performed. Note C: When facility changes are caused by highway relocation, changes shall be initially recorded in the appropriate Other Work in Progress work order for subsequent billing to the State
753	5900000	Maint Supv & Engineering	This account shall include the applicable portion of the cost of labor and expenses incurred in the general supervision, direction, planning, coordination, instruction and training in connection with the maintenance of the distribution system. It shall include the portion of services of personnel such as the Region and District Supervisor, Engineers, Superintendents, General Foremen, Consultants and Secretarial work for this group. Include herein the general supervision and direction of work as it relates to maintenance only, but not the actual performance of such work or the immediate and direct supervision chargeable to other accounts appropriate for the work performed. Exclude from this account and include in Account 5970000, Maintenance of Meters - Supervision, the general supervision of the Meter Department activities pertaining to maintenance. Also exclude general clerical and stenographic work includible in Accounts 5860002, Meter Expenses - Office Salaries and Expenses and 5880000, Miscellaneous Distribution Expenses - All Other as appropriate. Note: For billings involving relocation of distribution facilities, the portion of the overheads added to the billings which relate to operating expenses is to be credited 2/3 to this account and 1/3 to Account 9200003, Administrative and General Salaries Transferred. The remaining portion of the total overheads included in the billings is to be credited to Account 1080000, Retirement of

Explanation: Provide a copy of the utility's detailed chart of accounts and subaccounts including plant in the same level of detail required in E-17. Include a detailed description of each account/subaccount.

Line No.	G/L Account	Account Description	Additional Description
754	5910000	Maintenance of Structures	This account shall include the cost of labor, material used and expenses incurred in the maintenance, other than painting, of distribution structures, the book cost of which is includible in Account 361, Structures and Improvements. Payroll Labor: Maintenance labor on the following equipment: Company-owned railroad siding. Danger signs on fence or buildings. Drinking water system wells, pumps, piping, etc. Fence enclosing station property. Heating, lighting, ventilating and fire protection systems for station buildings or cottages. Retaining walls. Station and line crew shops. Station buildings. Station operator's cottage. Walks, drives, parking areas. Yard and station drainage. Yard lighting (not for equipment). Also include other maintenance labor such as: Ditching to maintain drainages. Making and installing markers for station plot boundary. Refusing station heaters. Repairing plumbing facilities, drainages and sewer system. Repairing tools used on maintenance. Replacing gravel on station yard or driveway. Resurfacing yard, replacing shrubbery, fertilizing grass and chemical killing of weeds. Special work to recondition yards and buildings after landslides or severe storms. Material: Lumber, gravel, plumbing supplies. Small, portable tools, testing equipment, safety equipment, first aid kits and medical supplies.
755	5920000	Maint of Station Equipment	This account shall include the cost of labor, material used and expenses incurred in maintenance of equipment in distribution stations other than that provided for in the other subdivisions of Account 5920000, Maintenance of Station Equipment. Payroll Labor: 1. Batteries, charger and transformer (control equipment). 2. Capacitor banks. Conduits and cables located on station property. Conversion equipment, frequency changers, motor generator sets, rectifiers, synchronous condenser. Dead ending units on incoming and outgoing lines. Equipment steel, structure. Fences isolating equipment. Fire extinguishing system for protection of equipment. Hoists, cranes and motors. Hot sticks and rubber protective equipment for maintenance work (includes testing and storing). Instrument transformers. Lightning arresters. Meters and instruments (exclude billing meters). Platforms and railings appurtenant to equipment. Reclosers. Also include other maintenance labor such as: Repairing or replacing relays. Changing air filter pads in condenser. Moving drying ovens to and from locations. Repainting station equipment (other than transformers, regulators, circuit breakers, buses and disconnects). Repairing station shop equipment. Repairing station trailers. Materials: Bolts Fence material Minor replacement parts for equipment listed in this account. Paint and brushes Refills for fire extinguishers 15 lbs. and over (dry) and 2-1/2 gallon and over (liquid). Tape Small, portable tools, testing equipment, safety equipment, first aid kits and medical supplies. All Other: State and City licenses for trailers used regularly for transporting distribution station equipment. Note: Excludes costs of the entire entrance to the Station (including any above ground support structures) and all underground conduit, conductors, and devices to and including the first pothead or termination on
756	5930000	Maintenance of Overhead Lines	This account shall include only the cost of labor, material used and expenses incurred in maintenance work on distribution overhead lines, the book cost of which is includible in Accounts 364, Poles, Towers and Fixtures and 365, Overhead Conductors and Devices, not elsewhere provided for in the other subdivisions of Account 5930000, Maintenance of Overhead Lines.
757	5930007	Mnt O/H Line Reliability-Def	To defer incremental distribution reliability O&M expenses for future recovery through Virginia Environmental & Reliability cost recovery mechanism in account 593 normally as a credit.
758	5940000	Maint of Underground Lines	This account shall include the cost of labor, materials used and expenses incurred in the maintenance of underground distribution line facilities, the book cost of which is includible in Account 366, Underground Conduit, Account 367, Underground Conductors and Devices, and Account 369, Services.

Explanation: Provide a copy of the utility's detailed chart of accounts and subaccounts including plant in the same level of detail required in E-17. Include a detailed description of each account/subaccount.

Line No.	G/L Account	Account Description	Additional Description
759	5950000	Maint of Lne Trnf,Rglators&Dvi	line transformers and devices, the book cost of which is includible in Account 368, Line Transformers. Also include in this account the maintenance of distribution line voltage regulators, capacitors, network protectors and devices, the book cost of which is also in Account 368, Line Transformers. Payroll Labor: 1. Changing location of same transformer on same pole. 2. Crating line transformers for shipment to be repaired. 3. Inspecting line transformers devices, cutouts and lightning arresters to determine what repairs are needed when trouble is known to exist. (If replacements of retirement units are made, charges shall be through retirement and construction.) 4. Repainting line transformers. 5. Replacing defective arresters and cutouts. 6. Refusing line transformer cutouts (not refusing cutouts used for line sectionalizing). 7. Rewinding and changing taps on line transformers. 8. Repairing cutouts and arresters. 9. Renumbering line transformers. 10. Repairing company-owned line transformers and devices to correct radio and television interference. 11. Replacing thermometers in line transformers. 12. Sampling, testing, changing, purifying and replacing insulating oil. 13. Taking line transformers to shop for repairs. 14. Testing and inspecting line transformers removed from service due to failure. 15. Transferring same line transformer to new pole at same location or from one pole location to another pole location. 16. Checking and replacing contacts. 17. Checking and replacing insulating oil. 18. Inspecting voltage regulators to determine what repairs are needed when trouble is known to exist. 19. Repainting voltage regulator tanks. 20. Relocating voltage regulators, arresters, etc., at the same pole location. 21. Replacing defective parts. 22. Maintenance of capacitor racks and associated equipment. 23. Maintenance of capacitor control devices. 24. Maintenance of capacitors. 25. Maintenance of network protectors. 26. Replacing capacitor fuses. 27. Replacing distribution transformer risers. Outside Services: Include herein charges by the manufacturer for repairs to line transformers and devices for work performed in the factory or elsewhere. Material: 1. Arresters 2. Cutouts 3. Insulating oil 4. Mounting plates used in reinstallation of older transformers. 5. Paint 6. Small, portable tools, testing equipment, safety equipment, first aid kits and medical supplies. Note: The replacement of core and oil in kind in line transformers shall not be charged to this account. DEFINITION OF A LINE TRANSFORMER The following definition is taken from AEP System Accounting Bulletin No. 19, Revised May 1, 1972. A. A transformer having a high voltage winding of not less than 2,400 volts* and not more than 34.5 Grd. Y/20 kv (three phase, or single phase with single bushing) or 20/34.5 Y kv (single phase with two bushings) is to be considered as a Line Transformer and classified to Account 368, Line Transformers at time of purchase
760	5960000	Maint of Strt Lghtng & Sgnal S	This account shall include the cost of labor, materials used and expenses incurred in maintenance of plant, the book cost of which is includible in account 373, Street Lighting and Signal Systems.
761	5970000	Maintenance of Meters	This account shall include the cost of labor, materials used and expenses incurred in the maintenance of meters, meter devices and instrument transformers used in measuring energy delivered to customers and also those used in measuring energy used by the company, the book cost of which is includible in Account 370, Meters. It shall also include the maintenance of meter testing equipment, the book cost of which is includible in Account 395, Laboratory Equipment. Payroll Labor: Cleaning, inspecting and repairing small and special tools used in maintenance of meters. Cleaning, inspecting, repairing and adjusting meter laboratory testing equipment. Packing and sending meters away for repairs. Repairing, cleaning and repainting meters. Renumbering meters. Repairing or replacing meter bases and sockets (mounting devices). Reconditioning, inspecting and replacing jewels, top bearings and other parts. Relocating meters, devices, mountings and accessories at same location. Testing and renewing oil in instrument transformers used for customer metering only. Outside Services: Include herein charges by the manufacturer for repairs to meters and metering equipment for work performed in the factory or elsewhere. Material: Insulating oil Meter jewels and top bearings Padlocks for meter boxes Paint Pilot lights Small, portable tools, testing equipment, safety equipment, first aid kits and medical supplies. Tape Other miscellaneous parts and supplies. Note: Labor and expenses incurred in modernization of old meters should not be charged directly to this account but to the work order established for that purpose.

Explanation: Provide a copy of the utility's detailed chart of accounts and subaccounts including plant in the same level of detail required in E-17. Include a detailed description of each account/subaccount.

Line No.	G/L Account	Account Description	Additional Description
762	5980000	Maint of Misc Distribution Plt	This account shall include the cost of labor, material used and expenses incurred in maintenance of plant, the book cost of which is includible in Account 371, Installations on Customers' Premises, 372. Leased Property on Customers' Premises and any other plant the maintenance of which is assignable to the distribution function and is not provided for elsewhere. Include herein the cost of maintenance of equipment installed on the customer's side if the meter when the company incurs such cost, retains title to the equipment and assumes responsibility for maintenance. This includes such equipment as electric motors and transformers leased or loaned to customers, but not including property held for sale. The cost (when borne by the company) of setting, connecting, resetting and removal of this equipment should be charged to this account. Any amounts billed to the customer for the cost of work performed in connection with the above shall be credited to this account. Southerwestern Electric Power Company
Calculatioin of AFUDC
Test Year Ending December 31, 2018
Docket No. 19-008-U

Explanation: Description of the company's method for calculating Allowance for Funds Used During Construction and determination of the rate used in the test year.

I. Provide a detailed narrative of how AFUDC is calculated, compounded and recorded. Include an example of the actual formula used to calculate AFUDC.

Line No.	Description
1	See Attached
II.	Provide the AFUDC rates used during the test year (both debt and equity components) and explain how the formula in Part I was used to derive those rates.
2	The AFUDC rates used during the test year are provided in the calculations in w/p E-14-1 through July 2018.
3	The Arkansas ROE rate from Docket 09-008-U is 10.25%. The blended rate used in the calculations provide on w/p E-14-1 is 9.82%. The company includes an adjustment for the AFUDC jurisdictional difference in WP B-2-2 and WP B-2-3-3.

Supporting Schedules and Workpapers:
WP E-14-1

Recap Schedules:

Policy/Procedure Title	Accounting for Allowance for Funds Used During Construction and Capitalized Interest	**Date**	7/29/13

Purpose

This accounting policy / procedure memo serves to update and replace AEP Accounting Bulletin 1, "Accounting for Allowance for Funds Used During Construction." This document outlines AEP's procedures for computing and capitalizing allowance for funds used during construction and capitalized interest. Additionally, the underlying principles governing the accounting for this construction cost factor are presented.

This policy / procedure document may not be released to parties outside AEP without the approval of the Chief Accounting Officer.

Policy/Procedure Statement

I. Summary of Principles Permitting Allowance for Funds Used During Construction (AFUDC) and Capitalized Interest

A. FERC Uniform System of Accounts

Effective January 1, 1977, the FERC ordered new accounting procedures for AFUDC (Order No. 561 issued February 2, 1977).

AFUDC as provided in the Uniform System of Accounts is a two-part allowance. It includes:

1. An allowance for other funds used during construction, which includes the cost of common equity and preferred stock when so used, and;

2. An allowance for borrowed funds used during construction, which includes the cost of short-term debt and long-term debt when so used.

AFUDC is capitalized on the company's books by charging Account 107, Construction Work in Progress, as a component of construction cost and crediting Other Income, Account 419.1 – Allowance for Other Funds Used During Construction and/or crediting Interest Charges, Account 432 – Allowance for Borrowed Funds Used During Construction – Credit, as appropriate.

B. Generally Accepted Accounting Principles

Capitalization of Interest

Accounting Standards Codification (ASC) 835-20, Capitalization of Interest, permits capitalization of interest by all entities; however, such costs are limited to actual interest expense incurred for borrowed funds, imputed interest on certain payables and interest related to capital leases. AEP applies capitalized interest to its non-regulated subsidiaries in accordance with ASC 835-20.

The capitalization period begins when expenditures for the asset have been made, activities necessary to get the asset ready for its intended use are in progress, and interest cost is being incurred. Interest capitalization continues as long as those three conditions are present. If substantially all activities related to the construction of the asset are suspended, interest capitalization should cease until activities are resumed.

The amount capitalized in an accounting period is determined by applying the capitalization rate to the average amount of accumulated expenditures for the asset during the period. The capitalization rates are the prior month's weighted average debt cost for the applicable AEP subsidiary. The total amount of interest cost capitalized in an accounting period should not exceed the total amount of interest cost incurred in that period.

The capitalization period ends when the asset is substantially complete and ready for its intended use.

ASC 835-20 recognizes that regulated entities capitalize both a cost of debt and a cost of equity capital during the construction period in accordance with ASC 980-835.

AFUDC

ASC 980-835, Regulated Operations, Interest, addresses cases where a regulator requires an entity to capitalize the cost of financing construction as financed partially by borrowings and partially by equity (AFUDC). In such cases, the amounts capitalized for rate-making purposes as part of the cost of acquiring the assets shall be capitalized for financial reporting purposes instead of the amount of interest that would be capitalized in accordance with ASC 835-20.

AEP applies AFUDC to its regulated subsidiaries in accordance with ASC 980-835. The prior month's weighted average debt cost and equity cost for the applicable AEP subsidiary are used to determine the AFUDC rate.

With the exception of the rate calculation, procedures to apply capital interest are the same as used for AFUDC unless indicated.

II. Rate for Computing AFUDC

A. Authorization of Rate for Computing AFUDC

The FERC has granted permission to utilities to calculate the AFUDC rate on a monthly basis instead of annually as specified in Electric Plant Instruction No. 3, Item 17. This change enables a utility to calculate AFUDC using the maximum allowed rate on a monthly basis and avoids the need for a retroactive adjustment of AFUDC to the maximum allowed rate.

AEP uses the monthly methodology for calculating AFUDC rates. The balances for long-term debt, preferred stock, common stock and construction work in progress are the actual book balances at the end of the prior month. The interest rate for long-term debt and the cost rate for preferred stock are based on the prior month's costs. The cost rate for common stock is the rate of return granted common equity in the last approved rate proceeding. The balance for short-term debt is the average daily balance for the prior month and the related interest rate is the average rate for the prior month.

B. Formula and Elements for Computing the Monthly Maximum Allowable Rate

Separate monthly rates for each company are developed using the formula and elements for the computation of AFUDC as contained in Electric Plant Instruction No. 3, Item 17, of the Uniform System of Accounts adjusted for the requirements of FERC Accounting Release AR-13 effective May 1, 1983. The formula and elements are as follows:

$$Ai = s\left(\frac{S}{W}\right) + d\left(\frac{D}{D+P+C}\right)\left(1 - \frac{S}{W}\right)$$

$$Ae = \left[1 - \frac{S}{W}\right]\left[p\left(\frac{P}{D+P+C}\right) + c\left(\frac{C}{D+P+C}\right)\right]$$

Ai = Gross allowance for borrowed funds used during construction rate
Ae = Allowance for other funds used during construction rate
S = Average short-term debt
s = Short-term debt interest rate
D = Long-term debt (including use-restricted debt)
d = Long-term debt interest rate (including rate of use-restricted debt)
P = Preferred stock
p = Preferred stock cost rate
C = Common equity
c = Common equity cost rate
W = Average balance in construction work in progress plus nuclear fuel in process of refinement, conversion, enrichment and fabrication, less asset retirement costs related to plant under construction

The rate for computing AFUDC as outlined above represents a maximum monthly, simple interest rate which cannot be exceeded without prior Commission approval.

C. <u>Compounding of AFUDC</u>
In Order No. 561, FERC noted that compounding of AFUDC would be permitted, but no more frequently than semiannually.

AEP uses a compounded rate for AFUDC based on semiannual compounding. The rate is developed and applied to construction on a monthly basis.

III. <u>Charges Exempt from Application of AFUDC</u>

AFUDC is to be applied on all construction expenditures with the following exceptions:

1. Meter and transformer blanket work orders.

2. Electric plant purchased.

3. Most work orders with a general plant work order type (general plant work orders mapped to account 397, communication equipment, have AFUDC applied to construction expenditures).

4. Work orders for acquiring land and land rights where new facilities are not being constructed on the land. See Item VI, below.

5. Any portion of construction work in progress which should be excluded from the application of AFUDC as a consequence of compensatory rate relief.

6. Ongoing landfill preparation activities where work may be done intermittently over several years.

7. Certain charge types such as unvouchered liabilities and billing credits.

IV. Method for Accruing AFUDC

AFUDC is to be computed by applying the applicable monthly rate to the previous month's closing balance in the work order (including AFUDC), plus one-half ($^1/_2$) of the current month's additions, less any unpaid retained percentages under contracts and any unpaid invoices included therein.

The computed base multiplied by the applicable monthly rate equals the AFUDC for the current month that is to be charged to the work order.

V. Period for Capitalization of AFUDC

A. Commencement

1. FERC Interpretation
FERC Accounting Release AR-5 (Revised) effective February 20, 1968 states that; "Interest during construction may be capitalized starting from the date that construction costs are continuously incurred on a planned progressive basis." Release AR-5 also states that; "No interest should be accrued during the period of interrupted construction unless the company can justify the interruption as being reasonable under the circumstances."

2. AEP System Implementation
AFUDC is to be capitalized, in accordance with the instructions contained in this policy / procedure memo, commencing with the month of the first charges to an eligible work order.

In the case of interrupted construction a project must meet the criteria specified in the AEP Work Order Suspension Policy to be considered eligible for suspension. Suspended work orders cease accruing AFUDC from the month the work order is suspended until the month the work order is reopened.

The accrual of AFUDC will automatically cease if a work order has no direct charges (labor, material, outside services, etc.) for a period exceeding 6 months.

B. Cessation

1. FERC Interpretation
FERC Accounting Release AR-5 (Revised) states that; "Capitalization of interest stops when the facilities have been tested and are placed in or ready for service. This would include those portions of construction projects completed and put into service although the project is not fully completed."

2. AEP System Implementation
The cessation of AFUDC is dependent upon the month of the in-service date of the facilities as reported in accordance with AEP's In Service Procedure.

The in-service date shall correspond to the first commitment to permanent use of the facilities in the performance of their intended functions (e.g., when electrical equipment is energized and permanently connection to the system). Temporary or limited operations for testing or for construction purposes are not construed as in-service.

A half-month of AFUDC will be calculated in the in-service month. If an in-service date is reported after the fact, any AFUDC calculated after the in-service month will be automatically reversed in the current month.

VI. AFUDC Applied to Land and Land Rights

The accrual of AFUDC on expenditures for land and land rights shall begin at the commencement of the related construction project.

AFUDC on land and land rights is part of the cost of constructing a new facility, and as such, these costs should be capitalized as part of the construction cost of the facility to be recovered through depreciation rather than as part of the cost of the land which is not depreciated. Accordingly AFUDC accrued on the cost of land and land rights shall be transferred to the related construction project as part of the cost of the facility constructed. This transfer will be made when the facility being constructed is placed in-service.

Southerwestern Electric Power Company
Trial Balance - Income Statement
Test Year Ending December 31, 2018
Docket No. 19-008-U

Explanation: Schedule showing the trial balance by detail general ledger subaccount for the test year and two preceding non-overlapping fiscal or calendar years. Also, provide monthly trial balances for the historical portion of the test year.

Southerwestern Electric Power Company
Trial Balance - Balance Sheet
Test Year Ending December 31, 2018
Docket No. 19-008-U

Explanation: Schedule showing the trial balance by detail general ledger subaccount for the test year and two preceding non-overlapping fiscal or calendar years. Also, provide monthly trial balances for the historical portion of the test year.

Schedule E-17B

Trial Balance - Balance Sheet
Test Year Ending December 31, 2018
Docket No. 19-008-U

Explanation: Schedule showing the trial balance by detail general ledger subaccount for the test year and two preceding non-overlapping fiscal or calendar years. Also, provide monthly trial balances for the historical portion of the test year.

Southerwestern Electric Power Company
Trial Balance - Balance Sheet
Test Year Ending December 31, 2018
Docket No. 19-008-U

Explanation: Schedule showing the trial balance by detail general ledger subaccount for the test year and two preceding non-overlapping fiscal or calendar years. Also, provide monthly trial balances for the historical portion of the test year.

Trial Balance - Balance Sheet
Test Year Ending December 31, 2018
Docket No. 19-008-U

Explanation: Schedule showing the trial balance by detail general ledger subaccount for the test year and two preceding non-overlapping fiscal or calendar years. Also, provide monthly trial balances for the historical portion of the test year.

Plant In Service
Test Year Ending December 31, 2018
Docket No. 19-008-U

Explanation: Schedule showing the trial balance by detail general ledger subaccount for the test year and two preceding non-overlapping fiscal or calendar years. Also, provide monthly trial balances for the historical portion of the test year.

Line No.	Category	Account	Location	Balance 12/31/16	Balance 12/31/17	Historic Balances Balance 1/31/18	Balance 2/28/18	Balance 3/31/18	Balance 4/30/18	Balance 5/31/18	Balance 6/30/18

Southerwestern Electric Power Company
Plant In Service
Test Year Ending December 31, 2018
Docket No. 19-008-U

Explanation: Schedule showing the trial balance by detail general ledger subaccount for the test year and two preceding non-overlapping fiscal or calendar years. Also, provide monthly trial balances for the historical portion of the test year.

Line No.	Category	Account	Location	Balance 12/31/16	Balance 12/31/17	Balance 1/31/18	Balance 2/28/18	Historic Balances Balance 3/31/18	Balance 4/30/18	Balance 5/31/18	Balance 6/30/18

Southerwestern Electric Power Company
Accumulated Provision for Depreciation
Test Year Ending December 31, 2018
Docket No. 19-008-U

Schedule E-17 Part II B

Explanation: Schedule showing the trial balance by detail general ledger subaccount for the test year and two preceding non-overlapping fiscal or calendar years. Also, provide monthly trial balances for the historical portion of the test year.

SCHEDULE F-1.2

Southwestern Electric Power Company
Partially Projected Test Year Depreciation Information
Test Year Ending December 31, 2018
Docket No. 19-008-U

Explanation: This schedule shows original cost of utility plant in service and accumulated depreciation by account, subtotaled by function, for a partially projected test year. Schedule F-1.2 should only be completed if the company is filing a partially projected test year. Total amounts must reconcile to the recap schedules indicated.

SCHEDULE F-1.2

Southwestern Electric Power Company
Partially Projected Test Year Depreciation Information
Test Year Ending December 31, 2018
Docket No. 19-008-U

Explanation: This schedule shows original cost of utility plant in service and accumulated depreciation by account, subtotaled by function, for a partially projected test year. Schedule F-1.2 should only be completed if the company is filing a partially projected test year. Total amounts must reconcile to the recap schedules indicated.

(1) Line No.	(2) Acct. Number	(3) Account Description	(8) Projected Plant Balance End of Test Year (A)	(9) Accumulated Depreciation Per Book End of Historical Portion of Test Year	(10) Accumulated Depreciation @ December 31, 2018

Partially Projected Test Year Depreciation Information
Test Year Ending December 31, 2018
Docket No. 19-008-U

Explanation: This schedule shows original cost of utility plant in service and accumulated depreciation by account, subtotaled by function, for a partially projected test year. Schedule F-1.2 should only be completed if the company is filing a partially projected test year. Total amounts must reconcile to the recap schedules indicated.

Pro Forma Year Depreciation Information
Test Year Ending December 31, 2018
Docket No. 19-008-U

PRO FORMA YEAR

Explanation: This schedule shows actual and proposed rates of depreciation expense, original cost of utility plant in service and accumulated depreciation by account, subtotaled by function, for the pro forma year. Total amounts must reconcile to the recap schedules indicated. If changes to existing depreciation rates are requested, columns 11 and 13 must be completed and the company must provide, as set forth in Section 8 of the Rules of Practice and Procedure, a comprehensive depreciation study which addresses life and salvage estimates in support of such new rates.

SCHEDULE F-1.3

Southwestern Electric Power Company
Pro Forma Year Depreciation Information
Test Year Ending December 31, 2018
Docket No. 19-008-U

Explanation: This schedule shows actual and proposed rates of depreciation expense, original cost of utility plant in service and accumulated depreciation by account, subtotaled by function, for the pro forma year. Total amounts must reconcile to the recap schedules indicated. If changes to existing depreciation rates are requested, columns 11 and 13 must be completed and the company must provide, as set forth in Section 8 of the Rules of Practice and Procedure, a comprehensive depreciation study which addresses life and salvage estimates in support of such new rates.

SCHEDULE F-1.3

Southwestern Electric Power Company
Pro Forma Year Depreciation Information
Test Year Ending December 31, 2018
Docket No. 19-008-U

Explanation: This schedule shows actual and proposed rates of depreciation expense, original cost of utility plant in service and accumulated depreciation by account, subtotaled by function, for the pro forma year. Total amounts must reconcile to the recap schedules indicated. If changes to existing depreciation rates are requested, columns 11 and 13 must be completed and the company must provide, as set forth in Section 8 of the Rules of Practice and Procedure, a comprehensive depreciation study which addresses life and salvage estimates in support of such new rates.

Southwestern Electric Power Company
Pro Forma Year Depreciation Information
Test Year Ending December 31, 2018
Docket No. 19-008-U

Explanation: This schedule shows actual and proposed rates of depreciation expense, original cost of utility plant in service and accumulated depreciation by account, subtotaled by function, for the pro forma year. Total amounts must reconcile to the recap schedules indicated. If changes to existing depreciation rates are requested, columns 11 and 13 must be completed and the company must provide, as set forth in Section 8 of the Rules of Practice and Procedure, a comprehensive depreciation study which addresses life and salvage estimates in support of such new rates.

SOUTHWESTERN ELECTRIC POWER COMPANY
DOCKET NO. 19-008-U
TST YEAR ENDED DECEMBER 31, 2018

Schedule G-1
Cost of Service Study
Summary

Explanation: Schedule showing the major categories of rate base, revenue, and expense for pro forma year by Total Company, all Other Jurisdictions, Total Arkansas Retail, and Arkansas Rate Schedules or Classes. The "Total Company" amount is not required if the amounts brought forward from supporting schedules are at the Arkansas level and the Company is not reporting any non-Jurisdictional (non-Arkansas) amounts on the supporting schedules. The schedule shall also show the calculation of the rate schedule revenue deficiency and revenue requirement for the above groups at an equal rate of return. If the proposed rate schedule revenue requirement is different from that resulting from the use of equal rates of return, that calculation should also be shown.

SOUTHWESTERN ELECTRIC POWER COMPANY
DOCKET NO. 19-008-U
TST YEAR ENDED DECEMBER 31, 2018

Explanation: Schedule showing the major categories of rate base, revenue, and expense for pro forma year by Total Company, all Other Jurisdictions, Total Arkansas Retail, and Arkansas Rate Schedules or Classes. The "Total Company" amount is not required if the amounts brought forward from supporting schedules are at the Arkansas level and the Company is not reporting any non-Jurisdictional (non-Arkansas) amounts on the supporting schedules. The schedule shall also show the calculation of the rate schedule revenue deficiency and revenue requirement for the above groups at an equal rate of return. If the proposed rate schedule revenue requirement is different from that resulting from the use of equal rates of return, that calculation should also be shown.

Explanation: Schedule showing the major categories of rate base, revenue, and expense for pro forma year by Total Company, all Other Jurisdictions, Total Arkansas Retail, and Arkansas Rate Schedules or Classes. The "Total Company" amount is not required if the amounts brought forward from supporting schedules are at the Arkansas level and the Company is not reporting any non-Jurisdictional (non-Arkansas) amounts on the supporting schedules. The schedule shall also show the calculation of the rate schedule revenue deficiency and revenue requirement for the above groups at an equal rate of return. If the proposed rate schedule revenue requirement is different from that resulting from the use of equal rates of return, that calculation should also be shown.

SOUTHWESTERN ELECTRIC POWER COMPANY
DOCKET NO. 19-008-U
TST YEAR ENDED DECEMBER 31, 2018

Explanation: Schedule showing the major categories of rate base, revenue, and expense for pro forma year by Total Company, all Other Jurisdictions, Total Arkansas Retail, and Arkansas Rate Schedules or Classes. The "Total Company" amount is not required if the amounts brought forward from supporting schedules are at the Arkansas level and the Company is not reporting any non-Jurisdictional (non-Arkansas) amounts on the supporting schedules. The schedule shall also show the calculation of the rate schedule revenue deficiency and revenue requirement for the above groups at an equal rate of return. If the proposed rate schedule revenue requirement is different from that resulting from the use of equal rates of return, that calculation should also be shown.

Supporting Schedules
(a) G-2
(b) H-1
(c) G-3
(d) C-5

Explanation: Schedule showing allocation of pro form year functionalized rate base by account, and where applicable by subaccount, at original cost less depreciation and other rate base items to Total Company, Other Jurisdictions, Total Arkansas Retail, and Arkansas Rate Schedule or Classes. The "Total Company" amount is not required if the amounts brought forward from supporting schedules are at the Arkansas level and the Company is not reporting any non-jurisdictional (non-Arkansas) amounts on the supporting schedules. The associated plant account(s) should be provided for all expenses which follow specific plant accounts. Workpapers detailing classification/functionalization by account should be provided. Identify accounts that have been classified and/or allocated in a manner differenct from the previous rate case and explain the basis for the change.

SOUTHWESTERN ELECTRIC POWER COMPANY
DOCKET NO. 19-008-U
TEST YEAR ENDING DECEMBER 31, 2018

Schedule: G-2
Coste of Service Study - Rate Base Detail
Jurisdiction

Explanation: Schedule showing allocation of pro form year functionalized rate base by account, and where applicable by subaccount, at original cost less depreciation and other rate base items to Total Company, Other Jurisdictions, Total Arkansas Retail, and Arkansas Rate Schedule or Classes. The "Total Company" amount is not required if the amounts brought forward from supporting schedules are at the Arkansas level and the Company is not reporting any non-jurisdictional (non-Arkansas) amounts on the supporting schedules. The associated plant account(s) should be provided for all expenses which follow specific plant accounts. Workpapers detailing classification/functionalization by account should be provided. Identify accounts that have been classified and/or allocated in a manner differenct from the previous rate case and explain the basis for the change.

Explanation: Schedule showing allocation of pro form year functionalized rate base by account, and where applicable by subaccount, at original cost less depreciation and other rate base items to Total Company, Other Jurisdictions, Total Arkansas Retail, and Arkansas Rate Schedule or Classes. The "Total Company" amount is not required if the amounts brought forward from supporting schedules are at the Arkansas level and the Company is not reporting any non-jurisdictional (non-Arkansas) amounts on the supporting schedules. The associated plant account(s) should be provided for all expenses which follow specific plant accounts. Workpapers detailing classification/functionalization by account should be provided. Identify accounts that have been classified and/or allocated in a manner differenct from the previous rate case and explain the basis for the change.

SOUTHWESTERN ELECTRIC POWER COMPANY
DOCKET NO. 19-008-U
TEST YEAR ENDING DECEMBER 31, 2018

Explanation: Schedule showing allocation of pro form year functionalized rate base by account, and where applicable by subaccount, at original cost less depreciation and other rate base items to Total Company, Other Jurisdictions, Total Arkansas Retail, and Arkansas Rate Schedule or Classes. The "Total Company" amount is not required if the amounts brought forward from supporting schedules are at the Arkansas level and the Company is not reporting any non-jurisdictional (non-Arkansas) amounts on the supporting schedules. The associated plant account(s) should be provided for all expenses which follow specific plant accounts. Workpapers detailing classification/functionalization by account should be provided. Identify accounts that have been classified and/or allocated in a manner differenct from the previous rate case and explain the basis for the change.

SOUTHWESTERN ELECTRIC POWER COMPANY
DOCKET NO. 19-008-U
TEST YEAR ENDING DECEMBER 31, 2018

Explanation: Schedule showing allocation of pro form year functionalized rate base by account, and where applicable by subaccount, at original cost less depreciation and other rate base items to Total Company, Other Jurisdictions, Total Arkansas Retail, and Arkansas Rate Schedule or Classes. The "Total Company" amount is not required if the amounts brought forward from supporting schedules are at the Arkansas level and the Company is not reporting any non-jurisdictional (non-Arkansas) amounts on the supporting schedules. The associated plant account(s) should be provided for all expenses which follow specific plant accounts. Workpapers detailing classification/functionalization by account should be provided. Identify accounts that have been classified and/or allocated in a manner differenct from the previous rate case and explain the basis for the change.

SOUTHWESTERN ELECTRIC POWER COMPANY
DOCKET NO. 19-008-U
TEST YEAR ENDING DECEMBER 31, 2018

Explanation: Schedule showing allocation of pro form year functionalized rate base by account, and where applicable by subaccount, at original cost less depreciation and other rate base items to Total Company, Other Jurisdictions, Total Arkansas Retail, and Arkansas Rate Schedule or Classes. The "Total Company" amount is not required if the amounts brought forward from supporting schedules are at the Arkansas level and the Company is not reporting any non-jurisdictional (non-Arkansas) amounts on the supporting schedules. The associated plant account(s) should be provided for all expenses which follow specific plant accounts. Workpapers detailing classification/functionalization by account should be provided. Identify accounts that have been classified and/or allocated in a manner differenct from the previous rate case and explain the basis for the change.

SOUTHWESTERN ELECTRIC POWER COMPANY
DOCKET NO. 19-008-U
TEST YEAR ENDING DECEMBER 31, 2018

Explanation: Schedule showing allocation of pro form year functionalized rate base by account, and where applicable by subaccount, at original cost less depreciation and other rate base items to Total Company, Other Jurisdictions, Total Arkansas Retail, and Arkansas Rate Schedule or Classes. The "Total Company" amount is not required if the amounts brought forward from supporting schedules are at the Arkansas level and the Company is not reporting any non-jurisdictional (non-Arkansas) amounts on the supporting schedules. The associated plant account(s) should be provided for all expenses which follow specific plant accounts. Workpapers detailing classification/functionalization by account should be provided. Identify accounts that have been classified and/or allocated in a manner differenct from the previous rate case and explain the basis for the change.

Explanation: Schedule showing pro form year revenues and allocation of functional expenses by account, and where applicable by subaccount, to Total Company, Other Jurisdictions, Total Arkansas Retail, and Arkansas Rate Schedule or Classes. The "Total Company" amount is not required if the amounts brought forward from supporting schedules are at the Arkansas level and the Company is not reporting any non-jurisdictional (non-Arkansas) amounts on the supporitng schedules. The associated plant plant account(s) should be provided for all expenses which follow specific plant accounts. Workpapers detailing classification/functionalization by account should be provided. Identify accounts that have been classified and/or allocated in a manner different from the previous rate case and explain the basis for the change.

SOUTHWESTERN ELECTRIC POWER COMPANY
DOCKET NO. 19-008-U
TEST YEAR ENDING DECEMBER 31, 2018

Schedule: G-3
Cost of Service Study - Revenue and Expense Detail
Class

Explanation: Schedule showing pro form year revenues and allocation of functional expenses by account, and where applicable by subaccount, to Total Company, Other Jurisdictions, Total Arkansas Retail, and Arkansas Rate Schedule or Classes. The "Total Company" amount is not required if the amounts brought forward from supporting schedules are at the Arkansas level and the Company is not reporting any non-jurisdictional (non-Arkansas) amounts on the supporting schedules. The associated plant account(s) should be provided for all expenses which follow specific plant accounts. Workpapers detailing classificatoin/functioinalization by account should be provided. Identify accounts that have been classified and/or allocated in a manner differenct from the previous rate case and explain the basis for the change.

Supporting Schedules

Explanation: Schedule showing pro form year revenues and allocation of functional expenses by account, and where applicable by subaccount, to Total Company, Other Jurisdictions, Total Arkansas Retail, and Arkansas Rate Schedule or Classes. The "Total Company" amount is not required if the amounts brought forward from supporting schedules are at the Arkansas level and the Company is not reporting any non-jurisdictional (non-Arkansas) amounts on the supporting schedules. The associated plant account(s) should be provided for all expenses which follow specific plant accounts. Workpapers detailing classificatoin/functioinalization by account should be provided. Identify accounts that have been classified and/or allocated in a manner differenct from the previous rate case and explain the basis for the change.

SOUTHWESTERN ELECTRIC POWER COMPANY
DOCKET NO. 19-008-U
TEST YEAR ENDING DECEMBER 31, 2018

Explanation: Schedule showing derivation of all allocation factors utilized in the cost of service study. All factors shall be labeled to show exact cross refereneces to Schedule G-2 and G-3. Show data used as well as the resulting factor. The "Total Company" amount is not required if the amounts brought forward from supporting schedules are at the Arkansas level and the Company is not reporting non-Jurisdictional (non-Arkansas) amounts on the supporting schedules.

SOUTHWESTERN ELECTRIC POWER COMPANY
DOCKET NO. 19-008-U
TEST YEAR ENDING DECEMBER 31, 2018

Explanation: Schedule showing derivation of all allocation factors utilized in the cost of service study. All factors shall be labeled to show exact cross references to Schedule G-2 and G-3. Show data used as well as the resulting factor. The "Total Company" amount is not required if the amounts brought forward from supporting schedules are at the Arkansas level and the Company is not reporting non-Jurisdictional (non-Arkansas) amounts on the supporting schedules.

Explanation: Schedule showing derivation of all allocation factors utilized in the cost of service study. All factors shall be labeled to show exact cross references to Schedule G-2 and G-3. Show data used as well as the resulting factor. The "Total Company" amount is not required if the amounts brought forward from supporting schedules are at the Arkansas level and the Company is not reporting non-Jurisdictional (non-Arkansas) amounts on the supporting schedules.

SOUTHWESTERN ELECTRIC POWER COMPANY
DOCKET NO. 19-008-U
TEST YEAR ENDING DECEMBER 31, 2018

Explanation: Schedule showing derivation of all allocation factors utilized in the cost of service study. All factors shall be labeled to show exact cross references to Schedule G-2 and G-3. Show data used as well as the resulting factor. The "Total Company" amount is not required if the amounts brought forward from supporting schedules are at the Arkansas level and the Company is not reporting non-Jurisdictional (non-Arkansas) amounts on the supporting schedules.

Explanation: Schedule showing derivation of all allocation factors utilized in the cost of service study. All factors shall be labeled to show exact cross references to Schedule G-2 and G-3. Show data used as well as the resulting factor. The "Total Company" amount is not required if the amounts brought forward from supporting schedules are at the Arkansas level and the Company is not reporting non-Jurisdictional (non-Arkansas) amounts on the supporting schedules.

SOUTHWESTERN ELECTRIC POWER COMPANY
DOCKET NO. 19-008-U
TEST YEAR ENDING DECEMBER 31, 2018

Explanation: Schedule showing derivation of all allocation factors utilized in the cost of service study. All factors shall be labeled to show exact cross refereneces to Schedule G-2 and G-3. Show data used as well as the resulting factor. The "Total Company" amount is not required if the amounts brought forward from supporting schedules are at the Arkansas level and the Company is not reporting non-Jurisdictional (non-Arkansas) amounts on the supporting schedules.

Explanation: Schedule showing derivation of all allocation factors utilized in the cost of service study. All factors shall be labeled to show exact cross references to Schedule G-2 and G-3. Show data used as well as the resulting factor. The "Total Company" amount is not required if the amounts brought forward from supporting schedules are at the Arkansas level and the Company is not reporting non-Jurisdictional (non-Arkansas) amounts on the supporting schedules.

SOUTHWESTERN ELECTRIC POWER COMPANY
DOCKET NO. 19-008-U
TEST YEAR ENDING DECEMBER 31, 2018

Explanation: Schedule showing derivation of all allocation factors utilized in the cost of service study. All factors shall be labeled to show exact cross references to Schedule G-2 and G-3. Show data used as well as the resulting factor. The "Total Company" amount is not required if the amounts brought forward from supporting schedules are at the Arkansas level and the Company is not reporting non-Jurisdictional (non-Arkansas) amounts on the supporting schedules.

Explanation: Schedule showing derivation of all allocation factors utilized in the cost of service study. All factors shall be labeled to show exact cross references to Schedule G-2 and G-3. Show data used as well as the resulting factor. The "Total Company" amount is not required if the amounts brought forward from supporting schedules are at the Arkansas level and the Company is not reporting non-Jurisdictional (non-Arkansas) amounts on the supporting schedules.

CLASS

Residential Service

This class includes rates for residential, single family, or individual family apartments. No commercial use is allowed on these rates. Included in this class are rate schedules: Residential Basic and Residential with electric heating appliances (closed).

General Service

This class includes rates for commercial customers not exceeding 50 kW and lighting-only for stadium, ball-park or recreational night lighting. Included in this class are rate schedules: General Service and Recreational Lighting.

Light and Power

This class includes rates for commercial and small industrial taking service under secondary and primary voltage with demand requirements over 50 kW. Included in this class are rate schedules: Light and Power Primary and Light and Power Secondary.

Light and Power Time of Use

This rates is an optional rate for customers having a maximum demand of 500 kW under secondary or primary voltage. Included in this rate: Light and Power Time of Use Primary and Secondary.

Industrial Class

This class is for customers that take service at the transmission voltage with demand and energy rates. Included in this rate: Large Light and Power and Pulp and Paper Mills.

Municipal

This class is for municipal pumping and service. Included in this rate: Municipal Service and Municipal Pumping.

Lighting

This class is includes lighting service to municipalities for company-owned street and parkway lighting and company-owned lighting service for residential, commercial, and industrial customers for outdoor, area, and private lighting. This class includes: Municipal Publice and Highway Lighting and Private, Outdoor and Area Lighting.

Southwestern Electric Power Company
Docket No. 19-008-U
Test Year Ending December 31, 2018

Schedule: H-2
Title: Analysis of Revenue by Detailed Rate Schedule

Explanation: Schedule comparing Arkansas retail revenues for each rate schedule by detailed rate component for the pro forma year, at present and proposed rates.

Recap Schedules
(A) H-1

Explanation: Schedule(s) comparing annual or seasonal analysis of customer bills at varying levels of usage at present and proposed rates by rate schedule. For each rate schedule, applicant should order bills by usage level in ascending order and separate into 10 groups (deciles) of equal number of bills. For each group, company should calculate a present and proposed bill using rates from Schedule H-2 applied to that group's average usage. A company with uniform monthly rates will provide an annual analysis. A company with seasonal rates will provide a seasonal analysis for each season. (Exclude non-standard rates, such as lighting, variable peak pricing, and special contracts).

Time Period: On-Peak Season
(Annual or separate seasonal schedule for each season)

Rate Schedule: Standard Residential

Southwestern Electric Power Company
Docket No. 19-008-U
Test Year Ending December 31, 2018

Explanation: Schedule(s) comparing annual or seasonal analysis of customer bills at varying levels of usage at present and proposed rates by rate schedule. For each rate schedule, applicant should order bills by usage level in ascending order and separate into 10 groups (deciles) of equal number of bills. For each group, company should calculate a present and proposed bill using rates from Schedule H-2 applied to that group's average usage. A company with uniform monthly rates will provide an annual analysis. A company with seasonal rates will provide a seasonal analysis for each season. (Exclude non-standard rates, such as lighting, variable peak pricing, and special contracts).

Time Period: On-Peak Season
(Annual or separate seasonal schedule for each season)

Rate Schedule: General Service

Explanation: For Residential rate schedule(s) and any other rate schedules for which the Company proposes to change the volumetric blocking, show monthly billed activity and actual consumption, if different, by rate schedule in the format provided. For demand metered customers, show the billed demand in addition to the billed usage. By individual rate schedule, provide data in the block format below with no less than 11 blocks, one of which is zero.

Explanation: For Residential rate schedule(s) and any other rate schedules for which the Company proposes to change the volumetric blocking, show monthly billed activity and actual consumption, if different, by rate schedule in the format provided. For demand metered customers, show the billed demand in addition to the billed usage. By individual rate schedule, provide data in the block format below with no less than 11 blocks, one of which is zero.

Explanation: For Residential rate schedule(s) and any other rate schedules for which the Company proposes to change the volumetric blocking, show monthly billed activity and actual consumption, if different, by rate schedule in the format provided. For demand metered customers, show the billed demand in addition to the billed usage. By individual rate schedule, provide data in the block format below with no less than 11 blocks, one of which is zero.

Rate Schedule: Residential Electric Heating Appliance Service - R-3

Explanation: For Residential rate schedule(s) and any other rate schedules for which the Company proposes to change the volumetric blocking, show monthly billed activity and actual consumption, if different, by rate schedule in the format provided. For demand metered customers, show the billed demand in addition to the billed usage. By individual rate schedule, provide data in the block format below with no less than 11 blocks, one of which is zero.

Explanation: For Residential rate schedule(s) and any other rate schedules for which the Company proposes to change the volumetric blocking, show monthly billed activity and actual consumption, if different, by rate schedule in the format provided. For demand metered customers, show the billed demand in addition to the billed usage. By individual rate schedule, provide data in the block format below with no less than 11 blocks, one of which is zero.

Rate Schedule: Residential Service R-2

Explanation: For Residential rate schedule(s) and any other rate schedules for which the Company proposes to change the volumetric blocking, show monthly billed activity and actual consumption, if different, by rate schedule in the format provided. For demand metered customers, show the billed demand in addition to the billed usage. By individual rate schedule, provide data in the block format below with no less than 11 blocks, one of which is zero.

Rate Schedule: Residential Service R-2

Explanation: For Residential rate schedule(s) and any other rate schedules for which the Company proposes to change the volumetric blocking, show monthly billed activity and actual consumption, if different, by rate schedule in the format provided. For demand metered customers, show the billed demand in addition to the billed usage. By individual rate schedule, provide data in the block format below with no less than 11 blocks, one of which is zero.

Rate Schedule: Residential Service R-2

Supporting Schedules
As needed

Explanation: For Residential rate schedule(s) and any other rate schedules for which the Company proposes to change the volumetric blocking, show monthly billed activity and actual consumption, if different, by rate schedule in the format provided. For demand metered customers, show the billed demand in addition to the billed usage. By individual rate schedule, provide data in the block format below with no less than 11 blocks, one of which is zero.

Rate Schedule: Residential Service R-2

Description: December 2018

Supporting Schedules
As needed

Explanation: Schedule showing (1) a narrative explanation of the sequential steps taken and (2) supporting calculations underlying the derivation of each component of the proposed rates for each rate schedule.

The steps in developing new or updated rates are shown in the narrative below.

1) The first step in developing the proposed rates for each rate schedule is to determine the pro forma test year billing determinants and corresponding present base rate revenues. Pro forma year billing determinants are collected for each rate class and adjustments are applied to determine the total adjusted test year base rate revenue. The unadjusted and adjusted billing determinants and base rate revenue for each class are shown in Schedule E-11.1 and E-11.2.
2) The adjusted billing determinants are used to populate the proof of revenue, Schedule H-2. Present base rate revenue is calculated by applying the rates approved in SWEPCO's last rate case to the adjusted billing determinants. Seasonal adjusted customer counts are used to calculate customer charge revenue. Seasonal adjusted kWh billing units are used to calculate seasonal energy charges. The residential classes include an extra step to split the total seasonal kWh billing determinant into seasonal kWh blocks. A workpaper detailing this process is included as Schedule H-2, Attachment 1. The adjusted seasonal demand (kW) billing determinants are used to determine seasonal demand charge revenue for the rate schedules that include charges associated with monthly billing demand. All revenue associated with each rate component is accumulated to determine total adjusted base rate revenue at present rates. The calculated present base rate revenue is compared with the adjusted base rate revenue shown in Schedule E-11.2. Any slight variation in revenue due to calculated base rate revenue is adjusted by a book-to-bill ratio that is also applied to the proposed base rate revenue to calibrate the calculated base rate revenue to the adjusted pro forma base rate revenue based on company books and forecasted data. Once the base rate revenue has been proved, proposed revenues for each rate class can be determined. The proof of revenue, Schedule H-2, includes the calculation of present and proposed revenue for each rate class.
3) The adjusted billing determinants and revenue, along with other pro forma year information, are used to construct the filed cost-of-service study as described in the direct testimony of SWEPCO witness John O. Aaron. Results from the cost-of-service study, including the class returns at present rates, equalized revenue requirements by class, and the unit cost section, are used in the determination of the proposed rate design.
4) The cost of providing service at an equalized return by class is compared to the class present base rate revenues in the revenue distribution, EXHIBIT JLJ-1, supported by SWEPCO witness Jennifer L. Jackson, to identify a class deficiency or surplus. The revenue distribution is used to mitigate impacts to specific customer classes. The revenue distribution identifies rate classes that can be combined to determine a target revenue requirement change based on customer class groupings. The rate class groupings represent the accumulation of all rate schedules in the family of each major rate class in order to

spread the revenue change equally among classes that are similarly situated. Target rate class proposed revenue requirements are determined in the revenue distribution and proposed rates are determined to recover the target proposed revenue requirement. The revenue distribution process and results are discussed in detail in direct testimony by SWEPCO witness Jennifer L. Jackson.

5) The proposed target revenue requirement for each class is used to calculate the proposed rates for each class. Schedule H-2 shows these calculations, including the sum of the revenue requested from each rate class to equal the total SWEPCO Arkansas retail proposed revenue requirement. In general, the proposed revenue requirement for each customer class, sets the percentage change to be applied to the rate components. The unit cost section was also used as a guide in the determination of the rate components along with the proposed class revenue distribution percentage changes. One of the goals of the rate design process is to develop rates that produce similar rate impacts across a range of usage levels. The proposed pricing of each rate component was adjusted to modify customer bill impacts and to recover the total revenue requirement.
   a. Residential Class: The Residential Class includes residential customers taking service under the basic Residential Service rate schedule and the Electric Heating Appliance Service rate schedule. The residential rate schedules recover the class functional costs to serve through fixed customer charges and variable, seasonal blocked kWh rates. The unit cost for the class as shown in the distribution customer component was used as a guide to determine the proposed customer charge for the class along with the percentage change indicated in the proposed revenue distribution. The customer charge was raised above the unit cost to moderate increases in the per kWh rates in each season. The customer charge was raised to $10, and the remaining revenue requirement was spread among the kWh blocks and seasons to achieve the proposed revenue requirement for the class. The inclining block (over 1,500 kWh) in the on-peak season was increased more than the initial block in the on-peak season in order to encourage conservation in the peak season. The percentage increases applied to the present rates to achieve the proposed rates and resulting revenue are shown in Schedule H-2.
   b. General Service Class: The General Service Class is for commercial loads not exceeding 50 kW. The GS rate schedule has a fixed customer charge, seasonal-based flat kWh rates and a non-seasonal demand charge applied on demand over 6 kW used in each billing month. The customer charge was set at the per customer unit cost for the distribution customer function for the GS rate class, $10.60. The demand charge was moderated from the unit cost and the per-kWh rates were increased proportionally to achieve the total revenue requirement after the customer charge and demand charge revenue change was determined to produce similar rate impacts across a range of usage. The Recreational Night Lighting rate schedule is for off-peak lighting-only service for stadium, ball-park, or other recreational night lighting. The customer charge for this rate schedule is designed to be the same as

the GS customer charge. The kWh charge is also based on the off-peak kWh charge of the GS rate schedule and will be applied year-round.

c. Lighting & Power Class: The Lighting and Power class provides service to commercial and small industrial customers with demand requirements over 50 kW served at either secondary or primary voltage. The LP rate schedule does not have a customer charge but has seasonal kWh and kW rates to recover the revenue requirement for the class. The revenue distribution percentage change for the LP secondary class was applied to the demand and kWh rates for secondary service and the percentage change for the LP primary class was applied to the primary service rates (and the Large Lighting & Power (LLP) primary rates) to achieve the required class revenue requirement as determined by the revenue distribution and to produce similar rate impacts across a range of usage levels.
d. Lighting & Power Time of Use Class: The LP TOU rate schedule is an optional rate schedule for customers having a maximum demand of 500 kW served under either secondary or primary voltages. The TOU rate schedule is structured to encourage customers to shift load requirements from the defined on-peak period to the off-peak period. The LP TOU rate schedule has an on-peak season defined as the months of July, August, and September and within the on-peak season, an on-peak period is defined as 1:00 p.m. to 7:00 p.m., excluding holidays and weekends. The off-peak season is defined as the hours other than on-peak. The proposed revenue distribution indicates that the class requires a larger than system average increase to achieve an equalized return. Each rate component was increased based upon the percentage change as directed by the revenue distribution but modified in consideration of customer bill impacts. The on-peak demand charges were increased to encourage load shifting and the off-peak demand charges were increases to achieve the required revenue requirement.
e. Industrial Class: The industrial class includes service for LLP at transmission voltage and a rate for Pulp & Paper Mill Service. Each industrial rate schedule has demand and energy rates to recover the cost to serve each class. The revenue distribution percentage change for each industrial class was applied to the demand and kWh rates to achieve the required revenue. Please note that each industrial class rate schedule provides service for only one customer; therefore, the individual class data is confidential and redacted from Schedule H-2.
f. Municipal Class: The municipal class includes two rate schedules for non-lighting service to municipal customers. The rate schedules in this class include Municipal Service and Municipal Pumping Service. Each municipal schedule includes a customer charge and flat, seasonal energy rates. Both municipal rate schedules have a non-seasonal minimum demand charge used to calculate monthly minimum bills. The customer charge and minimum bill provisions for the municipal schedules are designed to be the same, so the rates under both schedules are adjusted by the same percentage as directed by the revenue distribution.

g. Lighting Class: The Lighting Class includes lighting service for company-owned street and parkway lighting to municipalities and company-owned lighting service for residential, commercial, and industrial customers for outdoor, area, and private lighting. The lighting rate schedules also include energy-only service for customer-owned lighting facilities. Each schedule includes a monthly fixed rate for lighting services and a monthly facilities rate to recover SWEPCO's investment in customer requested facilities. The cost-of-service study indicates that the lighting classes have a higher than system average rate of return and require a rate decrease. The facilities charges were kept at the same level, while the monthly base rate charges were reduced to achieve the total combined revenue requirement, as directed by the revenue distribution.

h. New offerings for LED lighting fixtures: SWEPCO is requesting approval of new offerings for LED fixtures. The offering will include LED fixtures for municipal street lighting customers and for residential and commercial outdoor lighting service. The proposed LED monthly fixture charge is the combination of two components: 1) a component to recover the cost of generation, transmission, and distribution services and 2) a component for replacement of the fixture and photocell. The functional unit cost workpaper is used to determine a services cost on a per-kWh basis. The per-kWh rate is applied to the monthly average fixed kWh associated with each type of LED fixture. The replacement component is based on the cost to replace the fixture and photocell to be recovered on a monthly basis. In order to facilitate updates to rapidly changing LED technology, SWEPCO is proposing three ranges of LED service defined by lumen output and wattage. The LED ranges will accommodate future additional fixture types and updates to existing lumen output and wattage. Direct testimony EXHIBIT JLJ-4 details the calculation of the proposed LED rates.

i. Additional General Rate Schedules: SWEPCO's Tariff includes several, optional services including Alternate Feed Service (AFS), and optional service for Standby, Backup, Maintenance, and As-Available Standby Power Service. AFS may be available for LP and LLP customers who request alternate feed service from existing distribution facilities in addition to basic service. Standby, Backup, Maintenance, and As-Available Standby Power Service is available to customers that own and operate power production equipment and have a separate agreement for interconnection to SWEPCO's system. The individual rates for each service have been adjusted according to the corresponding class percentage change determined in the revenue distribution. SWEPCO also has charges for highly fluctuating loads and kVAR charges to recover costs associated with reactive demands. The charge for highly fluctuating loads and kVAR can be applied across multiple rate classes; therefore, the present rates for these charges are increased by the total retail percentage change as indicated in the revenue distribution. The AFS rate calculation workpaper is included as Schedule H-5, Attachment 2. The Standby, Backup, Maintenance, and As-Available Standby Power Service

workpaper detailing the rate changes is included as Schedule H-5, Attachment 3. Rate schedules with references to facilities charges and maintenance charges, including the lighting rate schedules and municipal rate schedule, will include a new facilities and maintenance charge percentage based on updated information that will be adjusted based on a final order in this case. The workpaper detailing the calculation of the new facilities and maintenance percentages is included Schedule H-5, Attachment 4.

For additional discussion on the derivation of the proposed rates and supporting calculations underlying the derivation of each component of the proposed rates for each rate schedule, please see the direct testimony of SWEPCO witness Jennifer L. Jackson, including testimony EXHIBIT JLJ-1, the unit cost workpaper supporting the cost-of-service study, and Schedule H-2, the rate class proof of revenues for present and proposed rates. The "Pricing" and "Results" tabs of Schedule H-2 show the derivation of the proposed rates based on the percentage change for each class as proposed in the revenue distribution.

FACILITIES RENTAL / MAINTENANCE

1 DESCRIPTION OF CHARGE

The Facilities Rental fee is made when Customer rents facilities owned and maintained by Company. Facilities Maintenance fee is charged for maintaining facilities for which a customer has made a contribution in aid for construction or for Company maintenance of customer-owned facilities.

A.) Facilities Rental B.) Facilities Maintenance

2 EXPLANATION OF COST

Calculated monthly levelized fixed charge rate for electric distribution equipment.

General Service Rule 4.01 – Deposits from Applicants

SWEPCO was granted exemption to utilize the computerized system of “Pos ID” in evaluating and identifying the credit risk of new applicants for utility service (Docket #98-056-U).

General Service Rule 4.03B – Calculation of Average Bill – For Inadequate Billing History

SWEPCO was granted exemption from General Service Rule 4.03B by clarifying that the basis on which the deposit for a non-residential applicant is calculated will be determined as following:

“When a non-residential applicant requests service in a location where the previous customer at that location was of the same business type and size as the applicant for service, the average bill shall not be more than the average monthly bill for that location for the most recently completed representative 12-month period.”

Title: EXEMPTION FROM COMMISSION RULES		PSC File Mark Only

General Service Rule 5.21 – Transferring Past Due Balances to Other Accounts

SWEPCO was granted exemption from General Service Rule 5.21 by the addition of the following Paragraph.

"C. An account of any Customer, of any class, when the Company receives a written request to have a balance transferred to the requesting Customer's account and when the following information is stated in the letter of request:

(1) Name and account number of the Customer requesting that a balance is to be transferred to their account;
(2) Name and account number of the Customer whose balance is to be transferred; and
(3) A statement that the requesting Customer understands that their own service may be terminated for non-payment if the transferred balance is not paid in full in accordance with any agreed upon payment arrangements."

Rules for Conservation and Energy Efficiency – Section 5.D

SWEPCO was granted a waiver of Section 5.D of the Conservation and Energy Efficiency Rules by Order 22 of Docket 07-082-TF. The waiver allows SWEPCO to implement its Commercial and Industrial Standard Offer Program and associated rebates for new construction.

Rules for Conservation and Energy Efficiency – Section 7.D

SWEPCO was granted a waiver of Section 7.D of the Conservation and Energy Efficiency Rules by Order 22 of Docket 07-082-TF. The waiver allows SWEPCO to implement its Emergency Load Management Standard Offer Program as and Energy Efficiency program.

1. APPLICABLE TO ALL CLASSES OF ELECTRIC SERVICE

In order that all Customers may receive uniform, efficient, and adequate service, electric service will be supplied to and accepted by all Customers receiving service from the Company in accordance with these Terms and Conditions.

2. ORDER FOR SERVICE

When applicable, contract and agreement forms are provided by the Company to show the agreement under which the Customer receives and the Company delivers electric service. Appropriate arrangements will be completed with Customer, or his duly-authorized agent, before service is supplied by the Company.

3. OPTIONAL RATES

The Company's published rate schedules state the conditions under which each is available for electric service. When two or more rates are applicable to a certain class of service, the choice of such rates lies with the Customer.

The Company, at any time upon request, will determine for any Customer the rate best adapted to existing or anticipated service requirements as defined by the Customer, but the Company does not assume responsibility for the selection of such rate or for the continuance of the lowest annual cost under the rate selected.

The Company, lacking knowledge of changes that may occur at any time in the Customer's operating conditions, does not assume responsibility that Customer will be served under the most favorable rate; nor will the Company make refunds covering the difference between the charges under the rate in effect and those under any other rate applicable to the same service.

Rates are normally established on a twelve-month basis and a Customer having selected a rate adapted to his service may not change to another rate within a twelve-month period unless there is a substantial change in the character or conditions of his service. A new Customer will be given reasonable opportunity to determine his service requirements before definitely selecting the most favorable rate therefor.

4. MONTHLY BILLS

Bills for service will be rendered monthly, unless otherwise specified. The term "month" for billing purposes will mean the period between any two consecutive readings of the meters by the Company, such readings to be taken as nearly as practicable every thirty days, but no less than 25 days and no more than 35 days.

Failure to receive a bill in no way exempts Customers from payment for electric service.

The Company makes a special effort to read all meters every month. Sometimes due to adverse weather conditions, dog hazards, damaged equipment, etc., it is not possible to obtain a meter reading and the bill may be estimated. Estimated bills are identified on the bill with an applicable code.

5. DISCONTINUANCE OF SERVICE

When bills for electric service are in arrears, or in case the Customer fails to comply with these Terms and Conditions, the Company will have the right to discontinue electric service to the Customer and to remove its property from the Customer's premises upon mailing notice to address to which the monthly bills are sent. There will be a charge for reconnecting the service to Customers whose service has been disconnected for non-payment of bills.

6. EXCLUSIVE SERVICE ON INSTALLATION CONNECTED TO COMPANY'S SYSTEM

Except as may be specifically permitted under tariffs governing the interconnection or provision of service to small power producers or cogenerators, standard electric rate schedules are based on exclusive use of Company's service.

Except in cases where the Customer has a contract with the Company for breakdown or standby service, no other electric light or power service will be used by the Customer on the same installation in conjunction with the Company's service, either by means of a throw-over switch or any other connection.

The Company will not be required to supply or continue to supply service to any Customer where a portion of Customer's service requirement is obtained from other sources, except when such service is covered by a contract.

The Customer will not sell the electricity purchased from the Company to any other customer, company, or person, and Customer will not deliver electricity purchased from the Company to any connection wherein said electricity is to be used off of the Customer's premises on which the meter is located.

7. CUSTOMER'S INSTALLATION

All wiring and other electrical equipment furnished by the Customer will be installed, operated, and maintained by the Customer at all times in conformity with good electrical practice and with the requirements of the constituted authorities and these Terms and Conditions. Where no public authorities have jurisdiction, Company, for Customer's protection, may require Customer to furnish Company a certificate from wiring electrician that Customer's installation conforms to the National Electrical Code and/or the National Electrical Safety Code. The Company does not assume responsibility for the design, operation, or condition of the Customer's installation.

Service will be delivered to Customer for each premise at one point of delivery to be designated by Company and to conform to Company's service standards. For mutual protection of Customer and Company, only authorized employees of Company are permitted to make and energize the connection between Company's service wire and Customer's service entrance conductors.

8. OWNER'S CONSENT TO OCCUPY

The Company shall have the right to install and maintain equipment in, over and under the Customer's property and shall have access to the Customer's premises for any other purpose necessary for supplying electric service to the Customer. In case the Customer is not the owner of the premises or of the intervening property between the premises and the Company's lines, the Customer will obtain from the property owner or owners the easements or right-of-way necessary to install and maintain in, over or under said premises all such

wires and electrical equipment as are necessary or convenient for supplying electric service to the Customer.

9. MOTOR INSTALLATIONS

For mutual protection of service to all customers, all motor installations will be as follows:

(a) All motors rated in horsepower up to and including 7-1/2 HP and individual air conditioning units with ratings of 65,000 BTUH (ARI rating) or less will be single phase, unless otherwise agreed to by the Company or served in conjunction with other larger three phase loads.

(b) All three phase motors will be equipped with approved starting equipment having low voltage release attachment and properly sized over-current protection in each of the three phases.

10. POWER FACTOR

The Company will not be required to furnish electric service to any Customer with low power factor equipment.

Where Customer has power or heating equipment installed that operates at low power factor, Customer, when requested to do so by the Company, will furnish, at his own expense, suitable corrective equipment to maintain a power factor of 90% lagging, or higher.

Customer will install and maintain in conjunction with any fluorescent lighting, neon lighting, or other lighting equipment having similar load characteristics, auxiliary or other

corrective apparatus that will correct the power factor of such lighting equipment to not less than 90% lagging.

<u>11. PROTECTION OF SERVICE</u>

The Company will not be obligated to serve any devices that have a detrimental effect upon the service rendered to other Customers or upon Company equipment. Where the Customer's use of such a device causes voltage fluctuation of the 60 Hertz wave, clipping of the current, or voltage wave - thereby producing harmonics or a cyclic pulsation between one and sixty Hertz (1 and 60 Hertz), Customer will furnish at his own expense necessary equipment to limit such voltage fluctuation, harmonics, or pulsations so that they will not interfere with other Customers or Company equipment. Where the interference cannot be corrected, the use of such devices must be discontinued.

<u>12. CONTINUOUS SERVICE</u>

The Company will endeavor to maintain continuous service but will not be liable for loss or damage caused by interruption or failure of service or delay in commencing service due to accident to or breakdown of plant, lines, or equipment, strike, riot, act of God, or causes reasonably beyond the Company’s control or due to shutdown for reasonable periods to make repairs to lines or equipment.

In like manner, should the Customer's premises be rendered wholly unfit for the continued operation of the Customer's plant or business, due to any of the causes mentioned above, the Customer's contract, if any, will thereupon be suspended until such time as the plant or premises will have been reconstructed, reconditioned, and reoccupied by the Customer for the purpose of his business.

13. INTERRUPTION OF SERVICE

The Company shall not be responsible in damages for any failure to supply electricity, or for interruption, or reversal of the supply, if such failure, interruption, or reversal is without willful default or negligence on its part, nor for interruptions, by under frequency relays or otherwise, to preserve the integrity of the Company's system or interconnected systems.

14. METERING

The electricity used will be measured by a meter or meters to be furnished and installed by the Company at its expense and bills will be calculated upon the registration of such meters. Meters include all measuring instruments. Meter installations will be made in accordance with the Company's service standards. Customer will provide a sufficient and proper space in a clean and safe place, accessible at all times and free from vibration, for the installation of Company's meters. Company will furnish all meter bases and/or metering enclosures to be installed by Customer on supply side of service equipment to be metered.

15. PROTECTION OF COMPANY'S PROPERTY AND ACCESS TO PREMISES

The Customer will protect the Company's property on the Customer's premises from loss or damage and will permit no one who is not an agent of the Company to remove or tamper with the Company's property.

The Company will have the right of access to the Customer's premises at all reasonable times for the purpose of installing, reading, inspecting, or repairing any meters or devices owned by Company or for the purpose of removing its property.

16. AGENTS CANNOT MODIFY AGREEMENT

No agent has power to amend, modify, or waive any of these Terms and Conditions, or to bind the Company by making any promises or representations not contained herein.

17. SUPERSEDE PREVIOUS TERMS AND CONDITIONS

These Terms and Conditions supersede all Terms and Conditions under which the Company has previously supplied electric service.

ARKANSAS PUBLIC SERVICE COMMISSION

Original	Sheet No. R-2.1	Sheet 1 of 2
Replacing:	Sheet No.	
Name of Company SOUTHWESTERN ELECTRIC POWER COMPANY		
Kind of Service: Electric	Class of Service: Residential	
Part III. Rate Schedule No. 2		
Title: RESIDENTIAL SERVICE		

PSC File Mark Only

AVAILABILITY

This schedule is available to residential customers for all domestic uses in residences, individual family apartments, and private rooming houses.

Where a portion of a residential unit is used for non-residential purposes, the appropriate non-residential service schedule is applicable to all uses of electric service. However, this rate schedule may be applied to the residential portion of such use provided the Customer's wiring is so arranged that the use of electric service for residential purposes can be metered separately from the non-residential use.

NET MONTHLY RATE

Customer Charge:	$10.00~~7.75~~ Per Meter, plus
Kilowatt-hour Charge:	May through September Billing Cycles $0.0702~~0442~~ each for the first 1,500 kilowatt-hours $0.0919~~0534~~ each for all additional kilowatt-hours October through April Billing Cycles $0.0610~~0358~~ per kilowatt-hour

AVAILABILITY

This schedule is available to residential customers for all domestic uses in residences, individual family apartments, and private rooming houses under one or both of the following conditions:

1. When a Customer regularly uses one or more Company-approved electric water heaters for all water heating requirements, notifies the Company, and has the installation verified by Company personnel, and/or,

2. When there is a permanently installed electric reverse cycle central system heat pump or a total of five kilowatts or more of permanently installed electric space heating devices which are in regular use for space heating purposes, and the Customer notifies the Company, and has the installation verified by Company personnel.

Where a portion of a residential unit is used for non-residential purposes, the appropriate non-residential service schedule is applicable to all uses of electric service. However, this rate schedule may be applied to the residential portion of such use provided the Customer's wiring is so arranged that the use of electric service for residential purposes can be metered separately from the non-residential use.

AVAILABILITY

This rate schedule is available to Industrial customers on an annual basis having loads of 500 Kilowatts of maximum demand or greater. Service will be provided at one point of delivery through one meter where facilities of adequate capacity and suitable phase and voltage are available.

NET MONTHLY RATE

Secondary Service:

On-Peak

$21.33~~11.65~~ for each Kilowatt of On-Peak Billing Demand in the month but not less than $1,066.50~~582.50~~

$0.1039~~0556~~ per kilowatt-hour

Off-Peak

$8.82~~3.25~~ for each Kilowatt of Off-Peak Billing Demand in the month, but not less than $441.00~~162.50~~

$0.0161~~0070~~ per kilowatt-hour

Primary Service:

On-Peak

$16.52~~11.00~~ for each Kilowatt of On-Peak Billing Demand in the month, but not less than $826~~550~~.00

$0.1005~~0554~~ per kilowatt-hour

Off-Peak

$6.43~~2.65~~ for each Kilowatt of Off-Peak Billing Demand in the month, but not less than $321.50~~132.50~~

$0.0142~~0068~~ per kilowatt-hour

Determination of Kilowatts of Billing Demand: Billing Demands will be separately maintained and applied for the On-Peak and Off-Peak periods. Billing Demands shall be calculated as follows:

On-Peak: The Kilowatts of On-Peak Billing Demand for each month in which On-Peak period rates are applicable shall be the average kilowatt load used by the customer during the 15-minute period of maximum use during that month's On-Peak period, but not less than 70% of the highest Kilowatts of Billing Demand established during the On-Peak period during the 11 preceding months. The Kilowatts of On-Peak Billing Demand shall be subject to the Power Factor Adjustment Clause.

Off-Peak: The Kilowatts of Off-Peak Billing Demand for each month shall be the average kilowatt load used by the Customer during the 15-minute period of maximum use during the Off-Peak period of that month, but not less than 70% of the highest Kilowatts of Billing Demand established during either the On-Peak or Off-Peak period during the 11 preceding months. The Kilowatts of Off-Peak Billing Demand shall be subject to the Power Factor Adjustment Clause.

Contract Minimum: The customer’s minimum bill shall not be less than the applicable charge for the contracted demand minimum plus the applicable Fuel and Tax Adjustments and in no event shall the contract demand minimum be less than 500 kilowatts.

Definition of Rating Periods:

On-Peak: The On-Peak hours shall be the hours from 1:01 p.m. through 7:00 p.m. during weekdays, excluding national holidays, during the months of July, August and September.

Off-Peak: The Off-Peak hours shall be all hours other than the On-Peak hours.

Capacity Charge for Highly Fluctuating Loads: Should the Customer operate equipment with highly fluctuating, intermittent, or abnormal characteristics that make it necessary for the Company to install special facilities to serve the Customer or to prevent disturbances to the service to other Customers, an additional Distribution Function charge of $1.58~~00~~ per month per kilovolt-ampere (kVA) or fraction thereof of transformer capacity installed by the Company to serve the Customer will be added to the Customer's bill.

Power Factor Adjustment: The Company reserves the right to determine the power factor of the Customer's installation served hereunder. Should the average lagging power factor during the month be determined to be below 90%, the Customer's Kilowatts of Billing Demand in each rating period will be adjusted by multiplying the Kilowatts of Billing Demand in each rating period by 90% and dividing by the average lagging power factor.

Primary Service: Applicable when electric service is provided at the Company's primary distribution voltage of 12.5 kV or higher and the Customer furnishes and maintains all necessary transformation equipment beyond this point.

Fuel Adjustment: In addition to all other charges, the amount of the Customer's bill will be adjusted by an amount per Kilowatt-hour calculated according to the formula in the Energy Cost Recovery Rider - Arkansas.

Tax Adjustment: In addition to all other charges, the amount of the Customer's bill will be increased by the proportionate part of any new tax or increased rate of tax in accordance with the Tax Adjustment Rider - Arkansas.

PAYMENT FOR SERVICE

Payment for Service Rider - See Rate Schedule 44.

TERMS AND CONDITIONS

Original	Sheet No. R-9.1	Sheet 1 of 6
Replacing:	Sheet No.	
Name of Company SOUTHWESTERN ELECTRIC POWER COMPANY		
Kind of Service: Electric	Class of Service: Pulp & Paper Mill	
Part III. Rate Schedule No. 9		
Title: PULP AND PAPER MILL SERVICE		

PSC File Mark Only

AVAILABILITY

This rate schedule is available to pulp and paper mills on an annual basis where facilities of adequate capacity and suitable phase and voltage are available. Service will be supplied at one point of delivery through one meter.

PULP AND PAPER MILL RATE

The Company shall render a bill and the Customer shall pay for electric service supplied each month an amount to be determined in the following manner:

$154,200~~105,000~~	Each month during the life of the contract for which the Customer will be allowed the use of up to 20,000 Kilowatts of Billing Demand determined as hereinafter provided, plus
$7.71~~5.25~~	Per Kilowatt of Billing Demand each month for the maximum number of Kilowatts of Billing Demand in any one month of the 12-month period ending with the current month that are in excess of 20,000 Kilowatts of Billing Demand, plus
$0.0103~~0070~~	Per kilowatt-hour for all kilowatt-hours supplied during the month

Determination of Kilowatts of Billing Demand: The Kilowatts of Billing Demand will be measured and will be the kilowatt load supplied during the 15-minute period of maximum use in the 12-month period ending with the current month, but never less than 20,000 kilowatts.

Power Factor Adjustment: In the event the power factor at the time of establishment of any 15-minute period of maximum use during the month is less than 90%, the Kilowatts of Billing Demand shall be adjusted by multiplying the Kilowatts of Billing Demand by 90% and dividing the result by the actual power factor at the time of said maximum use, and the result so obtained shall be Kilowatts of Billing Demand for the month, but never less than the maximum number of Kilowatts of Billing Demand in the 12-month period ending with the current month and, in any event, not less than 20,000 kilowatts.

Minimum Monthly Bill: The minimum monthly bill will be the maximum Kilowatts of Billing Demand charge during the 12-month period ending with the current month, but never less than the charge of $154,200~~105,000~~.00 for the first 20,000 Kilowatts of Billing Demand or less, and plus or minus the Fuel Adjustment charge plus the Tax Adjustment charge.

Annual Guarantee: It is mutually understood and agreed that in order for Company to be equitably compensated for permitting Customer to operate its plant generators in parallel with Company system the Customer will take or pay for, each year ending on October 31, a minimum of 2,000 hours times the maximum number of Kilowatts of Billing Demand previously determined, but not less than 40,000,000 kilowatt-hours per year.

Kilowatt-hours used during periods of turbine-generator overhaul, maintenance or emergency shall not be included in the Annual Guarantee.

Conjunctive Rate Provisions: When the Pulp and Paper Mill rate is used in conjunction with the Supplementary, Backup, Maintenance, and As-Available Standby Power Service rate, the Power Factor Adjustment and the following provisions for turbine-generator overhaul, emergency power, and maintenance power will not apply.

Turbine-Generator Overhaul: It is recognized that it will be necessary for the integrated operations of the turbine-generators of Customer and power service of the Company, that scheduled overhaul periods on the equipment of the Customer must be fitted into the similar schedules of the Company. During periods of agreed overhaul the Kilowatts of Billing Demand shall be based on actual kilowatts during such overhaul period but in no event less than maximum Kilowatts of Billing Demand previously established under normal operations. The Kilowatts of Billing Demand established during overhaul period will not be used to determine the maximum kilowatt load previously established.

Emergency Power: The Company recognizes that actual emergencies can occur to Customer's generating facilities and that Customer may desire assistance in supplying such loss of generating capability not to exceed 30 days for any one emergency.

The Company will, to the extent of facilities then available, make every reasonable effort to supply Customer's emergency. Customer agrees to correct its emergency conditions as soon as reasonably possible. An authorized representative of the Customer shall notify Company's system operations center's authorized representative at time of the beginning of the emergency, the cause and the expected duration thereof. The Customer's representative will also notify Company at the time the emergency ends. Such notices shall be confirmed by letter containing the same information to the authorized representative within 24 hours of the start and end of the emergency.

ARKANSAS PUBLIC SERVICE COMMISSION

Original	Sheet No. R-9.4	Sheet 4 of 6
Replacing:	Sheet No.	
Name of Company SOUTHWESTERN ELECTRIC POWER COMPANY		
Kind of Service: Electric	Class of Service: Pulp & Paper Mill	
Part III. Rate Schedule No. 9		
Title: PULP AND PAPER MILL SERVICE		

PSC File Mark Only

The Customer shall pay the Company for all emergency load and energy supplied on the following basis:

$9.30~~6.66~~	per Kilowatt of Billing Demand in excess of the Determination of Kilowatts of Billing Demand under normal firm load conditions or a minimum of 20,000 kilowatts, plus
$0.02230~~0152~~	per kilowatt-hour plus Fuel Adjustment charge or 110% of Company's highest kilowatt-hour cost either purchased or generated during the time of the emergency, whichever is greater. The kilowatt-hours will be the sum of the kilowatt-hours determined by multiplying the Maximum demand in each hour of the emergency that is in excess of the determination of Kilowatts of Billing Demand under normal firm load conditions times one hour.

Maintenance Power: To enable the Customer to repair and maintain the operating efficiency of its facilities, the Customer may purchase additional power referred to as "Maintenance Power" from the Company. Maintenance Power shall be arranged in advance by telephone

requests to the Company's system operation center. Such Maintenance Power will be supplied, provided the Company is reasonably certain that a system peak will not be created during this period and providing the Company in its judgment has adequate capacity in its own system to supply the requested demand. Maintenance Power requests will be for a limited period of time as specified by Company. Maintenance Power will be extremely limited or unavailable during the months of June, July, August and September. Company reserves the right to terminate Customer's purchase of Maintenance Power due to changes within this system with one-hour notice to Customer. Maintenance Power will be provided only during periods when the Customer is receiving firm power from the Company. The Customer will pay for such maintenance power on whichever of the following basis is applicable:

Maintenance Power - Used only from 11:00 p.m. on Fridays until 7:00 a.m. on Mondays and from 12:01 a.m. on holidays to 7:00 a.m. the following morning.

$3.85~~2.62~~	per Kilowatt of Billing Demand in excess of the Determination of Kilowatts of Billing Demand under normal firm load conditions or a minimum of 20,000 kilowatts, plus
	the normal charges per kilowatt-hour as provided in the rate schedule.

ARKANSAS PUBLIC SERVICE COMMISSION

Name of Company SOUTHWESTERN ELECTRIC POWER COMPANY

Kind of Service: Electric Class of Service: Pulp & Paper Mill

Part III. Rate Schedule No. 9

Title: PULP AND PAPER MILL SERVICE

PSC File Mark Only

Maintenance Power - Used at any time in addition to or including 11:00 p.m. on Fridays until 7:00 a.m. on Mondays and from 12:01 a.m. on holidays to 7:00 a.m. the following morning.

$7.68~~5.23~~ per Kilowatt of Billing Demand in excess of the Determination of Kilowatts of Billing Demand under normal firm load conditions or a minimum of 20,000 kilowatts, plus

the normal charges per kilowatt-hour as provided in the rate schedule.

The Kilowatts of Billing Demand created during an agreed to use of Maintenance Power in excess of the Determination of Kilowatts of Billing Demand under normal firm load conditions will not be used to determine the maximum kilowatt load previously established.

Adjustments:

Fuel Adjustment: In addition to all other charges, the amount of the Customer's bill will be adjusted by an amount per kilowatt-hour calculated according to the formula in the Energy Cost Recovery Rider - Arkansas.

Tax Adjustment: In addition to all other charges, the amount of the Customer's bill will be increased by the proportionate part of any new tax or increased rate of tax in accordance with Tax Adjustment Rider - Arkansas.

PAYMENT FOR SERVICE

Payment for Service Rider - See Rate Schedule 44.

TERMS AND CONDITIONS

Service will be furnished under the Company's Standard Terms and Conditions.

ARKANSAS PUBLIC SERVICE COMMISSION

AVAILABILITY

This schedule is available on an annual basis for lighting and power to municipal installations in communities where the Company has a franchise for the generation, distribution, and sale of electricity, together with a standard contract for the operation of a street lighting system when the Customer purchases its entire lighting and power requirements from the Company.

NET MONTHLY RATE

~~Customer Charge:~~ ~~$5.35 per meter, plus~~

~~Kilowatt-hour Charge:~~ ~~May through September Billing Cycles~~
~~$0.0405 per kilowatt-hour~~

~~October through April Billing Cycles~~
~~$0.0360 per kilowatt-hour~~

~~EFFECTIVE CYCLE 1, MAY 2011~~

Customer Charge: $7.36~~5.35~~ per meter, plus

Kilowatt-hour Charge: May through September Billing Cycles
$0.0557~~0405~~ per kilowatt-hour

October through April Billing Cycles
$0.0494~~0359~~ per kilowatt-hour

Minimum Monthly Bill: The Minimum Monthly Bill will be $1.76~~28~~ per Kilowatt of Maximum Demand established during the 11 preceding months, but not less than $7.36~~5.35~~. For Minimum Monthly Bills rated in horsepower, each horsepower will be considered equal to 3/4 kilowatt.

Determination of Kilowatts of Maximum Demand: The Kilowatts of Maximum Demand for each month will be the average kilowatt load used by the Customer during the 15-minute

period of maximum use during the month. The Kilowatts of Maximum Demand will be subject to the Power Factor Adjustment Clause.

<u>Contract Minimum</u>: When a contract minimum is applicable, the Customer's minimum monthly bill will not be less than the applicable charge for the contracted demand minimum plus the applicable Fuel and Tax Adjustments.

ARKANSAS PUBLIC SERVICE COMMISSION

Capacity Charge for Highly Fluctuating Loads: Should the Customer operate equipment with highly fluctuating, intermittent, or abnormal characteristics that make it necessary for the Company to install special facilities to serve the Customer or to prevent disturbances to the service to other Customers, an additional Distribution Function charge of $1.58~~00~~ per month per kilovolt-ampere (kVA) or fraction thereof of transformer capacity installed by the Company to serve the Customer will be added to the Customer's bill.

Power Factor Adjustment: The Company reserves the right to determine the power factor of the Customer's installation served hereunder. Should the average lagging power factor during the month be determined to be below 90%, the Customer's Kilowatts of Maximum Demand will be adjusted by multiplying the Kilowatts of Maximum Demand by 90% and dividing by the average lagging power factor.

Adjustments:

Fuel Adjustment: In addition to all other charges, the amount of the Customer’s bill will be adjusted by an amount per kilowatt-hour calculated according to the formula in the Energy Cost Recovery Rider - Arkansas.

Tax Adjustment: In addition to all other charges, the amount of the Customer's bill will be increased by the proportionate part of any new tax or increased rate of tax in accordance with the Tax Adjustment Rider - Arkansas.

PAYMENT FOR SERVICE

Payment for Service Rider - See Rate Schedule 44.

Net Monthly Rate For Units Not Listed Above:
The Net Monthly Rate for lighting units not listed above will be calculated by the Company using the following formula:

Monthly kWh used by the lighting unit X $0.036050~~0266~~ = Net Monthly Rate rounded to the nearest $0.01, but not less than $1.00.

Where: Monthly kWh used by the lighting unit = ((Input watts rounded to the nearest whole number X 4,000 hours) / 1,000) / 12, rounded to the nearest whole number.

Adjustments:

Fuel Adjustment: In addition to all other charges, the amount of the Customer's bill will be adjusted by an amount per kilowatt-hour calculated according to the formula in the Energy Cost Recovery Rider - Arkansas.

Tax Adjustment: In addition to all other charges, the amount of the Customer's bill will be increased by the proportionate part of any new tax or increased rate of tax in accordance with the Tax Adjustment Rider - Arkansas.

AVAILABILITY

This schedule is available for electric service used in the operation of publicly-owned highway lighting systems utilizing luminaries mounted at heights not exceeding forty (40) feet above ground level and where the Company has no investment in facilities beyond the delivery point of service.

TYPE OF SERVICE

The Company will make available single phase, secondary voltage electric service from dusk to dawn at Customer points of service adjacent to Company lines of adequate capacity and suitable voltage.

The Customer will own, install, operate, and maintain its highway lighting system from the point of service connection with the Company lines. The Company will be responsible for relamping and will replace glassware to be furnished by Customer.

The Customer will provide the Company, at no cost to the Company, any permit necessary to allow the Company the right to use highway right-of-way for maintenance of the system.

Title: PRIVATE LIGHTING (no new installations allowed)		PSC File Mark Only

AVAILABILITY

This schedule is available for existing private lighting systems only with no new installations allowed. As existing mercury vapor fixtures and/or ballasts need to be replaced on or after April 1, 2007, the Customer will have the option to transfer to another open tariff offering.

TYPE OF SERVICE

The Company will furnish, install, own, operate, and maintain complete luminaire units of approved design with an automatic control device for lights to burn from dusk to dawn for an agreed upon term of years to continue thereafter in automatically recurring yearly periods unless and until terminated at the end of any yearly period by 30 days prior notice from either party to the other.

The Customer agrees to provide all required right-of-way together with tree trimming permits and to protect the Company's equipment from damage.

The Company shall have the right to build pole line and install equipment upon the Customer's property and shall have access to the Customer's premises for any other purpose necessary for the performance of this service. The facilities installed by the Company will remain the property of the Company and may be removed by Company upon discontinuance of service.

The Company will exercise reasonable diligence at all times to furnish Customer service as contracted for, but will not be liable in damages for any interruption, deficiency or failure of service. The Company reserves the right to interrupt the service when such interruption is necessary for repairs to its lines or equipment.

Title: Rider C-2 Providing For Commercial/Industrial Seasonal Electric Space Heating		PSC File Mark Only

AVAILABILITY

This rider is available to Customers receiving electric service under the General Service (GS) or Lighting and Power Service (LP) Schedules having in regular use, permanently installed for heating either an electric reverse cycle central system heat pump or a total of 5 Kilowatts or more of electric devices used for comfort space heating. The installation must be verified by Company personnel.

Service under this rider is subject to all provisions of the applicable rate schedule to which it applies, except those provisions specifically modified herein.

APPLICABILITY

This rider will be applicable in any year when Company's May through September maximum monthly system peak demand exceeds the preceding October through April maximum monthly system peak demand by 20%.

KILOWATT CHARGE

During October through April billing cycles:

The Kilowatt charge will be computed using the Kilowatts of Billing Demand, which will be measured and will be the average kilowatt load used by the Customer during the 15-minute period of maximum use during the current month, but not to exceed the Kilowatts of Billing Demand established during the immediately preceding May through September billing cycles. However, the measured Kilowatts of Billing Demand for billing purposes will not be reduced by an amount greater than 60% of the kW load of the devices used for comfort space heating.

ARTICLE I:

Availability
This tariff schedule provides for the Company to pass directly to its customers within a municipality the proportionate part of any franchise or street rental taxes levied or imposed on the Company by that municipality on gross revenues from those customers.

Application
There shall be shown as a separate line item on each monthly bill for electric service to customers located within a municipality the amount of any street rental or franchise tax imposed or levied on the Company by the municipality on the gross revenues derived from the sale of electric power and energy to customer within the city limits of such municipality.

ARTICLE II:

Availability
In addition to all other charges, the amount of the Customer's bill will be increased by applicable sales taxes and other charges made effective by duly constituted authorities having jurisdiction.

Application
Each monthly bill for electric service to customers will include the amount of any sales tax and other charges levied or imposed by duly constituted authorities having jurisdiction over the customer for their electric usage.

Replacing:	Sheet No.	
Name of Company SOUTHWESTERN ELECTRIC POWER COMPANY		
Kind of Service: Electric	Class of Service: All	
Part III. Rate Schedule No. 27		
Title: ENERGY COST RECOVERY RIDER (RIDER ECR)		PSC File Mark Only

RECOVERY OF ENERGY COST

Energy Cost Recovery Rider ("Rider ECR ") defines the procedure by which the "Energy Cost Rate" of Southwestern Electric Power Company ("SWEPCO" or "Company") shall be initially established and periodically redetermined. The Energy Cost Rate shall recover the Company's net fuel and purchased energy cost, as defined in this Rider ECR.

ENERGY COST RATE

The Energy Cost Rate shall be redetermined annually through filings made in accordance with the provisions of Annual Redetermination of this Rider ECR. The Energy Cost Rate shall be applied to each customer's monthly billing energy (kWh). For electric service billed under applicable rate schedules for which there is no metering, the monthly usage shall be estimated by the Company and the Energy Cost Recovery Rider shall be applied. The Energy Cost Rate shall be calculated to the nearest $0.000001 and when applied to customers' bills shall be rounded to the nearest cent.

ANNUAL REDETERMINATION

On or before March 15 of each year the Company shall file a redetermined Energy Cost Rate with the Arkansas Public Service Commission (APSC or Commission). The redetermined Energy Cost Rate shall be determined by application of the Energy Cost Rate Formula set out in Attachment A of this Rider ECR. Each such revised Energy Cost Rate shall be filed in the proper underlying docket and shall be accompanied by a set of workpapers sufficient to fully document the calculations of the revised Energy Cost Rate.

THIS SPACE FOR PSC USE ONLY

The redetermined Energy Cost Rate shall reflect the projected Energy Cost for the 12-month period commencing on April 1 of each year ("Projected Energy Cost Period") together with a true-up adjustment reflecting the over-recovery or under-recovery of the Energy Cost for the 12-month period ended December 31 of the prior calendar year ("Historical Energy Cost Period"). The Energy Cost Rate so determined shall be effective for bills rendered on and after the first billing cycle of April of the filing year and shall then remain in effect for twelve (12) months, except as otherwise provided for below.

The annual update shall include a report of the following:

1. detailed fuel and purchased energy costs by FERC account and month for the historical year;
2. identify and explain changes from the prior year for major cost components of the ECR Rider, including fuel expense, purchased energy expense, off-system sales margins, etc., of 10% or more;
3. identify changes in accounting procedures affecting fuel and purchased power costs, such as changes in FERC account number classifications and changes in costing methodologies;
4. identify changes in fuel and purchased power procurement practices;
5. identify the monthly level of coal inventory in days and tons for the historical year;
6. identify the average price per unit for each fuel type and purchased power for the historical year;

7. identify revisions to the AEP System Integration Agreement affecting fuel and purchased energy costs;

8. identify and discuss changes in environmental regulations affecting fuel and purchased energy costs and explain the Company's plans for compliance;

9. identify plant outages for the historical year and explain the cause(s) of the outages; and

10. provide the summation of all day-ahead and real-time transactions, centered around the SPP energy market, and forward transactions, which will be made outside the SPP energy market beyond the day-ahead time horizon, including total shareholder off-system sales margin allocations, for each month in the preceding calendar year.

ADJUSTMENTS

If prior to the annual redetermination of the Energy Cost Rate, Staff or the Company becomes aware of an event that is reasonably expected to occur and/or has occurred which will materially impact the Company's Energy Cost, either the Staff or the Company may propose an adjustment to the Energy Cost Rate Formula set out in Attachment A of this Rider ECR. Furthermore, should a cumulative over-recovery or under-recovery balance arise during any Rider Cycle which exceeds ten percent (10%) of the Historical Energy Cost Period, then either the APSC General Staff ("Staff") or the Company may propose an interim revision to the then currently effective Energy Cost Rate.

PAYMENT FOR SERVICE

Payment for Service Rider – See Rate Schedule 44.

ATTACHMENT A

ENERGY COST RATE FORMULA

ECR = ENERGY COST RATE

$$ECR = \frac{(TUA + (PEC * JAF) + DEFCON + M)}{PES} * LCF$$

WHERE,

$$TUA = \sum_{j=1}^{12} \left(\left(EC_j * JAF \right) - \left(RR_j - PTU_j \right) \right) + CC_j$$

CCR = CARRYING CHARGE RATE (4)

$DAYS_j$ *= NUMBER OF DAYS IN MONTH j OF THE HISTORICAL ENERGY COST PERIOD*

PEC = *ESTIMATED ENERGY COST FOR THE PROJECTED ENERGY COST PERIOD (5)*

$$PEC = \sum_{j=1}^{12} EC_j$$

M = *$7,487 OF PROJECTED FINAL MINE CLOSING AND RECLAMATION COSTS FOR SWEPCO'S PIRKEY POWER PLANT*

LCF = *LOSS CORRECTION FACTOR (6)*

PES = *PROJECTED SALES (kWh) SUBJECT TO THIS RIDER ECR FOR THE PROJECTED ENERGY COST PERIOD*

DEFCON=AMORTIZATION OF DEFERRED CONSUMABLES ASSOCIATED WITH APSC DOCKET NO. 14-080-U

ATTACHMENT A (continued)

(1) The Historical Energy Cost Period is the calendar year immediately preceding the filing year.

(2) The margins from off-system sales transactions shall be treated in the following manner:

Customers shall be credited with 100% of the off-system sales margins allocated to SWEPCO's Arkansas retail jurisdiction up to $1,200,000 on an annual basis. For any off-system sales margins allocated to SWEPCO's Arkansas retail jurisdiction above $1,200,000, 90% of such margins shall be credited to customers and 10% of such margins shall be retained by the shareholders. Arkansas retail customers shall be shielded from any overall net annual loss from off-system sales transactions that may occur. In any year when the net margins from off-system sales result in a loss, such losses shall be borne by SWEPCO.

<u>Treatment of Affiliated Sales Margins</u>
Margins allocated to SWEPCO's Arkansas retail jurisdiction resulting from capacity sales will be reflected in the calculation of the Energy Cost Recovery Rider.

(3) The jurisdictional allocation factor will be derived in a two step process. First, for each jurisdiction the voltage level kWh at the meter will be divided by the most recent energy loss factors to determine the voltage level kWh at generation. Second, the Arkansas jurisdictional kWh at generation will be divided by the total kWh at generation for all jurisdictions less the Cleco PSSA kWh to develop the Arkansas jurisdictional allocation factor.

ARKANSAS PUBLIC SERVICE COMMISSION

ATTACHMENT A (continued)

(4) The Carrying Charge Rate shall be the Commission authorized interest rate on customer deposits.

(5) The Estimated Energy Costs for the Projected Energy Cost Period is equal to the energy costs for the Historical Energy Cost Period (the calendar year immediately preceding the filing year). Should there be unusual circumstances associated with any Projected Energy Cost or Projected Energy Cost Period either the Company or the Staff may propose use of a Projected Energy Cost (PEC variable) different from that defined by this formula.

(6) The loss correction factors will be determined by dividing the sum of the metered kWh sales for the Arkansas jurisdiction by the sum of the sales at the generation level for the Arkansas jurisdiction. This ratio of sales to generation is known as the “composite loss factor” for the Arkansas jurisdiction. The LCF for each voltage level is determined by dividing the service voltage loss factor by the composite loss factor.

(7) The deferred consumable balance under APSC Docket No. U-14-080-U as of the (insert date of new base rates) amortized over three years.

ATTACHMENT A (continued)

(8) Fuel Expense charged to Account 501 associated with the lignite supply to the Dolet Hills Power Plant will be treated in the following manner:

Treatment of the Dolet Hills Lignite Company Expenses

SWEPCO will be allowed to recover the costs associated with the Dolet Hills Lignite Company (DHLC) in the following manner:

Account 501 shall include costs associated with the DHLC mining operations in Month j of the Historical Energy Cost Period. DHLC services shall be provided at cost with the financing costs being calculated using the authorized rate of return on rate base most recently approved for SWEPCO by the APSC in a non-appealable final order on DHLC assets rather than DHLC's actual rate of return.

Production costs for DHLC shall be subject to the same ratemaking adjustments as applied to SWEPCO in a general rate case. Ratemaking adjustments shall include, but not be limited to:

- disallowance of charitable contributions and membership dues in civic organizations;
- disallowance of the portion of trade association memberships related to lobbying expenses and other disallowable costs;
- disallowance of expenses related to public relations advertising, image advertising, marketing, and corporate sponsorships;

ARKANSAS PUBLIC SERVICE COMMISSION

Original	Sheet No. R-27.11 Sheet 11 of 12	
Replacing:	Sheet No.	
Name of Company SOUTHWESTERN ELECTRIC POWER COMPANY		
Kind of Service: Electric	Class of Service: All	
Part III. Rate Schedule No. 27		
Title: ENERGY COST RECOVERY RIDER (RIDER ECR)		PSC File Mark Only

ATTACHMENT A (continued)

- 50/50 sharing of directors' and officers' liability insurance expense between ratepayers and shareholders;
- disallowance of long-term incentive compensation related to stock performance;
- 50/50 sharing of incentive compensation related to financial incentives for operations between ratepayers and shareholders; and
- disallowance or sharing of similar costs allocated to DHLC by SWEPCO or American Electric Power Service Corporation.

SWEPCO shall provide a report with its annual Rider ECR filing that identifies the total costs reflected in invoices from DHLC and the ratemaking adjustments made to arrive at the amounts included in Fuel Expense for the Historical Energy Cost Period in sufficient detail to identify the items disallowed.

(9) *AR* ADJ_j as described in the definition above is an adjustment to Arkansas jurisdictional share of SWEPCO's total fuel cost for month (j). The detailed description of the adjustment effective with the implementation of the SPP IM is provided in the Direct Testimony and Exhibits of Naim Hakimi APSC Docket No. 14-022-TF, Page 9, Line 8 through Page 12, Line 6 and Exhibit ANH-4. The adjustment removes the Turk plant fuel cost (including related NO_x and SO_2 emissions costs) and associated revenues from sale of the Turk plant output in the SPP market from the Energy Cost.

ATTACHMENT A (continued)

(10) The recovery of energy costs associated with long-term renewable energy resources must be approved by the Commission prior to the recovery of costs through Rider ECR.

(11) No charges for activated carbon, calcium bromide, hydrated lime, or urea may be passed through the rider to customers unless the Commission has approved the prudence of the particular environmental controls project at issue or the Commission has otherwise approved the recovery of the costs for such a project in retail rates. Pursuant to Order No. 1 of Docket No. 14-080-U, SWEPCO shall defer the cost of activated carbon, calcium bromide, hydrated lime, and urea associated with the Dolet Hills and Pirkey power plants for serving Arkansas retail load incremental to the amount of chemical costs embedded in Arkansas retail rates without carrying charges.

AVAILABILITY

This schedule is available for Supplementary, Backup, Maintenance and As-Available Standby Power to customers that own and operate power production equipment or other source of power not held primarily for emergency use and that have a separate agreement for interconnection to Company's system stating those terms and conditions.

Service will be supplied at one point of delivery at locations where facilities of adequate capacity and suitable phase and voltage are available. Service may be provided on the Company's standard Contract for Electric Service, containing the Standard Terms and Conditions, stating the rate applicable to Supplementary Power and Energy, the Supplementary Power Contract Demand, the Backup Power Contract Demand, the Maintenance Power Contract Demand and the As-Available Standby Power Contract Demand that the Company is obligated to provide. The rate applicable to Supplementary Power and all energy is limited to the Lighting and Power Service Rate (LP), the Large Lighting and Power Service Rate (LLP), or the Pulp and Paper Mill Rate (P&PM), whichever is applicable. When used in conjunction with the Pulp and Paper Mill Rate, the Pulp and Paper Mill Rate will apply only to the Supplementary Power and all energy.

DEFINITIONS

Supplementary Power is electric capacity supplied by the Company, regularly used by a Customer in addition to that which the Customer's generation facility regularly generates. The Supplementary Power Billing Demand shall be determined in the Supplementary Power Charge section of this tariff.

Maintenance Power is electric capacity supplied by the Company during scheduled outages of the Customer's facility to replace capacity which is ordinarily generated by the Customer's own generation. This capacity when supplied during each of the months of October through May to Customers with total generating capacity of less than 5,000 kW shall be considered to be scheduled and approved by the Company as Maintenance Power until such time as the aggregate generation of all customer owned sources of power which are connected to the Company exceed 1% of the Company's peak system load. Customers with total generation capacity of 5,000 kW or greater must obtain written Company approval at least seven days in advance for a scheduled outage during the months of October through May or the use of capacity will be considered to be Supplementary Power. Maintenance Power will be supplied at the sole discretion of the Company, provided the

ARKANSAS PUBLIC SERVICE COMMISSION

Company is reasonably certain that a system peak will not be created during this period and providing the Company, in its judgment, has adequate capacity in its own system to supply the requested demand. Maintenance Power will normally not be available during the months of June through September.

Maintenance Power Demand is the Kilowatts of Billing Demand that exceed the Supplementary Power Billing Demand during the period approved for maintenance power usage. If As-Available Standby Power has been requested during this period, then for billing purposes, the Maintenance Power Demand will be equal to the Maintenance Power Contract Demand.

Backup Power is electric capacity supplied by the Company during an unscheduled outage of the Customer's facility to replace capacity ordinarily provided by the Customer's own generation. However, any capacity supplied by the Company during an unscheduled outage of the Customer's facility to replace that which is ordinarily provided by the Customer's own generation during the months of June through September shall be considered as Backup Power, and/or As-Available Standby Power if approved by the Company. The Customer shall notify the Company's system dispatcher as soon as reasonably possible when requesting the initiation and termination of Backup Power. The customer shall also provide written documentation to the Company within 24 hours or on the first working day following a weekend or holiday confirming the date and time of both the initiation and termination of Backup Power.

Backup Power Demand is the Kilowatts of Billing Demand that exceed the Supplementary Power Billing Demand during the period of Backup Power usage. If As-Available Standby Power has been requested during this period, then for billing purposes, the Backup Power Demand will be equal to the Backup Power Contract Demand.

Kilowatts of Billing Demand for each month will be the average kilowatt load used by the Customer during the 15-minute period of maximum use during the month.

As-Available Standby Power is electric capacity supplied by the Company during a scheduled or unscheduled outage of the Customer's facility to replace capacity which is provided by the Customer's own generation. Customer may request As-Available Standby Power at any time subject to the conditions specified herein. However, the Customer must request and receive prior approval from Company each time As-Available Standby Power is required and must also notify the Company

when As-Available Standby Power is to be discontinued. When Customer experiences a forced outage of his power production facilities, Customer must request approval from Company's dispatcher for continued use of As-Available Standby Power after the forced outage has occurred and use of As-Available Standby Power has begun. This provision for after-the-fact request and approval shall apply only if Customer has contacted the Company's system dispatcher for approval as soon as reasonably possible. All requests for and terminations of As-Available Standby Power shall be confirmed in writing to the Company by the Customer within 24 hours of the request or termination. As-Available Standby Power will be available solely at the discretion of the Company. At the request of Company, the Customer will cease use of As-Available Standby Power within ten (10) minutes after notification from the Company that approval for continued use of that As-Available Standby Power is denied. Use of As-Available Standby Power will be subject to immediate interruption for emergency system conditions.

As-Available Standby Power Demand is the kilowatts of capacity requested by the Customer. This capacity is requested in addition to any capacity associated with Supplementary, Backup, or Maintenance Power during the period of Backup or Maintenance Power usage.

MONTHLY RATE

The monthly billing shall be the sum of the following:

(I) Supplementary Power Charge
(II) Backup Power Charge and Maintenance Power Charge
(III) As-Available Standby Power Charge
(IV) Energy Charge

(I) SUPPLEMENTARY POWER CHARGE

The applicable rate schedule for supplementary power, with modifications to the provisions for the Determination of Kilowatts of Billing Demand and the Power Factor Adjustment, as specified herein, will be applied to any and all electric capacity actually supplied by the Company during the month, except for any Maintenance Power Demand, any Backup Power Demand, and any As-Available Standby Power Demand.

ARKANSAS PUBLIC SERVICE COMMISSION

Original	Sheet No. R-28.4 Sheet 4 of 8	
Replacing:	Sheet No.	
Name of Company SOUTHWESTERN ELECTRIC POWER COMPANY		
Kind of Service: Electric	Class of Service: As Applicable	
Part III. Rate Schedule No. 28		
Title: Supplementary, Backup, Maintenance, and As-Available Standby Power Service		PSC File Mark Only

Determination of Supplementary Power Billing Demand

When neither Backup, Maintenance, nor As-Available Standby Power are being used, the Supplementary Power Billing Demand will be the Kilowatts of Billing Demand established by the Customer, subject to the Kilowatts of Billing Demand provisions specified in the Lighting and Power Rate, the Large Lighting and Power Rate, or the Pulp and Paper Mill Rate, whichever is applicable. When Backup, Maintenance, or As-Available Standby Power is taken in conjunction with Supplementary Power, the Supplementary Power Billing Demand will be the greatest of:

A. Supplementary Power Contract Demand as specified in the Contract for Electric Service;
B. The Kilowatts of Billing Demand less the Backup Power Contract Demand when Backup Power is being used, less the Maintenance Power Contract Demand when Maintenance Power is being used, less the As-Available Standby Power Demand requested;
C. Supplementary Power Billing Demand of the current month;
D. Seventy percent (70%) of the highest Supplementary Power Billing Demand of the previous eleven months for customers receiving service under the LP rate schedule, eighty percent (80%) of the highest Supplementary Power Billing Demand of the previous eleven months for customers receiving service under the LLP rate schedule, or the highest Supplementary Power Billing Demand in the 12-month period ending with the current month for customers receiving service under the P&PM rate schedule.

(II) BACKUP POWER CHARGE AND MAINTENANCE POWER CHARGE

The monthly billing for Backup Power and Maintenance Power shall be the sum of (A) the Backup Power Charge, plus (B) the Maintenance Power Charge. However, this amount shall not be less than (C) the Minimum Monthly Charge for Backup Power and Maintenance Power.

(A) BACKUP POWER CHARGE

Company agrees to supply Backup Power up to but not exceeding the Backup Power Contract Demand. The Backup Power Contract Demand shall not exceed the nameplate rating of the Customer's generating unit(s) unless the Customer can demonstrate a higher capability for its unit(s). The Backup Power Contract Demand can be adjusted annually with written request by the Customer and with written consent of the Company.

ARKANSAS PUBLIC SERVICE COMMISSION

Original	Sheet No. R-28.5	Sheet 5 of 8
Replacing:	Sheet No.

Kind of Service: Electric	Class of Service: As Applicable	
Part III. Rate Schedule No. 28		
Title: Supplementary, Backup, Maintenance, and As-Available Standby Power Service		PSC File Mark Only

Daily Rate for Backup Power
The Daily Rate for Backup Power will be the Kilowatts of Backup Power Demand times the applicable rate:

Pulp & Paper Mill Transmission Service	$0.31~~22~~
Large Lighting & Power Transmission Service	$0.31~~22~~
~~Large Lighting & Power Primary Service~~	~~$0.28~~
Lighting & Power Primary Service	$0.46~~28~~
Lighting & Power Secondary Service	$0.50~~30~~

(B) MAINTENANCE POWER CHARGE
The Company agrees to supply Maintenance Power up to but not exceeding the Maintenance Power Contract Demand. Maintenance Power Contract Demand shall not exceed the nameplate rating of the Customer's generating unit(s) unless Customer can demonstrate a higher capability for its unit(s). The Maintenance Power Contract Demand can be adjusted annually with written request by the Customer and with written consent of the Company. Upon approval by the Company, Maintenance Power may be scheduled for a total of three occurrences in a calendar year during the months of January through May and October through December for each of the Customer's generating unit(s) provided Customer provides the Company at least seven days prior notice of intent to perform maintenance. In the event maintenance exceeds the scheduled time period provided by the Customer and agreed to by the Company or exceeds a maximum of 30 days per generating unit per calendar year, unless it is agreed to extend Maintenance Power or supply Backup Power, by written request by the Customer and written consent of the Company, such excess use of capacity will be billed as Supplementary Power.

Pulp & Paper Mill Transmission Service	$0.68~~46~~
Large Lighting & Power Transmission Service	$0.68~~46~~
~~Large Lighting & Power Primary Service~~	~~$1.27~~
Lighting & Power Primary Service	$2.11~~1.27~~
Lighting & Power Secondary Service	$2.22~~1.32~~

(III) AS-AVAILABLE STANDBY POWER CHARGE
The Company agrees to supply As-Available Standby Power up to but not exceeding the As-Available Standby Power Contract Demand. The As-Available Standby Power Contract Demand shall not exceed the nameplate rating of the Customer's generating unit(s) unless the Customer can demonstrate a higher capability for its unit(s). The As-Available Standby Power Contract Demand can be adjusted annually with written request by the Customer and with written consent of the Company.

Monthly Rate for As-Available Standby Power
The monthly rate for As-Available Standby Power will be the As-Available Standby Power Demand times the applicable rate:

Pulp & Paper Mill Transmission Service	$0.47~~32~~
Large Lighting & Power Transmission Service	$0.47~~32~~
~~Large Lighting & Power Primary Service~~	~~$1.18~~
Lighting & Power Primary Service	$1.96~~1.18~~
Lighting & Power Secondary Service	$2.04~~1.21~~

ARKANSAS PUBLIC SERVICE COMMISSION

(IV) ENERGY CHARGE

The monthly rate for all energy used during the month will be the kilowatt~~-~~hour charge as set forth in the Lighting and Power Rate, Large Lighting and Power Rate, or Pulp and Paper Mill Rate, whichever is applicable.

Power Factor Adjustment - Kilovar Charge

The kilovars of Reactive Demand will be recorded each month by the Company and will be the average kilovars used by the Customer during the 15-minute period of maximum kilovar use during the month. A Generation Function Charge of $0.54~~34~~ per month shall be made for each Kilovar of Reactive Demand exceeding 50% of the Kilowatts of Billing Demand.

PAYMENT FOR SERVICE

Payment for Service Rider - See Rate Schedule 44.

TERMS AND CONDITIONS

Service provided under the terms of this tariff will be furnished under the Company's Standard Contract containing the Standard Terms and Conditions and will be recognized as an exemption to the Exclusive Service Clause of the Company's Standard Terms and Conditions.

Title: CHARGES RELATED TO CUSTOMER ACTIVITY		PSC File Mark Only

TERMS AND CONDITIONS

Services under this tariff are provided in accordance with the Company's Standard Terms and Conditions.

CHARGES RELATED TO CUSTOMER ACTIVITY

Customer Account Record Statement (General Service Rule (GSR) 2.04.A.)
The Company will charge a fee of: -- No Charge
when a customer or any authorized party requests a statement of the customer's account record as described by GSR 7.02.

Energy Consumption Statement (GSR 2.04.B.)
The Company will charge a fee of: -- No Charge
when a customer or any authorized party requests a statement of the customer's energy consumption for the preceding 13 months.

Deposit From Applicant (GSR 4.01.A. & B.)
The Company may require a deposit from any applicant to guarantee payment for service, subject to the conditions of GSR 4.01 in Subsections A. & B.

Deposit From Landlord (GSR 4.01.A. & B.(1))
The Company may require a deposit when an applicant for residential service qualifies as a landlord as defined in the APSC General Service Rules. The amount of the deposit will be calculated in accordance with GSR 4.01.B(1).

Deposit From Customer (GSR 4.02.A. & B.)
The Company may require a deposit from a customer when that customer meets the criteria in GSR 4.02.A.

The amount of the deposit will be calculated in accordance with GSR 4.02.B.

ARKANSAS PUBLIC SERVICE COMMISSION

Processing Fee For Levelized Billing Withdrawal (GSR 5.10.C(3))
The Company will require payment of a processing fee of: -------------------------- No Charge
if a customer withdraws from a levelized billing plan more than one time in 12 months.

Returned Check Charge (GSR 5.13.)
The Company will charge a returned check fee when a customer pays by check and the check is returned to the Company for any reason other than bank error. ---------$25.00

Meter Reading Report Charge (GSR 5.16.B(3))
The Company will charge a meter reading report fee of: -------------------------- No Charge
if a customer has requested a meter reading report in writing and the customer has already received two free meter reading reports in the last 12 months.

Meter Test Fee (GSR 5.18.C.(1))
The Company will charge a meter test fee when a customer's meter has been tested in accordance with the procedures set out in GSR 5.18., and the meter test results show the meter to be operating within the guidelines of Rule 7.05. of the Special Rules - Electric.

Self Contained ---$35.00
Other --$59.00

Collection Fee (GSR 6.11.)
The Company will charge a fee when the last day to pay, as printed on the most recent cut-off notice, has passed and a utility employee accepts payment at the premises under GSR 6.09.B(1) without service being disconnected. -----------$10.00

ARKANSAS PUBLIC SERVICE COMMISSION

Reconnection Fee (GSR 6.12.)

The Company will charge a reconnect fee when a customer or other authorized party requests reconnection during normal working hours, and payment is made at a Company business office or payment agency before the Company's close of business on the same day. ---$25.00

The Company will charge a reconnect fee when a customer or other authorized party requests reconnection on a pole during normal working hours, and payment is made at a Company business office or payment agency before the Company's close of business on the same day. ---$74.00

Finance Charge on Delayed Payment Agreements (GSR 6.13.I)

The finance charge on delayed payment agreements will be interest as defined by the GSR. --No Charge
(The rate is set annually by the Commission.)

Meter Tampering

The Company will charge a fee if customer connects a meter that has been cut off by Company.

During regular working hours--$75.00
During other than regular working hours--$97.00

The Company will charge a minimum fee for a broken meter seal and/or meter tampering. --$57.00

Connection Other Than Regular Working Hours

The Company will charge a fee for initiation of permanent service (if no construction is required) during other than regular working hours. ------------------$57.00

Re-fusing Customer's Circuits
The Company will charge a service charge plus the price of fuses for re-fusing customer's circuits. --$42.00

Faulty Customer-Owned Equipment
A service charge will be charged during regular business hours where trouble is found to be in customer's equipment. --$82.00

A service charge will be charged after regular business hours where trouble is found to be in customer's equipment. ---$106.00

Relocation Fee
A facilities relocation fee (actual cost of labor and materials used) will be charged to customers requesting the relocation of Company's facilities. ----------Actual Cost

Translation and Non-Standard Reports (minimum charge)
The Company will charge a fee each time the Company provides meter pulse translation and any non-standard reporting requested by the customer. -----------------$25.00

Connect Fee
The Company will charge a fee each time a meter must physically be re-set or pulled and re-set. This fee does not apply to connects requiring only a read-out/read in. ----$10.00

PAYMENT FOR SERVICE

Payment for Service Rider - See Rate Schedule 44.

OPTION 1

Availability

This ~~rider~~ Option 1 is only available to customers receiving electric service under the Lighting and Power Service (LP) or Large Lighting and Power Service (LLP) rate schedules. ~~This~~ Option 1~~rider~~ is available to new loads of 500 kW or more, or significant expansions of existing load in excess of ~~the Kilowatts (kW) or~~ 500 kW~~5%~~ ~~of~~ incremental~~existing~~ load, or for resumption of service to loads of a minimum of 500 kW which have been inactive for 12 months or more. Service under ~~this~~ Option 1~~rider~~ is available only in conjunction with a contract for electric service having a minimum initial term of five~~six~~ years and requiring a minimum of thirty (30) days advance notice to cancel thereafter.

To qualify for ~~this~~ Option 1~~rider~~, the customer must furnish to the Company an affidavit stating that this rider was an important factor in the customer's decision to add new or incremental~~additional~~ load or to resume load that has been inactive for 12 months or more, and complete and sign the appropriate application form.

The load factor of the entire facility, including expansion, must be equal to or greater than 40%.

~~This rider is not available to additional load from customers who have begun construction or installation of equipment prior to the date of approval of this rider.~~

The availability of ~~this~~ Option 1~~rider~~ is at the sole discretion of the Company. T~~, and t~~he Company will not accept new applications for service under Option 1~~this rider~~ when the Company's forecasts indicate that additional generating capacity will be needed within a three~~six~~-year period.

All provisions of the LP or LLP rate schedules, whichever is applicable, will apply except as modified herein.

Definition of Base Period

The Base Period shall be the 12 months immediately preceding the month that service is requested under this rider, or as mutually agreed upon by the Company and the Customer.

Determination of ~~Monthly~~ Base Threshold Demand ~~Threshold~~

For expansions, t~~T~~he ~~Monthly~~ Base Threshold Demand ~~Threshold~~ shall be determined based ~~y~~ on~~increasing~~ the Kilowatts of Billing Demands ~~for each month~~ of the Base Period ~~by the greater of 500 kW or 5% of existing load~~. For ~~a~~ new Customers or for Customers resuming service to loads which have been inactive for 12 months or more, the Monthly Base Threshold Demand ~~Threshold~~ shall be 0~~500~~ kW. The Kilowatts of Billing Demand for each month of the Base Period may be

adjusted as mutually agreed upon by the Company and the Customer to reflect the Customer's normalized load profile.

Replacing: Sheet No.

Name of Company SOUTHWESTERN ELECTRIC POWER COMPANY

Kind of Service: Electric Class of Service: As Applicable

Part III. Rate Schedule No. 32

Title: EXPERIMENTAL ECONOMIC DEVELOPMENT RIDER

PSC File Mark Only

Determination of Economic Development Demand

The Economic Development Demand subject to the provisions of Option 1 ~~this rider~~ shall be that portion of the Kilowatts of Billing Demand during the current month that is greater than the Monthly Base Threshold Demand ~~Threshold of the corresponding month in the Base Period~~.

Determination of Economic Development Credits

The Customer's monthly bill for service under Option 1~~this rider~~ will be calculated in accordance with the LP or LLP rate schedule,~~,~~ whichever is applicable, with the exception that an Economic Development Credit will be applied. An Economic Development Credit will be determined by multiplying the Economic Development Demand times the Kilowatt Charge of the LP or LLP rate schedule, whichever is applicable, times the appropriate Billing Credit Factor. The Billing Credit Factors are provided below:

Term of Economic Development Credit	Billing Credit Factors
Year 1 - First 12 monthly billing periods	50%
Year 2 - Next 12 monthly billing periods	40%
Year 3 - Next 12 monthly billing periods	30%
~~Year 4 - Next 12 monthly billing periods~~	~~20%~~
~~Year 5 - Next 12 monthly billing periods~~	~~10%~~

Special Terms and Conditions

In the event the monthly Kilowatts of Billing Demand for 12 consecutive months is less than the corresponding ~~Monthly~~ Base Threshold Demand ~~Threshold~~, this rider will automatically terminate. Billing for subsequent months will revert to the LP or LLP rate schedule, whichever is applicable.

OPTION 2

Availability

This Option 2 is only available to customers receiving electric service under the Lighting and Power (LP) rate schedule. Option 2 is available to new loads of 200 kW or more. Service under Option 2 is available only in conjunction with a contract for electric service having a minimum initial term of five years and requiring a minimum of thirty (30) days advance notice to cancel thereafter.

Examples of businesses and industries eligible for service under Option 2 include the following categories:

- Distribution centers
- Startup manufacturing
- Big Box and/or retail stores
- Server farms and other information technology related companies
- Printing companies

To qualify for Option 2, the customer must furnish to the Company an affidavit stating that this rider was an important factor in the customer's decision to add load and complete and sign the appropriate application form.

The load factor of the facility must be equal to or greater than 40%.

The availability of Option 2 is at the sole discretion of the Company. The Company will not accept new applications for service under Option 2 when the Company's forecasts indicate that additional generating capacity will be needed within a three-year period.

All provisions of the LP rate schedule will apply except as modified herein.

ARKANSAS PUBLIC SERVICE COMMISSION

Original	**Sheet No:** R-33.1	Sheet 1 of 4
Replacing:	**Sheet No:** R-33.1	
Name of Company: SOUTHWESTERN ELECTRIC POWER COMPANY		
Kind of Service: Electric	**Class of Service:** As Applicable	
Part III. Rate Schedule No. 33		
Title: PURCHASED POWER SERVICE (PPS)		

PSC File Mark Only

AVAILABILITY

This rate shall apply to purchases by the Company of energy generated by qualified small power production and cogeneration facilities. The Qualified Facility's (QF) electrical requirements supplied by the Company shall be separately metered and billed in accordance with the applicable rate schedule. The rules under which small power production and cogeneration facilities can obtain qualifying status are defined in the Arkansas Public Service Commission Cogeneration Rules as approved. The design capacity of the qualified facility must be 100 kW or less.

PAYMENT SCHEDULE

The payment shall be the algebraic sum of calculations made under (I) and (II) below.

(I) RATE

(A) QF Charge (Payable by QF)

(1) Each QF will pay any interconnection costs which are defined as the costs of connection, switching, metering, transmission, distribution, safety provisions, and administrative costs incurred by the Company directly related to the installation and maintenance of the physical facilities necessary to permit interconnected operations. Interconnection costs do not include any costs included in the calculation of avoided costs in Section (I)(B). The QF will either make an initial payment to the Company for the interconnection costs for investment in facilities as determined above or make periodic payments over a two year period wherein such payments provide for the amortization of interconnection costs, as well as a return to the Company equal to its pre-tax

ARKANSAS PUBLIC SERVICE COMMISSION

PSC File Mark Only

marginal cost of capital. In addition, the QF will pay the monthly charge for maintaining facilities currently at the filed rate of 0.69~~54~~ percent of the interconnection cost for investment in facilities as determined above.

(2) Monthly QF Charge (Payable by QF)
Each QF will pay a monthly QF Charge of $12.00. This charge is to cover such items as customer accounting expenses, administrative expenses, and general expenses incurred in servicing the QF.

(B) Monthly kWh Payment (Payment by Company)
Payment for energy delivered into Company's system with adjustment as provided in (II) will be at the following purchase rate:

Months – 2019	cents/KWH
1st Quarter - January, February, March	3.1164
2nd Quarter - April, May, June	2.4095
3rd Quarter - July, August, September	2.7714
4th Quarter - October, November, December	2.3866

Purchase rate will begin upon approval of the Purchased Power Service (PPS) rate schedule and will be revised no less frequently than annually.

ARKANSAS PUBLIC SERVICE COMMISSION

Part III. Rate Schedule No. 33		
Title: PURCHASED POWER SERVICE (PPS)		

PSC File Mark Only

(II) ADJUSTMENTS

(A) (Meter readings may be made in conjunction with regular meter reading schedules. The actual metered kilowatt-hours will be billed according to the pricing period defined in (I)(B). Kilowatt-hour payments will be prorated to reflect the number of days within each quarter and each pricing period when metering does not allow for an actual determination.

BILLING

The Company shall send a statement to the QF on or before the 10th day after the QF's meter is read. The statement will show the kilowatt capacity, if any, and kilowatt-hours delivered to the Company during the period, customer charges payable to the Company, and total amount due. Payments for service will be rendered monthly, unless otherwise specified. The term "month" for payment purposes will mean the period between any two consecutive readings of the meters by the Company, such readings to be taken as nearly as practical every 30 days. The Company reserves the right to credit purchase of power against billings for electric service due and payable to the Company by the QF.

CONTRACT PERIOD

A Power Purchase Contract will be in effect for each service at each separate location. The Contract Period shall be negotiated between the QF and the Company. The Company's TERMS AND CONDITIONS FOR PURCHASE BY THE COMPANY OF ELECTRICITY APPLICABLE TO RATE SCHEDULE PURCHASED POWER SERVICE (PPS) are applicable to this rate schedule.

Part III. Rate Schedule No. 34

Title: REDUNDANT SERVICE POLICY FOR MUNICIPAL ACCOUNTS

PSC File Mark Only

AVAILABILITY

Redundant service is defined as those facilities, including metering equipment, to provide electric power and energy from an alternate source to municipal accounts served by the Company that require such redundant service.

APPLICABILITY

The kilowatt-hours used on the meter for redundant service plus the kilowatt-hours equal to the redundant transformer no load losses at 100% voltage shall be added to the kilowatt-hours used on the regular meter (for billing on the appropriate rate) plus a charge computed according to one of the Alternatives:

ALTERNATIVE 1 For Total Company Investment to Provide Redundant Service

There will be a charge each month equal to 1.46~~43~~% (17.52~~17.21~~% per year) of the Company investment, which includes metering costs, to provide redundant service.

ALTERNATIVE 2 For Customer's Contribution of the Total Investment to Provide Redundant Service

There will be a charge each month equal to 0.69~~60~~% (8.28~~7.16~~% per year) of the Customer's contribution of the total investment to provide redundant service.

ALTERNATIVE 3 For the Customer Desiring to Make a Contribution in Aid of Construction Toward the Investment Required to Provide the Redundant Service

There will be a charge each month equal to 1.46~~43~~% (17.52~~17.21~~% per year) of the Company's investment, which includes metering costs, to provide redundant service plus a charge each month equal to 0.69~~60~~% (8.28~~7.16~~% per year) of the Customer's contribution toward the investment required to provide the redundant service.

PAYMENT FOR SERVICE

Payment for Service Rider - See Rate Schedule 44.

TERMS AND CONDITIONS

Service will be furnished under Company's Standard Terms and Conditions.

THIS SPACE FOR PSC USE ONLY

For Residential Customers in Undeveloped Areas:

Southwestern Electric Power Company's (SWEPCO) philosophy is to extend facilities to provide service requested under the applicable rate schedule. If the anticipated continuing annual revenue, not including adjustment charge of fuel and tax adjustment charge, will not support the allocated portion of SWEPCO's investment in facilities to extend or provide service in undeveloped areas, the following extension policy will apply.

When the revenue from the prospective customer(s) does not meet these estimated criteria, the Company will be authorized to collect a minimum bill which will be determined by such factors as: cost of extension (not including system investment and cost of meter), growth potential, future earnings, system improvements, terrain, geography and other considerations.

The customer will be billed for electric service made available hereunder on the published rate schedule applicable to the location. However, for the amount of investment determined by the Company, customer agrees to pay the Company a minimum amount of $________ per month (1/60th of the allocated portion of SWEPCO's investment) plus the fuel adjustment charge and the tax adjustment charge as provided in the rate schedule for a period of five years from the date service is first made available to the customer from said extension. The customer agrees to pay said minimum monthly amount to the Company. Customer further agrees to pay said minimum monthly amount even though it may be in excess of the amount specified in Company's applicable published rate schedule. If the premises served under this agreement are sold, leased, or rented, the customer nevertheless guarantees the payment of said minimum bill for said period, as provided above.

For Industrial, Large Commercial and Loads Requiring an Unusual Amount of Investment

SWEPCO will own, install, operate and maintain the facilities required to supply the customer's electric requirements. Electric service will be furnished according to terms of a contract between the parties including the applicable rate schedule plus a provision which will provide:

In consideration of the determined investment in facilities by SWEPCO necessary to make electric service available, the customer agrees to pay to SWEPCO each month an amount, computed under the applicable rate schedule not including tax adjustment charge, the cost of fuel and/or fuel adjustment revenue, not less than 1/60th* of the determined investment required to supply the customer's electrical requirements. The determined investment will include such factors as cost of extension (including system investment), growth potential, future earnings, system improvements, terrain, geography and other considerations.

*The denominator of this fraction is to be the number of months for which service is contracted if less than 60 months.

Contribution in Aid of Construction

The customer may reduce the minimum bill requirement by making a contribution in aid of construction to reduce the determined investment to not more than five times the anticipated continuing annual revenue, not including the fuel adjustment charge and tax adjustment charge.

Contributions in aid of construction that are considered taxable income by a governmental agency or body will be increased by the approximate tax rate.

PAYMENT FOR SERVICE

Payment for Service Rider - See Rate Schedule 44.

TERMS AND CONDITIONS

Service will be furnished under Company’s Standard Terms and Conditions.

ARKANSAS PUBLIC SERVICE COMMISSION

Original	Sheet No. R-36.1	Sheet 1 of 5
Replacing:	Sheet No.	
Name of Company SOUTHWESTERN ELECTRIC POWER COMPANY		
Kind of Service: Electric	Class of Service: As Applicable	
Part III. Rate Schedule No. 36		
Title: EXPERIMENTAL CURTAILABLE SERVICE RIDER		PSC File Mark Only

AVAILABILITY

This Rider is available only in conjunction with Company's Lighting and Power (LP) or Large Lighting and Power (LLP) rate schedules to Customers who contract for not less than 500 kW of curtailable power. The applicable rate schedule will be determined based on the Customers Total kW. All provisions of the Lighting and Power or Large Lighting and Power rate schedules, whichever is applicable, will apply except as modified herein. Service must be taken at one point of delivery and measured through one meter. This Rider is not available for backup power to customer owned generation. This Rider is not applicable in conjunction with Company's Experimental Economic Development Rider for loads designated as Curtailable kW.

The availability of service under this Rider is subject to the Company, in its sole judgment, having sufficient capacity and fuel to serve the requirements of its other customers and to maintain its spinning reserve. The availability of total system curtailable and interruptible kW contracted may be limited by the Company to an amount not to exceed 5% of the projected aggregate Company peak demand. Service is available under this Rider only if the utilization of such service is of such character that service can be curtailed at any time by Company, following 10 minutes notice by Company to Customer that service must be curtailed, without loss to Customer or damage to property or persons and without adversely affecting the public health, safety, and welfare.

DEFINITION OF TERMS

Total kW: Total kW is defined as the sum of the Firm kW and the Curtailable kW designated by the customer when contracting for service under this Rider and will be used to determine the applicable rate schedule.

Firm kW: Firm kW is defined as that portion of the Total kW that is not subject to curtailment under the terms and conditions of this Rider. The Firm kW will be designated by the Customer when contracting for service under this Rider. In addition, Firm kW may be adjusted annually by the Customer by written request to the Company.

ARKANSAS PUBLIC SERVICE COMMISSION

Curtailable kW: Curtailable kW is defined as that portion of the Total kW subject to curtailment by the Company under this Rider. The Curtailable kW will be designated by the Customer when contracting for service. In addition, Curtailable kW may be adjusted annually by the Customer by written request to the Company.

CONDITIONS OF SERVICE

Customer may choose to have Total kW or some portion thereof designated as Curtailable kW. The amount of Total kW not designated as Firm kW shall constitute Customer's Curtailable kW. Customer's service must be equipped, at Customer's expense, with devices necessary to reduce Total kW during the period of curtailment to Firm kW or below and with metering devices necessary to verify that Total kW is at or below the Firm kW. In addition, the Company may request that the Customer's service be equipped, at Customer's expense, with communication equipment necessary to provide instantaneous load information to Company's designated system operating center.

Company will request curtailment of electric service under this Rider as the Company deems necessary for any reason including, but not limited to, maintaining service to firm loads, avoiding establishment of a new system peak, avoiding establishment of a peak demand in excess of 95% of the Company's forecasted peak load for the year, maintaining service integrity in the area, or other situations when reduction in load on the Company's system is warranted. To the extent possible, curtailable loads served under this Rider will be curtailed before any curtailment of firm loads is requested or required. Requests for curtailment will be made by Company's System Operator via telephonic communication to Customer's designated representative(s). Upon application for service under this Rider, Customer shall designate the representative(s) and provide the telephone number at which they may be reached 24 hours a day. In the event of a curtailment for non-emergency purposes, Company will endeavor to provide notice to Customer at least 30 minutes prior to curtailment. In the event of a curtailment for emergency conditions, Company will attempt to provide as much prior notice as possible but is in no way obligated to give more than 10 minutes notice prior to curtailment. Absence of a designated representative or inability of the Company to communicate with the designated representative because of unanswered telephone, busy telephone, or otherwise, once

Company has initiated a telephonic communication to the designated representative, will in no way be regarded as an excuse for failure to comply with a curtailment request. The Company may request the customer to install at Customer's expense electronic equipment necessary for automatic notification of curtailment.

MONTHLY CHARGES AND CREDITS

Customer's net monthly bill for service provided under this Rider will be calculated in accordance with Company's applicable rate schedule, with the exception that a Curtailable Power Credit will be applied. The Curtailable Power Credit will be determined by applying a Demand Credit to the portion of the average kilowatt load used by the Customer during the 15 minute period of maximum use during the month in excess of the Firm kW. However, the Curtailable Power Credit will not exceed the product of the Demand Credit and the Curtailable kW.

The Demand Credit used to calculate the Monthly Curtailable Power Credit will be:

VOLTAGE LEVEL	**DEMAND CREDIT**
Secondary Service	$3.19/kW
Primary Service	$3.06/kW
Transmission Service	$2.91/kW

NON-COMPLIANCE PROVISIONS

Customer understands that service under this Rider is contingent upon Customer's complete and timely compliance with Company's requests for curtailment. If, at any time, Customer fails in whole or in part to implement or maintain any request for curtailment to reduce the Total kW to

the Firm kW, the Company may, at its option, elect to cancel, effective immediately, the Customer's eligibility for service under this Rider. Should the Company exercise this option, billing for the current and subsequent eleven (11) months will revert to the LP or LLP rate schedule, whichever is applicable. In addition, any Curtailable Power Credits received by the Customer during the 11 previous months shall be forfeited and reimbursed with interest to the Company over the six (6) month period following the cancellation of Customer's eligibility for service under this Rider.

LIMITATIONS ON CURTAILMENTS

Curtailments under this Rider are limited as follows:

Daily Limit: No longer than 12 hours in any day, measured from midnight to midnight, except during system emergencies as described below.

Annual Limit: No more than 400 hours in any calendar year.

The only curtailments included in curtailment time limits are those implemented at the request of Company for the purposes described in the "Conditions of Service" above. Extended interruptions resulting from failure of transmission or distribution equipment are not included in curtailment time limits. Curtailment time is measured from the time the Company notifies the Customer via telephonic communication when the period of curtailment will begin to the time that Company notifies Customer via telephonic communication that the period of curtailment will end.

During system emergencies when Company has made public pleas to restrict electric energy usage to essential needs because of an area or statewide shortage of electric power and/or energy, curtailable loads served under this Rider may be curtailed continuously without daily limit until such emergency condition has ended. Such curtailments shall be included in annual curtailment time limits.

Curtailments of less than 15 minutes in duration shall constitute a 15-minute period for inclusion in Curtailable time limits.

Contract Minimum: The customer's minimum bill shall not be less than the applicable charge for the contracted demand minimum plus the applicable Fuel and Tax Adjustments and in no event shall the contract demand minimum be less than 500 kilowatts.

TERM OF CONTRACT

This Rider is being offered as an experimental service and may be withdrawn by the Company following written notice to each Customer served under the Rider given at least one year prior to such withdrawal. The obligation of the Customer shall continue for a minimum initial term of one year and continuing thereafter unless canceled by Customer following written notice given at least one year prior to such cancellation.

PAYMENT FOR SERVICE

Payment for Service Rider - See Rate Schedule 44.

ARKANSAS PUBLIC SERVICE COMMISSION

Original	**Sheet No:** R-37.1	Sheet 1 of 9
Replacing:	**Sheet No:**	
Name of Company: SOUTHWESTERN ELECTRIC POWER COMPANY		
Kind of Service: Electric	**Class of Service:** As Applicable	
Part III. Rate Schedule No. 37		
Title: UNDERGROUND ELECTRIC DISTRIBUTION SERVICE AGREEMENT		

PSC File Mark Only

I. SCOPE

This policy applies to installation of underground electric distribution systems where feasible from engineering, operation, and economic standpoint to serve. Underground Electric Distribution (UED) and similar phrases include not only electric facilities that are actually located underground, but also above ground which may be necessary to provide service to the customer.

Our basic philosophy, that the developer should pay the cost of underground electric distribution facilities that is in excess of the cost of overhead electric distribution facilities is to be maintained in all instances.

II. DEFINITION OF TERMS

A. For purposes of this policy the following abbreviations and definitions shall prevail:

1. Underground (US) Service -- Customer owned, maintained and installed underground service conductors, sometimes installed in a raceway, that extend from the Customer's meter to the point of delivery, where connection is made to Company's distribution system.

2. Overhead (OH) Service Drop -- Company owned and installed overhead service drop conductors that extend from the Company's overhead distribution

system to the point of delivery, where connection is made to Customer's electrical installation.

3. Point of Delivery -- The point of delivery of electric service shall be the point at which the electrical facilities of the Company connect to the electrical facilities of the Customer.

   a) For Overhead construction, the point of delivery is that point where the Company owned and installed OH Service Drop connects to the Customer owned service entrance wires which are located at the Customer's weatherhead. The Customer owned service entrance wires are connected by the customer to the source side of the meter socket and runs along the customer owned and installed service entrance raceway. The Service Entrance conductors extend out the weatherhead approximately 2 - 3 ft.

   b) For Underground construction, the point of delivery is that point where the Company owned distribution UED secondary facilities connect to the Customer owned and installed UED Service. The customer owned UED service is connected by the customer to the source side of the meter socket and runs underground from the Customer's meter location to the Company owned UED distribution facilities.

4. SWEPCO - Southwestern Electric Power Company.

5. Developer – A person, partnership, association, corporation, or governmental agency that owns, operates, or develops a subdivision or mobile home park.

6. Service Connections – The electrical facilities of the underground system installed, maintained and owned by developer extending from SWEPCO's secondary connection on the distribution system to the point of metering, but not including the meter(s). This would consist of the underground cable from customer's entrance equipment to SWEPCO's secondary pedestal or transformer.

7. Primary - That portion of the distribution system which delivers energy to the primary (high voltage) side of the distribution transformer from the substation or point of supply. Nominal voltages of these primary systems are 2.4 kV, 4Y/2.4 kV, 12.5Y/7.2 kV, and 34.5Y/19.9 kV.

8. Secondary - That portion of the distribution system which distributes the energy from the secondary (low voltage) side of the distribution transformer to the customers' service connection points at utilization voltage. Nominal voltages of these secondary systems are 120/240 volts, 240 volts, 208Y/120 volts, and 480Y/277 volts.

III. CONDITION OF SERVICE

A. UED will be made available in SWEPCO's service area where feasible from engineering, operation, and economic standpoint. The terms and conditions of the Company's Extension of Facilities Agreement (Schedule R-35.1) apply as

ARKANSAS PUBLIC SERVICE COMMISSION

Original **Sheet No:** R-37.4 Sheet 4 of 9

Replacing: **Sheet No:**

Part III. Rate Schedule No. 37

Title: UNDERGROUND ELECTRIC DISTRIBUTION SERVICE AGREEMENT

PSC File Mark Only

necessary. The cost estimate for all facilities provided, installed, owned, and maintained by the Company will include:

1. Material cost (purchased and stores);

2. Labor costs (Company and Contract);

3. Transportation cost;

4. Trenching (including backhoeing and boring);

    a) The customer may provide all trenching and backfilling to meet Company specifications.

    b) If the customer provides all trenching and backfilling to meet Company specifications, customer's (CIAC) will be reduced by that amount.

5. Right-of-way clearing, purchase, and acquisition;

6. Permanent Work Orders (PWO’s) (where applicable) and Overheads (exempt material);

7. Stores, Freight, and Handling;

8. Administrative & General costs; and

9. Engineering & Supervisory costs.

B. Differential cost: Customer will pay to Company prior to installation a contribution in aid to construction (CIAC) for all costs in excess of the cost of overhead electric distribution facilities. The CIAC will be grossed up for taxes.

PAYMENT FOR SERVICE

Payment for Service Rider - See Rate Schedule 44.

SOUTHWESTERN ELECTRIC POWER COMPANY

STANDARD AGREEMENT
FOR UNDERGROUND ELECTRIC DISTRIBUTION SYSTEM
BETWEEN

____

____

(Customer, Owner, Developer, Operator, or Builder)
Hereinafter referred to as Customer
AND
SOUTHWESTERN ELECTRIC POWER COMPANY

It is mutually understood and agreed that:

I. This Agreement applies to installation and operation of an underground electric distribution system on easement granted Southwestern Electric Power Company (SWEPCO) on ____

____

____________________________ and is further identified by SWEPCO Drawing No. _____ which is made a part of this Agreement.

II. Electric service covered by this Agreement shall be: (Indicate one)

( ) A. For individually metered customers in residential subdivisions, mobile home parks, apartment complexes, and apartments - single phase, 3 wire

at a nominal voltage of 120/240 volts.

( ) B. For primary metered apartment complexes - primary voltage and phases required are ______________________.

( ) C. For single point service for apartment projects metered at secondary voltage. (Indicate one)

( ) 1. Single phase, 3 wire at a nominal voltage of 120/240.
( ) 2. Three phase, 4 wire at a nominal voltage of 208Y/120.
( ) 3. Three phase, 4 wire at a nominal voltage of 480Y/277.
( ) 4. Three phase, 4 wire at a nominal voltage of 120/240.

III. Service entrance cables shall be installed underground between Customer's building and SWEPCO transformer or secondary service pedestal by Customer.

IV. SWEPCO reserves the right to designate the point of service for each lot, each apartment building, each mobile home space, and each commercial customer.

V. To insure reliability of service to all consumers in an apartment and commercial developments:

A. Customer will provide adequate overcurrent protection to each individual consumer.

Title: UNDERGROUND ELECTRIC DISTRIBUTION SERVICE AGREEMENT

PSC File Mark Only

B. If Customer installs service feeders under a building to centrally located metering points, a spare conduit shall be provided by the Customer to permit rapid restoration of service.

VI. Customer will provide the utility an easement at final grade, the easement shall be clear of trees or other obstructions, as required, with all property corners staked before construction of residential underground electric distribution system begins.

VII. Location of underground facilities, other than the electric distribution system installed by or for the Customer shall be designated by the Customer prior to construction of the electric distribution system.

VIII. Any rearrangements in the electric distribution system or metering arrangement which may be required by the Customer after installation of distribution system shall be paid for by the Customer.

IX. SWEPCO will furnish and install the following equipment:

A. All primary and secondary cables. (Does not include service cable.)
B. Switch enclosures, transformers, transformer enclosures, secondary pedestals, and associated equipment.
C. Any overhead distribution required to provide this service.

X. The Customer will pay the Company the differential cost prior to the installation of (UED) facilities.

Replacing:	Sheet No.	
Name of Company SOUTHWESTERN ELECTRIC POWER COMPANY		
Kind of Service: Electric	Class of Service: As Applicable	
Part III. Rate Schedule No. 38		
Title: RECREATIONAL LIGHTING		PSC File Mark Only

AVAILABILITY

This schedule is available for lighting of recreational fields and for miscellaneous recreational facilities to include restrooms and concession stands, where the Customer owns the lighting facilities and the electric service is metered. Non-lighting loads may not exceed 20% of the total lighting load.

Service under this schedule includes but is not limited to facilities with characteristics similar to athletic fields of schools, churches, and public recreational associations.

A written contract may be required at the option of the Company.

TYPE OF SERVICE

The electric service furnished will be to a single metered delivery point and will be at one standard voltage.

This rate schedule is not available for resale, stand-by, or supplemental service.

NET MONTHLY RATE

Customer Charge: $10.60~~8.60~~

Kilowatt-hour Charge: $0.0373~~0257~~ per kilowatt hour

Adjustments:

Fuel Adjustment: In addition to all other charges, the amount of the Customer's bill will be adjusted by an amount per kilowatt-hour calculated according to the formula in the Energy Cost Recovery Rider - Arkansas.

Tax Adjustment: In addition to all other charges, the amount of the Customer's bill will be increased by the proportionate part of any new tax or increased rate of tax in accordance with the Tax Adjustment Rider - Arkansas.

PAYMENT FOR SERVICE

Payment for Service Rider - See Rate Schedule 44.

TERMS AND CONDITIONS

Service will be furnished under the Company's Standard Terms and Conditions.

Part III. Rate Schedule No. 39		
Title: ALTERNATE FEED SERVICE		PSC File Mark Only

AVAILABILITY

Alternate Feed Service (AFS) may be available for service to customers served under Lighting and Power and Large Lighting and Power Primary Service Schedules, who request an alternate feed service from existing distribution facilities which is in addition to the customer's basic service, provided that the Company can reasonably provide available capacity in existing distribution facilities adjacent to the customers requested delivery point.

NET MONTHLY RATE

In addition to all monthly charges for the customer's basic service as determined under the appropriate Schedule, the customer shall pay the following:

$5.06~~3.95~~	Per kW of AFS billing demand for reserving AFS station and distribution line facilities at primary voltage.

AFS CAPACITY RESERVATION

The customer shall reserve a specific amount of AFS capacity equal to the customer's normal maximum requirements, but in no event shall the customer's AFS reserved capacity under this rider exceed the capacity reservation for the customer's basic service under the appropriate tariff. The Company shall not be required to supply AFS capacity in excess of that reserved except by mutual agreement.

Adjustments:

Tax Adjustment: In addition to all other charges, the amount of the Customer's bill will be increased by the proportionate part of any new tax or increased rate of tax in accordance with the Tax Adjustment Rider – Arkansas.

Part III. Rate Schedule No. 39		
Title: ALTERNATE FEED SERVICE		PSC File Mark Only

MEASUREMENT AND DETERMINATION OF DEMAND

The billing demand will be measured and billed in accordance with the tariff requirements set forth in the customer's basic service tariff.

EQUIPMENT AND INSTALLATION CHARGE

The Customer shall be required to pay a one-time equipment and installation charge for all facilities required to provide either a new or upgraded alternate feed service. The equipment and installation charge shall be determined by the Company and shall include, but not be limited to, (a) all cost of the alternate feed facilities, and (b) any cost of modifications to the customer's basic service necessary to install the alternate feed facilities. All equipment shall remain the property of the Company.

TERM

The customer shall contract for a definite amount of electrical capacity in kilowatts which shall be sufficient to meet normal maximum requirements under this Rider, but in no event shall the customer's contract capacity under this Rider exceed the contract capacity for the customer's basic service under the appropriate Schedule. The Company shall not be required to supply capacity in excess of that for which the customer has contracted.

Contracts will be required for an initial period of not less than one (1) year and shall remain in effect thereafter until either party shall give the other at least six (6) months' written notice of the intention to discontinue service under their Rider.

A new initial contract period will not be required for existing customers who change their contract requirements after the original initial periods longer than one (1) year pursuant to the Extension of Service provision of the Company's Terms and Conditions of Service.

SPECIAL TERMS AND CONDITIONS

The customer shall be responsible for supplying any switching apparatus and facilities which are required in order for the installation to conform to the Company's construction standards and requirements. In those cases where the Company supplies the switching apparatus to conform to the Company's standards and requirements, the customer shall be responsible for the total cost of the switching apparatus, installation, maintenance, and any future replacement costs.

Upon receipt of a request from the customer for non-standard AFS, the Company will provide the customer with a written estimate of all costs, including system impact study costs, and any applicable unique terms and conditions of service related to the provision of the non-standard AFS. The AFS agreement shall provide full disclosure of all rates, terms and conditions of service under this rider, and any and all agreements related thereto.

The Company will have sole responsibility for determining the basic service circuit and the AFS circuit.

Service under this Rider does not guarantee that power will be available through the alternate feed service at all times.

PAYMENT FOR SERVICE

Payment for Service Rider - See Rate Schedule 44.

TERMS AND CONDITIONS

Service will be furnished under Company's Standard Terms and Conditions.

TABLE OF CONTENTS

40. NET-METERING

40.1. AVAILABILITY

40.1.1. To any residential or any other customer who takes service under standard rate schedules Residential Service, Electric Heating Appliance Residential Service, General Service, Lighting and Power, Lighting and Power Time-of-Use, Large Lighting and Power, Municipal Service, Municipal Pumping (non-conjunction), and Recreational Lighting who is an owner of a Net-Metering Facility and has obtained a signed Standard Interconnection Agreement for Net-Metering Facilities with the Electric Utility. The generating capacity of Net-Metering Facilities may not exceed the greater of: 1) twenty-five kilowatts (25 kW) or 2) one hundred percent (100%) of the Net-Metering Customer’s highest monthly usage in the previous twelve (12) months for Residential Use. The generating capacity of Net-Metering Facilities may not exceed three hundred kilowatts (300 kW) for non-residential use unless otherwise allowed by the Commission. Net-Metering is intended primarily to offset part or all of the customer’s energy use.

The provisions of the customer’s standard rate schedule are modified as specified herein.

40.1.2. Net-Metering Customers taking service under the provisions of this tariff may not simultaneously take service under the provisions of any other alternative source generation or co-generation tariff except as provided in the Net-Metering Rules.

40.2. MONTHLY BILLING

40.2.1. The Electric Utility shall separately meter, bill, and credit each Net-Metering Facility even if one (1) or more Net-Metering Facilities are under common ownership.

40.2.2. On a monthly basis, the Net-Metering Customer shall be billed the charges applicable under the currently effective standard rate schedule and any appropriate rider schedules. Under Net-Metering, only the kilowatt hour (kWh) units of a Net–Metering Customer's bill are netted.

40.2.3. If the kWhs supplied by the Electric Utility exceeds the kWhs generated by the Net-Metering Facility and fed back to the Electric Utility during the Billing Period, the Net-Metering Customer shall be billed for the net billable kWhs supplied by the Electric Utility in accordance with the rates and charges under the Net-Metering Customer's standard rate schedule.

40.2.4. If the kWhs generated by the Net-Metering Facility and fed back to the Electric Utility during the Billing Period exceed the kWhs supplied by the Electric Utility to the Net-Metering Customer during the applicable Billing Period, the Electric Utility shall credit the Net-Metering Customer with any accumulated Net Excess Generation in the next applicable Billing Period.

40.2.5. Net Excess Generation shall first be credited to the Net-Metering Customer's meter to which the Net-Metering Facility is physically attached (Generation Meter).

40.2.6. After application of 40.2.5 and upon request of the Net-Metering Customer pursuant to 40.2.8, any remaining Net Excess Generation shall be credited to one or more of the Net-Metering Customer's meters (Additional Meters) in the rank order provided by the Net-Metering Customer.

ARKANSAS PUBLIC SERVICE COMMISSION

Original	Sheet No. R-40.3	Sheet 3 of 16
Replacing:	Sheet No.	
Name of Company SOUTHWESTERN ELECTRIC POWER COMPANY		
Kind of Service: Electric	Class of Service: All	
Part III. Rate Schedule No. 40		
Title: NET-METERING		PSC File Mark Only

40.2.7. Net Excess Generation shall be credited as described in 40.2.5 and 40.2.6 during subsequent Billing Periods; the Net Excess Generation Credits remaining in a Net-Metering Customer's account at the close of a billing cycle shall not expire and shall be carried forward to subsequent billing cycles indefinitely. For Net Excess Generation Credits older than twenty-four (24) months, a Net-Metering Customer may elect to have the Electric Utility purchase the Net Excess Generation Credits in the Net-Metering Customer's account at the Electric Utility's estimated annual average cost rate for wholesale energy if the sum to be paid to the Net-Metering Customer is at least one hundred dollars ($100). An Electric Utility shall purchase at the Electric Utility's estimated annual average Avoided Cost rate for wholesale energy any Net Excess Generation Credits remaining in a Net-Metering Customer's account when the Net-Metering Customer: 1) ceases to be a customer of the Electric Utility; 2) ceases to operate the Net-Metering Facility; or transfers the Net-Metering Facility to another person.

When purchasing Net Excess Generation Credits from a Net-Metering Customer, the Electric Utility shall calculate the payment based on its annual average avoided energy costs in the applicable Regional Transmission Organization for the current year.

40.2.8. Upon request from a Net-Metering Customer the Electric Utility must apply Net Excess Generation to the Net-Metering Customer's Additional Meters provided that:

(a) The Net-Metering Customer must give at least 30 days' notice to the Electric Utility.

(b) The Additional Meter(s) must be identified at the time of the request. Additional Meter(s) shall be under common ownership within a single Electric Utility's service area; shall be used to measure the Net-Metering Customer's requirements for electricity; may be in a different class of service than the Generation Meter; shall be assigned to one, and only one, Generation Meter; shall not be a Generation Meter; and shall not be associated with unmetered service.

(c) In the event that more than one of the Net-Metering Customer's meters is identified, the Net-Metering Customer must designate the rank order for the Additional Meters to which excess kWhs are to be applied. The Net-Metering Customer cannot designate the rank order more than once during the Annual Billing Cycle.

40.2.9. Any Renewable Energy Credit created as the result of electricity supplied by a Net-Metering Customer is the property of the Net-Metering Customer that generated the Renewable Energy Credit.

PRELIMINARY INTERCONNECTION SITE REVIEW REQUEST

Generator Rating (kW): ____________________ AC or DC (circle one)

Expected Capacity Factor: _________________________________

Expected annual production of electrical energy (kWh) of the facility calculated using industry recognized simulation model (PVWatts, etc):_____________________________

Section 3. Interconnection Information

Attach a detailed electrical diagram showing the configuration of all generating facility equipment, including protection and control schemes.

Requested Point of Interconnection: ____

Customer-Site Load (kW) at Net-Metering Facility location (if none, so state):

____

Interconnection Request: Single Phase: ______________ Three Phase: _______________

Section 4. Signature

I hereby certify that, to the best of my knowledge, all the information provided in this Preliminary Interconnection Site Review is true and correct.

Signature: ____________________________________ Date: _____________________

II. TERMS AND CONDITIONS

Section 1. Requirements for Request

For the purpose of requesting that the Electric Utility conduct a preliminary interconnection site review for a proposed Net-Metering Facility pursuant to the requirement of Rule 2.05.B.4, or as otherwise requested by the customer, the customer shall notify the Electric Utility by submitting a completed Preliminary Interconnection Site Review Request. The customer shall submit a separate Preliminary Interconnection Site Review Request for each point of interconnection if information about multiple points of interconnection is requested. Part 1, Standard Information, Sections 1 through 4 of the Preliminary Interconnection Site Review Request must be completed for the notification to be valid. If mailed, the date of notification shall be the third day following the mailing of the Preliminary Interconnection Site Review Request. The Electric Utility shall provide a copy of the Preliminary Interconnection Site Review Request to the customer upon request.

<u>Section 2. Utility Review</u>

Following submission of the Preliminary Interconnection Site Review Request by the customer the Electric Utility shall review the plans of the facility interconnection and provide the results of its review to the customer, in writing, within 30 calendar days. If the customer requests that multiple interconnection site reviews be conducted the Electric Utility shall make reasonable efforts to provide the customer with the results of the review within 30 calendar days. If the Electric Utility cannot meet the deadline it will provide the customer with an estimated date by which it will complete the review. Any items that would prevent Parallel Operation due to violation of safety standards and/or power generation limits shall be explained along with a description of the modifications necessary to remedy the violations.

The preliminary interconnection site review is non-binding and need only include existing data and does not require the Electric Utility to conduct a study or other analysis of the proposed interconnection site in the event that data is not readily available. The Electric Utility shall notify the customer if additional site screening may be required prior to interconnection of the facility. The customer shall be responsible for the actual costs for conducting the preliminary interconnection site review and any subsequent costs associated with site screening that may be required.

<u>Section 3. Application to Exceed 300 kW Net-Metering Facility Size Limit</u>

This Preliminary Interconnection Site Review Request and the results of the Electric Utility's review of the facility interconnection shall be filed with the Commission with the customer's application to exceed the 300 kW facility size limit pursuant to Net Metering Rule 2.05.B.4.

<u>Section 4. Standard Interconnection Agreement</u>

The preliminary interconnection site review does not relieve the customer of the requirement to execute a Standard Interconnection Agreement prior to interconnection of the facility.

II. INTERCONNECTION AGREEMENT TERMS AND CONDITIONS

This Interconnection Agreement for Net-Metering Facilities ("Agreement") is made and entered into this _________day of __________, 20_______, by ____________________ __________("Electric Utility") and ____________________________ ("Customer"), a______________(specify whether corporation or other), each hereinafter sometimes referred to individually as "Party" or collectively as the "Parties". In consideration of the mutual covenants set forth herein, the Parties agree as follows:

Section 1. The Net-Metering Facility

The Net-Metering Facility meets the requirements of Ark. Code Ann. § 23-18-603(6) and the Arkansas Public Service Commission's *Net-Metering Rules*.

Section 2. Governing Provisions

The Parties shall be subject to the provisions of Ark. Code Ann. § 23-18-604 and the terms and conditions set forth in this Agreement, the Commission's *Net-Metering Rules*, the Commission's *General Service Rules*, and the Electric Utility's applicable tariffs.

Section 3. Interruption or Reduction of Deliveries

The Electric Utility shall not be obligated to accept and may require Customer to interrupt or reduce deliveries when necessary in order to construct, install, repair, replace, remove, investigate, or inspect any of its equipment or part of its system; or if it reasonably determines that curtailment, interruption, or reduction is necessary because of emergencies, forced outages, force majeure, or compliance with prudent electrical practices. Whenever possible, the Utility shall give the Customer reasonable notice of the possibility that interruption or reduction of deliveries may be required. Notwithstanding any other provision of this Agreement, if at any time the Utility reasonably determines that either the facility may endanger the Electric Utility's personnel or other persons or property, or the continued operation of the Customer's facility may endanger the integrity or safety of the Utility's electric system, the Electric Utility shall have the right to disconnect and lock out the Customer's facility from the Electric Utility's electric system. The Customer's facility shall remain disconnected until such time as the Electric Utility is reasonably satisfied that the conditions referenced in this Section have been corrected.

Section 4. Interconnection

Customer shall deliver the as-available energy to the Electric Utility at the Electric Utility's meter.

Electric Utility shall furnish and install a standard kilowatt hour meter. Customer shall provide and install a meter socket for the Electric Utility's meter and any related interconnection equipment per the Electric Utility's technical requirements, including safety and performance standards.

The customer shall submit a Standard Interconnection Agreement to the Electric Utility at least thirty (30) days prior to the date the customer intends to interconnect the Net-Metering Facilities to the utility's facilities. Part I, Standard Information, Sections 1 through 4 of the Standard Interconnection Agreement must be completed to be valid. The customer shall have all equipment necessary to complete the interconnection prior to such notification. If mailed, the date of notification shall be the third day following the mailing of the Standard Interconnection Agreement. The Electric Utility shall provide a copy of the Standard Interconnection Agreement to the customer upon request.

Following submission of the Standard Interconnection Agreement by the customer, the utility shall review the plans of the facility and provide the results of its review to the customer, in writing, within 30 calendar days. Any items that would prevent Parallel Operation due to violation of applicable safety standards and/or power generation limits shall be explained along with a description of the modifications necessary to remedy the violations.

If the Electric Utility's existing facilities are not adequate to interconnect with the Net-Metering Facility, the Customer shall pay the cost of additional or reconfigured facilities prior to the installation or reconfiguration of the facilities.

To prevent a Net-Metering Customer from back-feeding a de-energized line, the customer shall install a manual disconnect switch with lockout capability that is accessible to utility personnel at all hours. This requirement for a manual disconnect switch will be waived if the following three conditions are met: 1) The inverter equipment must be designed to shut down or disconnect and cannot be manually overridden by the customer upon loss of utility service; 2) The inverter must be warranted by the manufacturer to shut down or disconnect upon loss of utility service; and 3) The inverter must be properly installed and operated, and inspected and/or tested by utility personnel.

Customer, at his own expense, shall meet all safety and performance standards established by local and national electrical codes including the National Electrical Code (NEC), the Institute of Electrical and Electronics Engineers (IEEE), the National Electrical Safety Code (NESC), and Underwriters Laboratories (UL).

Customer, at his own expense, shall meet all safety and performance standards adopted by the utility and filed with and approved by the Commission that are necessary to assure safe and reliable operation of the Net Metering Facility to the utility's system.

Customer shall not commence Parallel Operation of the Net-Metering Facility until the Net Metering Facility has been inspected and approved by the Electric Utility. Such approval shall not be unreasonably withheld or delayed. Notwithstanding the foregoing, the Electric Utility's approval to operate the Customer's Net-Metering Facility in parallel with the Utility's electrical system should not be construed as an endorsement, confirmation, warranty, guarantee, or representation concerning the safety, operating characteristics, durability, or reliability of the Customer's Net-Metering Facility.

Section 5. Modifications or Changes to the Net-Metering Facility Described in Part 1, Section 2

Prior to being made, the Customer shall notify the Electric Utility of, and the Electric Utility shall evaluate, any modifications or changes to the Net-Metering Facility described in Part 1, Standard Information, Section 2 of the Standard Interconnection Agreement for Net-Metering Facilities. The notice provided by the Customer shall provide detailed information describing the modifications or changes to the Utility in writing, including a revised Standard Interconnection Agreement for Net-Metering Facilities that clearly identifies the changes to be made. The Electric Utility shall review the proposed changes to the facility and provide the results of its evaluation to the Customer, in writing, within thirty (30) calendar days of receipt of the Customer's proposal. Any items that would prevent Parallel Operation due to violation of applicable safety standards and/or power generation limits shall be explained along with a description of the modifications necessary to remedy the violations.

If the Customer makes such modification without the Electric Utility's prior written authorization and the execution of a new Standard Interconnection Agreement, the Electric Utility shall have the right to suspend Net-Metering service pursuant to the procedures in Section 6 of the Commission's General Service Rules.

A Net-Metering Facility shall not be modified or changed to generate electrical energy in excess of the amount necessary to offset all of the Net-Metering Customer requirements for electricity.

Section 6. Maintenance and Permits

The customer shall obtain any governmental authorizations and permits required for the construction and operation of the Net-Metering Facility and interconnection facilities. The Customer shall maintain the Net-Metering Facility and interconnection facilities in a safe and reliable manner and in conformance with all applicable laws and regulations.

Section 7. Access to Premises

The Electric Utility may enter the Customer's premises to inspect the Customer's protective devices and read or test the meter. The Electric Utility may disconnect the interconnection facilities without notice if the Electric Utility reasonably believes a hazardous condition exists and such immediate action is necessary to protect persons, or the Electric Utility's facilities, or property of others from damage or interference caused by the Customer's facilities, or lack of properly operating protective devices.

Section 8. Indemnity and Liability

The following is Applicable to Agreements between the Electric Utility and to all Customers except the State of Arkansas and any entities thereof, local governments and federal agencies:

Each Party shall indemnify the other Party, its directors, officers, agents, and employees against all loss, damages, expense and liability to third persons for injury to or death of persons or injury to property caused by the indemnifying party's engineering, design, construction, ownership, maintenance or operations of, or the making of replacements, additions or betterment to, or by failure of, any of such Party's works or facilities used in connection with this Agreement by reason of omission or negligence, whether active or passive. The indemnifying Party shall, on the other Party's request, defend any suit asserting a claim covered by this indemnity. The indemnifying Party shall pay all costs that may be incurred by the other Party in enforcing this indemnity. It is the intent of the Parties hereto that, where negligence is determined to be contributory, principles of comparative negligence will be followed and each Party shall bear the proportionate cost of any loss, damage, expense and liability attributable to that Party’s negligence. Nothing in this paragraph shall be applicable to the Parties in any agreement entered into with the State of Arkansas or any entities thereof, or with local governmental entities or federal agencies. Furthermore, nothing in this Agreement shall be construed to waive the sovereign immunity of the State of Arkansas or any entities thereof. The Arkansas State Claims Commission has exclusive jurisdiction over claims against the state.

Nothing in this Agreement shall be construed to create any duty to, any standard of care with reference to or any liability to any person not a Party to this Agreement. Neither the Electric Utility, its officers, agents or employees shall be liable for any claims, demands, costs, losses, causes of action, or any other liability of any nature or kind, arising out of the engineering, design, construction, ownership, maintenance or operation of, or the making of replacements, additions or betterment to, or by failure of, the Customer's facilities by the Customer or any other person or entity.

<u>Section 9.</u> **<u>Notices</u>**

The Net-Metering Customer shall notify the Electric Utility of any changes in the information provided herein.

All written notices shall be directed as follows:

Southwestern Electric Power Company
Attention: Customer Services Manager

Shreveport, LA 71156

Attention:
[Customer]
Name: ____
Address: ____
City:____

Customer notices to Electric Utility shall refer to the Customer's electric service account number set forth in Section 1 of this Agreement.

<u>Section 10.</u> **<u>Term of Agreement</u>**

The term of this Agreement shall be the same as the term of the otherwise applicable standard rate schedule. This Agreement shall remain in effect until modified or terminated in accordance with its terms or applicable regulations or laws.

<u>Section 11.</u> **<u>Assignment</u>**

This Agreement and all provisions hereof shall inure to and be binding upon the respective Parties hereto, their personal representatives, heirs, successors, and assigns. The Customer shall not assign this Agreement or any part hereof without the prior written consent of the Electric Utility, and such unauthorized assignment may result in termination of this Agreement.

Section 12. Net-Metering Customer Certification

I hereby certify that all of the information provided in this Agreement is true and correct, to the best of my knowledge, and that I have read and understand the Terms and Conditions of this Agreement.

Signature: ______________________________________ Date: ______________________

IN WITNESS WHEREOF, the Parties have caused this Agreement to be executed by their duly authorized representatives.

STANDARD INTERCONNECTION AGREEMENT FOR NET-METERING FACILITIES

Southwestern Electric Power Company – State of Arkansas

Disclaimer

POSSIBLE FUTURE RULES OR RATE CHANGES, OR BOTH AFFECTING YOUR NET-METERING FACILITY

The following is a supplement to the Interconnection Agreement you signed with Southwestern Electric Power Company.

1. Electricity rates, basic charges, and service fees, set by Southwestern Electric Power Company and approved by the Arkansas Public Service Commission (Commission), are subject to change.

2. I understand that I will be responsible for paying any future increases to my electricity rates, basic charges, or service fees from Southwestern Electric Power Company.

3. My Net-Metering System is subject to the current rates of Southwestern Electric Power Company, and the rules and regulations of the Commission. Southwestern Electric Power Company may change its rates in the future with approval of the Commission or the Commission may alter its rules and regulations, or both may happen. If either or both occurs, my system will be subject to those changes.

By signing below, you acknowledge that you have read and understand the above disclaimer.

Title: Radio Frequency Meter Installation Rider		PSC File Mark Only

AVAILABILITY

The Rider for Radio Frequency Meter Installation is available upon request to customers who are served under a rate schedule that requires no more than a single-phase, kWh only meter. A customer may request or elect upon request by the Company to have a radio frequency meter installed under the terms of this Rider as a mutually agreeable solution to Company personnel's lack of meter reading access to Company metering equipment on a customer's premises, due to a locked gate, animal concern, safety concern or other reason.

CONDITION OF SERVICE

The Company will install, own, operate, and maintain the radio frequency meters installed under this Rider. All radio frequency meters installed under this Rider shall remain the property of the Company. After a radio frequency meter is installed, the customer is responsible for keeping the line-of-site clear from obstructions that may impede the reading of the radio frequency meter. The radio frequency meter is not transferable to another location within the Company's service territory to which the customer may move.

Some locations may not be suitable for installation of a radio frequency meter due to possible interference or limitations of the transmitting device. If it is determined by the Company that a location is not suitable for the installation, the radio frequency meter will not be installed and the Company will refund any prior payment received under this Rider.

INSTALLATION FEE

The Radio Frequency Meter Installation Fee is a one-time, non-refundable fee based on the charges as set out below:

For premises requiring a meter exchange	$100.00 per meter
Each additional meter at the same premises	$ 70.00 per meter
For premises requiring new meter installation	$ 53.00 per meter

PAYMENT

The Company will invoice the requesting customer for the total installation fee and will install the radio frequency meter after receipt of payment. The fee is non-refundable after the radio frequency meter is installed.

Part III. Rate Schedule No. 45			
Title: ENERGY EFFICIENCY COST RECOVERY RIDER (Rider EECR)			PSC File Mark Only

PURPOSE

The purpose of the Energy Efficiency Cost Recovery Rider ("Rider EECR") is to establish the EECR Rate(s) by which Southwestern Electric Power Company (Company) will recover its energy efficiency program costs approved by the Commission in Docket No. 07-082-TF; including, but not limited to: (1) incremental energy efficiency program costs ("Incremental Program Costs"); (2) lost contributions to fixed costs ("LCFC") as described and approved by the Commission in Order No. 14 issued in Docket No 08-137-U; (3) utility incentive as described and approved by the Commission in Order No 15 issued in Docket No. 08-137-U; and (4) a "true-up" adjustment (collectively, the "Recoverable Costs"). Recovery of Incremental Program Costs is limited to the incremental costs which represent the direct program costs that are not already included in the then current rates of the Company. The EECR Rate(s) will be calculated to recover the Company's Recoverable Costs over the period in which the EECR Rate(s) will be in effect.

ANNUAL REDETERMINATION

On or before May 1 of each year, redetermined EECR Rate(s) shall be filed by the Company with the Commission in accordance with the provisions of Section 7 of the Commission's *Rules for Conservation and Energy Efficiency Programs*. The redetermined EECR Rate(s) shall be determined by application of the EECR Rate Formula set out in Attachment A to this Rider EECR. Each such revised EECR Rate shall be filed in Docket No. 07-082-TF and shall be accompanied by supporting testimony and a set of workpapers sufficient to fully document the calculations of the revised EECR Rates(s).

The redetermined EECR Rate(s) shall reflect projected Recoverable Costs for the next calendar year (the "Recoverable Year"); including, but not limited to: (1) the approved incremental Program Costs for the Recoverable Year; (2) the projected LCFC for the Recoverable Year, which shall be inclusive of LCFC for prior reporting years that are not already included within the Company's most recently established base rates; (3) the incentive earned in the prior calendar year (the "Reporting Year"), if any; and (4) a

true-up adjustment reflecting the over-recovery or under-recovery of the EECR Recoverable Costs for the Reporting Year. The true-up adjustment will be calculated to include the effect of carrying costs using the Company's most recently approved rate of return on rate base. The EECR Rate(s) so redetermined shall be effective for bills rendered on and after the first billing cycle of January of the Recoverable Year and shall then remain in effect for twelve (12) months ("EECR Cycle"), except as otherwise provided for below.

INTERIM ADJUSTMENT

Should a cumulative over-recovery or under-recovery balance arise during any EECR Cycle which exceeds ten (10) percent of the EECR Recoverable Costs determined for the EECR Cycle included in the most recently filed rate redetermination under this Rider EECR, then either the Commission General Staff or the Company may propose an interim revision to the then currently effective EECR Rate(s).

TRACKING AND MONITORING PROGRAM COSTS AND BENEFITS

The Company shall develop and implement appropriate accounting procedures, subject to the review of the Commission General Staff, which provide for separate tracking, accounting, and reporting of all program costs incurred by the Company. The procedures shall enable energy efficiency program costs to be readily identified and clearly separated from all other costs. The Company shall secure and retain all documents necessary to verify the validity of the program costs for which it is seeking recovery. Such documents shall include, but not be limited to, vouchers, journal entries, and the date the participant's project was completed.

The Company shall develop and implement appropriate accounting procedures, subject to the review of the Commission General Staff, which provide for separate tracking, accounting, and reporting of

revenues collected through the Rider EECR. The procedures shall enable the EECR revenues to be readily identified and clearly separated from all other revenues. The Company shall secure and retain all documents necessary to verify the accuracy of the EECR revenues. Such documents shall include, but not be limited to, billing determinants, journal entries, and summary revenue reports.

For the purpose of assessing the benefits and effectiveness of the programs, the Company shall develop and implement appropriate procedures, subject to the review of the Commission General Staff, which provide for separate tracking of the benefits and the effectiveness of the programs. The data that shall be tracked shall include, but shall not be limited to, information that will enable the Commission to assess the effectiveness of the programs. The Company shall secure and retain all documents necessary to verify its assessments.

TRACKING AND MONITORING LCFC AND INCENTIVE

The Company shall track and monitor LCFC and Incentives in accordance with Order Nos. 14 and 15, respectively, issued in Docket No. 08-137-U and in future Orders addressing LCFC and Incentives.

TERM

This Rider EECR shall remain in effect until modified or terminated in accordance with the provisions of the Rider EECR or applicable regulations or laws.

If this Rider EECR is terminated by a future order of the Commission, the EECR Rate(s) then in effect shall continue to be applied until the Commission approves an alternative mechanism by which the Company can recover its energy efficiency costs. At that time, any cumulative over-recovery or under-recovery resulting from application of the just terminated EECR Rate(s) shall be applied to customer billings over the twelve (12) month billing period beginning on the first billing cycle of the second month following the termination of Rider EECR in a manner prescribed by the Commission.

Replacing:	Sheet No.	
Name of Company SOUTHWESTERN ELECTRIC POWER COMPANY		
Kind of Service: Electric	Class of Service: All	
Part III. Rate Schedule No. 46		
Title: FEDERAL LITIGATION CONSULTING FEE RIDER		PSC File Mark Only

1. PURPOSE

The Federal Litigation Consulting Fee Rider defines the procedures by which the Federal Litigation Consulting Fee Rate shall be determined. The Federal Litigation Consulting Fee Rate shall recover the fees and expenses paid by Southwestern Electric Power Company ("Company") to contract attorneys and consultants retained by the Arkansas Public Service Commission (Commission), as authorized by the General Assembly, when it participates in litigation before a federal agency or federal court in proceedings which affect the Company. See Ark. Code Ann. §23-4-102.

2. APPLICATION

The Federal Litigation Consulting Fee Rate is applicable to all electric service billed under the rate schedules designated in Attachment A to this Rider. The Net Monthly Rates of the Company's currently effective rate schedules will be adjusted by the Federal Litigation Consulting Fee Rate amount set forth in Attachment A to this Rider, which shall apply during the period indicated thereon. The Federal Litigation Consulting Fee Rate amounts shall be revised pursuant to the procedures described in Section 6 below.

3. BILL REVIEW AND PAYMENT

When involved in federal litigation, bills for litigation consulting fees and expenses shall be submitted by the contracting attorney(s) and/or consultant(s) to the Commission on a monthly basis. After review and approval by the Commission, the Commission will forward the bills for the approved fees and expenses to the Company Designees listed in Section 4 below. The maximum amount that may be directly recovered shall not exceed $3,000,000 annually.

The Company shall remit payment for the Federal Litigation Consulting Fees directly to the contracting party within thirty (30) days of the bill's receipt by the Company. A record of the payments will be maintained in an appropriate, separate account.

5. ANNUAL RATE REVISIONS

5.1 Annual Filing Requirements
On or before February 15 of any year following a calendar year in which Federal Litigation Consulting Fees are paid, the Company may file for recovery of the Federal Litigation Consulting Fees. The Federal Litigation Consulting Fees Rate shall be calculated annually in accordance with the provisions of Paragraph 6.1 and filed for approval with the Commission.

Once a docket is established, annual revisions shall be filed in the same docket each year thereafter. Each Federal Litigation Consulting Fee rate filing shall be accompanied by a set of workpapers sufficient to fully document the timely payment of the third party contract fees and expenses, the accounting treatment for such payments, and the calculation of the rate.

6. CALCULATION AND RECOVERY PROCEDURES

6.1 Federal Litigation Consulting Fee Rate Calculation
The Federal Litigation Consulting Fee rate shall include the Commission-approved contract fees and expenses paid in the preceding calendar year. The rate shall not include any interest or carrying charges. The Federal Litigation Consulting Fee rate shall be determined by dividing the federal litigation consulting fees and expenses paid by the projected energy sales for the twelve-month period commencing on April 1 of each year. This rate shall also include a true-up adjustment reflecting the over-recovery or under-recovery of the federal litigation consulting fees for the preceding calendar year.

The Federal Litigation Consulting Fee rate so determined shall be effective, after Commission approval, for bills rendered on and after the first billing cycle of April of the filing year and shall then remain in effect until the last billing cycle of March of the following year, or other billing period as approved by the Commission.

Should there be unusual circumstances either the Company or the Staff may propose to modify the above calculation.

6.2 Federal Litigation Consulting Fee Rate Recovery
The Federal Litigation Consulting Fee rate, once approved by the Commission, shall be applied to each customer's monthly billing energy (kWh). The rate shall be constant across all customer classes and applied to the currently effective rate schedules. The Federal Litigation Consulting Fee Rate shall be set forth in Attachment A to this Rider and shall be filed with the utilities' tariffs.

6.3 Federal Litigation Consulting Fee Rate True-up
At the time of the annual filing, the actual recovery of Federal Litigation Consulting Fees will be compared to the projected recovery for the preceding calendar year. Any net over-recovery or under-recovery of the Federal Litigation Consulting Fees shall be included in setting the Federal Litigation Consulting Fee rate for the next recovery period.

Southwestern Electric Power Company
Federal Litigation Consulting Fee Rate
ATTACHMENT A

The Net Monthly rates for all customers shall be adjusted by the following amount for recovery of the Federal Litigation Consulting Fee from the first billing cycle of (month) 20XX through the last billing cycle of (month) 20XX.

$x.xxxxxx per kWh

Applicable Rate Schedules

Residential Service,
Residential, Electric Heating Appliance Residential Service,
~~Residential – Rider to Residential Service for Controlled Service to Water Heaters;~~
General Service,
Lighting & Power Service – Secondary,
Lighting & Power Service – Primary,
~~C-1 Heating Rider,~~
Lighting & Power TOU – Primary,
Lighting & Power TOU – Secondary;
Large Lighting & Power – Primary,
Large Lighting & Power – Transmission,
Pulp and Paper Mill – Transmission
Supplemental, Backup, Maintenance, and As-Available Standby Power Service
Municipal Pumping Service,
Municipal Service;
Municipal Street & Parkway Lighting,
Public Street & Highway Lighting,
Private Lighting,
Area Lighting,
Recreational Lighting.

The Federal Litigation Consulting Fee Rider shall apply to all kilowatt-hours billed during each monthly billing cycle. For electric service billed under applicable rate schedules for which there is no metering, the Company shall estimate the monthly kWh usage and the Federal Litigation Consulting Fee Rider shall be applied.

ARKANSAS PUBLIC SERVICE COMMISSION

Original	Sheet No. R-47.1 Sheet 1 of 5

Part III. Rate Schedule No. 47		
Title: RESERVED FOR FUTURE USE~~ALTERNATIVE GENERATION RECOVERY (GR) RIDER~~		PSC File Mark Only

This Schedule has been removed from the tariff book.

Reserved for Future Use

~~**PURPOSE**~~

~~This Generation Recovery (GR) Rider is designed to adjust monthly billings to recover costs associated with the Stall generating facility that has received a certificate of environmental compatibility and public need issued by the Arkansas Public Service Commission (APSC). The GR Rider is designed to recover return on and of the generation facility and operation and maintenance expenditures after the facility commences commercial operation.~~

~~This schedule is applicable to and becomes part of each APSC jurisdictional rate schedule. This schedule is applicable to energy consumption of retail customers and to facilities, premises and loads of such retail customers.~~

~~The GR Factors will include the Arkansas' jurisdictional portion of the Stall generation facilities once it is placed in commercial operation. The Arkansas jurisdictional portion will be determined using the most recently approved production allocation factors for SWEPCO Arkansas. The GR factors will be calculated in accordance with the following methodology and will be applied as a percentage of base rates to all classes with the exception of the Residential class where it will be applied to each kWh sold.~~

~~**GR FACTORS**~~

~~The Generation Recovery Factors (GR Factors) shall be set forth in Attachment A to this GR Rider.~~

THIS SPACE FOR PSC USE ONLY

Title: RESERVED FOR FUTURE USE~~ALTERNATIVE GENERATION RECOVERY (GR) RIDER~~		PSC File Mark Only

~~ANNUAL DETERMINATION~~

~~The initial period for the GR Factors shall be the forecasted initial 12 months of operation after the commercial operation date of the generation facility.~~

~~A True-up Adjustment shall be calculated and reflected in the following year's GR Factor calculation. The True-up Adjustment shall be defined as the difference between the actual GR costs for the prior year and the revenue received from the GR Factors.~~

~~GR factors shall be filed by the Company with the Commission and shall be accompanied by a set of workpapers sufficient to fully document the calculations of the GR Factors including any potential True-up Adjustment.~~

~~The GR factors shall be calculated as shown below:~~

~~GR = ((GENP – ADEP)*ROR + DEPX + O&M) * RBAF + TU/ Forecasted Base Revenues or kWh Sales by Major Rate Class, as appropriate.~~

~~GENP = Average generation plant in service balance for the forecasted calendar year for the Arkansas Jurisdiction.~~

~~ADEP = Average accumulated depreciation balance for the forecasted calendar year for the Arkansas jurisdiction based on the production depreciation rate in effect for the Arkansas Jurisdiction.~~

~~TU = The true-up amount to correct for any variance between the actual GR costs for the prior year and the revenue received from the GR factors. The calculation will be done on an annual basis, and will determine the true-up for the following year.~~

~~STAFF AND COMMISSION REVIEW~~

~~The Company will file with the Commission the requested GR Annual Factors approximately 90 days preceding the requested effective date. Staff shall review the filed GR factors to verify that the formula has been correctly applied and shall notify the Company of any necessary corrections. After the Staff completes its review of the rate calculation, the Company shall make appropriate changes to correct undisputed errors identified by the Staff in its review. Any disputed issues arising out of the Staff review are to be resolved by the Commission after notice and hearing. The requested GR Factors will become effective, upon Commission approval, with the first billing cycle of the requested billing month or the first billing cycle of the month subsequent to the approval.~~

~~TERM~~

~~The GR Factors will remain in effect for 12 months and will expire unless a request for updated GR Factors is filed by the Company or until updated GR Factors are approved by order of the Commission or until the generating facility is included in retail base rates of the Company~~

~~If this GR rider is terminated by a future order of the Commission, the GR Factors shall continue to be in effect until such costs are recovered through another mechanism or until the implementation of new base rates reflecting such costs.~~

~~Collections under the GR Rider are subject to refund, with interest, after notice and hearing to determine prudence.~~

Title: FORMULA RATE REVIEW (FRR) RIDER			PSC File Mark Only

REGULATORY AUTHORITY

The Arkansas General Assembly has delegated authority to the Arkansas Public Service Commission ("APSC" or the "Commission") to regulate public utilities in the State of Arkansas, including Southwestern Electric Power Company ("SWEPCO" or the "Company"). The Arkansas General Assembly has enacted the Formula Rate Review Act, Ark. Code Ann. §§ 23-4-1201 *et seq.*, which authorizes use of this Formula Rate Review ("FRR") Rider.

PURPOSE

The FRR defines the procedure by which all rates and applicable riders (Rate Schedules) on file with the APSC, except those excluded in Attachment A.1 to this FRR, may be periodically adjusted. The FRR shall apply to all electric service billed under the Rate Schedules, whether metered or unmetered.

DEFINITIONS

EFFECTIVE DATE -

Rates pursuant to the initial FRR shall become effective with the first billing cycle of October 2021 and subsequently adjusted FRR rates shall be effective with the first billing cycle of each successive projected year.

FORMULA RATE REVIEW TEST PERIOD -

The Formula Rate Review Test Period shall be a test period based upon a Historical Year. A Historical Year shall be the twelve (12) month period ending December 31 of the year preceding the filing of an Evaluation Report.

ANNUAL FILING AND REVIEW

ANNUAL FILING

On or about April 1, 2021 and on or about April 1 of each subsequent year during the term of the FRR, SWEPCO shall file a report ("Evaluation Report") with the Commission containing an evaluation of the Company's earnings pursuant to the FRR for the Historical Year. Attachment A-1 shall be included in each such filing and shall contain the Company's proposed Rate Adjustment. The Evaluation Report and the Rate Adjustment shall be filed pursuant to the FRR.

REVIEW PERIOD

The Parties shall file a statement of error(s) or objection(s) and supporting Testimony with or without Exhibits at least 90 days before the date on which the Rate Adjustment becomes effective. The Company shall have fifteen (15) days to review the statement of error(s) or objection(s), to work with the Parties to resolve any differences, and to address the error(s) and objection(s) raised by the Parties by filing either a corrected Attachment A.1 or Rebuttal Testimony with or without Exhibits.

HEARING AND APPROVAL OF RATE ADJUSTMENT

Following a hearing at least fifty (50) days before the date on which the Rate Adjustment shall become effective, unless waived by SWEPCO and the Parties, the Commission shall issue a final order in which it resolves any issues in dispute and approves the Rate Adjustment at least twenty (20) days before the date on which the Rate Adjustment shall become effective. If a final order is not issued by such date, the initially filed or revised Rate Adjustment shall become effective for bills rendered on and after the first billing cycle of October, subject to refund, and shall remain in effect until changed by final order of the Commission or by operation of other provisions of this FRR.

If the Commission's final ruling on any disputed issues requires changes to the Rate Adjustment, the Company shall file a revised Attachment A-1 containing such further modified Rate Adjustment within five (5) days after receiving the Commission's order resolving the disputed issues. The Parties shall have three (3) days to review the revised Attachment A-1. The revised Attachment A-1 shall be implemented as ordered by the Commission.

FRR BANDWIDTH CALCULATION

The Total FRR revenue level shall be adjusted in the FRR review mechanism based on a comparison of the ERR to the TRR calculated using the following formula:

A. If the ERR is less than the TRR minus five-tenths percent (0.50%), the Total FRR Revenue level shall be increased by the amount necessary to increase the ERR to the TRR.

B. If the ERR is greater than the TRR plus five-tenths percent (0.50%), the Total FRR Revenue level shall be decreased by the amount necessary to decrease the ERR to the TRR.

C. There shall be no change to the FRR Revenue level if the ERR is less than or equal to the TRR plus five-tenths percent (0.50%), and greater than or equal to the TRR minus five-tenths percent (0.50%).

FRR REVENUE ALLOCATION

The total change in the formula rate revenue level shall be allocated to each applicable rate class based on an equal percentage of the base rate revenue used in the development of rates approved by the Commission in Docket No. 19-008-U. The total amount of such revenue increase or decrease for each rate class shall not exceed four percent (4%) of the revenue for each rate class for the Filing Year.

TERM

The initial term of the FRR rider shall not exceed five (5) years from the date of the Commission's final order in Docket No. 19-008-U. If SWEPCO requests an extension of the FRR rider, SWEPCO shall make such request in accordance with the Extension of Term provisions of the Formula Rate Protocols.

If the FRR is not extended, the then-existing Total FRR rates shall continue to be in effect until new base rates are duly approved and implemented.

ARKANSAS PUBLIC SERVICE COMMISSION

ANNUAL DETERMINATION OF RATE ADJUSTMENT

INDEX OF ATTACHMENTS

Attachment	Description
A-1	FRR Rate Adjustment (Rate Adjustment).
A-2	FRR Revenue Change and includes the calculation of the total FRR Revenue to be collected in the Projected Year.
B-1	Earned Rate of Return ("ERR") on Common Equity. The ERR is the Company's return on common equity calculated by dividing the weighted earned common equity rate by the common equity ratio percentage.
B-2	Rate Base
B-3	Operating Income
B-4	Income Tax
B-5	Benchmark Rate of Return on Rate Base ("BRORB"). The BRORB is the composite weighted, embedded cost of capital reflecting SWEPCO's annual costs of long-term debt, preferred stock, common equity, and other capital components as of the Test Year end.
B-6	Revenue Redetermination Formula using the Rate of Return on Common Equity Bandwidth which is an Upper Bandwidth limit equal to the Target Return Rate (TRR) plus 0.5% (50 basis points) and a Lower Bandwidth limit equal to the TRR minus 0.5% (50 basis points). The TRR is the Company's cost rate for common equity as established by the Commission in Docket No. 19-008-U.
C	FRR Plan Adjustments
D	FRR Filing Requirements and description of the supporting documents to be included with the annual Evaluation Report.
E	Formula Rate Review Protocols which include the FRR general provisions and filing requirements for the annual Evaluation Report.

Attachment A-1

SOUTHWESTERN ELECTRIC POWER COMPANY
FORMULA RATE REVIEW
RATE ADJUSTMENT

All retail base rates and applicable riders on file with the APSC will be increased or decreased by a percentage of base revenues listed below, except those specifically excluded below:

Rate Class	FRR Rate (%)
Residential	XX.XXXX%
Commercial / Small Industrial	XX.XXXX%
Large Industrial	XX.XXXX%
Municipal	XX.XXXX%
Lighting	XX.XXXX%

Excluded Schedules: Energy Cost Recovery Rider (ECR)
Energy Efficiency Cost Recovery Rider (EECR)
Distribution Reliability Rider (DR Rider)

Attachment A-2

SOUTHWESTERN ELECTRIC POWER COMPANY
FORMULA RATE REVIEW
FRR RIDER REVENUE CHANGE

Line A	Description B	Total C	Residential D	Commercial / Small Industrial E	Large Industrial F	Municipal G	Lighting H
1	Base Rate Revenue: Docket No. XX-XXX-X	$	$	$	$	$	$
2	Rate Class Allocation: (Percent of Total from Line 1)	%	%	%	%	%	%
3	**FRR Constraint Calculation [1]**						
4	Total Annualized Filing Year Revenues by Rate Class	$	$	$	$	$	$
5	FRR Revenue Change ± 4% per Rate Class		4.00%	4.00%	4.00%	4.00%	4.00%
6	Upper FRR Revenue Constraint		$	$	$	$	$
7	Lower FRR Revenue Constraint		-$	-$	-$	-$	-$
9	**Calculated FRR Increase**						
10	ROE Bandwidth Rate Adjustment [2] (B-6, L 10 * L 2)	$	$	$	$	$	$
11	Incremental FRR Base Rate Change L10 ÷ (L1 + L13)	%	%	%	%	%	%
12	**Cumulative FRR Revenue Calculation [3]**						
13	Maximum Inc / Dec in FRR Revenue calculated on L9 bounded by the constraint defined on L6 and L7	$	$	$	$	$	$
14	Annualized Filing Year FRR Rider Revenue [4]	$	$	$	$	$	$
15	Cumulative Total FRR Rider Revenue (L13 + L14)	$	$	$	$	$	$
16	**Rider FRR Rate Development Calculation [5]**						
17	Adjusted Historical Base Rate Revenue (B-3, L 2)	$	$	$	$	$	$
18	FRR Rate Change (L15 ÷ L17)	%	%	%	%	%	%

NOTES:

[1] The FRR constraint calculation determines the limit of the FRR revenue increase/decrease per rate class, which shall not exceed four percent (4%) of Total Unadjusted Annualized Revenues.

[2] The Net Change in Required FRR Revenue Calculation takes the Total Historical Year Rate Change in Rider FRR Revenue (B-6, L10) and allocates the amount to each rate class based on the class allocation approved by the Commission in Docket No. 19-008-U listed on line 2.

[3] The Cumulative Rider FRR revenue calculation adjusts the required Rider FRR revenue determined on Line 10 to be within the limits of the Rider FRR constraint calculation and adds the Annualized Filing Year FRR Rider Revenue to calculate the Cumulative Total FRR Rider Revenue.

[4] The Annualized Filing Year FRR Rider Revenue in the initial Filing Year of 20XX will be zero ($0). In subsequent Filing Years, the Annualized Filing Year FRR Revenue shall reflect the annualized effect using the historical test year billing data of the FRR Rate Adjustment in effect at the end of the test year under this FRR Rider.

[5] The Rider FRR Rate Development Calculation determines the percent increase/decrease that will be applied to all base rate components. The Adjusted Historical Year Base Rate Revenue is calculated using the Retail Rate Schedule Revenue (B-3, L2) excluding Historical Year FRR Revenue and any revenue pursuant to excluded schedules on Attachment A-1. The percent increase/decrease is calculated by taking the Cumulative Total FRR Rider Revenue (L15) and dividing it by the Adjusted Historical Year Base Rate Revenue (L17).

NOTES:

[1] The capital balances for Long-Term Debt, Capital Leases, Preferred Stock, Common Equity, and ADIT shall be Test Year Ending balances consistent with Commission Order in Docket No. 19-008-U. Short-Term Debt balances and CAOL balances shall be based on the 13-month averages ending as of the Test Year end and include all accounts consistent with those ordered by the Commission in Docket No. 19-008-U. All other capital components including customer deposits shall be determined as of the Test Year end. Support for the 13 month average Short-Term debt shall be provided. Support for the CAOL balances shall include the same format and detail as required by the Filing Requirements in Attachment E, Item No. 15. A Test Year ending balance sheet should be provided as well as a reconciliation between the balance sheet and Column (2) amounts.

[2] Capital amounts each divided by the Total Capital Amount.

[3] The cost rates shall be calculated in accordance with the calculation applied by the Commission in Docket No.19-008-U. Support for the cost of Long-Term Debt and cost of Preferred Stock shall be provided in the same format and level of detail required by the Filing Requirements, respectively. Support for the Short-Term debt cost rate should include a general description of how the interest rae is determined and the same level of detail provided in the Filing Requirements in Attachment E, Item No. 15. The cost rate for Customer Deposits shall be the Commission-approved rate in effect during the year. The cost rate for Common Equity shall be that approved by Commission Order In Docket No. 19-008-U.

[4] The components in Column (5) are the corresponding Cost Rates multiplied by the associated Capital Ratio.

Notes:

[1] The ERR is the Earned Rate of Return on Common Equity calculated by dividing the weighted earned common equity rate by the common equity ratio percentage.

[2] The TRR is SWEPCO's cost rate for common equity as established by the Commission in Docket No. 19-008-U.

Attachment C
Southwestern Electric Power Company
FORMULA RATE REVIEW ADJUSTMENTS

The actual (per book) data for each Test Year reflected in Attachment B shall be adjusted to reflect the following specific ratemaking adjustments to rate base, operating income, and rate of return:

I. General

A) SWEPCO shall not record a regulatory asset or a regulatory liability representing the amount by which an FRR increase or decrease absent the operation of the 4 percent cap exceeds the actual FRR increase or decrease that is implemented pursuant to the operation of this tariff.

B) During the term of the FRR the Lost Contribution to Fixed Costs portion of the Company's Energy Efficiency Rider shall be set to zero after any true-ups, if needed, for timing purposes.

C) If not specifically mentioned in this Attachment C, revenues, expenses, cost of capital components and any other cost effects shall be treated in the same manner as in Docket No. 19-008-U.

D) Rate base amounts for the Test Year shall exclude construction work in progress (CWIP), Non-Utility Plant, and Plant Held for Future Use.

E) The Arkansas Jurisdictional Revenue Requirement will be determined by running the total company historical costs through the approved Cost of Service model from Docket 19-008-U. The Company will provide a fully-functioning cost of service model able to replicate the Company's determination of the jurisdictional revenue requirement, containing links to the supporting accounting schedules which contains the level of detail (e.g., subaccounts or detailed plant information) commensurate with the detail required by the cost of service model.

F) Plant additions requiring either CECPN or CCN approvals (generation and transmission plant) in any SWEPCO jurisdiction shall be included in this FRR, but related revenues recovered under this FRR shall be subject to refund pending a prudence review in the next general rate case, if the prudence determination doesn't occur during the FRR review. All other plant additions shall be deemed prudent once included in this FRR.

II. Cost of Service Ratemaking Adjustments

A. Rate Base

1. Use Test Year-end balances for Electric Plant In Service (EPIS) and Accumulated Depreciation on a total company basis excluding the Turk Generation Power Station and related Generator Step-up Transformers.

2. Use 13-month averages ending December 31 of the Test Year for working capital assets, excluding amounts (e.g., non-jurisdictional) and accounts consistent with Docket No. 19-008-U.

3. Restate balances of accumulated depreciation (and related depreciation ADIT) using existing Arkansas depreciation rates in effect when the depreciation expense was incurred.. During an annual FRR filing,

a utility may request an interim rate for plant added which has no approved depreciation rate, excluding major plant acquisitions. Depreciation rates for major plant acquisitions must be requested within the docket requesting approval of the purchase.

4. Remove from Test Year Rate Base all non-Arkansas jurisdictional, non-utility amounts and other items consistent with Docket No. 19-008-U.

5. Include AFUDC adjustment to EPIS, accumulated depreciation and ADIT computed consistent with Docket No. 19-008-U including Arkansas' approved return on common equity and the FERC AFUDC formula.

6. Eliminate rate base effects associated with any riders other than this FRR Rider that SWEPCO may have in effect during the test year that recover specific costs.

B. Operating Income

1. The Test Year shall reflect actual revenues. No adjustments for rate annualization, growth or weather shall be included.

2. The revenue and expense effects associated with any riders other than this Rider FRR that SWEPCO may have in effect during the test year that recover specific costs are to be eliminated.

3. Include other revenues consistent with the methodology utilized in Docket No. 19-008-U.

4. Do not annualize or normalize test year revenues or expenses, except for depreciation expense which shall be restated using approved depreciation rates and changes in EPIS.

5. Include credit line fees in operating expenses that are not included in cost of debt or recovered elsewhere in the cost of service.

6. Specifically assign jurisdictional other taxes in same manner as SWEPCO filed its revenue requirement as in Docket No. 19-008-U.

7. Exclude other costs not recognized for ratemaking, including, but not limited to, the Turk Generation Power Station, charitable contributions, lobbying expenses, fines and penalties, and disallowances consistent with Docket No. 19-008-U.

8. Adjust federal and state income expense, and deferred tax expense, for the following:
   i. All Historical Year interest expenses shall be eliminated and replaced with an imputed interest expense amount equal to the rate base multiplied by the weighted embedded cost of debt;
   ii. Effects associated with other adjustments set out in this Attachment C shall similarly and consistently be adjusted;
   iii. The corporate state and federal income tax laws legally in effect at test year end shall be reflected in the calculation of all income tax amounts; and any changes in the statutory federal income tax rate will be treated as a direct flowthrough item in the year the new tax rate is effective as long as the flowthrough complies with normalization rules; and,
   iv. Tax effects normally excluded in prior Commission Orders regarding SWEPCO for ratemaking purposes shall be eliminated.

C. Benchmark Rate of Return on Rate Base

1. Short-term Debt shall be included consistent with Docket No. 19-008-U.

2. All Long-Term Debt issues as of the Test Year end, including current maturities, shall reflect the balance net of a) unamortized debt discount, premium, and issuance expense and b) the gains or losses on reacquired debt should be included as a component of total net outstanding Long-Term, consistent with Docket No. 19-008-U.

3. All Preferred Stock issues as of the Test Year end shall reflect the balance net of discount, premium and capital stock expense, consistent with Docket No. 19-008-U.

4. Accumulated Deferred Income Taxes (ADIT) will be treated as zero-cost capital reflecting balances at Test Year-End. ADIT shall include all accounts consistent with those approved in Docket No. 19-008-U. Any associated excess ADIT recorded in the Company's Regulatory Assets/Liabilities receives the same ADIT treatment consistent with Docket No. 19-008-U.

5. CAOL shall be based on the 13-month averages ending as of the Test Year end, and include all accounts consistent with those ordered by the Commission in Docket No. 19-008-U.

6. All other capital components including customer deposits shall be determined as of the Test Year end.

7. The cost rates to be applied for Long-Term Debt and Preferred Equity shall be determined as of the Test Year end. The Long-Term Debt cost rates shall include the a) annual amortization of debt discount premium and expenses; and b) annual gain or loss on reacquired debt.

8. The cost rate to be applied for Common Equity shall be the authorized Rate of Return on Common Equity approved by the Commission in Docket No. 19-008-U.

9. The cost rates for ADIT and CAOL will be zero.

10. The cost rates for other capital items including customer deposits, short-term debt and other capital components will be determined as of the Test Year end and calculated in a consistent manner with Docket No. 19-008-U.

Attachment D

SOUTHWESTERN ELECTRIC POWER COMPANY
FORMULA RATE REVIEW
FILING REQUIREMENTS

Item No.	Filing Requirements
1	SWEPCO shall file all FRR Attachments supporting the Test Year. For the initial FRR application, SWEPCO shall provide the FERC FORM Number 1 for the test year and the four preceding years. The FERC FORM Number 1 for the test year will be provided when filed at the FERC.
The following information shall be provided to the Parties:	
2	In support of the Test Year FRR schedules, the Company will provide a fully-functioning cost of service model as approved by the Commission in Docket 19-008-U. The Cost of Service model should be able to replicate the Company's determination of the jurisdictional revenue requirement, containing links to the supporitng accounting schedules which contains the level of detail (e.g., subaccounts or detailed plant information) commensurate with the detail required by the cost of service model. Total company amounts shall be reconciled to the Trial Balances provided in item 3.
3	Monthly Trial Balances by detail general ledger subaccount number for the Test Year.
4	Identify all construction projects or purchases that closed to plant during the Test Year greater than $1 million on a total basis. Include the project number, project description, start date, completion date, date closed to plant, cost to complete, and plant accounts where it was closed. Provide the costs, including the AFUDC calculation, included in the five (5) largest projects completed during the year.
5	Rules of Practice and Procedure, Appendix 8-1 Minimum Filing Requirements (MFR) Schedules, as modified for the Test Year, B-1, B-2, B-4, B-5, B-10, C-2, C-4, C-5, C-8, C-9, C-10, C-11, C-12, D-2, D-3, D-5, D-6.1, D-6.2, D-6.3, D-7, F-1, G-1, G-2, G-3 and G-4, including the supporting cost of service study (Jurisdictional Only). For the F-1 Schedule, provide a reconciliation to Schedule B-1 and the plant amounts in the monthly trial balance (item 3 above).
6	Detailed chart of accounts, including subaccounts and detailed description (i.e. MFR E-9). List of project codes, activity codes, resource codes and detailed description for each.
7	Web access to SWEPCO's general ledger for the Test Year including capablility to view supporting invoices.
8	For the Test Year, by rate class and rate schedule, provide a monthly statement showing customer count, kWh, coincident and non-coincident kW demands, base rate revenues, and rider revenues.
9	For the 12 month's prior to the Test Year, provide actual revenues by rate class.
10	SWEPCO/AEPSC internal and external audit reports for the Test Year and any proposed auditor's adjustments to be filed confidentially.
11	The most recently filed State and Federal Income Tax Returns for SWEPCO and AEP to be filed confidentially. Also provide any return that becomes available during the discovery period related to the Test Year.

Attachment E

FORMULA RATE REVIEW PROTOCOLS
Section I. General Provisions

1. Applicability and Scope

A. The following protocols shall apply to the annual Evaluation Report filings made pursuant to the Formula Rate Review (FRR) Rider approved by the Commission in Docket No. 19-008-U.

B. The Rules of Practice and Procedure (RPPs) shall apply to all annual Evaluation Report filings, except the following for which the Commission has granted an exemption by approving the FRR:

Rule 3.08;
Rule 4.02 (a)(2)(A);
Rule 4.02 (a)(3);
Rule 4.02 (a)(4);
Rule 4.03 (c);
Rule 4.04 (a)(2);
Rule 4.10 (a)(2) & (3); and
Rule 5.05(b), (c), & (d).

C. Any proposed modification of the FRR Rider, including these protocols, is outside the scope of an annual Evaluation Report filing and as such, no Party shall seek to modify the FRR Tariff, including these protocols, as part of any annual Evaluation Report filing. Proposed modifications to the FRR Tariff, including these protocols, shall be brought in a separate docket.

D. The filing of an annual Evaluation Report is a Formal Application. The filings of an annual Evaluation Report are not to be construed as a General Rate Change Application, nor are adjustments to rates that result from the filings of an annual Evaluation Report to be construed as a general change in rates pursuant to any provision of the Arkansas Code that references a general change in rates.

E. The Commission may grant an exemption from compliance with these Protocols if the exemption is found to be in the public interest and for good cause shown.

2. Public Notice

A. At least thirty (30) days prior to filing an annual Evaluation Report, SWEPCO shall give public notice of its intent to file.

B. The notice shall indicate that it is from SWEPCO and shall include: the docket number, if known; the date on or about which the annual Evaluation Report is to be filed; the effective date of FRR rates; reference to the RPPs and these protocols for persons interested in intervening, making a limited appearance, or submitting public comments in writing or orally at the hearing; deadlines for intervention as provided herein; the name, address, phone number and email address of the Secretary of the Commission and the URL address of the Commission website; and that further information may be obtained by contacting the Secretary of the Commission or viewing the Commission's website.

C. Public notice shall be given by any method including but not limited to: bill notation, direct mail, email exploder list, publication on SWEPCO's website, through social media, or publication in a newspaper of general circulation in SWEPCO's service area.

D. An annual Evaluation Report filing shall include a declaration that these notice provisions have been complied with.

3. Intervention

A. A Petition to Intervene shall be filed within ten (10) calendar days from the date the annual Evaluation Report is filed.

B. Any Party desiring to file a Response to a Petition to Intervene shall file the Response within five (5) calendar days of the filing of the Petition. No additional responses or replies shall be permitted unless specifically authorized by the Commission.

C. The Commission shall rule on the Petition to Interveners within seven (7) calendar days from the date the Petition is filed. If the Commission does not rule within that time frame, the Petition to Intervene shall be deemed denied.

4. Discovery

A. Time Within Which to Respond or Object

1. The Party upon whom discovery is sought shall serve a written response or objection within ten (10) calendar days after service of the discovery. Responses or objections to requests for admission shall be served within ten (10) calendar days of service of the requests. The Commission may prescribe a shorter or longer time. Any objections shall state the specific reasons for such objection.

2. If the response to the discovery request contains protected information for which no Protective Order has been issued, the responsive Party shall apply for a Protective Order as soon as reasonably practicable after receipt of the discovery request so as to avoid any delays in responding to discovery, and to the greatest extent practicable no later than five (5) calendar days after receipt of the discovery request. SWEPCO shall respond to the discovery request on the next business day after the Protective Order is issued or on the date the discovery response is due.

B. Discovery Initiation

Unless otherwise ordered, a Party may initiate discovery at any time after filling of an annual Evaluation Report so long as responses or objections and depositions shall be completed at least sixty (60) days before the date on which rates determined by the formula rate review mechanism will go into effect for each year or ten (10) days before a hearing on the merits, whichever is earlier.

C. Service and Format

1. Service shall be made by electronic mail, facsimile transmission, hand delivery, or overnight delivery service unless unusual circumstances otherwise justify delivery by another method and the Parties agree to the method chosen.

2. Attachments to documents shall be provided in native electronic format, with formulae and viable links intact.

3. Any discovery document served electronically or by facsimile after Commission Business Hours but before midnight or received on a non-business day shall be deemed served on Persons on the Official Service List with electronic mail on the next business day. Any discovery document served electronically or by facsimile between midnight and the beginning of Commission Business Hours on a business day shall be deemed served on Persons on the Official Service List on that business day. Any discovery document served by hand delivery or overnight delivery service shall be deemed served pursuant to Rule 3.07 of the RPPs.

D. Computation of Time for Performance or Response

In computing the time within which an act must be performed or a response made, the Day of the act from which the designated period of time begins to run shall not be included and the last Day shall be included unless it is a Saturday, Sunday, Legal Holiday, or other Day in which the Commission's office is closed, in which event the period shall extend to the next business Day. Service by mail or commercial delivery service is prohibited; therefore no additional response time as contemplated by the RPPs is necessary.

5. General Filing Matters

A. Beginning with the initial annual Evaluation Report filing after the FRR is approved by the Commission in Docket No. 19-008-U, a separate docket shall be established by the Secretary of the Commission for the annual Evaluation Report filings with an "FR" docket designation.

B. The initial and all subsequent annual Evaluation Reports filed in the "FR" docket. SWEPCO shall submit the annual Evaluation Report with a Commission-approved tariff Docket Summary Cover Sheet. In addition to any other information required by the coversheet, SWEPCO shall reference Docket No. 19-008-U.

C. Stipulations or Settlements

1. Parties shall propose by written motion that the Commission adopt stipulations or settlements. Such motion shall be filed, along with supporting testimony, no later than seven (7) calendar days prior to the hearing scheduled in the annual Evaluation Report filing. If the seventh day falls on a weekend or state holiday such settlement agreement and supporting testimony shall be filed on the last business day prior to the seventh day. The motion shall set forth the factual, legal, policy, and other consideration which form the basis for the Parties' recommendation that the stipulation or agreement be adopted, and shall be supported by written testimony.

2. A Party not joining a proposed stipulation or settlement may file a response no later than five (5) calendar days prior to the scheduled date of the hearing.

3. Such a response shall set forth the factual, legal, policy, and other consideration which form the basis for the Party's opposition to the proposed stipulation or settlement or portions thereof.

Section II. Filing Requirements

1. Testimony and Exhibits

A. Testimony with or without Exhibits shall be filed simultaneously with the annual Evaluation Report and address, at a minimum:

1. A description of the filed schedules and all of the adjustments proposed;

2. A description of any significant cost drivers;

3. A description of any changes in accounting policies, practices, and procedures if they affect inputs to the FRR or the rate redetermination to be made under the FRR; and

4. A narrative explanation of the rate impact.

2. Workpapers and Supporting Documentation

A. The annual Evaluation Report and any revisions thereto shall include:

1. Data-populated schedules including fully functioning EXCEL spreadsheet with all formulas and links intact, showing all calculations in the annual Evaluation Report;

2. Sufficient information to enable the Parties to replicate the calculation of the formula results from the applicable schedules; and

3. Documentation fully supporting all calculations and adjustments.

B. Workpapers shall be provided to the Parties simultaneously with the filing of the annual Evaluation Report and any revisions thereto, and shall include:

1. All supporting calculations and documents that explain the calculations in the annual Evaluation Report;

2. Both references to and support from detailed source information; and

3. A complete description of any statistical model used, the data used, and the results of the analysis if not addressed in testimony or exhibits.

C. With respect to any change in accounting that affects inputs to the FRR or the resulting rate redetermination to be billed under the FRR, SWEPCO shall identify and provide narrative explanation of the individual impact of such changes on rate redetermination to be billed under the FRR including:

1. The initial implementation of an accounting standard or policy;

2. The initial implementation of accounting practices for unusual or unconventional items where the Commission has not provided specific accounting direction;

3. Correction of errors and prior period adjustments that impact the FRR;

4. The implementation of new estimation methods or policies that change prior estimates; and

5. Changes to income tax elections.

D. SWEPCO shall identify any reorganization or merger transaction and explain the effect of the accounting for such transaction(s) on the inputs to the FRR or the resulting rate determination to be billed under the FRR.

3. Waiver of Requirements

SWEPCO may omit specific items of information from the annual Evaluation Report filing only with prior Commission approval.

4. Filing Deficiencies

A. The Arkansas Public Service Commission General Staff ("Staff") may review each annual Evaluation Report filing to ascertain whether it complies with the provisions of these Filing Requirements and the FRR, including the provisions of all of the Attachments thereto.

B. If Staff determines that any deficiencies exist, Staff shall file a notice detailing the deficiencies within seven (7) calendar days from the date the annual Evaluation Report is filed.

C. SWEPCO shall correct the deficiencies, within seven (7) calendar days of filing of the notification of deficiency, or upon objection being filed by SWEPCO within that timeframe; the Commission may set a longer period as may be reasonable.

D. Staff shall review corrections made by SWEPCO to determine compliance with all information required by the Filing Requirements and the FRR, including the provisions of all of the Attachments thereto.

E. No more than three (3) business days from the filing of corrections, Staff may file a (1) statement of compliance or (2) a second notice of deficiencies, listing each requirement not met and a brief explanation in support.

F. The Commission shall resolve any dispute as to deficiencies within seven (7) calendar days of the filing of the second notice of deficiencies by either accepting the corrections made by SWEPCO or by directing additional corrections to be filed by SWEPCO.

5. Dispute Procedures

A. Any Party filing with the Commission a statement of errors or objections to the Evaluation Report shall file Testimony with or without Exhibits simultaneously with the statement of errors or objections and the filing shall:

1. Clearly identify and explain the error in or objection to the annual Evaluation Report;

2. Make a good faith effort to quantify the financial impact of the error or objection;

3. State specifically any proposed changes to the annual Evaluation Report that the Party recommends; and

4. Include all documents and workpapers that support the calculation of the error or the facts supporting the objection.

B. SWEPCO shall file a corrected FRR rate or Rebuttal Testimony with or without Exhibits to the errors and objections raised by the Parties.

6. Extension of Term

A. If SWEPCO requests an extension of the initial term of the FRR, SWEPCO shall include such request as part of its fourth annual Evaluation Report filing.

B. SWEPCO shall provide a class cost of service study for historical year-end 2023.

C. The Commission shall enter a decision on SWEPCO's request no later than 30 days after SWEPCO's request for an extension of the term.

ARKANSAS PUBLIC SERVICE COMMISSION

Replacing:	Sheet No.	
Name of Company SOUTHWESTERN ELECTRIC POWER COMPANY		
Kind of Service: Electric	Class of Service: As Applicable	
Part III. Rate Schedule No. 51		
Title: DISTRIBUTION RELIABILITY RIDER (DRR)		PSC File Mark Only

AVAILABILITY

The Distribution Reliability Rider is designed to recover Arkansas costs associated with vegetation management and tree trimming incremental to Arkansas jurisdictional costs recovered in base rates for vegetation management. The Arkansas jurisdictional portion of distribution reliability costs are those that are directly assigned to the Arkansas jurisdiction. The class allocators will be determined using the most recently approved FERC account 593 allocation factors for SWEPCO Arkansas. The Distribution Reliability Rider is applicable to and becomes part of each SWEPCO Arkansas jurisdictional rate schedule. This Rider is applicable to energy consumption of retail customers served at secondary and primary service levels and to facilities, premises and loads of such retail customers.

For service billed under applicable rate schedules for which there is not metering, the monthly kilowatt-hour (kWh) usage shall be estimated by the Company and the Distribution Reliability Factor shall be applied to the estimated kWh usage. The Distribution Reliability billing shall be determined by multiplying the total billing kWh for each applicable customer by the Reliability Surcharge Factor for that customer's class for the current month.

ANNUAL DETERMINATION

The initial period for the DRR Factors shall be the forecasted initial 12 months of distribution reliability costs. A True-up Adjustment shall be calculated and reflected in the following year's DRR factor calculation. The True-up Adjustment shall be defined as the difference between the actual DRR costs for the prior year and the revenue received from the DRR Factors. DRR factors shall be filed by the Company with the Commission and shall be accompanied by a set of workpapers sufficient to fully document the calculations of the DRR Factors including any potential True-up Adjustment.

DISTRIBUTION RELIABILITY FACTORS

Major Rate Class	Factors
Residential - Secondary	$0.004713 per kWh
Commercial/Small Industrial – Secondary	$0.003375 per kWh
Commercial/Small Industrial - Primary	$0.001682 per kWh
Municipal – Secondary	$0.003379 per kWh
Lighting – Secondary	$0.004594 per kWh

General Service Rule 4.01 – Deposits from Applicants

SWEPCO was granted exemption to utilize the computerized system of "Pos ID" in evaluating and identifying the credit risk of new applicants for utility service (Docket #98-056-U).

General Service Rule 4.03B – Calculation of Average Bill – For Inadequate Billing History

SWEPCO was granted exemption from General Service Rule 4.03B by clarifying that the basis on which the deposit for a non-residential applicant is calculated will be determined as following:

"When a non-residential applicant requests service in a location where the previous customer at that location was of the same business type and size as the applicant for service, the average bill shall not be more than the average monthly bill for that location for the most recently completed representative 12-month period."

General Service Rule 5.21 – Transferring Past Due Balances to Other Accounts

SWEPCO was granted exemption from General Service Rule 5.21 by the addition of the following Paragraph.

"C. An account of any Customer, of any class, when the Company receives a written request to have a balance transferred to the requesting Customer's account and when the following information is stated in the letter of request:

(1) Name and account number of the Customer requesting that a balance is to be transferred to their account;
(2) Name and account number of the Customer whose balance is to be transferred; and
(3) A statement that the requesting Customer understands that their own service may be terminated for non-payment if the transferred balance is not paid in full in accordance with any agreed upon payment arrangements."

Rules for Conservation and Energy Efficiency – Section 5.D

SWEPCO was granted a waiver of Section 5.D of the Conservation and Energy Efficiency Rules by Order 22 of Docket 07-082-TF. The waiver allows SWEPCO to implement its Commercial and Industrial Standard Offer Program and associated rebates for new construction.

Rules for Conservation and Energy Efficiency – Section 7.D

SWEPCO was granted a waiver of Section 7.D of the Conservation and Energy Efficiency Rules by Order 22 of Docket 07-082-TF. The waiver allows SWEPCO to implement its Emergency Load Management Standard Offer Program as and Energy Efficiency program.

ARKANSAS PUBLIC SERVICE COMMISSION

Original	Sheet No. R-1.1	Sheet 1 of 8
Replacing:	Sheet No.	
Name of Company SOUTHWESTERN ELECTRIC POWER COMPANY		
Kind of Service: Electric	Class of Service: All	
Part III. Rate Schedule No. 1		
Title: STANDARD TERMS AND CONDITIONS		PSC File Mark Only

1. APPLICABLE TO ALL CLASSES OF ELECTRIC SERVICE

In order that all Customers may receive uniform, efficient, and adequate service, electric service will be supplied to and accepted by all Customers receiving service from the Company in accordance with these Terms and Conditions.

2. ORDER FOR SERVICE

When applicable, contract and agreement forms are provided by the Company to show the agreement under which the Customer receives and the Company delivers electric service. Appropriate arrangements will be completed with Customer, or his duly-authorized agent, before service is supplied by the Company.

3. OPTIONAL RATES

The Company's published rate schedules state the conditions under which each is available for electric service. When two or more rates are applicable to a certain class of service, the choice of such rates lies with the Customer.

The Company, at any time upon request, will determine for any Customer the rate best adapted to existing or anticipated service requirements as defined by the Customer, but the Company does not assume responsibility for the selection of such rate or for the continuance of the lowest annual cost under the rate selected.

The Company, lacking knowledge of changes that may occur at any time in the Customer's operating conditions, does not assume responsibility that Customer will be served under the most favorable rate; nor will the Company make refunds covering the difference between the charges under the rate in effect and those under any other rate applicable to the same service.

Rates are normally established on a twelve-month basis and a Customer having selected a rate adapted to his service may not change to another rate within a twelve-month period unless there is a substantial change in the character or conditions of his service. A new Customer will be given reasonable opportunity to determine his service requirements before definitely selecting the most favorable rate therefor.

4. MONTHLY BILLS

Bills for service will be rendered monthly, unless otherwise specified. The term "month" for billing purposes will mean the period between any two consecutive readings of the meters by the Company, such readings to be taken as nearly as practicable every thirty days, but no less than 25 days and no more than 35 days.

Failure to receive a bill in no way exempts Customers from payment for electric service.

The Company makes a special effort to read all meters every month. Sometimes due to adverse weather conditions, dog hazards, damaged equipment, etc., it is not possible to obtain a meter reading and the bill may be estimated. Estimated bills are identified on the bill with an applicable code.

5. DISCONTINUANCE OF SERVICE

When bills for electric service are in arrears, or in case the Customer fails to comply with these Terms and Conditions, the Company will have the right to discontinue electric service to the Customer and to remove its property from the Customer's premises upon mailing notice to address to which the monthly bills are sent. There will be a charge for reconnecting the service to Customers whose service has been disconnected for non-payment of bills.

6. EXCLUSIVE SERVICE ON INSTALLATION CONNECTED TO COMPANY'S SYSTEM

Except as may be specifically permitted under tariffs governing the interconnection or provision of service to small power producers or cogenerators, standard electric rate schedules are based on exclusive use of Company's service.

Except in cases where the Customer has a contract with the Company for breakdown or standby service, no other electric light or power service will be used by the Customer on the same installation in conjunction with the Company's service, either by means of a throw-over switch or any other connection.

The Company will not be required to supply or continue to supply service to any Customer where a portion of Customer's service requirement is obtained from other sources, except when such service is covered by a contract.

The Customer will not sell the electricity purchased from the Company to any other customer, company, or person, and Customer will not deliver electricity purchased from the Company to any connection wherein said electricity is to be used off of the Customer's premises on which the meter is located.

7. CUSTOMER'S INSTALLATION

All wiring and other electrical equipment furnished by the Customer will be installed, operated, and maintained by the Customer at all times in conformity with good electrical practice and with the requirements of the constituted authorities and these Terms and Conditions. Where no public authorities have jurisdiction, Company, for Customer's protection, may require Customer to furnish Company a certificate from wiring electrician that Customer's installation conforms to the National Electrical Code and/or the National Electrical Safety Code. The Company does not assume responsibility for the design, operation, or condition of the Customer's installation.

Service will be delivered to Customer for each premise at one point of delivery to be designated by Company and to conform to Company's service standards. For mutual protection of Customer and Company, only authorized employees of Company are permitted to make and energize the connection between Company's service wire and Customer's service entrance conductors.

8. OWNER'S CONSENT TO OCCUPY

The Company shall have the right to install and maintain equipment in, over and under the Customer's property and shall have access to the Customer's premises for any other purpose necessary for supplying electric service to the Customer. In case the Customer is not the owner of the premises or of the intervening property between the premises and the Company's lines, the Customer will obtain from the property owner or owners the easements or right-of-way necessary to install and maintain in, over or under said premises all such

wires and electrical equipment as are necessary or convenient for supplying electric service to the Customer.

9. MOTOR INSTALLATIONS

For mutual protection of service to all customers, all motor installations will be as follows:

(a) All motors rated in horsepower up to and including 7-1/2 HP and individual air conditioning units with ratings of 65,000 BTUH (ARI rating) or less will be single phase, unless otherwise agreed to by the Company or served in conjunction with other larger three phase loads.

(b) All three phase motors will be equipped with approved starting equipment having low voltage release attachment and properly sized over-current protection in each of the three phases.

10. POWER FACTOR

The Company will not be required to furnish electric service to any Customer with low power factor equipment.

Where Customer has power or heating equipment installed that operates at low power factor, Customer, when requested to do so by the Company, will furnish, at his own expense, suitable corrective equipment to maintain a power factor of 90% lagging, or higher.

Customer will install and maintain in conjunction with any fluorescent lighting, neon lighting, or other lighting equipment having similar load characteristics, auxiliary or other

corrective apparatus that will correct the power factor of such lighting equipment to not less than 90% lagging.

11. PROTECTION OF SERVICE

The Company will not be obligated to serve any devices that have a detrimental effect upon the service rendered to other Customers or upon Company equipment. Where the Customer's use of such a device causes voltage fluctuation of the 60 Hertz wave, clipping of the current, or voltage wave - thereby producing harmonics or a cyclic pulsation between one and sixty Hertz (1 and 60 Hertz), Customer will furnish at his own expense necessary equipment to limit such voltage fluctuation, harmonics, or pulsations so that they will not interfere with other Customers or Company equipment. Where the interference cannot be corrected, the use of such devices must be discontinued.

12. CONTINUOUS SERVICE

The Company will endeavor to maintain continuous service but will not be liable for loss or damage caused by interruption or failure of service or delay in commencing service due to accident to or breakdown of plant, lines, or equipment, strike, riot, act of God, or causes reasonably beyond the Company’s control or due to shutdown for reasonable periods to make repairs to lines or equipment.

In like manner, should the Customer's premises be rendered wholly unfit for the continued operation of the Customer's plant or business, due to any of the causes mentioned above, the Customer's contract, if any, will thereupon be suspended until such time as the plant or premises will have been reconstructed, reconditioned, and reoccupied by the Customer for the purpose of his business.

ARKANSAS PUBLIC SERVICE COMMISSION

Original	Sheet No. R-1.7	Sheet 7 of 8
Replacing:	Sheet No.	
Name of Company SOUTHWESTERN ELECTRIC POWER COMPANY		
Kind of Service: Electric	Class of Service: All	
Part III. Rate Schedule No. 1		
Title: STANDARD TERMS AND CONDITIONS		PSC File Mark Only

13. INTERRUPTION OF SERVICE

The Company shall not be responsible in damages for any failure to supply electricity, or for interruption, or reversal of the supply, if such failure, interruption, or reversal is without willful default or negligence on its part, nor for interruptions, by under frequency relays or otherwise, to preserve the integrity of the Company's system or interconnected systems.

14. METERING

The electricity used will be measured by a meter or meters to be furnished and installed by the Company at its expense and bills will be calculated upon the registration of such meters. Meters include all measuring instruments. Meter installations will be made in accordance with the Company’s service standards. Customer will provide a sufficient and proper space in a clean and safe place, accessible at all times and free from vibration, for the installation of Company's meters. Company will furnish all meter bases and/or metering enclosures to be installed by Customer on supply side of service equipment to be metered.

15. PROTECTION OF COMPANY'S PROPERTY AND ACCESS TO PREMISES

The Customer will protect the Company's property on the Customer's premises from loss or damage and will permit no one who is not an agent of the Company to remove or tamper with the Company's property.

The Company will have the right of access to the Customer's premises at all reasonable times for the purpose of installing, reading, inspecting, or repairing any meters or devices owned by Company or for the purpose of removing its property.

16. AGENTS CANNOT MODIFY AGREEMENT

No agent has power to amend, modify, or waive any of these Terms and Conditions, or to bind the Company by making any promises or representations not contained herein.

17. SUPERSEDE PREVIOUS TERMS AND CONDITIONS

These Terms and Conditions supersede all Terms and Conditions under which the Company has previously supplied electric service.

ARKANSAS PUBLIC SERVICE COMMISSION

Original	Sheet No. R-2.1	Sheet 1 of 2
Replacing:	Sheet No.	
Name of Company SOUTHWESTERN ELECTRIC POWER COMPANY		
Kind of Service: Electric	Class of Service: Residential	
Part III. Rate Schedule No. 2		
Title: RESIDENTIAL SERVICE		PSC File Mark Only

AVAILABILITY

This schedule is available to residential customers for all domestic uses in residences, individual family apartments, and private rooming houses.

Where a portion of a residential unit is used for non-residential purposes, the appropriate non-residential service schedule is applicable to all uses of electric service. However, this rate schedule may be applied to the residential portion of such use provided the Customer's wiring is so arranged that the use of electric service for residential purposes can be metered separately from the non-residential use.

NET MONTHLY RATE

Customer Charge:	$10.00 Per Meter, plus
Kilowatt-hour Charge:	May through September Billing Cycles $0.0702 each for the first 1,500 kilowatt-hours $0.0919 each for all additional kilowatt-hours October through April Billing Cycles $0.0610 per kilowatt-hour

Adjustments:

Fuel Adjustment: In addition to all other charges, the amount of the Customer's bill will be adjusted by an amount per kilowatt-hour calculated according to the formula in the Energy Cost Recovery Rider - Arkansas.

Tax Adjustment: In addition to all other charges, the amount of the Customer's bill will be increased by the proportionate part of any new tax or increased rate of tax in accordance with the Tax Adjustment Rider - Arkansas.

Multiple Dwelling: Where service is rendered through one meter to a multiple dwelling unit or apartment house, the amount of the Customer Charge will be multiplied by the number of single residence units served.

PAYMENT FOR SERVICE

Payment for Service Rider - See Rate Schedule 44.

TERMS AND CONDITIONS

Service will be furnished under the Company's Standard Terms and Conditions.

Title: ELECTRIC HEATING APPLIANCE RESIDENTIAL SERVICE Closed to New Applications		PSC File Mark Only

AVAILABILITY

This schedule is available to residential customers for all domestic uses in residences, individual family apartments, and private rooming houses under one or both of the following conditions:

1. When a Customer regularly uses one or more Company-approved electric water heaters for all water heating requirements, notifies the Company, and has the installation verified by Company personnel, and/or,
2. When there is a permanently installed electric reverse cycle central system heat pump or a total of five kilowatts or more of permanently installed electric space heating devices which are in regular use for space heating purposes, and the Customer notifies the Company, and has the installation verified by Company personnel.

Where a portion of a residential unit is used for non-residential purposes, the appropriate non-residential service schedule is applicable to all uses of electric service. However, this rate schedule may be applied to the residential portion of such use provided the Customer's wiring is so arranged that the use of electric service for residential purposes can be metered separately from the non-residential use.

Part III. Rate Schedule No. 5		
Title: GENERAL SERVICE		PSC File Mark Only

AVAILABILITY

This rate schedule is available to all customers except multiple or individual dwellings or apartment houses, on an annual basis for secondary service for lighting, heating and power, or combination of lighting, heating and power where facilities of adequate capacity and suitable phase and voltage are available. Service will be supplied at one point of delivery through one meter. This schedule is available for Demand up to 50 kilowatts.

NET MONTHLY RATE

Customer Charge:	\$10.60 Per Meter, plus \$6.51 for each Kilowatt of Billing Demand in excess of 6 Kilowatts of Billing Demand
Kilowatt-hour Charge:	May through September Billing Cycles \$0.0456 per kilowatt-hour October through April Billing Cycles \$0.0373 per kilowatt-hour

Determination of Kilowatts of Billing Demand: The Kilowatts of Billing Demand for each month will be the average kilowatt load used by the Customer during the 15-minute period of maximum use during the month. The Kilowatts of Billing Demand will be subject to the Power Factor Adjustment Clause.

Contract Minimum: When a contract minimum is applicable, the Customer's minimum monthly bill will not be less than the applicable charge for the contracted demand minimum plus the applicable Fuel and Tax Adjustments.

<u>Capacity Charge for Highly Fluctuating Loads</u>: Should the Customer operate equipment with highly fluctuating, intermittent, or abnormal characteristics that make it necessary for the Company to install special facilities to serve the Customer or to prevent disturbances to the service to other Customers, an additional Distribution Function charge of $1.58 per month per kilovolt-ampere (kVA) or fraction thereof of transformer capacity installed by the Company to serve the Customer will be added to the Customer's bill.

<u>Power Factor Adjustment</u>: The Company reserves the right to determine the power factor of the Customer's installation served hereunder. Should the average lagging power factor during the month be determined to be below 90%, the Customer's Kilowatts of Billing Demand will be adjusted by multiplying the Kilowatts of Billing Demand by 90% and dividing by the average lagging power factor.

<u>Adjustments</u>:

<u>Fuel Adjustment</u>: In addition to all other charges, the amount of the Customer’s bill will be adjusted by an amount per kilowatt-hour calculated according to the formula in the Energy Cost Recovery Rider - Arkansas.

<u>Tax Adjustment</u>: In addition to all other charges, the amount of the Customer's bill will be increased by the proportionate part of any new tax or increased rate of tax in accordance with the Tax Adjustment Rider - Arkansas.

<u>PAYMENT FOR SERVICE</u>

Payment for Service Rider - See Rate Schedule 44.

<u>TERMS AND CONDITIONS</u>

Service will be furnished under Company's Standard Terms and Conditions.

Title: LIGHTING AND POWER		PSC File Mark Only

AVAILABILITY

This rate schedule is available to all customers, except multiple or individual dwellings or apartment houses, on an annual basis for service for lighting, heating and power or combination of lighting, heating and power where facilities of adequate capacity and suitable phase and voltage are available. Service will be supplied at one point of delivery through one meter. This schedule is available for Billing Demands from 50 kilowatts to 10,000 kilowatts.

NET MONTHLY RATE

Secondary Service:

May through September Billing Cycles
$12.73 for each Kilowatt of Billing Demand in the month, but not less than $636.50

$0.0270 per kilowatt-hour

October through April Billing Cycles
$10.22 for each Kilowatt of Billing Demand in the month, but not less than $511.00

$0.0079 per kilowatt-hour

Primary Service:

May through September Billing Cycles
$11.16 for each Kilowatt of Billing Demand in the month, but not less than $558.00

$0.02573 per kilowatt-hour

October through April Billing Cycles
$8.80 for each Kilowatt of Billing Demand in the month, but not less than $440.00

$0.0074 per kilowatt-hour

Determination of Kilowatts of Billing Demand: The Kilowatts of Billing Demand for each month will be the average kilowatt load used by the Customer during the 15-minute period of maximum use during the month, but not less than 70% of the highest Kilowatts of Billing Demand established during the 11 preceding months. The Kilowatts of Billing Demand will be subject to the Power Factor Adjustment Clause.

Contract Minimum: When a contract minimum is applicable, the Customer's minimum monthly bill will not be less than the applicable charge for the contracted demand minimum plus the applicable Fuel and Tax Adjustments.

Capacity Charge for Highly Fluctuating Loads: Should the Customer operate equipment with highly fluctuating, intermittent, or abnormal characteristics that make it necessary for the Company to install special facilities to serve the Customer or to prevent disturbances to the service to other Customers, an additional Distribution Function charge of $1.58 per month per kilovolt-ampere (kVA) or fraction thereof of transformer capacity installed by the Company to serve the Customer will be added to the Customer's bill.

Power Factor Adjustment: The Company reserves the right to determine the power factor of the Customer's installation served hereunder. Should the average lagging power factor during the month be determined to be below 90%, the Customer's Kilowatts of Billing Demand will be adjusted by multiplying the Kilowatts of Billing Demand by 90% and dividing by the average lagging power factor.

Primary Service: Applicable when electric service is provided at the Company's primary distribution voltage of 12.5 kV or higher and the Customer furnishes and maintains all necessary transformation equipment beyond this point.

Adjustments:

Fuel Adjustment: In addition to all other charges, the amount of the Customer's bill will be adjusted by an amount per kilowatt-hour calculated according to the formula in the Energy Cost Recovery Rider - Arkansas.

Tax Adjustment: In addition to all other charges, the amount of the Customer's bill will be increased by the proportionate part of any new tax or increased rate of tax in accordance with the Tax Adjustment Rider - Arkansas.

PAYMENT FOR SERVICE

Payment for Service Rider - See Rate Schedule 44.

Replacing:	Sheet No.		
Name of Company SOUTHWESTERN ELECTRIC POWER COMPANY			
Kind of Service: Electric	Class of Service: As Applicable		
Part III. Rate Schedule No. 7			
Title: LARGE LIGHTING AND POWER			PSC File Mark Only

AVAILABILITY

This rate schedule is available to all customers on an annual basis for service for lighting, heating and power or combination of lighting, heating and power where facilities of adequate capacity and suitable phase and voltage are available. Service will be supplied at one point of delivery though one meter. This schedule is available for Billing Demands of 10,000 kilowatts or greater.

NET MONTHLY RATE

Transmission Service:

May through September Billing Cycles
$88,100 for the first 10,000 Kilowatts of Billing Demand or less in the month

$8.81 each for all kilowatts in excess of 10,000 Kilowatts of Billing Demand in the month

$0.0223 per kilowatt-hour

October through April Billing Cycles
$66,500 for the first 10,000 Kilowatts of Billing Demand or less in the month

$6.65 each for all kilowatts in excess of 10,000 Kilowatts of Billing Demand in the month

$0.0060 per kilowatt-hour

Determination of Kilowatts of Billing Demand: The Kilowatts of Billing Demand for each month will be the average kilowatt load used by the Customer during the 15-minute period of maximum use during the month but not less than 80% of the highest Kilowatts of Billing Demand established during the 11 preceding months. The Kilowatts of Billing Demand will be subject to the Power Factor Adjustment Clause.

Contract Minimum: When a contract minimum is applicable, the Customer's minimum monthly bill will not be less than the applicable charge for the contracted demand minimum plus the applicable Fuel and Tax Adjustments.

Capacity Charge for Highly Fluctuating Loads: Should the Customer operate equipment with highly fluctuating, intermittent, or abnormal characteristics that make it necessary for the Company to install special facilities to serve the Customer or to prevent disturbances to the service to other Customers, an additional Distribution Function charge of $1.58 per month per kilovolt-ampere (kVA) or fraction thereof of transformer capacity installed by the Company to serve the Customer will be added to the Customer's bill.

Power Factor Adjustment: The Company reserves the right to determine the power factor of the Customer's installation served hereunder. Should the power factor at the time of establishment of any 15-minute period of maximum use during the month be determined to be below 90%, the Customer's Kilowatts of Billing Demand will be adjusted by multiplying the Kilowatts of Billing Demand by 90% and dividing the result by the actual power factor at the time of maximum use.

Transmission Service: Applicable when electric service is provided at the Company's available transmission voltages of 69 kV or higher and the Customer furnishes and maintains all necessary transformation equipment beyond this point.

Adjustments:

Fuel Adjustment: In addition to all other charges, the amount of the Customer’s bill will be adjusted by an amount per kilowatt-hour calculated according to the formula in the Energy Cost Recovery Rider - Arkansas.

Tax Adjustment: In addition to all other charges, the amount of the Customer's bill will be increased by the proportionate part of any new tax or increased rate of tax in accordance with the Tax Adjustment Rider - Arkansas.

PAYMENT FOR SERVICE

Payment for Service Rider - See Rate Schedule 44.

TERMS AND CONDITIONS

Service will be furnished under Company's Standard Terms and Conditions.

ARKANSAS PUBLIC SERVICE COMMISSION

Replacing:	Sheet No.	
Name of Company SOUTHWESTERN ELECTRIC POWER COMPANY		
Kind of Service: Electric	Class of Service: Industrial - Time of Use	
Part III. Rate Schedule No. 8		
Title: LIGHTING AND POWER – TIME OF USE		PSC File Mark Only

AVAILABILITY

This rate schedule is available to Industrial customers on an annual basis having loads of 500 Kilowatts of maximum demand or greater. Service will be provided at one point of delivery through one meter where facilities of adequate capacity and suitable phase and voltage are available.

NET MONTHLY RATE

Secondary Service: **On-Peak** $21.33 for each Kilowatt of On-Peak Billing Demand in the month but not less than $1,066.50

$0.1039 per kilowatt-hour

Off-Peak $8.82 for each Kilowatt of Off-Peak Billing Demand in the month, but not less than $441.00

$0.0161 per kilowatt-hour

Primary Service: **On-Peak** $16.52 for each Kilowatt of On-Peak Billing Demand in the month, but not less than $826.00

$0.1005 per kilowatt-hour

Off-Peak $6.43 for each Kilowatt of Off-Peak Billing Demand in the month, but not less than $321.50

$0.0142 per kilowatt-hour

Determination of Kilowatts of Billing Demand: Billing Demands will be separately maintained and applied for the On-Peak and Off-Peak periods. Billing Demands shall be calculated as follows:

On-Peak: The Kilowatts of On-Peak Billing Demand for each month in which On-Peak period rates are applicable shall be the average kilowatt load used by the customer during the 15-minute period of maximum use during that month's On-Peak period, but not less than 70% of the highest Kilowatts of Billing Demand established during the On-Peak period during the 11 preceding months. The Kilowatts of On-Peak Billing Demand shall be subject to the Power Factor Adjustment Clause.

Off-Peak: The Kilowatts of Off-Peak Billing Demand for each month shall be the average kilowatt load used by the Customer during the 15-minute period of maximum use during the Off-Peak period of that month, but not less than 70% of the highest Kilowatts of Billing Demand established during either the On-Peak or Off-Peak period during the 11 preceding months. The Kilowatts of Off-Peak Billing Demand shall be subject to the Power Factor Adjustment Clause.

Contract Minimum: The customer's minimum bill shall not be less than the applicable charge for the contracted demand minimum plus the applicable Fuel and Tax Adjustments and in no event shall the contract demand minimum be less than 500 kilowatts.

Definition of Rating Periods:

On-Peak: The On-Peak hours shall be the hours from 1:01 p.m. through 7:00 p.m. during weekdays, excluding national holidays, during the months of July, August and September.

Off-Peak: The Off-Peak hours shall be all hours other than the On-Peak hours.

Capacity Charge for Highly Fluctuating Loads: Should the Customer operate equipment with highly fluctuating, intermittent, or abnormal characteristics that make it necessary for the Company to install special facilities to serve the Customer or to prevent disturbances to the service to other Customers, an additional Distribution Function charge of $1.58 per month per kilovolt-ampere (kVA) or fraction thereof of transformer capacity installed by the Company to serve the Customer will be added to the Customer's bill.

Power Factor Adjustment: The Company reserves the right to determine the power factor of the Customer's installation served hereunder. Should the average lagging power factor during the month be determined to be below 90%, the Customer's Kilowatts of Billing Demand in each rating period will be adjusted by multiplying the Kilowatts of Billing Demand in each rating period by 90% and dividing by the average lagging power factor.

Primary Service: Applicable when electric service is provided at the Company's primary distribution voltage of 12.5 kV or higher and the Customer furnishes and maintains all necessary transformation equipment beyond this point.

Fuel Adjustment: In addition to all other charges, the amount of the Customer's bill will be adjusted by an amount per Kilowatt-hour calculated according to the formula in the Energy Cost Recovery Rider - Arkansas.

Tax Adjustment: In addition to all other charges, the amount of the Customer's bill will be increased by the proportionate part of any new tax or increased rate of tax in accordance with the Tax Adjustment Rider - Arkansas.

PAYMENT FOR SERVICE

Payment for Service Rider - See Rate Schedule 44.

TERMS AND CONDITIONS

Service will be furnished under Company's Standard Terms and Conditions.

ARKANSAS PUBLIC SERVICE COMMISSION

Original	Sheet No. R-9.1	Sheet 1 of 6
Replacing:	Sheet No.	
Name of Company SOUTHWESTERN ELECTRIC POWER COMPANY		
Kind of Service: Electric	Class of Service: Pulp & Paper Mill	
Part III. Rate Schedule No. 9		
Title: PULP AND PAPER MILL SERVICE		PSC File Mark Only

AVAILABILITY

This rate schedule is available to pulp and paper mills on an annual basis where facilities of adequate capacity and suitable phase and voltage are available. Service will be supplied at one point of delivery through one meter.

PULP AND PAPER MILL RATE

The Company shall render a bill and the Customer shall pay for electric service supplied each month an amount to be determined in the following manner:

$154,200	Each month during the life of the contract for which the Customer will be allowed the use of up to 20,000 Kilowatts of Billing Demand determined as hereinafter provided, plus
$7.71	Per Kilowatt of Billing Demand each month for the maximum number of Kilowatts of Billing Demand in any one month of the 12-month period ending with the current month that are in excess of 20,000 Kilowatts of Billing Demand, plus
$0.0103	Per kilowatt-hour for all kilowatt-hours supplied during the month

Determination of Kilowatts of Billing Demand: The Kilowatts of Billing Demand will be measured and will be the kilowatt load supplied during the 15-minute period of maximum use in the 12-month period ending with the current month, but never less than 20,000 kilowatts.

ARKANSAS PUBLIC SERVICE COMMISSION

Original	Sheet No. R-9.2 Sheet 2 of 6	
Replacing:	Sheet No.	
Name of Company SOUTHWESTERN ELECTRIC POWER COMPANY		
Kind of Service: Electric	Class of Service: Pulp & Paper Mill	
Part III. Rate Schedule No. 9		
Title: PULP AND PAPER MILL SERVICE		PSC File Mark Only

Power Factor Adjustment: In the event the power factor at the time of establishment of any 15-minute period of maximum use during the month is less than 90%, the Kilowatts of Billing Demand shall be adjusted by multiplying the Kilowatts of Billing Demand by 90% and dividing the result by the actual power factor at the time of said maximum use, and the result so obtained shall be Kilowatts of Billing Demand for the month, but never less than the maximum number of Kilowatts of Billing Demand in the 12-month period ending with the current month and, in any event, not less than 20,000 kilowatts.

Minimum Monthly Bill: The minimum monthly bill will be the maximum Kilowatts of Billing Demand charge during the 12-month period ending with the current month, but never less than the charge of $154,200.00 for the first 20,000 Kilowatts of Billing Demand or less, and plus or minus the Fuel Adjustment charge plus the Tax Adjustment charge.

Annual Guarantee: It is mutually understood and agreed that in order for Company to be equitably compensated for permitting Customer to operate its plant generators in parallel with Company system the Customer will take or pay for, each year ending on October 31, a minimum of 2,000 hours times the maximum number of Kilowatts of Billing Demand previously determined, but not less than 40,000,000 kilowatt-hours per year.

Kilowatt-hours used during periods of turbine-generator overhaul, maintenance or emergency shall not be included in the Annual Guarantee.

Conjunctive Rate Provisions: When the Pulp and Paper Mill rate is used in conjunction with the Supplementary, Backup, Maintenance, and As-Available Standby Power Service rate, the Power Factor Adjustment and the following provisions for turbine-generator overhaul, emergency power, and maintenance power will not apply.

<u>Turbine-Generator Overhaul</u>: It is recognized that it will be necessary for the integrated operations of the turbine-generators of Customer and power service of the Company, that scheduled overhaul periods on the equipment of the Customer must be fitted into the similar schedules of the Company. During periods of agreed overhaul the Kilowatts of Billing Demand shall be based on actual kilowatts during such overhaul period but in no event less than maximum Kilowatts of Billing Demand previously established under normal operations. The Kilowatts of Billing Demand established during overhaul period will not be used to determine the maximum kilowatt load previously established.

<u>Emergency Power</u>: The Company recognizes that actual emergencies can occur to Customer's generating facilities and that Customer may desire assistance in supplying such loss of generating capability not to exceed 30 days for any one emergency.

The Company will, to the extent of facilities then available, make every reasonable effort to supply Customer's emergency. Customer agrees to correct its emergency conditions as soon as reasonably possible. An authorized representative of the Customer shall notify Company's system operations center's authorized representative at time of the beginning of the emergency, the cause and the expected duration thereof. The Customer's representative will also notify Company at the time the emergency ends. Such notices shall be confirmed by letter containing the same information to the authorized representative within 24 hours of the start and end of the emergency.

The Customer shall pay the Company for all emergency load and energy supplied on the following basis:

$9.30	per Kilowatt of Billing Demand in excess of the Determination of Kilowatts of Billing Demand under normal firm load conditions or a minimum of 20,000 kilowatts, plus
$0.0223	per kilowatt-hour plus Fuel Adjustment charge or 110% of Company's highest kilowatt-hour cost either purchased or generated during the time of the emergency, whichever is greater. The kilowatt-hours will be the sum of the kilowatt-hours determined by multiplying the Maximum demand in each hour of the emergency that is in excess of the determination of Kilowatts of Billing Demand under normal firm load conditions times one hour.

Maintenance Power: To enable the Customer to repair and maintain the operating efficiency of its facilities, the Customer may purchase additional power referred to as "Maintenance Power" from the Company. Maintenance Power shall be arranged in advance by telephone

requests to the Company's system operation center. Such Maintenance Power will be supplied, provided the Company is reasonably certain that a system peak will not be created during this period and providing the Company in its judgment has adequate capacity in its own system to supply the requested demand. Maintenance Power requests will be for a limited period of time as specified by Company. Maintenance Power will be extremely limited or unavailable during the months of June, July, August and September. Company reserves the right to terminate Customer's purchase of Maintenance Power due to changes within this system with one-hour notice to Customer. Maintenance Power will be provided only during periods when the Customer is receiving firm power from the Company. The Customer will pay for such maintenance power on whichever of the following basis is applicable:

Maintenance Power - Used only from 11:00 p.m. on Fridays until 7:00 a.m. on Mondays and from 12:01 a.m. on holidays to 7:00 a.m. the following morning.

$3.85	per Kilowatt of Billing Demand in excess of the Determination of Kilowatts of Billing Demand under normal firm load conditions or a minimum of 20,000 kilowatts, plus
	the normal charges per kilowatt-hour as provided in the rate schedule.

ARKANSAS PUBLIC SERVICE COMMISSION

Maintenance Power - Used at any time in addition to or including 11:00 p.m. on Fridays until 7:00 a.m. on Mondays and from 12:01 a.m. on holidays to 7:00 a.m. the following morning.

$7.68 per Kilowatt of Billing Demand in excess of the Determination of Kilowatts of Billing Demand under normal firm load conditions or a minimum of 20,000 kilowatts, plus

the normal charges per kilowatt-hour as provided in the rate schedule.

The Kilowatts of Billing Demand created during an agreed to use of Maintenance Power in excess of the Determination of Kilowatts of Billing Demand under normal firm load conditions will not be used to determine the maximum kilowatt load previously established.

Adjustments:

Fuel Adjustment: In addition to all other charges, the amount of the Customer's bill will be adjusted by an amount per kilowatt-hour calculated according to the formula in the Energy Cost Recovery Rider - Arkansas.

Tax Adjustment: In addition to all other charges, the amount of the Customer's bill will be increased by the proportionate part of any new tax or increased rate of tax in accordance with Tax Adjustment Rider - Arkansas.

PAYMENT FOR SERVICE

Payment for Service Rider - See Rate Schedule 44.

TERMS AND CONDITIONS

Service will be furnished under the Company's Standard Terms and Conditions.

AVAILABILITY

This schedule is available on an annual basis for lighting and power to municipal installations in communities where the Company has a franchise for the generation, distribution, and sale of electricity, together with a standard contract for the operation of a street lighting system when the Customer purchases its entire lighting and power requirements from the Company.

NET MONTHLY RATE

Customer Charge:	$7.36 per meter, plus
Kilowatt-hour Charge:	May through September Billing Cycles $0.0557 per kilowatt-hour October through April Billing Cycles $0.0494 per kilowatt-hour

Minimum Monthly Bill: The Minimum Monthly Bill will be $1.76 per Kilowatt of Maximum Demand established during the 11 preceding months, but not less than $7.36. For Minimum Monthly Bills rated in horsepower, each horsepower will be considered equal to 3/4 kilowatt.

Determination of Kilowatts of Maximum Demand: The Kilowatts of Maximum Demand for each month will be the average kilowatt load used by the Customer during the 15-minute period of maximum use during the month. The Kilowatts of Maximum Demand will be subject to the Power Factor Adjustment Clause.

Contract Minimum: When a contract minimum is applicable, the Customer's minimum monthly bill will not be less than the applicable charge for the contracted demand minimum plus the applicable Fuel and Tax Adjustments.

ARKANSAS PUBLIC SERVICE COMMISSION

Capacity Charge for Highly Fluctuating Loads: Should the Customer operate equipment with highly fluctuating, intermittent, or abnormal characteristics that make it necessary for the Company to install special facilities to serve the Customer or to prevent disturbances to the service to other Customers, an additional Distribution Function charge of $1.58 per month per kilovolt-ampere (kVA) or fraction thereof of transformer capacity installed by the Company to serve the Customer will be added to the Customer's bill.

Power Factor Adjustment: The Company reserves the right to determine the power factor of the Customer's installation served hereunder. Should the average lagging power factor during the month be determined to be below 90%, the Customer's Kilowatts of Maximum Demand will be adjusted by multiplying the Kilowatts of Maximum Demand by 90% and dividing by the average lagging power factor.

Adjustments:

Fuel Adjustment: In addition to all other charges, the amount of the Customer’s bill will be adjusted by an amount per kilowatt-hour calculated according to the formula in the Energy Cost Recovery Rider - Arkansas.

Tax Adjustment: In addition to all other charges, the amount of the Customer's bill will be increased by the proportionate part of any new tax or increased rate of tax in accordance with the Tax Adjustment Rider - Arkansas.

PAYMENT FOR SERVICE

Payment for Service Rider - See Rate Schedule 44.

Replacing:	Sheet No.	
Name of Company SOUTHWESTERN ELECTRIC POWER COMPANY		
Kind of Service: Electric	Class of Service: Municipal	
Part III. Rate Schedule No. 11		
Title: MUNICIPAL PUMPING		PSC File Mark Only

AVAILABILITY

This schedule is available on an annual basis for all municipal water and sewerage pumping, with the exception of standby, breakdown, or auxiliary service, in communities in which the Company has a franchise for the generation, distribution, and sale of electricity, together with a standard contract for the generation, distribution, and sale of electricity, together with a standard contract for the operation of a street lighting system, when the Customer purchases its entire lighting and power requirements from the Company.

CHARACTER OF SERVICE

Power and energy supplied under this schedule will be at either primary or secondary voltage, depending on the Customer's requirements and the availability of such voltage from the Company's established primary or secondary circuits.

MEASUREMENT OF POWER AND ENERGY

Power and energy supplied hereunder will be measured by metering installations at each point of delivery and the kilowatt-hours registered at all points of delivery will be combined to determine the total kilowatt-hours to be used in computing the Customer's monthly bill under this schedule.

NET MONTHLY RATE

Customer Charge:	$7.36 per meter, plus
Kilowatt-hour Charge:	May through September Billing Cycles $0.0492 per kilowatt-hour
	October through April Billing Cycles $0.0426 per kilowatt-hour

Minimum Monthly Bill: The Minimum Monthly Bill will be $1.76 per Kilowatt of Maximum Demand established during the 11 preceding months, but not less than $7.36. For Minimum Monthly Bills rated in horsepower, each horsepower will be considered equal to 3/4 kilowatt.

Determination of Kilowatts of Maximum Demand: The Kilowatts of Maximum Demand for each month will be the average kilowatt load used by the Customer during the 15-minute period of maximum use during the month. The Kilowatts of Maximum Demand will be subject to the Power Factor Adjustment Clause.

Contract Minimum: When a contract minimum is applicable, the Customer's minimum monthly bill will not be less than the applicable charge for the contracted demand minimum plus the applicable Fuel and Tax Adjustments.

Capacity Charge for Highly Fluctuating Loads: Should the Customer operate equipment with highly fluctuating, intermittent, or abnormal characteristics that make it necessary for the Company to install special facilities to serve the Customer or to prevent disturbances to the service to other Customers, an additional Distribution Function charge of $1.58 per month per kilovolt-ampere (kVA) or fraction thereof of transformer capacity installed by the Company to serve the Customer will be added to the Customer's bill.

Part III. Rate Schedule No. 11		
Title: MUNICIPAL PUMPING		PSC File Mark Only

Power Factor Adjustment: The Company reserves the right to determine the power factor of the Customer's installation served hereunder. Should the average lagging power factor during the month be determined to be below 90%, the Customer's Kilowatts of Maximum Demand will be adjusted by multiplying the Kilowatts of Maximum Demand by 90% and dividing by the average lagging power factor.

Adjustments:

Fuel Adjustment: In addition to all other charges, the amount of the Customer’s bill will be adjusted by an amount per kilowatt-hour calculated according to the formula in the Energy Cost Recovery Rider - Arkansas.

Tax Adjustment: In addition to all other charges, the amount of the Customer's bill will be increased by the proportionate part of any new tax or increased rate of tax in accordance with the Tax Adjustment Rider - Arkansas.

PAYMENT FOR SERVICE

Payment for Service Rider - See Rate Schedule 44.

TERMS AND CONDITIONS

Service will be furnished under Company's Standard Terms and Conditions.

ARKANSAS PUBLIC SERVICE COMMISSION

Facilities Charge:

1.46% per month of the Company’s investment to provide each lighting system.

Adjustments:
Fuel Adjustment: In addition to all other charges, the amount of the Customer's bill will be adjusted by an amount per kilowatthour calculated according to the formula in the Energy Cost Recovery Rider - Arkansas.

Tax Adjustment: In addition to all other charges, the amount of the Customer's bill will be increased by the proportionate part of any new tax or increased rate of tax in accordance with the Tax Adjustment Rider - Arkansas.

REPLACEMENT, REMOVAL, OR DISCONNECT

When a customer requests that the Company replace an existing non-LED lighting system with an LED lighting system the customer may be required to pay to the Company a one-time Conversion Fee of $95.

When a customer requests that the Company disconnect or remove an existing LED lighting system the customer may be required to pay to the Company a one-time Removal Fee of $145.

PAYMENT FOR SERVICE

Payment for Service Rider - See Rate Schedule 44.

TERMS AND CONDITIONS

Service will be furnished under the Company's Standard Terms and Conditions.

THIS SPACE FOR PSC USE ONLY

ARKANSAS PUBLIC SERVICE COMMISSION

AVAILABILITY

This rider is available to Customers receiving electric service under the General Service (GS) or Lighting and Power Service (LP) Schedules having in regular use, permanently installed for heating either an electric reverse cycle central system heat pump or a total of 5 Kilowatts or more of electric devices used for comfort space heating. The installation must be verified by Company personnel.

Service under this rider is subject to all provisions of the applicable rate schedule to which it applies, except those provisions specifically modified herein.

APPLICABILITY

This rider will be applicable in any year when Company's May through September maximum monthly system peak demand exceeds the preceding October through April maximum monthly system peak demand by 20%.

KILOWATT CHARGE

During October through April billing cycles:

The Kilowatt charge will be computed using the Kilowatts of Billing Demand, which will be measured and will be the average kilowatt load used by the Customer during the 15-minute period of maximum use during the current month, but not to exceed the Kilowatts of Billing Demand established during the immediately preceding May through September billing cycles. However, the measured Kilowatts of Billing Demand for billing purposes will not be reduced by an amount greater than 60% of the kW load of the devices used for comfort space heating.

ARTICLE I:

Availability
This tariff schedule provides for the Company to pass directly to its customers within a municipality the proportionate part of any franchise or street rental taxes levied or imposed on the Company by that municipality on gross revenues from those customers.

Application
There shall be shown as a separate line item on each monthly bill for electric service to customers located within a municipality the amount of any street rental or franchise tax imposed or levied on the Company by the municipality on the gross revenues derived from the sale of electric power and energy to customer within the city limits of such municipality.

ARTICLE II:

Availability
In addition to all other charges, the amount of the Customer's bill will be increased by applicable sales taxes and other charges made effective by duly constituted authorities having jurisdiction.

Application
Each monthly bill for electric service to customers will include the amount of any sales tax and other charges levied or imposed by duly constituted authorities having jurisdiction over the customer for their electric usage.

Kind of Service: Electric	Class of Service: All	
Part III. Rate Schedule No. 27		
Title: ENERGY COST RECOVERY RIDER (RIDER ECR)		PSC File Mark Only

RECOVERY OF ENERGY COST

Energy Cost Recovery Rider ("Rider ECR ") defines the procedure by which the "Energy Cost Rate" of Southwestern Electric Power Company ("SWEPCO" or "Company") shall be initially established and periodically redetermined. The Energy Cost Rate shall recover the Company's net fuel and purchased energy cost, as defined in this Rider ECR.

ENERGY COST RATE

The Energy Cost Rate shall be redetermined annually through filings made in accordance with the provisions of Annual Redetermination of this Rider ECR. The Energy Cost Rate shall be applied to each customer's monthly billing energy (kWh). For electric service billed under applicable rate schedules for which there is no metering, the monthly usage shall be estimated by the Company and the Energy Cost Recovery Rider shall be applied. The Energy Cost Rate shall be calculated to the nearest $0.000001 and when applied to customers' bills shall be rounded to the nearest cent.

ANNUAL REDETERMINATION

On or before March 15 of each year the Company shall file a redetermined Energy Cost Rate with the Arkansas Public Service Commission (APSC or Commission). The redetermined Energy Cost Rate shall be determined by application of the Energy Cost Rate Formula set out in Attachment A of this Rider ECR. Each such revised Energy Cost Rate shall be filed in the proper underlying docket and shall be accompanied by a set of workpapers sufficient to fully document the calculations of the revised Energy Cost Rate.

The redetermined Energy Cost Rate shall reflect the projected Energy Cost for the 12-month period commencing on April 1 of each year ("Projected Energy Cost Period") together with a true-up adjustment reflecting the over-recovery or under-recovery of the Energy Cost for the 12-month period ended December 31 of the prior calendar year ("Historical Energy Cost Period"). The Energy Cost Rate so determined shall be effective for bills rendered on and after the first billing cycle of April of the filing year and shall then remain in effect for twelve (12) months, except as otherwise provided for below.

<u>The annual update shall include a report of the following:</u>

1. detailed fuel and purchased energy costs by FERC account and month for the historical year;
2. identify and explain changes from the prior year for major cost components of the ECR Rider, including fuel expense, purchased energy expense, off-system sales margins, etc., of 10% or more;
3. identify changes in accounting procedures affecting fuel and purchased power costs, such as changes in FERC account number classifications and changes in costing methodologies;
4. identify changes in fuel and purchased power procurement practices;
5. identify the monthly level of coal inventory in days and tons for the historical year;
6. identify the average price per unit for each fuel type and purchased power for the historical year;

7. identify revisions to the AEP System Integration Agreement affecting fuel and purchased energy costs;

8. identify and discuss changes in environmental regulations affecting fuel and purchased energy costs and explain the Company's plans for compliance;

9. identify plant outages for the historical year and explain the cause(s) of the outages; and

10. provide the summation of all day-ahead and real-time transactions, centered around the SPP energy market, and forward transactions, which will be made outside the SPP energy market beyond the day-ahead time horizon, including total shareholder off-system sales margin allocations, for each month in the preceding calendar year.

ADJUSTMENTS

If prior to the annual redetermination of the Energy Cost Rate, Staff or the Company becomes aware of an event that is reasonably expected to occur and/or has occurred which will materially impact the Company's Energy Cost, either the Staff or the Company may propose an adjustment to the Energy Cost Rate Formula set out in Attachment A of this Rider ECR. Furthermore, should a cumulative over-recovery or under-recovery balance arise during any Rider Cycle which exceeds ten percent (10%) of the Historical Energy Cost Period, then either the APSC General Staff ("Staff") or the Company may propose an interim revision to the then currently effective Energy Cost Rate.

PAYMENT FOR SERVICE

Payment for Service Rider – See Rate Schedule 44.

ATTACHMENT A (continued)

CCR = CARRYING CHARGE RATE (4)

$DAYS_j$ = NUMBER OF DAYS IN MONTH j OF THE HISTORICAL ENERGY COST PERIOD

PEC = ESTIMATED ENERGY COST FOR THE PROJECTED ENERGY COST PERIOD (5)

$$PEC = \sum_{j=1}^{12} EC_j$$

M = $7,487 OF PROJECTED FINAL MINE CLOSING AND RECLAMATION COSTS FOR SWEPCO'S PIRKEY POWER PLANT

LCF = LOSS CORRECTION FACTOR (6)

PES = PROJECTED SALES (kWh) SUBJECT TO THIS RIDER ECR FOR THE PROJECTED ENERGY COST PERIOD

DEFCON=AMORTIZATION OF DEFERRED CONSUMABLES ASSOCIATED WITH APSC DOCKET NO. 14-080-U

ATTACHMENT A (continued)

(1) The Historical Energy Cost Period is the calendar year immediately preceding the filing year.

(2) The margins from off-system sales transactions shall be treated in the following manner:

Customers shall be credited with 100% of the off-system sales margins allocated to SWEPCO's Arkansas retail jurisdiction up to $1,200,000 on an annual basis. For any off-system sales margins allocated to SWEPCO's Arkansas retail jurisdiction above $1,200,000, 90% of such margins shall be credited to customers and 10% of such margins shall be retained by the shareholders. Arkansas retail customers shall be shielded from any overall net annual loss from off-system sales transactions that may occur. In any year when the net margins from off-system sales result in a loss, such losses shall be borne by SWEPCO.

Treatment of Affiliated Sales Margins

Margins allocated to SWEPCO's Arkansas retail jurisdiction resulting from capacity sales will be reflected in the calculation of the Energy Cost Recovery Rider.

(3) The jurisdictional allocation factor will be derived in a two step process. First, for each jurisdiction the voltage level kWh at the meter will be divided by the most recent energy loss factors to determine the voltage level kWh at generation. Second, the Arkansas jurisdictional kWh at generation will be divided by the total kWh at generation for all jurisdictions less the Cleco PSSA kWh to develop the Arkansas jurisdictional allocation factor.

ARKANSAS PUBLIC SERVICE COMMISSION

Original	Sheet No. R-27.9 Sheet 9 of 12	
Replacing:	Sheet No.	
Name of Company SOUTHWESTERN ELECTRIC POWER COMPANY		
Kind of Service: Electric	Class of Service: All	
Part III. Rate Schedule No. 27		
Title: ENERGY COST RECOVERY RIDER (RIDER ECR)		PSC File Mark Only

ATTACHMENT A (continued)

(4) The Carrying Charge Rate shall be the Commission authorized interest rate on customer deposits.

(5) The Estimated Energy Costs for the Projected Energy Cost Period is equal to the energy costs for the Historical Energy Cost Period (the calendar year immediately preceding the filing year). Should there be unusual circumstances associated with any Projected Energy Cost or Projected Energy Cost Period either the Company or the Staff may propose use of a Projected Energy Cost (PEC variable) different from that defined by this formula.

(6) The loss correction factors will be determined by dividing the sum of the metered kWh sales for the Arkansas jurisdiction by the sum of the sales at the generation level for the Arkansas jurisdiction. This ratio of sales to generation is known as the "composite loss factor" for the Arkansas jurisdiction. The LCF for each voltage level is determined by dividing the service voltage loss factor by the composite loss factor.

(7) The deferred consumable balance under APSC Docket No. U-14-080-U as of the (insert date of new base rates) amortized over three years.

ATTACHMENT A (continued)

(8) Fuel Expense charged to Account 501 associated with the lignite supply to the Dolet Hills Power Plant will be treated in the following manner:

<u>Treatment of the Dolet Hills Lignite Company Expenses</u>

SWEPCO will be allowed to recover the costs associated with the Dolet Hills Lignite Company (DHLC) in the following manner:

Account 501 shall include costs associated with the DHLC mining operations in Month j of the Historical Energy Cost Period. DHLC services shall be provided at cost with the financing costs being calculated using the authorized rate of return on rate base most recently approved for SWEPCO by the APSC in a non-appealable final order on DHLC assets rather than DHLC's actual rate of return.

Production costs for DHLC shall be subject to the same ratemaking adjustments as applied to SWEPCO in a general rate case. Ratemaking adjustments shall include, but not be limited to:

- disallowance of charitable contributions and membership dues in civic organizations;
- disallowance of the portion of trade association memberships related to lobbying expenses and other disallowable costs;
- disallowance of expenses related to public relations advertising, image advertising, marketing, and corporate sponsorships;

ARKANSAS PUBLIC SERVICE COMMISSION

Original	Sheet No. R-27.11 Sheet 11 of 12	
Replacing:	Sheet No.	
Name of Company SOUTHWESTERN ELECTRIC POWER COMPANY		
Kind of Service: Electric	Class of Service: All	
Part III. Rate Schedule No. 27		
Title: ENERGY COST RECOVERY RIDER (RIDER ECR)		PSC File Mark Only

ATTACHMENT A (continued)

- 50/50 sharing of directors' and officers' liability insurance expense between ratepayers and shareholders;
- disallowance of long-term incentive compensation related to stock performance;
- 50/50 sharing of incentive compensation related to financial incentives for operations between ratepayers and shareholders; and
- disallowance or sharing of similar costs allocated to DHLC by SWEPCO or American Electric Power Service Corporation.

SWEPCO shall provide a report with its annual Rider ECR filing that identifies the total costs reflected in invoices from DHLC and the ratemaking adjustments made to arrive at the amounts included in Fuel Expense for the Historical Energy Cost Period in sufficient detail to identify the items disallowed.

(9) *AR ADJ*$_j$ as described in the definition above is an adjustment to Arkansas jurisdictional share of SWEPCO's total fuel cost for month (j). The detailed description of the adjustment effective with the implementation of the SPP IM is provided in the Direct Testimony and Exhibits of Naim Hakimi APSC Docket No. 14-022-TF, Page 9, Line 8 through Page 12, Line 6 and Exhibit ANH-4. The adjustment removes the Turk plant fuel cost (including related NO_x and SO_2 emissions costs) and associated revenues from sale of the Turk plant output in the SPP market from the Energy Cost.

ATTACHMENT A (continued)

(10) The recovery of energy costs associated with long-term renewable energy resources must be approved by the Commission prior to the recovery of costs through Rider ECR.

(11) No charges for activated carbon, calcium bromide, hydrated lime, or urea may be passed through the rider to customers unless the Commission has approved the prudence of the particular environmental controls project at issue or the Commission has otherwise approved the recovery of the costs for such a project in retail rates. Pursuant to Order No. 1 of Docket No. 14-080-U, SWEPCO shall defer the cost of activated carbon, calcium bromide, hydrated lime, and urea associated with the Dolet Hills and Pirkey power plants for serving Arkansas retail load incremental to the amount of chemical costs embedded in Arkansas retail rates without carrying charges.

ARKANSAS PUBLIC SERVICE COMMISSION

Original	Sheet No. R-28.1	Sheet 1 of 8
Replacing:	Sheet No.	
Name of Company SOUTHWESTERN ELECTRIC POWER COMPANY		
Kind of Service: Electric	Class of Service: As Applicable	
Part III. Rate Schedule No. 28		
Title: Supplementary, Backup, Maintenance, and As-Available Standby Power Service		PSC File Mark Only

AVAILABILITY

This schedule is available for Supplementary, Backup, Maintenance and As-Available Standby Power to customers that own and operate power production equipment or other source of power not held primarily for emergency use and that have a separate agreement for interconnection to Company's system stating those terms and conditions.

Service will be supplied at one point of delivery at locations where facilities of adequate capacity and suitable phase and voltage are available. Service may be provided on the Company's standard Contract for Electric Service, containing the Standard Terms and Conditions, stating the rate applicable to Supplementary Power and Energy, the Supplementary Power Contract Demand, the Backup Power Contract Demand, the Maintenance Power Contract Demand and the As-Available Standby Power Contract Demand that the Company is obligated to provide. The rate applicable to Supplementary Power and all energy is limited to the Lighting and Power Service Rate (LP), the Large Lighting and Power Service Rate (LLP), or the Pulp and Paper Mill Rate (P&PM), whichever is applicable. When used in conjunction with the Pulp and Paper Mill Rate, the Pulp and Paper Mill Rate will apply only to the Supplementary Power and all energy.

DEFINITIONS

Supplementary Power is electric capacity supplied by the Company, regularly used by a Customer in addition to that which the Customer's generation facility regularly generates. The Supplementary Power Billing Demand shall be determined in the Supplementary Power Charge section of this tariff.

Maintenance Power is electric capacity supplied by the Company during scheduled outages of the Customer's facility to replace capacity which is ordinarily generated by the Customer's own generation. This capacity when supplied during each of the months of October through May to Customers with total generating capacity of less than 5,000 kW shall be considered to be scheduled and approved by the Company as Maintenance Power until such time as the aggregate generation of all customer owned sources of power which are connected to the Company exceed 1% of the Company's peak system load. Customers with total generation capacity of 5,000 kW or greater must obtain written Company approval at least seven days in advance for a scheduled outage during the months of October through May or the use of capacity will be considered to be Supplementary Power. Maintenance Power will be supplied at the sole discretion of the Company, provided the

ARKANSAS PUBLIC SERVICE COMMISSION

Company is reasonably certain that a system peak will not be created during this period and providing the Company, in its judgment, has adequate capacity in its own system to supply the requested demand. Maintenance Power will normally not be available during the months of June through September.

Maintenance Power Demand is the Kilowatts of Billing Demand that exceed the Supplementary Power Billing Demand during the period approved for maintenance power usage. If As-Available Standby Power has been requested during this period, then for billing purposes, the Maintenance Power Demand will be equal to the Maintenance Power Contract Demand.

Backup Power is electric capacity supplied by the Company during an unscheduled outage of the Customer's facility to replace capacity ordinarily provided by the Customer's own generation. However, any capacity supplied by the Company during an unscheduled outage of the Customer's facility to replace that which is ordinarily provided by the Customer's own generation during the months of June through September shall be considered as Backup Power, and/or As-Available Standby Power if approved by the Company. The Customer shall notify the Company's system dispatcher as soon as reasonably possible when requesting the initiation and termination of Backup Power. The customer shall also provide written documentation to the Company within 24 hours or on the first working day following a weekend or holiday confirming the date and time of both the initiation and termination of Backup Power.

Backup Power Demand is the Kilowatts of Billing Demand that exceed the Supplementary Power Billing Demand during the period of Backup Power usage. If As-Available Standby Power has been requested during this period, then for billing purposes, the Backup Power Demand will be equal to the Backup Power Contract Demand.

Kilowatts of Billing Demand for each month will be the average kilowatt load used by the Customer during the 15-minute period of maximum use during the month.

As-Available Standby Power is electric capacity supplied by the Company during a scheduled or unscheduled outage of the Customer's facility to replace capacity which is provided by the Customer's own generation. Customer may request As-Available Standby Power at any time subject to the conditions specified herein. However, the Customer must request and receive prior approval from Company each time As-Available Standby Power is required and must also notify the Company

when As-Available Standby Power is to be discontinued. When Customer experiences a forced outage of his power production facilities, Customer must request approval from Company's dispatcher for continued use of As-Available Standby Power after the forced outage has occurred and use of As-Available Standby Power has begun. This provision for after-the-fact request and approval shall apply only if Customer has contacted the Company's system dispatcher for approval as soon as reasonably possible. All requests for and terminations of As-Available Standby Power shall be confirmed in writing to the Company by the Customer within 24 hours of the request or termination. As-Available Standby Power will be available solely at the discretion of the Company. At the request of Company, the Customer will cease use of As-Available Standby Power within ten (10) minutes after notification from the Company that approval for continued use of that As-Available Standby Power is denied. Use of As-Available Standby Power will be subject to immediate interruption for emergency system conditions.

As-Available Standby Power Demand is the kilowatts of capacity requested by the Customer. This capacity is requested in addition to any capacity associated with Supplementary, Backup, or Maintenance Power during the period of Backup or Maintenance Power usage.

MONTHLY RATE

The monthly billing shall be the sum of the following:

(I) Supplementary Power Charge
(II) Backup Power Charge and Maintenance Power Charge
(III) As-Available Standby Power Charge
(IV) Energy Charge

(I) SUPPLEMENTARY POWER CHARGE

The applicable rate schedule for supplementary power, with modifications to the provisions for the Determination of Kilowatts of Billing Demand and the Power Factor Adjustment, as specified herein, will be applied to any and all electric capacity actually supplied by the Company during the month, except for any Maintenance Power Demand, any Backup Power Demand, and any As-Available Standby Power Demand.

ARKANSAS PUBLIC SERVICE COMMISSION

Determination of Supplementary Power Billing Demand

When neither Backup, Maintenance, nor As-Available Standby Power are being used, the Supplementary Power Billing Demand will be the Kilowatts of Billing Demand established by the Customer, subject to the Kilowatts of Billing Demand provisions specified in the Lighting and Power Rate, the Large Lighting and Power Rate, or the Pulp and Paper Mill Rate, whichever is applicable. When Backup, Maintenance, or As-Available Standby Power is taken in conjunction with Supplementary Power, the Supplementary Power Billing Demand will be the greatest of:

A. Supplementary Power Contract Demand as specified in the Contract for Electric Service;
B. The Kilowatts of Billing Demand less the Backup Power Contract Demand when Backup Power is being used, less the Maintenance Power Contract Demand when Maintenance Power is being used, less the As-Available Standby Power Demand requested;
C. Supplementary Power Billing Demand of the current month;
D. Seventy percent (70%) of the highest Supplementary Power Billing Demand of the previous eleven months for customers receiving service under the LP rate schedule, eighty percent (80%) of the highest Supplementary Power Billing Demand of the previous eleven months for customers receiving service under the LLP rate schedule, or the highest Supplementary Power Billing Demand in the 12-month period ending with the current month for customers receiving service under the P&PM rate schedule.

(II) BACKUP POWER CHARGE AND MAINTENANCE POWER CHARGE

The monthly billing for Backup Power and Maintenance Power shall be the sum of (A) the Backup Power Charge, plus (B) the Maintenance Power Charge. However, this amount shall not be less than (C) the Minimum Monthly Charge for Backup Power and Maintenance Power.

(A) BACKUP POWER CHARGE

Company agrees to supply Backup Power up to but not exceeding the Backup Power Contract Demand. The Backup Power Contract Demand shall not exceed the nameplate rating of the Customer's generating unit(s) unless the Customer can demonstrate a higher capability for its unit(s). The Backup Power Contract Demand can be adjusted annually with written request by the Customer and with written consent of the Company.

ARKANSAS PUBLIC SERVICE COMMISSION

Original	Sheet No. R-28.5	Sheet 5 of 8
Replacing:	Sheet No.	
Name of Company SOUTHWESTERN ELECTRIC POWER COMPANY		
Kind of Service: Electric	Class of Service: As Applicable	
Part III. Rate Schedule No. 28		
Title: Supplementary, Backup, Maintenance, and As-Available Standby Power Service		PSC File Mark Only

Daily Rate for Backup Power

The Daily Rate for Backup Power will be the Kilowatts of Backup Power Demand times the applicable rate:

Pulp & Paper Mill Transmission Service	$0.31
Large Lighting & Power Transmission Service	$0.31
Lighting & Power Primary Service	$0.46
Lighting & Power Secondary Service	$0.50

(B) MAINTENANCE POWER CHARGE

The Company agrees to supply Maintenance Power up to but not exceeding the Maintenance Power Contract Demand. Maintenance Power Contract Demand shall not exceed the nameplate rating of the Customer's generating unit(s) unless Customer can demonstrate a higher capability for its unit(s). The Maintenance Power Contract Demand can be adjusted annually with written request by the Customer and with written consent of the Company. Upon approval by the Company, Maintenance Power may be scheduled for a total of three occurrences in a calendar year during the months of January through May and October through December for each of the Customer's generating unit(s) provided Customer provides the Company at least seven days prior notice of intent to perform maintenance. In the event maintenance exceeds the scheduled time period provided by the Customer and agreed to by the Company or exceeds a maximum of 30 days per generating unit per calendar year, unless it is agreed to extend Maintenance Power or supply Backup Power, by written request by the Customer and written consent of the Company, such excess use of capacity will be billed as Supplementary Power.

Daily Rate for Maintenance Power

The Daily Rate for Maintenance Power will be the Kilowatts of Maintenance Power Demand times the applicable rate:

Pulp & Paper Mill Transmission Service	$018
Large Lighting & Power Transmission Service	$0.18
Lighting & Power Primary Service	$0.18
Lighting & Power Secondary Service	$0.22

(C) MINIMUM MONTHLY CHARGE FOR BACKUP POWER AND MAINTENANCE POWER

The Minimum Monthly Charge for Backup Power and Maintenance Power shall be the applicable monthly rate per kW of Backup Power Contract Demand plus the applicable monthly rate per kW of Maintenance Power Contract Demand in excess of the Backup Power Contract Demand.

Backup Power - Minimum Charge Per kW:

Pulp & Paper Mill Transmission Service	$1.33
Large Lighting & Power Transmission Service	$1.33
Lighting & Power Primary Service	$4.23
Lighting & Power Secondary Service	$4.42

ARKANSAS PUBLIC SERVICE COMMISSION

Maintenance Power - Minimum Charge Per kW:

Pulp & Paper Mill Transmission Service	$0.68
Large Lighting & Power Transmission Service	$0.68
Lighting & Power Primary Service	$2.11
Lighting & Power Secondary Service	$2.22

(III) AS-AVAILABLE STANDBY POWER CHARGE
The Company agrees to supply As-Available Standby Power up to but not exceeding the As-Available Standby Power Contract Demand. The As-Available Standby Power Contract Demand shall not exceed the nameplate rating of the Customer's generating unit(s) unless the Customer can demonstrate a higher capability for its unit(s). The As-Available Standby Power Contract Demand can be adjusted annually with written request by the Customer and with written consent of the Company.

Monthly Rate for As-Available Standby Power
The monthly rate for As-Available Standby Power will be the As-Available Standby Power Demand times the applicable rate:

Pulp & Paper Mill Transmission Service	$0.47
Large Lighting & Power Transmission Service	$0.47
Lighting & Power Primary Service	$1.96
Lighting & Power Secondary Service	$2.04

Title: Supplementary, Backup, Maintenance, and As-Available Standby Power Service		PSC File Mark Only

(IV) ENERGY CHARGE
The monthly rate for all energy used during the month will be the kilowatt-hour charge as set forth in the Lighting and Power Rate, Large Lighting and Power Rate, or Pulp and Paper Mill Rate, whichever is applicable.

Power Factor Adjustment - Kilovar Charge
The kilovars of Reactive Demand will be recorded each month by the Company and will be the average kilovars used by the Customer during the 15-minute period of maximum kilovar use during the month. A Generation Function Charge of $0.54 per month shall be made for each Kilovar of Reactive Demand exceeding 50% of the Kilowatts of Billing Demand.

PAYMENT FOR SERVICE

Payment for Service Rider - See Rate Schedule 44.

TERMS AND CONDITIONS

Service provided under the terms of this tariff will be furnished under the Company's Standard Contract containing the Standard Terms and Conditions and will be recognized as an exemption to the Exclusive Service Clause of the Company's Standard Terms and Conditions.

TERMS AND CONDITIONS

Services under this tariff are provided in accordance with the Company's Standard Terms and Conditions.

CHARGES RELATED TO CUSTOMER ACTIVITY

Customer Account Record Statement (General Service Rule (GSR) 2.04.A.)
The Company will charge a fee of: -- No Charge
when a customer or any authorized party requests a statement of the customer’s account record as described by GSR 7.02.

Energy Consumption Statement (GSR 2.04.B.)
The Company will charge a fee of: -- No Charge
when a customer or any authorized party requests a statement of the customer’s energy consumption for the preceding 13 months.

Deposit From Applicant (GSR 4.01.A. & B.)
The Company may require a deposit from any applicant to guarantee payment for service, subject to the conditions of GSR 4.01 in Subsections A. & B.

Deposit From Landlord (GSR 4.01.A. & B.(1))
The Company may require a deposit when an applicant for residential service qualifies as a landlord as defined in the APSC General Service Rules. The amount of the deposit will be calculated in accordance with GSR 4.01.B(1).

Deposit From Customer (GSR 4.02.A. & B.)
The Company may require a deposit from a customer when that customer meets the criteria in GSR 4.02.A.

The amount of the deposit will be calculated in accordance with GSR 4.02.B.

<u>Processing Fee For Levelized Billing Withdrawal (GSR 5.10.C(3))</u>
The Company will require payment of a processing fee of: -------------------------- No Charge
if a customer withdraws from a levelized billing plan more than one time in 12 months.

<u>Returned Check Charge (GSR 5.13.)</u>
The Company will charge a returned check fee when a customer pays by check and the check is returned to the Company for any reason other than bank error. ---------$25.00

<u>Meter Reading Report Charge (GSR 5.16.B(3))</u>
The Company will charge a meter reading report fee of: -------------------------- No Charge
if a customer has requested a meter reading report in writing and the customer has already received two free meter reading reports in the last 12 months.

<u>Meter Test Fee (GSR 5.18.C.(1))</u>
The Company will charge a meter test fee when a customer's meter has been tested in accordance with the procedures set out in GSR 5.18., and the meter test results show the meter to be operating within the guidelines of Rule 7.05. of the Special Rules - Electric.

Self Contained ---$35.00
Other ---$59.00

<u>Collection Fee (GSR 6.11.)</u>
The Company will charge a fee when the last day to pay, as printed on the most recent cut-off notice, has passed and a utility employee accepts payment at the premises under GSR 6.09.B(1) without service being disconnected. -----------$10.00

Reconnection Fee (GSR 6.12.)

The Company will charge a reconnect fee when a customer or other authorized party requests reconnection during normal working hours, and payment is made at a Company business office or payment agency before the Company's close of business on the same day. --$25.00

The Company will charge a reconnect fee when a customer or other authorized party requests reconnection on a pole during normal working hours, and payment is made at a Company business office or payment agency before the Company's close of business on the same day. --$74.00

Finance Charge on Delayed Payment Agreements (GSR 6.13.I)

The finance charge on delayed payment agreements will be interest as defined by the GSR. ---No Charge
(The rate is set annually by the Commission.)

Meter Tampering

The Company will charge a fee if customer connects a meter that has been cut off by Company.

During regular working hours---$75.00

During other than regular working hours--$97.00

The Company will charge a minimum fee for a broken meter seal and/or meter tampering. ---$57.00

Connection Other Than Regular Working Hours

The Company will charge a fee for initiation of permanent service (if no construction is required) during other than regular working hours. ------------------$57.00

ARKANSAS PUBLIC SERVICE COMMISSION

OPTION 1

Availability

This Option 1 is only available to customers receiving electric service under the Lighting and Power Service (LP) or Large Lighting and Power Service (LLP) rate schedules. Option 1 is available to new loads of 500 kW or more, or significant expansions of existing load in excess of 500 kW incremental load, or for resumption of service to loads of a minimum of 500 kW which have been inactive for 12 months or more. Service under Option 1 is available only in conjunction with a contract for electric service having a minimum initial term of five years and requiring a minimum of thirty (30) days advance notice to cancel thereafter.

To qualify for Option 1, the customer must furnish to the Company an affidavit stating that this rider was an important factor in the customer's decision to add new or incremental load or to resume load that has been inactive for 12 months or more, and complete and sign the appropriate application form.

The load factor of the entire facility, including expansion, must be equal to or greater than 40%.

The availability of Option 1 is at the sole discretion of the Company. The Company will not accept new applications for service under Option 1 when the Company's forecasts indicate that additional generating capacity will be needed within a three-year period.

All provisions of the LP or LLP rate schedules, whichever is applicable, will apply except as modified herein.

Definition of Base Period
The Base Period shall be the 12 months immediately preceding the month that service is requested under this rider, or as mutually agreed upon by the Company and the Customer.

Determination of Base Threshold Demand
For expansions, the Base Threshold Demand shall be determined based on the Kilowatts of Billing Demands of the Base Period. For new Customers or for Customers resuming service to loads which have been inactive for 12 months or more, the Monthly Base Threshold Demand shall be 0 kW. The Kilowatts of Billing Demand for each month of the Base Period may be adjusted as mutually agreed upon by the Company and the Customer to reflect the Customer's normalized load profile.

APSC FILED Time: 2/28/2019 2:15:14 PM: Recvd 2/28/2019 2:14:10 PM: Docket 19-008-U-Doc. 39

ARKANSAS PUBLIC SERVICE COMMISSION

Determination of Economic Development Demand

The Economic Development Demand subject to the provisions of Option 1 shall be that portion of the Kilowatts of Billing Demand during the current month that is greater than the Monthly Base Threshold Demand.

Determination of Economic Development Credits

The Customer's monthly bill for service under Option 1 will be calculated in accordance with the LP or LLP rate schedule, whichever is applicable, with the exception that an Economic Development Credit will be applied. An Economic Development Credit will be determined by multiplying the Economic Development Demand times the Kilowatt Charge of the LP or LLP rate schedule, whichever is applicable, times the appropriate Billing Credit Factor. The Billing Credit Factors are provided below:

Term of Economic Development Credit	Billing Credit Factors
Year 1 - First 12 monthly billing periods	50%
Year 2 - Next 12 monthly billing periods	40%
Year 3 - Next 12 monthly billing periods	30%

Special Terms and Conditions

In the event the monthly Kilowatts of Billing Demand for 12 consecutive months is less than the corresponding Base Threshold Demand, this rider will automatically terminate. Billing for subsequent months will revert to the LP or LLP rate schedule, whichever is applicable.

PAYMENT FOR SERVICE

Payment for Service Rider - See Rate Schedule 44.

OPTION 2

Availability

This Option 2 is only available to customers receiving electric service under the Lighting and Power (LP) rate schedule. Option 2 is available to new loads of 200 kW or more. Service under Option 2 is available only in conjunction with a contract for electric service having a minimum initial term of five years and requiring a minimum of thirty (30) days advance notice to cancel thereafter.

Examples of businesses and industries eligible for service under Option 2 include the following categories:

Distribution centers
Startup manufacturing
Big Box and/or retail stores
Server farms and other information technology related companies
Printing companies

To qualify for Option 2, the customer must furnish to the Company an affidavit stating that this rider was an important factor in the customer's decision to add load and complete and sign the appropriate application form.

The load factor of the facility must be equal to or greater than 40%.

The availability of Option 2 is at the sole discretion of the Company. The Company will not accept new applications for service under Option 2 when the Company's forecasts indicate that additional generating capacity will be needed within a three-year period.

All provisions of the LP rate schedule will apply except as modified herein.

Kind of Service: Electric	Class of Service: As Applicable	
Part III. Rate Schedule No. 32		
Title: EXPERIMENTAL ECONOMIC DEVELOPMENT RIDER		PSC File Mark Only

Determination of Base Threshold Demand
The Monthly Base Threshold Demand shall be 0 kW.

Determination of Economic Development Demand
The Economic Development Demand subject to the provisions of Option 2 shall be that portion of the Kilowatts of Billing Demand during the current month that is greater than the Monthly Base Threshold Demand. The Economic Development Demand will not exceed 500 kW.

Determination of Economic Development Credits
The Customer's monthly bill for service under this rider will be calculated in accordance with the LP rate schedule with the exception that an Economic Development Credit will be applied. An Economic Development Credit will be determined by multiplying the Economic Development Demand times the Kilowatt Charge of the LP rate schedule times the appropriate Billing Credit Factor. The Billing Credit Factors are provided below:

Term of Economic Development Credit	Billing Credit Factors
Year 1 - First 12 monthly billing periods	35%
Year 2 - Next 12 monthly billing periods	25%
Year 3 - Next 12 monthly billing periods	15%

Original	**Sheet No:** R-33.1	Sheet 1 of 4
Replacing:	**Sheet No:** R-33.1	
Name of Company: SOUTHWESTERN ELECTRIC POWER COMPANY		
Kind of Service: Electric	**Class of Service:** As Applicable	
Part III. Rate Schedule No. 33		
Title: PURCHASED POWER SERVICE (PPS)		

PSC File Mark Only

AVAILABILITY

This rate shall apply to purchases by the Company of energy generated by qualified small power production and cogeneration facilities. The Qualified Facility's (QF) electrical requirements supplied by the Company shall be separately metered and billed in accordance with the applicable rate schedule. The rules under which small power production and cogeneration facilities can obtain qualifying status are defined in the Arkansas Public Service Commission Cogeneration Rules as approved. The design capacity of the qualified facility must be 100 kW or less.

PAYMENT SCHEDULE

The payment shall be the algebraic sum of calculations made under (I) and (II) below.

(I) RATE

(A) QF Charge (Payable by QF)

(1) Each QF will pay any interconnection costs which are defined as the costs of connection, switching, metering, transmission, distribution, safety provisions, and administrative costs incurred by the Company directly related to the installation and maintenance of the physical facilities necessary to permit interconnected operations. Interconnection costs do not include any costs included in the calculation of avoided costs in Section (I)(B). The QF will either make an initial payment to the Company for the interconnection costs for investment in facilities as determined above or make periodic payments over a two year period wherein such payments provide for the amortization of interconnection costs, as well as a return to the Company equal to its pre-tax

ARKANSAS PUBLIC SERVICE COMMISSION

marginal cost of capital. In addition, the QF will pay the monthly charge for maintaining facilities currently at the filed rate of 0.69 percent of the interconnection cost for investment in facilities as determined above.

(2) Monthly QF Charge (Payable by QF)
Each QF will pay a monthly QF Charge of $12.00. This charge is to cover such items as customer accounting expenses, administrative expenses, and general expenses incurred in servicing the QF.

(B) Monthly kWh Payment (Payment by Company)
Payment for energy delivered into Company's system with adjustment as provided in (II) will be at the following purchase rate:

Months – 2019	cents/KWH
1st Quarter - January, February, March	3.1164
2nd Quarter - April, May, June	2.4095
3rd Quarter - July, August, September	2.7714
4th Quarter - October, November, December	2.3866

Purchase rate will begin upon approval of the Purchased Power Service (PPS) rate schedule and will be revised no less frequently than annually.

ARKANSAS PUBLIC SERVICE COMMISSION

(II) ADJUSTMENTS

(A) (Meter readings may be made in conjunction with regular meter reading schedules. The actual metered kilowatt-hours will be billed according to the pricing period defined in (I)(B). Kilowatt-hour payments will be prorated to reflect the number of days within each quarter and each pricing period when metering does not allow for an actual determination.

BILLING

The Company shall send a statement to the QF on or before the 10th day after the QF's meter is read. The statement will show the kilowatt capacity, if any, and kilowatt-hours delivered to the Company during the period, customer charges payable to the Company, and total amount due. Payments for service will be rendered monthly, unless otherwise specified. The term "month" for payment purposes will mean the period between any two consecutive readings of the meters by the Company, such readings to be taken as nearly as practical every 30 days. The Company reserves the right to credit purchase of power against billings for electric service due and payable to the Company by the QF.

CONTRACT PERIOD

A Power Purchase Contract will be in effect for each service at each separate location. The Contract Period shall be negotiated between the QF and the Company. The Company's TERMS AND CONDITIONS FOR PURCHASE BY THE COMPANY OF ELECTRICITY APPLICABLE TO RATE SCHEDULE PURCHASED POWER SERVICE (PPS) are applicable to this rate schedule.

SUPPLEMENTARY POWER SERVICE

Supplementary power is electric energy or capacity used regularly by a facility in addition to that power which it ordinarily generates for its own use. QF's electrical requirements for supplementary power service will be supplied by the Company and shall be separately metered and billed in accordance with the applicable rate schedule and the Company's Standard Terms and Conditions.

Title: REDUNDANT SERVICE POLICY FOR MUNICIPAL ACCOUNTS		PSC File Mark Only

AVAILABILITY

Redundant service is defined as those facilities, including metering equipment, to provide electric power and energy from an alternate source to municipal accounts served by the Company that require such redundant service.

APPLICABILITY

The kilowatt-hours used on the meter for redundant service plus the kilowatt-hours equal to the redundant transformer no load losses at 100% voltage shall be added to the kilowatt-hours used on the regular meter (for billing on the appropriate rate) plus a charge computed according to one of the following Alternatives:

ALTERNATIVE 1 For Total Company Investment to Provide Redundant Service

There will be a charge each month equal to 1.46% (17.52% per year) of the Company investment, which includes metering costs, to provide redundant service.

ALTERNATIVE 2 For Customer’s Contribution of the Total Investment to Provide Redundant Service

There will be a charge each month equal to 0.69% (8.28% per year) of the Customer's contribution of the total investment to provide redundant service.

ALTERNATIVE 3 For the Customer Desiring to Make a Contribution in Aid of Construction Toward the Investment Required to Provide the Redundant Service

There will be a charge each month equal to 1.46% (17.52% per year) of the Company’s investment, which includes metering costs, to provide redundant service plus a charge each month equal to 0.69% (8.28% per year) of the Customer's contribution toward the investment required to provide the redundant service.

PAYMENT FOR SERVICE

Payment for Service Rider - See Rate Schedule 44.

TERMS AND CONDITIONS

Service will be furnished under Company's Standard Terms and Conditions.

APSC FILED Time: 2/28/2019 2:15:14 PM: Recvd 2/28/2019 2:14:10 PM: Docket 19-008-U-Doc. 39

ARKANSAS PUBLIC SERVICE COMMISSION

Original	Sheet No. R-35.1	Sheet 1 of 2
Replacing:	Sheet No.	
Name of Company SOUTHWESTERN ELECTRIC POWER COMPANY		
Kind of Service: Electric	Class of Service: As Applicable	
Part III. Rate Schedule No. 35		
Title: EXTENSION OF FACILITIES AGREEMENT		PSC File Mark Only

For Residential Customers in Undeveloped Areas:

Southwestern Electric Power Company's (SWEPCO) philosophy is to extend facilities to provide service requested under the applicable rate schedule. If the anticipated continuing annual revenue, not including adjustment charge of fuel and tax adjustment charge, will not support the allocated portion of SWEPCO's investment in facilities to extend or provide service in undeveloped areas, the following extension policy will apply.

When the revenue from the prospective customer(s) does not meet these estimated criteria, the Company will be authorized to collect a minimum bill which will be determined by such factors as: cost of extension (not including system investment and cost of meter), growth potential, future earnings, system improvements, terrain, geography and other considerations.

The customer will be billed for electric service made available hereunder on the published rate schedule applicable to the location. However, for the amount of investment determined by the Company, customer agrees to pay the Company a minimum amount of $________ per month (1/60th of the allocated portion of SWEPCO's investment) plus the fuel adjustment charge and the tax adjustment charge as provided in the rate schedule for a period of five years from the date service is first made available to the customer from said extension. The customer agrees to pay said minimum monthly amount to the Company. Customer further agrees to pay said minimum monthly amount even though it may be in excess of the amount specified in Company's applicable published rate schedule. If the premises served under this agreement are sold, leased, or rented, the customer nevertheless guarantees the payment of said minimum bill for said period, as provided above.

For Industrial, Large Commercial and Loads Requiring an Unusual Amount of Investment

SWEPCO will own, install, operate and maintain the facilities required to supply the customer's electric requirements. Electric service will be furnished according to terms of a contract between the parties including the applicable rate schedule plus a provision which will provide:

In consideration of the determined investment in facilities by SWEPCO necessary to make electric service available, the customer agrees to pay to SWEPCO each month an amount, computed under the applicable rate schedule not including tax adjustment charge, the cost of fuel and/or fuel adjustment revenue, not less than 1/60th* of the determined investment required to supply the customer's electrical requirements. The determined investment will include such factors as cost of extension (including system investment), growth potential, future earnings, system improvements, terrain, geography and other considerations.

*The denominator of this fraction is to be the number of months for which service is contracted if less than 60 months.

Contribution in Aid of Construction

The customer may reduce the minimum bill requirement by making a contribution in aid of construction to reduce the determined investment to not more than five times the anticipated continuing annual revenue, not including the fuel adjustment charge and tax adjustment charge.

Contributions in aid of construction that are considered taxable income by a governmental agency or body will be increased by the approximate tax rate.

PAYMENT FOR SERVICE

Payment for Service Rider - See Rate Schedule 44.

TERMS AND CONDITIONS

Service will be furnished under Company’s Standard Terms and Conditions.

AVAILABILITY

This Rider is available only in conjunction with Company's Lighting and Power (LP) or Large Lighting and Power (LLP) rate schedules to Customers who contract for not less than 500 kW of curtailable power. The applicable rate schedule will be determined based on the Customers Total kW. All provisions of the Lighting and Power or Large Lighting and Power rate schedules, whichever is applicable, will apply except as modified herein. Service must be taken at one point of delivery and measured through one meter. This Rider is not available for backup power to customer owned generation. This Rider is not applicable in conjunction with Company's Experimental Economic Development Rider for loads designated as Curtailable kW.

The availability of service under this Rider is subject to the Company, in its sole judgment, having sufficient capacity and fuel to serve the requirements of its other customers and to maintain its spinning reserve. The availability of total system curtailable and interruptible kW contracted may be limited by the Company to an amount not to exceed 5% of the projected aggregate Company peak demand. Service is available under this Rider only if the utilization of such service is of such character that service can be curtailed at any time by Company, following 10 minutes notice by Company to Customer that service must be curtailed, without loss to Customer or damage to property or persons and without adversely affecting the public health, safety, and welfare.

DEFINITION OF TERMS

Total kW: Total kW is defined as the sum of the Firm kW and the Curtailable kW designated by the customer when contracting for service under this Rider and will be used to determine the applicable rate schedule.

Firm kW: Firm kW is defined as that portion of the Total kW that is not subject to curtailment under the terms and conditions of this Rider. The Firm kW will be designated by the Customer when contracting for service under this Rider. In addition, Firm kW may be adjusted annually by the Customer by written request to the Company.

ARKANSAS PUBLIC SERVICE COMMISSION

Original	Sheet No. R-36.2 Sheet 2 of 5	
Replacing:	Sheet No.	
Name of Company SOUTHWESTERN ELECTRIC POWER COMPANY		
Kind of Service: Electric	Class of Service: As Applicable	
Part III. Rate Schedule No. 36		
Title: EXPERIMENTAL CURTAILABLE SERVICE RIDER		PSC File Mark Only

Curtailable kW: Curtailable kW is defined as that portion of the Total kW subject to curtailment by the Company under this Rider. The Curtailable kW will be designated by the Customer when contracting for service. In addition, Curtailable kW may be adjusted annually by the Customer by written request to the Company.

CONDITIONS OF SERVICE

Customer may choose to have Total kW or some portion thereof designated as Curtailable kW. The amount of Total kW not designated as Firm kW shall constitute Customer's Curtailable kW. Customer's service must be equipped, at Customer's expense, with devices necessary to reduce Total kW during the period of curtailment to Firm kW or below and with metering devices necessary to verify that Total kW is at or below the Firm kW. In addition, the Company may request that the Customer's service be equipped, at Customer's expense, with communication equipment necessary to provide instantaneous load information to Company's designated system operating center.

Company will request curtailment of electric service under this Rider as the Company deems necessary for any reason including, but not limited to, maintaining service to firm loads, avoiding establishment of a new system peak, avoiding establishment of a peak demand in excess of 95% of the Company's forecasted peak load for the year, maintaining service integrity in the area, or other situations when reduction in load on the Company's system is warranted. To the extent possible, curtailable loads served under this Rider will be curtailed before any curtailment of firm loads is requested or required. Requests for curtailment will be made by Company's System Operator via telephonic communication to Customer's designated representative(s). Upon application for service under this Rider, Customer shall designate the representative(s) and provide the telephone number at which they may be reached 24 hours a day. In the event of a curtailment for non-emergency purposes, Company will endeavor to provide notice to Customer at least 30 minutes prior to curtailment. In the event of a curtailment for emergency conditions, Company will attempt to provide as much prior notice as possible but is in no way obligated to give more than 10 minutes notice prior to curtailment. Absence of a designated representative or inability of the Company to communicate with the designated representative because of unanswered telephone, busy telephone, or otherwise, once

Company has initiated a telephonic communication to the designated representative, will in no way be regarded as an excuse for failure to comply with a curtailment request. The Company may request the customer to install at Customer's expense electronic equipment necessary for automatic notification of curtailment.

MONTHLY CHARGES AND CREDITS

Customer's net monthly bill for service provided under this Rider will be calculated in accordance with Company's applicable rate schedule, with the exception that a Curtailable Power Credit will be applied. The Curtailable Power Credit will be determined by applying a Demand Credit to the portion of the average kilowatt load used by the Customer during the 15 minute period of maximum use during the month in excess of the Firm kW. However, the Curtailable Power Credit will not exceed the product of the Demand Credit and the Curtailable kW.

The Demand Credit used to calculate the Monthly Curtailable Power Credit will be:

VOLTAGE LEVEL	DEMAND CREDIT
Secondary Service	$3.19/kW
Primary Service	$3.06/kW
Transmission Service	$2.91/kW

NON-COMPLIANCE PROVISIONS

Customer understands that service under this Rider is contingent upon Customer's complete and timely compliance with Company's requests for curtailment. If, at any time, Customer fails in whole or in part to implement or maintain any request for curtailment to reduce the Total kW to

the Firm kW, the Company may, at its option, elect to cancel, effective immediately, the Customer's eligibility for service under this Rider. Should the Company exercise this option, billing for the current and subsequent eleven (11) months will revert to the LP or LLP rate schedule, whichever is applicable. In addition, any Curtailable Power Credits received by the Customer during the 11 previous months shall be forfeited and reimbursed with interest to the Company over the six (6) month period following the cancellation of Customer's eligibility for service under this Rider.

LIMITATIONS ON CURTAILMENTS

Curtailments under this Rider are limited as follows:

Daily Limit: No longer than 12 hours in any day, measured from midnight to midnight, except during system emergencies as described below.

Annual Limit: No more than 400 hours in any calendar year.

The only curtailments included in curtailment time limits are those implemented at the request of Company for the purposes described in the "Conditions of Service" above. Extended interruptions resulting from failure of transmission or distribution equipment are not included in curtailment time limits. Curtailment time is measured from the time the Company notifies the Customer via telephonic communication when the period of curtailment will begin to the time that Company notifies Customer via telephonic communication that the period of curtailment will end.

During system emergencies when Company has made public pleas to restrict electric energy usage to essential needs because of an area or statewide shortage of electric power and/or energy, curtailable loads served under this Rider may be curtailed continuously without daily limit until such emergency condition has ended. Such curtailments shall be included in annual curtailment time limits.

ARKANSAS PUBLIC SERVICE COMMISSION

Curtailments of less than 15 minutes in duration shall constitute a 15-minute period for inclusion in Curtailable time limits.

Contract Minimum: The customer's minimum bill shall not be less than the applicable charge for the contracted demand minimum plus the applicable Fuel and Tax Adjustments and in no event shall the contract demand minimum be less than 500 kilowatts.

TERM OF CONTRACT

This Rider is being offered as an experimental service and may be withdrawn by the Company following written notice to each Customer served under the Rider given at least one year prior to such withdrawal. The obligation of the Customer shall continue for a minimum initial term of one year and continuing thereafter unless canceled by Customer following written notice given at least one year prior to such cancellation.

PAYMENT FOR SERVICE

Payment for Service Rider - See Rate Schedule 44.

ARKANSAS PUBLIC SERVICE COMMISSION

Original	**Sheet No:** R-37.1	Sheet 1 of 9
Replacing:	**Sheet No:**	
Name of Company: SOUTHWESTERN ELECTRIC POWER COMPANY		
Kind of Service: Electric	**Class of Service:** As Applicable	
Part III. Rate Schedule No. 37		
Title: UNDERGROUND ELECTRIC DISTRIBUTION SERVICE AGREEMENT		

PSC File Mark Only

I. SCOPE

This policy applies to installation of underground electric distribution systems where feasible from engineering, operation, and economic standpoint to serve. Underground Electric Distribution (UED) and similar phrases include not only electric facilities that are actually located underground, but also above ground which may be necessary to provide service to the customer.

Our basic philosophy, that the developer should pay the cost of underground electric distribution facilities that is in excess of the cost of overhead electric distribution facilities is to be maintained in all instances.

II. DEFINITION OF TERMS

A. For purposes of this policy the following abbreviations and definitions shall prevail:

1. Underground (US) Service -- Customer owned, maintained and installed underground service conductors, sometimes installed in a raceway, that extend from the Customer's meter to the point of delivery, where connection is made to Company's distribution system.

2. Overhead (OH) Service Drop -- Company owned and installed overhead service drop conductors that extend from the Company's overhead distribution

system to the point of delivery, where connection is made to Customer's electrical installation.

3. Point of Delivery -- The point of delivery of electric service shall be the point at which the electrical facilities of the Company connect to the electrical facilities of the Customer.

   a) For Overhead construction, the point of delivery is that point where the Company owned and installed OH Service Drop connects to the Customer owned service entrance wires which are located at the Customer's weatherhead. The Customer owned service entrance wires are connected by the customer to the source side of the meter socket and runs along the customer owned and installed service entrance raceway. The Service Entrance conductors extend out the weatherhead approximately 2 - 3 ft.

   b) For Underground construction, the point of delivery is that point where the Company owned distribution UED secondary facilities connect to the Customer owned and installed UED Service. The customer owned UED service is connected by the customer to the source side of the meter socket and runs underground from the Customer's meter location to the Company owned UED distribution facilities.

4. SWEPCO - Southwestern Electric Power Company.

5. Developer – A person, partnership, association, corporation, or governmental agency that owns, operates, or develops a subdivision or mobile home park.

6. Service Connections – The electrical facilities of the underground system installed, maintained and owned by developer extending from SWEPCO's secondary connection on the distribution system to the point of metering, but not including the meter(s). This would consist of the underground cable from customer's entrance equipment to SWEPCO's secondary pedestal or transformer.

7. Primary - That portion of the distribution system which delivers energy to the primary (high voltage) side of the distribution transformer from the substation or point of supply. Nominal voltages of these primary systems are 2.4 kV, 4Y/2.4 kV, 12.5Y/7.2 kV, and 34.5Y/19.9 kV.

8. Secondary - That portion of the distribution system which distributes the energy from the secondary (low voltage) side of the distribution transformer to the customers' service connection points at utilization voltage. Nominal voltages of these secondary systems are 120/240 volts, 240 volts, 208Y/120 volts, and 480Y/277 volts.

III. CONDITION OF SERVICE

A. UED will be made available in SWEPCO's service area where feasible from engineering, operation, and economic standpoint. The terms and conditions of the Company's Extension of Facilities Agreement (Schedule R-35.1) apply as

ARKANSAS PUBLIC SERVICE COMMISSION

Original **Sheet No:** R-37.4 Sheet 4 of 9

Title: UNDERGROUND ELECTRIC DISTRIBUTION SERVICE AGREEMENT

PSC File Mark Only

necessary. The cost estimate for all facilities provided, installed, owned, and maintained by the Company will include:

1. Material cost (purchased and stores);

2. Labor costs (Company and Contract);

3. Transportation cost;

4. Trenching (including backhoeing and boring);

    a) The customer may provide all trenching and backfilling to meet Company specifications.

    b) If the customer provides all trenching and backfilling to meet Company specifications, customer's (CIAC) will be reduced by that amount.

5. Right-of-way clearing, purchase, and acquisition;

6. Permanent Work Orders (PWO’s) (where applicable) and Overheads (exempt material);

7. Stores, Freight, and Handling;

8. Administrative & General costs; and

9. Engineering & Supervisory costs.

B. Differential cost: Customer will pay to Company prior to installation a contribution in aid to construction (CIAC) for all costs in excess of the cost of overhead electric distribution facilities. The CIAC will be grossed up for taxes.

PAYMENT FOR SERVICE

Payment for Service Rider - See Rate Schedule 44.

SOUTHWESTERN ELECTRIC POWER COMPANY

STANDARD AGREEMENT
FOR UNDERGROUND ELECTRIC DISTRIBUTION SYSTEM
BETWEEN

____

____

(Customer, Owner, Developer, Operator, or Builder)
Hereinafter referred to as Customer
AND
SOUTHWESTERN ELECTRIC POWER COMPANY

It is mutually understood and agreed that:

I. This Agreement applies to installation and operation of an underground electric distribution system on easement granted Southwestern Electric Power Company (SWEPCO) on ____ ____________________________________ and is further identified by SWEPCO Drawing No. _____ which is made a part of this Agreement.

II. Electric service covered by this Agreement shall be: (Indicate one)

( ) A. For individually metered customers in residential subdivisions, mobile home parks, apartment complexes, and apartments - single phase, 3 wire

at a nominal voltage of 120/240 volts.

( ) B. For primary metered apartment complexes - primary voltage and phases required are ______________________.

( ) C. For single point service for apartment projects metered at secondary voltage. (Indicate one)

( ) 1. Single phase, 3 wire at a nominal voltage of 120/240.
( ) 2. Three phase, 4 wire at a nominal voltage of 208Y/120.
( ) 3. Three phase, 4 wire at a nominal voltage of 480Y/277.
( ) 4. Three phase, 4 wire at a nominal voltage of 120/240.

III. Service entrance cables shall be installed underground between Customer's building and SWEPCO transformer or secondary service pedestal by Customer.

IV. SWEPCO reserves the right to designate the point of service for each lot, each apartment building, each mobile home space, and each commercial customer.

V. To insure reliability of service to all consumers in an apartment and commercial developments:

A. Customer will provide adequate overcurrent protection to each individual consumer.

APSC FILED Time: 2/28/2019 2:15:14 PM: Recvd 2/28/2019 2:14:10 PM: Docket 19-008-U-Doc. 39

ARKANSAS PUBLIC SERVICE COMMISSION

B. If Customer installs service feeders under a building to centrally located metering points, a spare conduit shall be provided by the Customer to permit rapid restoration of service.

VI. Customer will provide the utility an easement at final grade, the easement shall be clear of trees or other obstructions, as required, with all property corners staked before construction of residential underground electric distribution system begins.

VII. Location of underground facilities, other than the electric distribution system installed by or for the Customer shall be designated by the Customer prior to construction of the electric distribution system.

VIII. Any rearrangements in the electric distribution system or metering arrangement which may be required by the Customer after installation of distribution system shall be paid for by the Customer.

IX. SWEPCO will furnish and install the following equipment:

A. All primary and secondary cables. (Does not include service cable.)
B. Switch enclosures, transformers, transformer enclosures, secondary pedestals, and associated equipment.
C. Any overhead distribution required to provide this service.

X. The Customer will pay the Company the differential cost prior to the installation of (UED) facilities.

Part III. Rate Schedule No. 38		
Title: RECREATIONAL LIGHTING		PSC File Mark Only

AVAILABILITY

This schedule is available for lighting of recreational fields and for miscellaneous recreational facilities to include restrooms and concession stands, where the Customer owns the lighting facilities and the electric service is metered. Non-lighting loads may not exceed 20% of the total lighting load.

Service under this schedule includes but is not limited to facilities with characteristics similar to athletic fields of schools, churches, and public recreational associations.

A written contract may be required at the option of the Company.

TYPE OF SERVICE

The electric service furnished will be to a single metered delivery point and will be at one standard voltage.

This rate schedule is not available for resale, stand-by, or supplemental service.

NET MONTHLY RATE

Customer Charge:	$10.60
Kilowatt-hour Charge:	$0.0373 per kilowatt hour

Adjustments:

Fuel Adjustment: In addition to all other charges, the amount of the Customer's bill will be adjusted by an amount per kilowatt-hour calculated according to the formula in the Energy Cost Recovery Rider - Arkansas.

Tax Adjustment: In addition to all other charges, the amount of the Customer's bill will be increased by the proportionate part of any new tax or increased rate of tax in accordance with the Tax Adjustment Rider - Arkansas.

PAYMENT FOR SERVICE

Payment for Service Rider - See Rate Schedule 44.

TERMS AND CONDITIONS

Service will be furnished under the Company's Standard Terms and Conditions.

ARKANSAS PUBLIC SERVICE COMMISSION

Replacing:	Sheet No.	
Name of Company SOUTHWESTERN ELECTRIC POWER COMPANY		
Kind of Service: Electric	Class of Service: As Applicable	
Part III. Rate Schedule No. 39		
Title: ALTERNATE FEED SERVICE		PSC File Mark Only

AVAILABILITY

Alternate Feed Service (AFS) may be available for service to customers served under Lighting and Power and Large Lighting and Power Primary Service Schedules, who request an alternate feed service from existing distribution facilities which is in addition to the customer's basic service, provided that the Company can reasonably provide available capacity in existing distribution facilities adjacent to the customers requested delivery point.

NET MONTHLY RATE

In addition to all monthly charges for the customer's basic service as determined under the appropriate Schedule, the customer shall pay the following:

$5.06	Per kW of AFS billing demand for reserving AFS station and distribution line facilities at primary voltage.

AFS CAPACITY RESERVATION

The customer shall reserve a specific amount of AFS capacity equal to the customer's normal maximum requirements, but in no event shall the customer's AFS reserved capacity under this rider exceed the capacity reservation for the customer's basic service under the appropriate tariff. The Company shall not be required to supply AFS capacity in excess of that reserved except by mutual agreement.

Adjustments:

Tax Adjustment: In addition to all other charges, the amount of the Customer's bill will be increased by the proportionate part of any new tax or increased rate of tax in accordance with the Tax Adjustment Rider – Arkansas.

MEASUREMENT AND DETERMINATION OF DEMAND

The billing demand will be measured and billed in accordance with the tariff requirements set forth in the customer's basic service tariff.

EQUIPMENT AND INSTALLATION CHARGE

The Customer shall be required to pay a one-time equipment and installation charge for all facilities required to provide either a new or upgraded alternate feed service. The equipment and installation charge shall be determined by the Company and shall include, but not be limited to, (a) all cost of the alternate feed facilities, and (b) any cost of modifications to the customer's basic service necessary to install the alternate feed facilities. All equipment shall remain the property of the Company.

TERM

The customer shall contract for a definite amount of electrical capacity in kilowatts which shall be sufficient to meet normal maximum requirements under this Rider, but in no event shall the customer's contract capacity under this Rider exceed the contract capacity for the customer's basic service under the appropriate Schedule. The Company shall not be required to supply capacity in excess of that for which the customer has contracted.

Contracts will be required for an initial period of not less than one (1) year and shall remain in effect thereafter until either party shall give the other at least six (6) months' written notice of the intention to discontinue service under their Rider.

A new initial contract period will not be required for existing customers who change their contract requirements after the original initial periods longer than one (1) year pursuant to the Extension of Service provision of the Company's Terms and Conditions of Service.

SPECIAL TERMS AND CONDITIONS

The customer shall be responsible for supplying any switching apparatus and facilities which are required in order for the installation to conform to the Company's construction standards and requirements. In those cases where the Company supplies the switching apparatus to conform to the Company's standards and requirements, the customer shall be responsible for the total cost of the switching apparatus, installation, maintenance, and any future replacement costs.

Upon receipt of a request from the customer for non-standard AFS, the Company will provide the customer with a written estimate of all costs, including system impact study costs, and any applicable unique terms and conditions of service related to the provision of the non-standard AFS. The AFS agreement shall provide full disclosure of all rates, terms and conditions of service under this rider, and any and all agreements related thereto.

The Company will have sole responsibility for determining the basic service circuit and the AFS circuit.

Service under this Rider does not guarantee that power will be available through the alternate feed service at all times.

PAYMENT FOR SERVICE

Payment for Service Rider - See Rate Schedule 44.

TERMS AND CONDITIONS

Service will be furnished under Company's Standard Terms and Conditions.

TABLE OF CONTENTS

40. NET-METERING

40.1. AVAILABILITY

40.1.1. To any residential or any other customer who takes service under standard rate schedules Residential Service, Electric Heating Appliance Residential Service, General Service, Lighting and Power, Lighting and Power Time-of-Use, Large Lighting and Power, Municipal Service, Municipal Pumping (non-conjunction), and Recreational Lighting who is an owner of a Net-Metering Facility and has obtained a signed Standard Interconnection Agreement for Net-Metering Facilities with the Electric Utility. The generating capacity of Net-Metering Facilities may not exceed the greater of: 1) twenty-five kilowatts (25 kW) or 2) one hundred percent (100%) of the Net-Metering Customer's highest monthly usage in the previous twelve (12) months for Residential Use. The generating capacity of Net-Metering Facilities may not exceed three hundred kilowatts (300 kW) for non-residential use unless otherwise allowed by the Commission. Net-Metering is intended primarily to offset part or all of the customer's energy use.

The provisions of the customer's standard rate schedule are modified as specified herein.

40.1.2. Net-Metering Customers taking service under the provisions of this tariff may not simultaneously take service under the provisions of any other alternative source generation or co-generation tariff except as provided in the Net-Metering Rules.

40.2. MONTHLY BILLING

40.2.1. The Electric Utility shall separately meter, bill, and credit each Net-Metering Facility even if one (1) or more Net-Metering Facilities are under common ownership.

40.2.2. On a monthly basis, the Net-Metering Customer shall be billed the charges applicable under the currently effective standard rate schedule and any appropriate rider schedules. Under Net-Metering, only the kilowatt hour (kWh) units of a Net–Metering Customer's bill are netted.

40.2.3. If the kWhs supplied by the Electric Utility exceeds the kWhs generated by the Net-Metering Facility and fed back to the Electric Utility during the Billing Period, the Net-Metering Customer shall be billed for the net billable kWhs supplied by the Electric Utility in accordance with the rates and charges under the Net-Metering Customer's standard rate schedule.

40.2.4. If the kWhs generated by the Net-Metering Facility and fed back to the Electric Utility during the Billing Period exceed the kWhs supplied by the Electric Utility to the Net-Metering Customer during the applicable Billing Period, the Electric Utility shall credit the Net-Metering Customer with any accumulated Net Excess Generation in the next applicable Billing Period.

40.2.5. Net Excess Generation shall first be credited to the Net-Metering Customer's meter to which the Net-Metering Facility is physically attached (Generation Meter).

40.2.6. After application of 40.2.5 and upon request of the Net-Metering Customer pursuant to 40.2.8, any remaining Net Excess Generation shall be credited to one or more of the Net-Metering Customer's meters (Additional Meters) in the rank order provided by the Net-Metering Customer.

40.2.7. Net Excess Generation shall be credited as described in 40.2.5 and 40.2.6 during subsequent Billing Periods; the Net Excess Generation Credits remaining in a Net-Metering Customer's account at the close of a billing cycle shall not expire and shall be carried forward to subsequent billing cycles indefinitely. For Net Excess Generation Credits older than twenty-four (24) months, a Net-Metering Customer may elect to have the Electric Utility purchase the Net Excess Generation Credits in the Net-Metering Customer's account at the Electric Utility's estimated annual average cost rate for wholesale energy if the sum to be paid to the Net-Metering Customer is at least one hundred dollars ($100). An Electric Utility shall purchase at the Electric Utility's estimated annual average Avoided Cost rate for wholesale energy any Net Excess Generation Credits remaining in a Net-Metering Customer's account when the Net-Metering Customer: 1) ceases to be a customer of the Electric Utility; 2) ceases to operate the Net-Metering Facility; or transfers the Net-Metering Facility to another person.

When purchasing Net Excess Generation Credits from a Net-Metering Customer, the Electric Utility shall calculate the payment based on its annual average avoided energy costs in the applicable Regional Transmission Organization for the current year.

40.2.8. Upon request from a Net-Metering Customer the Electric Utility must apply Net Excess Generation to the Net-Metering Customer's Additional Meters provided that:

(a) The Net-Metering Customer must give at least 30 days' notice to the Electric Utility.

(b) The Additional Meter(s) must be identified at the time of the request. Additional Meter(s) shall be under common ownership within a single Electric Utility's service area; shall be used to measure the Net-Metering Customer's requirements for electricity; may be in a different class of service than the Generation Meter; shall be assigned to one, and only one, Generation Meter; shall not be a Generation Meter; and shall not be associated with unmetered service.

(c) In the event that more than one of the Net-Metering Customer's meters is identified, the Net-Metering Customer must designate the rank order for the Additional Meters to which excess kWhs are to be applied. The Net-Metering Customer cannot designate the rank order more than once during the Annual Billing Cycle.

40.2.9. Any Renewable Energy Credit created as the result of electricity supplied by a Net-Metering Customer is the property of the Net-Metering Customer that generated the Renewable Energy Credit.

PRELIMINARY INTERCONNECTION SITE REVIEW REQUEST

Southwestern Electric Power Company – State of Arkansas

If the requested point of interconnection is the same as an existing electric service, provide the electric service account number: ________________________________

Additional Customer Accounts (from electric bill) to be credited with Net Excess Generation: ____

Annual Energy Requirements (kWh) in the previous twelve (12) months for the account physically attached to the Net-Metering Facility and for any additional accounts listed (in the absence of historical data reasonable estimates for the class and character of service may be made):____

Section 2. Generation Facility Information

System Type: Solar Wind Hydro Geothermal Biomass Fuel Cell Micro Turbine (circle one)

Generator Rating (kW): ____________________ AC or DC (circle one)

Expected Capacity Factor: ____________________________________

Expected annual production of electrical energy (kWh) of the facility calculated using industry recognized simulation model (PVWatts, etc):___________________________

Section 3. Interconnection Information

Attach a detailed electrical diagram showing the configuration of all generating facility equipment, including protection and control schemes.

Requested Point of Interconnection: ____

Customer-Site Load (kW) at Net-Metering Facility location (if none, so state):

____

Interconnection Request: Single Phase: _______________ Three Phase: ________________

Section 4. Signature

I hereby certify that, to the best of my knowledge, all the information provided in this Preliminary Interconnection Site Review is true and correct.

Signature: _____________________________________ Date: ______________________

II. TERMS AND CONDITIONS

Section 1. Requirements for Request

For the purpose of requesting that the Electric Utility conduct a preliminary interconnection site review for a proposed Net-Metering Facility pursuant to the requirement of Rule 2.05.B.4, or as otherwise requested by the customer, the customer shall notify the Electric Utility by submitting a completed Preliminary Interconnection Site Review Request. The customer shall submit a separate Preliminary Interconnection Site Review Request for each point of interconnection if information about multiple points of interconnection is requested. Part 1, Standard Information, Sections 1 through 4 of the Preliminary Interconnection Site Review Request must be completed for the notification to be valid. If mailed, the date of notification shall be the third day following the mailing of the Preliminary Interconnection Site Review Request. The Electric Utility shall provide a copy of the Preliminary Interconnection Site Review Request to the customer upon request.

<u>Section 2. Utility Review</u>

Following submission of the Preliminary Interconnection Site Review Request by the customer the Electric Utility shall review the plans of the facility interconnection and provide the results of its review to the customer, in writing, within 30 calendar days. If the customer requests that multiple interconnection site reviews be conducted the Electric Utility shall make reasonable efforts to provide the customer with the results of the review within 30 calendar days. If the Electric Utility cannot meet the deadline it will provide the customer with an estimated date by which it will complete the review. Any items that would prevent Parallel Operation due to violation of safety standards and/or power generation limits shall be explained along with a description of the modifications necessary to remedy the violations.

The preliminary interconnection site review is non-binding and need only include existing data and does not require the Electric Utility to conduct a study or other analysis of the proposed interconnection site in the event that data is not readily available. The Electric Utility shall notify the customer if additional site screening may be required prior to interconnection of the facility. The customer shall be responsible for the actual costs for conducting the preliminary interconnection site review and any subsequent costs associated with site screening that may be required.

<u>Section 3. Application to Exceed 300 kW Net-Metering Facility Size Limit</u>

This Preliminary Interconnection Site Review Request and the results of the Electric Utility's review of the facility interconnection shall be filed with the Commission with the customer's application to exceed the 300 kW facility size limit pursuant to Net Metering Rule 2.05.B.4.

<u>Section 4. Standard Interconnection Agreement</u>

The preliminary interconnection site review does not relieve the customer of the requirement to execute a Standard Interconnection Agreement prior to interconnection of the facility.

II. INTERCONNECTION AGREEMENT TERMS AND CONDITIONS

This Interconnection Agreement for Net-Metering Facilities ("Agreement") is made and entered into this ________day of _________, 20_______, by _________________________ _________("Electric Utility") and __________________________ ("Customer"), a____________(specify whether corporation or other), each hereinafter sometimes referred to individually as "Party" or collectively as the "Parties". In consideration of the mutual covenants set forth herein, the Parties agree as follows:

Section 1. The Net-Metering Facility
The Net-Metering Facility meets the requirements of Ark. Code Ann. § 23-18-603(6) and the Arkansas Public Service Commission's *Net-Metering Rules*.

Section 2. Governing Provisions
The Parties shall be subject to the provisions of Ark. Code Ann. § 23-18-604 and the terms and conditions set forth in this Agreement, the Commission's *Net-Metering Rules*, the Commission's *General Service Rules*, and the Electric Utility's applicable tariffs.

Section 3. Interruption or Reduction of Deliveries

The Electric Utility shall not be obligated to accept and may require Customer to interrupt or reduce deliveries when necessary in order to construct, install, repair, replace, remove, investigate, or inspect any of its equipment or part of its system; or if it reasonably determines that curtailment, interruption, or reduction is necessary because of emergencies, forced outages, force majeure, or compliance with prudent electrical practices. Whenever possible, the Utility shall give the Customer reasonable notice of the possibility that interruption or reduction of deliveries may be required. Notwithstanding any other provision of this Agreement, if at any time the Utility reasonably determines that either the facility may endanger the Electric Utility's personnel or other persons or property, or the continued operation of the Customer's facility may endanger the integrity or safety of the Utility's electric system, the Electric Utility shall have the right to disconnect and lock out the Customer's facility from the Electric Utility's electric system. The Customer's facility shall remain disconnected until such time as the Electric Utility is reasonably satisfied that the conditions referenced in this Section have been corrected.

Section 4. Interconnection

Customer shall deliver the as-available energy to the Electric Utility at the Electric Utility's meter.

Electric Utility shall furnish and install a standard kilowatt hour meter. Customer shall provide and install a meter socket for the Electric Utility's meter and any related interconnection equipment per the Electric Utility's technical requirements, including safety and performance standards.

The customer shall submit a Standard Interconnection Agreement to the Electric Utility at least thirty (30) days prior to the date the customer intends to interconnect the Net-Metering Facilities to the utility's facilities. Part I, Standard Information, Sections 1 through 4 of the Standard Interconnection Agreement must be completed to be valid. The customer shall have all equipment necessary to complete the interconnection prior to such notification. If mailed, the date of notification shall be the third day following the mailing of the Standard Interconnection Agreement. The Electric Utility shall provide a copy of the Standard Interconnection Agreement to the customer upon request.

ARKANSAS PUBLIC SERVICE COMMISSION

Following submission of the Standard Interconnection Agreement by the customer, the utility shall review the plans of the facility and provide the results of its review to the customer, in writing, within 30 calendar days. Any items that would prevent Parallel Operation due to violation of applicable safety standards and/or power generation limits shall be explained along with a description of the modifications necessary to remedy the violations.

If the Electric Utility's existing facilities are not adequate to interconnect with the Net-Metering Facility, the Customer shall pay the cost of additional or reconfigured facilities prior to the installation or reconfiguration of the facilities.

To prevent a Net-Metering Customer from back-feeding a de-energized line, the customer shall install a manual disconnect switch with lockout capability that is accessible to utility personnel at all hours. This requirement for a manual disconnect switch will be waived if the following three conditions are met: 1) The inverter equipment must be designed to shut down or disconnect and cannot be manually overridden by the customer upon loss of utility service; 2) The inverter must be warranted by the manufacturer to shut down or disconnect upon loss of utility service; and 3) The inverter must be properly installed and operated, and inspected and/or tested by utility personnel.

Customer, at his own expense, shall meet all safety and performance standards established by local and national electrical codes including the National Electrical Code (NEC), the Institute of Electrical and Electronics Engineers (IEEE), the National Electrical Safety Code (NESC), and Underwriters Laboratories (UL).

Customer, at his own expense, shall meet all safety and performance standards adopted by the utility and filed with and approved by the Commission that are necessary to assure safe and reliable operation of the Net Metering Facility to the utility's system.

Customer shall not commence Parallel Operation of the Net-Metering Facility until the Net Metering Facility has been inspected and approved by the Electric Utility. Such approval shall not be unreasonably withheld or delayed. Notwithstanding the foregoing, the Electric Utility's approval to operate the Customer's Net-Metering Facility in parallel with the Utility's electrical system should not be construed as an endorsement, confirmation, warranty, guarantee, or representation concerning the safety, operating characteristics, durability, or reliability of the Customer's Net-Metering Facility.

Section 5. Modifications or Changes to the Net-Metering Facility Described in Part 1, Section 2

Prior to being made, the Customer shall notify the Electric Utility of, and the Electric Utility shall evaluate, any modifications or changes to the Net-Metering Facility described in Part 1, Standard Information, Section 2 of the Standard Interconnection Agreement for Net-Metering Facilities. The notice provided by the Customer shall provide detailed information describing the modifications or changes to the Utility in writing, including a revised Standard Interconnection Agreement for Net-Metering Facilities that clearly identifies the changes to be made. The Electric Utility shall review the proposed changes to the facility and provide the results of its evaluation to the Customer, in writing, within thirty (30) calendar days of receipt of the Customer's proposal. Any items that would prevent Parallel Operation due to violation of applicable safety standards and/or power generation limits shall be explained along with a description of the modifications necessary to remedy the violations.

If the Customer makes such modification without the Electric Utility's prior written authorization and the execution of a new Standard Interconnection Agreement, the Electric Utility shall have the right to suspend Net-Metering service pursuant to the procedures in Section 6 of the Commission's General Service Rules.

A Net-Metering Facility shall not be modified or changed to generate electrical energy in excess of the amount necessary to offset all of the Net-Metering Customer requirements for electricity.

Section 6. Maintenance and Permits

The customer shall obtain any governmental authorizations and permits required for the construction and operation of the Net-Metering Facility and interconnection facilities. The Customer shall maintain the Net-Metering Facility and interconnection facilities in a safe and reliable manner and in conformance with all applicable laws and regulations.

Section 7. Access to Premises

The Electric Utility may enter the Customer's premises to inspect the Customer's protective devices and read or test the meter. The Electric Utility may disconnect the interconnection facilities without notice if the Electric Utility reasonably believes a hazardous condition exists and such immediate action is necessary to protect persons, or the Electric Utility's facilities, or property of others from damage or interference caused by the Customer's facilities, or lack of properly operating protective devices.

Section 8. Indemnity and Liability

The following is Applicable to Agreements between the Electric Utility and to all Customers except the State of Arkansas and any entities thereof, local governments and federal agencies:

Each Party shall indemnify the other Party, its directors, officers, agents, and employees against all loss, damages, expense and liability to third persons for injury to or death of persons or injury to property caused by the indemnifying party's engineering, design, construction, ownership, maintenance or operations of, or the making of replacements, additions or betterment to, or by failure of, any of such Party's works or facilities used in connection with this Agreement by reason of omission or negligence, whether active or passive. The indemnifying Party shall, on the other Party's request, defend any suit asserting a claim covered by this indemnity. The indemnifying Party shall pay all costs that may be incurred by the other Party in enforcing this indemnity. It is the intent of the Parties hereto that, where negligence is determined to be contributory, principles of comparative negligence will be followed and each Party shall bear the proportionate cost of any loss, damage, expense and liability attributable to that Party's negligence. Nothing in this paragraph shall be applicable to the Parties in any agreement entered into with the State of Arkansas or any entities thereof, or with local governmental entities or federal agencies. Furthermore, nothing in this Agreement shall be construed to waive the sovereign immunity of the State of Arkansas or any entities thereof. The Arkansas State Claims Commission has exclusive jurisdiction over claims against the state.

Nothing in this Agreement shall be construed to create any duty to, any standard of care with reference to or any liability to any person not a Party to this Agreement. Neither the Electric Utility, its officers, agents or employees shall be liable for any claims, demands, costs, losses, causes of action, or any other liability of any nature or kind, arising out of the engineering, design, construction, ownership, maintenance or operation of, or the making of replacements, additions or betterment to, or by failure of, the Customer's facilities by the Customer or any other person or entity.

Section 9. Notices
The Net-Metering Customer shall notify the Electric Utility of any changes in the information provided herein.

All written notices shall be directed as follows:

Southwestern Electric Power Company
Attention: Customer Services Manager
P. O. Box 21106
Shreveport, LA 71156

Attention:
[Customer]
Name: ____________________________________
Address: __________________________________
City:_____________________________________

Customer notices to Electric Utility shall refer to the Customer's electric service account number set forth in Section 1 of this Agreement.

Section 10. Term of Agreement
The term of this Agreement shall be the same as the term of the otherwise applicable standard rate schedule. This Agreement shall remain in effect until modified or terminated in accordance with its terms or applicable regulations or laws.

Section 11. Assignment
This Agreement and all provisions hereof shall inure to and be binding upon the respective Parties hereto, their personal representatives, heirs, successors, and assigns. The Customer shall not assign this Agreement or any part hereof without the prior written consent of the Electric Utility, and such unauthorized assignment may result in termination of this Agreement.

<u>Section 12. Net-Metering Customer Certification</u>

I hereby certify that all of the information provided in this Agreement is true and correct, to the best of my knowledge, and that I have read and understand the Terms and Conditions of this Agreement.

STANDARD INTERCONNECTION AGREEMENT FOR NET-METERING FACILITIES

Southwestern Electric Power Company – State of Arkansas

Disclaimer

POSSIBLE FUTURE RULES OR RATE CHANGES, OR BOTH AFFECTING YOUR NET-METERING FACILITY

The following is a supplement to the Interconnection Agreement you signed with Southwestern Electric Power Company.

1. Electricity rates, basic charges, and service fees, set by Southwestern Electric Power Company and approved by the Arkansas Public Service Commission (Commission), are subject to change.

2. I understand that I will be responsible for paying any future increases to my electricity rates, basic charges, or service fees from Southwestern Electric Power Company.

3. My Net-Metering System is subject to the current rates of Southwestern Electric Power Company, and the rules and regulations of the Commission. Southwestern Electric Power Company may change its rates in the future with approval of the Commission or the Commission may alter its rules and regulations, or both may happen. If either or both occurs, my system will be subject to those changes.

By signing below, you acknowledge that you have read and understand the above disclaimer.

Part III. Rate Schedule No. 42		
Title: Radio Frequency Meter Installation Rider		PSC File Mark Only

AVAILABILITY

The Rider for Radio Frequency Meter Installation is available upon request to customers who are served under a rate schedule that requires no more than a single-phase, kWh only meter. A customer may request or elect upon request by the Company to have a radio frequency meter installed under the terms of this Rider as a mutually agreeable solution to Company personnel's lack of meter reading access to Company metering equipment on a customer's premises, due to a locked gate, animal concern, safety concern or other reason.

CONDITION OF SERVICE

The Company will install, own, operate, and maintain the radio frequency meters installed under this Rider. All radio frequency meters installed under this Rider shall remain the property of the Company. After a radio frequency meter is installed, the customer is responsible for keeping the line-of-site clear from obstructions that may impede the reading of the radio frequency meter. The radio frequency meter is not transferable to another location within the Company's service territory to which the customer may move.

Some locations may not be suitable for installation of a radio frequency meter due to possible interference or limitations of the transmitting device. If it is determined by the Company that a location is not suitable for the installation, the radio frequency meter will not be installed and the Company will refund any prior payment received under this Rider.

INSTALLATION FEE

The Radio Frequency Meter Installation Fee is a one-time, non-refundable fee based on the charges as set out below:

For premises requiring a meter exchange	$100.00 per meter
Each additional meter at the same premises	$ 70.00 per meter
For premises requiring new meter installation	$ 53.00 per meter

PAYMENT

The Company will invoice the requesting customer for the total installation fee and will install the radio frequency meter after receipt of payment. The fee is non-refundable after the radio frequency meter is installed.

Title: PAYMENT FOR SERVICE RIDER (Rules of Practice and Procedure 11.04(b)(10)(B)		PSC File Mark Only

PAYMENT FOR SERVICE

Customers who pay within 22 days of the date of the bill will pay the net bill computed on the Net Monthly Rate. The gross bill will be payable after 22 days of the date of the bill. The gross bill will be the total net bill plus the sum of 10 percent of the first $30 of the net bill plus 2 percent of the amount over $30.

This rider is applicable to the following rate schedules:

2, 3, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 25, 26, 27, 28, 29, 30, 31, 32, 34, 35, 36, 37, 38, 39.

Title: ENERGY EFFICIENCY COST RECOVERY RIDER (Rider EECR)			PSC File Mark Only

PURPOSE

The purpose of the Energy Efficiency Cost Recovery Rider ("Rider EECR") is to establish the EECR Rate(s) by which Southwestern Electric Power Company (Company) will recover its energy efficiency program costs approved by the Commission in Docket No. 07-082-TF; including, but not limited to: (1) incremental energy efficiency program costs ("Incremental Program Costs"); (2) lost contributions to fixed costs ("LCFC") as described and approved by the Commission in Order No. 14 issued in Docket No 08-137-U; (3) utility incentive as described and approved by the Commission in Order No 15 issued in Docket No. 08-137-U; and (4) a "true-up" adjustment (collectively, the "Recoverable Costs"). Recovery of Incremental Program Costs is limited to the incremental costs which represent the direct program costs that are not already included in the then current rates of the Company. The EECR Rate(s) will be calculated to recover the Company's Recoverable Costs over the period in which the EECR Rate(s) will be in effect.

ANNUAL REDETERMINATION

On or before May 1 of each year, redetermined EECR Rate(s) shall be filed by the Company with the Commission in accordance with the provisions of Section 7 of the Commission's *Rules for Conservation and Energy Efficiency Programs*. The redetermined EECR Rate(s) shall be determined by application of the EECR Rate Formula set out in Attachment A to this Rider EECR. Each such revised EECR Rate shall be filed in Docket No. 07-082-TF and shall be accompanied by supporting testimony and a set of workpapers sufficient to fully document the calculations of the revised EECR Rates(s).

The redetermined EECR Rate(s) shall reflect projected Recoverable Costs for the next calendar year (the "Recoverable Year"); including, but not limited to: (1) the approved incremental Program Costs for the Recoverable Year; (2) the projected LCFC for the Recoverable Year, which shall be inclusive of LCFC for prior reporting years that are not already included within the Company's most recently established base rates; (3) the incentive earned in the prior calendar year (the "Reporting Year"), if any; and (4) a

true-up adjustment reflecting the over-recovery or under-recovery of the EECR Recoverable Costs for the Reporting Year. The true-up adjustment will be calculated to include the effect of carrying costs using the Company's most recently approved rate of return on rate base. The EECR Rate(s) so redetermined shall be effective for bills rendered on and after the first billing cycle of January of the Recoverable Year and shall then remain in effect for twelve (12) months ("EECR Cycle"), except as otherwise provided for below.

INTERIM ADJUSTMENT

Should a cumulative over-recovery or under-recovery balance arise during any EECR Cycle which exceeds ten (10) percent of the EECR Recoverable Costs determined for the EECR Cycle included in the most recently filed rate redetermination under this Rider EECR, then either the Commission General Staff or the Company may propose an interim revision to the then currently effective EECR Rate(s).

TRACKING AND MONITORING PROGRAM COSTS AND BENEFITS

The Company shall develop and implement appropriate accounting procedures, subject to the review of the Commission General Staff, which provide for separate tracking, accounting, and reporting of all program costs incurred by the Company. The procedures shall enable energy efficiency program costs to be readily identified and clearly separated from all other costs. The Company shall secure and retain all documents necessary to verify the validity of the program costs for which it is seeking recovery. Such documents shall include, but not be limited to, vouchers, journal entries, and the date the participant's project was completed.

The Company shall develop and implement appropriate accounting procedures, subject to the review of the Commission General Staff, which provide for separate tracking, accounting, and reporting of

revenues collected through the Rider EECR. The procedures shall enable the EECR revenues to be readily identified and clearly separated from all other revenues. The Company shall secure and retain all documents necessary to verify the accuracy of the EECR revenues. Such documents shall include, but not be limited to, billing determinants, journal entries, and summary revenue reports.

For the purpose of assessing the benefits and effectiveness of the programs, the Company shall develop and implement appropriate procedures, subject to the review of the Commission General Staff, which provide for separate tracking of the benefits and the effectiveness of the programs. The data that shall be tracked shall include, but shall not be limited to, information that will enable the Commission to assess the effectiveness of the programs. The Company shall secure and retain all documents necessary to verify its assessments.

TRACKING AND MONITORING LCFC AND INCENTIVE

The Company shall track and monitor LCFC and Incentives in accordance with Order Nos. 14 and 15, respectively, issued in Docket No. 08-137-U and in future Orders addressing LCFC and Incentives.

TERM

This Rider EECR shall remain in effect until modified or terminated in accordance with the provisions of the Rider EECR or applicable regulations or laws.

If this Rider EECR is terminated by a future order of the Commission, the EECR Rate(s) then in effect shall continue to be applied until the Commission approves an alternative mechanism by which the Company can recover its energy efficiency costs. At that time, any cumulative over-recovery or under-recovery resulting from application of the just terminated EECR Rate(s) shall be applied to customer billings over the twelve (12) month billing period beginning on the first billing cycle of the second month following the termination of Rider EECR in a manner prescribed by the Commission.

Part III. Rate Schedule No. 46		
Title: FEDERAL LITIGATION CONSULTING FEE RIDER		PSC File Mark Only

1. PURPOSE

The Federal Litigation Consulting Fee Rider defines the procedures by which the Federal Litigation Consulting Fee Rate shall be determined. The Federal Litigation Consulting Fee Rate shall recover the fees and expenses paid by Southwestern Electric Power Company ("Company") to contract attorneys and consultants retained by the Arkansas Public Service Commission (Commission), as authorized by the General Assembly, when it participates in litigation before a federal agency or federal court in proceedings which affect the Company. See Ark. Code Ann. §23-4-102.

2. APPLICATION

The Federal Litigation Consulting Fee Rate is applicable to all electric service billed under the rate schedules designated in Attachment A to this Rider. The Net Monthly Rates of the Company's currently effective rate schedules will be adjusted by the Federal Litigation Consulting Fee Rate amount set forth in Attachment A to this Rider, which shall apply during the period indicated thereon. The Federal Litigation Consulting Fee Rate amounts shall be revised pursuant to the procedures described in Section 6 below.

3. BILL REVIEW AND PAYMENT

When involved in federal litigation, bills for litigation consulting fees and expenses shall be submitted by the contracting attorney(s) and/or consultant(s) to the Commission on a monthly basis. After review and approval by the Commission, the Commission will forward the bills for the approved fees and expenses to the Company Designees listed in Section 4 below. The maximum amount that may be directly recovered shall not exceed $3,000,000 annually.

The Company shall remit payment for the Federal Litigation Consulting Fees directly to the contracting party within thirty (30) days of the bill's receipt by the Company. A record of the payments will be maintained in an appropriate, separate account.

4. COMPANY DESIGNEES

Lynn Ferry-Nelson
Director Regulatory Services
SWEPCO
P.O. Box 21106
Shreveport, La 71156

Elizabeth Stephens
Regulatory Consultant
SWEPCO
P.O. Box 21106
Shreveport, LA 71156

5. ANNUAL RATE REVISIONS

5.1 Annual Filing Requirements
On or before February 15 of any year following a calendar year in which Federal Litigation Consulting Fees are paid, the Company may file for recovery of the Federal Litigation Consulting Fees. The Federal Litigation Consulting Fees Rate shall be calculated annually in accordance with the provisions of Paragraph 6.1 and filed for approval with the Commission.

Once a docket is established, annual revisions shall be filed in the same docket each year thereafter. Each Federal Litigation Consulting Fee rate filing shall be accompanied by a set of workpapers sufficient to fully document the timely payment of the third party contract fees and expenses, the accounting treatment for such payments, and the calculation of the rate.

6. CALCULATION AND RECOVERY PROCEDURES

6.1 Federal Litigation Consulting Fee Rate Calculation

The Federal Litigation Consulting Fee rate shall include the Commission-approved contract fees and expenses paid in the preceding calendar year. The rate shall not include any interest or carrying charges. The Federal Litigation Consulting Fee rate shall be determined by dividing the federal litigation consulting fees and expenses paid by the projected energy sales for the twelve-month period commencing on April 1 of each year. This rate shall also include a true-up adjustment reflecting the over-recovery or under-recovery of the federal litigation consulting fees for the preceding calendar year.

The Federal Litigation Consulting Fee rate so determined shall be effective, after Commission approval, for bills rendered on and after the first billing cycle of April of the filing year and shall then remain in effect until the last billing cycle of March of the following year, or other billing period as approved by the Commission.

Should there be unusual circumstances either the Company or the Staff may propose to modify the above calculation.

6.2 <u>Federal Litigation Consulting Fee Rate Recovery</u>
The Federal Litigation Consulting Fee rate, once approved by the Commission, shall be applied to each customer's monthly billing energy (kWh). The rate shall be constant across all customer classes and applied to the currently effective rate schedules. The Federal Litigation Consulting Fee Rate shall be set forth in Attachment A to this Rider and shall be filed with the utilities' tariffs.

6.3 <u>Federal Litigation Consulting Fee Rate True-up</u>
At the time of the annual filing, the actual recovery of Federal Litigation Consulting Fees will be compared to the projected recovery for the preceding calendar year. Any net over-recovery or under-recovery of the Federal Litigation Consulting Fees shall be included in setting the Federal Litigation Consulting Fee rate for the next recovery period.

Southwestern Electric Power Company
Federal Litigation Consulting Fee Rate
ATTACHMENT A

The Net Monthly rates for all customers shall be adjusted by the following amount for recovery of the Federal Litigation Consulting Fee from the first billing cycle of (month) 20XX through the last billing cycle of (month) 20XX.

$x.xxxxxx per kWh

Applicable Rate Schedules

Residential Service,
Residential, Electric Heating Appliance Residential Service,
General Service,
Lighting & Power Service – Secondary,
Lighting & Power Service – Primary,
Lighting & Power TOU – Primary,
Lighting & Power TOU – Secondary;
Large Lighting & Power – Primary,
Large Lighting & Power – Transmission,
Pulp and Paper Mill – Transmission
Supplemental, Backup, Maintenance, and As-Available Standby Power Service
Municipal Pumping Service,
Municipal Service;
Municipal Street & Parkway Lighting,
Public Street & Highway Lighting,
Private Lighting,
Area Lighting,
Recreational Lighting.

The Federal Litigation Consulting Fee Rider shall apply to all kilowatt-hours billed during each monthly billing cycle. For electric service billed under applicable rate schedules for which there is no metering, the Company shall estimate the monthly kWh usage and the Federal Litigation Consulting Fee Rider shall be applied.

Title: FORMULA RATE REVIEW (FRR) RIDER			PSC File Mark Only

REGULATORY AUTHORITY

The Arkansas General Assembly has delegated authority to the Arkansas Public Service Commission ("APSC" or the "Commission") to regulate public utilities in the State of Arkansas, including Southwestern Electric Power Company ("SWEPCO" or the "Company"). The Arkansas General Assembly has enacted the Formula Rate Review Act, Ark. Code Ann. §§ 23-4-1201 *et seq.*, which authorizes use of this Formula Rate Review ("FRR") Rider.

PURPOSE

The FRR defines the procedure by which all rates and applicable riders (Rate Schedules) on file with the APSC, except those excluded in Attachment A.1 to this FRR, may be periodically adjusted. The FRR shall apply to all electric service billed under the Rate Schedules, whether metered or unmetered.

DEFINITIONS

EFFECTIVE DATE -

Rates pursuant to the initial FRR shall become effective with the first billing cycle of October 2021 and subsequently adjusted FRR rates shall be effective with the first billing cycle of each successive projected year.

FORMULA RATE REVIEW TEST PERIOD -

The Formula Rate Review Test Period shall be a test period based upon a Historical Year. A Historical Year shall be the twelve (12) month period ending December 31 of the year preceding the filing of an Evaluation Report.

ARKANSAS PUBLIC SERVICE COMMISSION

Original	Sheet No. R-50.2	Sheet 2 of 23 Including Attachments	
Replacing:	Sheet No.		
Name of Company SOUTHWESTERN ELECTRIC POWER COMPANY			
Kind of Service: Electric	Class of Service: All		
Part III. Rate Schedule No. 50			
Title: FORMULA RATE REVIEW (FRR) RIDER			PSC File Mark Only

ANNUAL FILING AND REVIEW

ANNUAL FILING

On or about April 1, 2021 and on or about April 1 of each subsequent year during the term of the FRR, SWEPCO shall file a report ("Evaluation Report") with the Commission containing an evaluation of the Company's earnings pursuant to the FRR for the Historical Year. Attachment A-1 shall be included in each such filing and shall contain the Company's proposed Rate Adjustment. The Evaluation Report and the Rate Adjustment shall be filed pursuant to the FRR.

REVIEW PERIOD

The Parties shall file a statement of error(s) or objection(s) and supporting Testimony with or without Exhibits at least 90 days before the date on which the Rate Adjustment becomes effective. The Company shall have fifteen (15) days to review the statement of error(s) or objection(s), to work with the Parties to resolve any differences, and to address the error(s) and objection(s) raised by the Parties by filing either a corrected Attachment A.1 or Rebuttal Testimony with or without Exhibits.

HEARING AND APPROVAL OF RATE ADJUSTMENT

Following a hearing at least fifty (50) days before the date on which the Rate Adjustment shall become effective, unless waived by SWEPCO and the Parties, the Commission shall issue a final order in which it resolves any issues in dispute and approves the Rate Adjustment at least twenty (20) days before the date on which the Rate Adjustment shall become effective. If a final order is not issued by such date, the initially filed or revised Rate Adjustment shall become effective for bills rendered on and after the first billing cycle of October, subject to refund, and shall remain in effect until changed by final order of the Commission or by operation of other provisions of this FRR.

If the Commission's final ruling on any disputed issues requires changes to the Rate Adjustment, the Company shall file a revised Attachment A-1 containing such further modified Rate Adjustment within five (5) days after receiving the Commission's order resolving the disputed issues. The Parties shall have three (3) days to review the revised Attachment A-1. The revised Attachment A-1 shall be implemented as ordered by the Commission.

FRR BANDWIDTH CALCULATION

The Total FRR revenue level shall be adjusted in the FRR review mechanism based on a comparison of the ERR to the TRR calculated using the following formula:

A. If the ERR is less than the TRR minus five-tenths percent (0.50%), the Total FRR Revenue level shall be increased by the amount necessary to increase the ERR to the TRR.

B. If the ERR is greater than the TRR plus five-tenths percent (0.50%), the Total FRR Revenue level shall be decreased by the amount necessary to decrease the ERR to the TRR.

C. There shall be no change to the FRR Revenue level if the ERR is less than or equal to the TRR plus five-tenths percent (0.50%), and greater than or equal to the TRR minus five-tenths percent (0.50%).

FRR REVENUE ALLOCATION

The total change in the formula rate revenue level shall be allocated to each applicable rate class based on an equal percentage of the base rate revenue used in the development of rates approved by the Commission in Docket No. 19-008-U. The total amount of such revenue increase or decrease for each rate class shall not exceed four percent (4%) of the revenue for each rate class for the Filing Year.

TERM

The initial term of the FRR rider shall not exceed five (5) years from the date of the Commission's final order in Docket No. 19-008-U. If SWEPCO requests an extension of the FRR rider, SWEPCO shall make such request in accordance with the Extension of Term provisions of the Formula Rate Protocols.

If the FRR is not extended, the then-existing Total FRR rates shall continue to be in effect until new base rates are duly approved and implemented.

B-3	Operating Income
B-4	Income Tax
B-5	Benchmark Rate of Return on Rate Base ("BRORB"). The BRORB is the composite weighted, embedded cost of capital reflecting SWEPCO's annual costs of long-term debt, preferred stock, common equity, and other capital components as of the Test Year end.
B-6	Revenue Redetermination Formula using the Rate of Return on Common Equity Bandwidth which is an Upper Bandwidth limit equal to the Target Return Rate (TRR) plus 0.5% (50 basis points) and a Lower Bandwidth limit equal to the TRR minus 0.5% (50 basis points). The TRR is the Company's cost rate for common equity as established by the Commission in Docket No. 19-008-U.
C	FRR Plan Adjustments
D	FRR Filing Requirements and description of the supporting documents to be included with the annual Evaluation Report.
E	Formula Rate Review Protocols which include the FRR general provisions and filing requirements for the annual Evaluation Report.

SOUTHWESTERN ELECTRIC POWER COMPANY
FORMULA RATE REVIEW
RATE ADJUSTMENT

All retail base rates and applicable riders on file with the APSC will be increased or decreased by a percentage of base revenues listed below, except those specifically excluded below:

Rate Class	FRR Rate (%)
Residential	XX.XXXX%
Commercial / Small Industrial	XX.XXXX%
Large Industrial	XX.XXXX%
Municipal	XX.XXXX%
Lighting	XX.XXXX%

Excluded Schedules: Energy Cost Recovery Rider (ECR)
Energy Efficiency Cost Recovery Rider (EECR)
Distribution Reliability Rider (DR Rider)

Docket No. 19-008-U
Order No. XX
Effective: XX/XX/201X
Rate Schedule No. 50

Attachment A-2

SOUTHWESTERN ELECTRIC POWER COMPANY

14	Annualized Filing Year FRR Rider Revenue [4]	$	$	$	$	$	$
15	Cumulative Total FRR Rider Revenue (L13 + L14)	$	$	$	$	$	$
16	**Rider FRR Rate Development Calculation [5]**						
17	Adjusted Historical Base Rate Revenue (B-3, L 2)	$	$	$	$	$	$
18	FRR Rate Change (L15 ÷ L17)	%	%	%	%	%	%

NOTES:

[1] The FRR constraint calculation determines the limit of the FRR revenue increase/decrease per rate class, which shall not exceed four percent (4%) of Total Unadjusted Annualized Revenues.

[2] The Net Change in Required FRR Revenue Calculation takes the Total Historical Year Rate Change in Rider FRR Revenue (B-6, L10) and allocates the amount to each rate class based on the class allocation approved by the Commission in Docket No. 19-008-U listed on line 2.

[3] The Cumulative Rider FRR revenue calculation adjusts the required Rider FRR revenue determined on Line 10 to be within the limits of the Rider FRR constraint calculation and adds the Annualized Filing Year FRR Rider Revenue to calculate the Cumulative Total FRR Rider Revenue.

[4] The Annualized Filing Year FRR Rider Revenue in the initial Filing Year of 20XX will be zero ($0). In subsequent Filing Years, the Annualized Filing Year FRR Revenue shall reflect the annualized effect using the historical test year billing data of the FRR Rate Adjustment in effect at the end of the test year under this FRR Rider.

[5] The Rider FRR Rate Development Calculation determines the percent increase/decrease that will be applied to all base rate components. The Adjusted Historical Year Base Rate Revenue is calculated using the Retail Rate Schedule Revenue (B-3, L2) excluding Historical Year FRR Revenue and any revenue pursuant to excluded schedules on Attachment A-1. The percent increase/decrease is calculated by taking the Cumulative Total FRR Rider Revenue (L15) and dividing it by the Adjusted Historical Year Base Rate Revenue (L17).

NOTES:

[1] The capital balances for Long-Term Debt, Capital Leases, Preferred Stock, Common Equity, and ADIT shall be Test Year Ending balances consistent with Commission Order in Docket No. 19-008-U. Short-Term Debt balances and CAOL balances shall be based on the 13-month averages ending as of the Test Year end and include all accounts consistent with those ordered by the Commission in Docket No. 19-008-U. All other capital components including customer deposits shall be determined as of the Test Year end. Support for the 13 month average Short-Term debt shall be provided. Support for the CAOL balances shall include the same format and detail as required by the Filing Requirements in Attachment E, Item No. 15. A Test Year ending balance sheet should be provided as well as a reconciliation between the balance sheet and Column (2) amounts.

[2] Capital amounts each divided by the Total Capital Amount.

[3] The cost rates shall be calculated in accordance with the calculation applied by the Commission in Docket No.19-008-U. Support for the cost of Long-Term Debt and cost of Preferred Stock shall be provided in the same format and level of detail required by the Filing Requirements, respectively. Support for the Short-Term debt cost rate should include a general description of how the interest rae is determined and the same level of detail provided in the Filing Requirements in Attachment E, Item No. 15. The cost rate for Customer Deposits shall be the Commission-approved rate in effect during the year. The cost rate for Common Equity shall be that approved by Commission Order In Docket No. 19-008-U.

[4] The components in Column (5) are the corresponding Cost Rates multiplied by the associated Capital Ratio.

5	ROE Adjustment	If L1 < L4, then L2 - L1; If L1 > L3, then L2 - L1, but no adjustment if L1 ≥ L4 or L1 ≤ L3	%

SECTION 2

ROE BANDWIDTH RATE ADJUSTMENT

	DESCRIPTION	REFERENCE	
6	ROE Adjustment	per Line 5	%
7	Common Equity Capital Ratio	B-5, L 3, Col. 3	%
8	Retail Rate Base	B-1, L 1, Col. 3	$
9	Revenue Conversion Factor	B-1, L 6, Col. 3	#
10	Total Rate Change in FRR Revenue	L6 * L7 * L8 * L9	$

Notes:

[1] The ERR is the Earned Rate of Return on Common Equity calculated by dividing the weighted earned common equity rate by the common equity ratio percentage.

[2] The TRR is SWEPCO's cost rate for common equity as established by the Commission in Docket No. 19-008-U.

Attachment C
Southwestern Electric Power Company
FORMULA RATE REVIEW ADJUSTMENTS

The actual (per book) data for each Test Year reflected in Attachment B shall be adjusted to reflect the following specific ratemaking adjustments to rate base, operating income, and rate of return:

I. General

A) SWEPCO shall not record a regulatory asset or a regulatory liability representing the amount by which an FRR increase or decrease absent the operation of the 4 percent cap exceeds the actual FRR increase or decrease that is implemented pursuant to the operation of this tariff.

B) During the term of the FRR the Lost Contribution to Fixed Costs portion of the Company's Energy Efficiency Rider shall be set to zero after any true-ups, if needed, for timing purposes.

C) If not specifically mentioned in this Attachment C, revenues, expenses, cost of capital components and any other cost effects shall be treated in the same manner as in Docket No. 19-008-U.

D) Rate base amounts for the Test Year shall exclude construction work in progress (CWIP), Non-Utility Plant, and Plant Held for Future Use.

E) The Arkansas Jurisdictional Revenue Requirement will be determined by running the total company historical costs through the approved Cost of Service model from Docket 19-008-U. The Company will provide a fully-functioning cost of service model able to replicate the Company's determination of the jurisdictional revenue requirement, containing links to the supporting accounting schedules which contains the level of detail (e.g., subaccounts or detailed plant information) commensurate with the detail required by the cost of service model.

F) Plant additions requiring either CECPN or CCN approvals (generation and transmission plant) in any SWEPCO jurisdiction shall be included in this FRR, but related revenues recovered under this FRR shall be subject to refund pending a prudence review in the next general rate case, if the prudence determination doesn't occur during the FRR review. All other plant additions shall be deemed prudent once included in this FRR.

II. Cost of Service Ratemaking Adjustments

A. Rate Base

1. Use Test Year-end balances for Electric Plant In Service (EPIS) and Accumulated Depreciation on a total company basis excluding the Turk Generation Power Station and related Generator Step-up Transformers.

2. Use 13-month averages ending December 31 of the Test Year for working capital assets, excluding amounts (e.g., non-jurisdictional) and accounts consistent with Docket No. 19-008-U.

3. Restate balances of accumulated depreciation (and related depreciation ADIT) using existing Arkansas depreciation rates in effect when the depreciation expense was incurred.. During an annual FRR filing,

a utility may request an interim rate for plant added which has no approved depreciation rate, excluding major plant acquisitions. Depreciation rates for major plant acquisitions must be requested within the docket requesting approval of the purchase.

4. Remove from Test Year Rate Base all non-Arkansas jurisdictional, non-utility amounts and other items consistent with Docket No. 19-008-U.

5. Include AFUDC adjustment to EPIS, accumulated depreciation and ADIT computed consistent with Docket No. 19-008-U including Arkansas' approved return on common equity and the FERC AFUDC formula.

6. Eliminate rate base effects associated with any riders other than this FRR Rider that SWEPCO may have in effect during the test year that recover specific costs.

B. Operating Income

1. The Test Year shall reflect actual revenues. No adjustments for rate annualization, growth or weather shall be included.

2. The revenue and expense effects associated with any riders other than this Rider FRR that SWEPCO may have in effect during the test year that recover specific costs are to be eliminated.

3. Include other revenues consistent with the methodology utilized in Docket No. 19-008-U.

4. Do not annualize or normalize test year revenues or expenses, except for depreciation expense which shall be restated using approved depreciation rates and changes in EPIS.

5. Include credit line fees in operating expenses that are not included in cost of debt or recovered elsewhere in the cost of service.

6. Specifically assign jurisdictional other taxes in same manner as SWEPCO filed its revenue requirement as in Docket No. 19-008-U.

7. Exclude other costs not recognized for ratemaking, including, but not limited to, the Turk Generation Power Station, charitable contributions, lobbying expenses, fines and penalties, and disallowances consistent with Docket No. 19-008-U.

8. Adjust federal and state income expense, and deferred tax expense, for the following:
   i. All Historical Year interest expenses shall be eliminated and replaced with an imputed interest expense amount equal to the rate base multiplied by the weighted embedded cost of debt;
   ii. Effects associated with other adjustments set out in this Attachment C shall similarly and consistently be adjusted;
   iii. The corporate state and federal income tax laws legally in effect at test year end shall be reflected in the calculation of all income tax amounts; and any changes in the statutory federal income tax rate will be treated as a direct flowthrough item in the year the new tax rate is effective as long as the flowthrough complies with normalization rules; and,
   iv. Tax effects normally excluded in prior Commission Orders regarding SWEPCO for ratemaking purposes shall be eliminated.

C. Benchmark Rate of Return on Rate Base

1. Short-term Debt shall be included consistent with Docket No. 19-008-U.

2. All Long-Term Debt issues as of the Test Year end, including current maturities, shall reflect the balance net of a) unamortized debt discount, premium, and issuance expense and b) the gains or losses on reacquired debt should be included as a component of total net outstanding Long-Term, consistent with Docket No. 19-008-U.

3. All Preferred Stock issues as of the Test Year end shall reflect the balance net of discount, premium and capital stock expense, consistent with Docket No. 19-008-U.

4. Accumulated Deferred Income Taxes (ADIT) will be treated as zero-cost capital reflecting balances at Test Year-End. ADIT shall include all accounts consistent with those approved in Docket No. 19-008-U. Any associated excess ADIT recorded in the Company's Regulatory Assets/Liabilities receives the same ADIT treatment consistent with Docket No. 19-008-U.

5. CAOL shall be based on the 13-month averages ending as of the Test Year end, and include all accounts consistent with those ordered by the Commission in Docket No. 19-008-U.

6. All other capital components including customer deposits shall be determined as of the Test Year end.

7. The cost rates to be applied for Long-Term Debt and Preferred Equity shall be determined as of the Test Year end. The Long-Term Debt cost rates shall include the a) annual amortization of debt discount premium and expenses; and b) annual gain or loss on reacquired debt.

8. The cost rate to be applied for Common Equity shall be the authorized Rate of Return on Common Equity approved by the Commission in Docket No. 19-008-U.

9. The cost rates for ADIT and CAOL will be zero.

10. The cost rates for other capital items including customer deposits, short-term debt and other capital components will be determined as of the Test Year end and calculated in a consistent manner with Docket No. 19-008-U.

Attachment D

SOUTHWESTERN ELECTRIC POWER COMPANY
FORMULA RATE REVIEW
FILING REQUIREMENTS

Item No.	Filing Requirements
1	SWEPCO shall file all FRR Attachments supporting the Test Year. For the initial FRR application, SWEPCO shall provide the FERC FORM Number 1 for the test year and the four preceding years. The FERC FORM Number 1 for the test year will be provided when filed at the FERC.
The following information shall be provided to the Parties:	
2	In support of the Test Year FRR schedules, the Company will provide a fully-functioning cost of service model as approved by the Commission in Docket 19-008-U. The Cost of Service model should be able to replicate the Company's determination of the jurisdictional revenue requirement, containing links to the supporitng accounting schedules which contains the level of detail (e.g., subaccounts or detailed plant information) commensurate with the detail required by the cost of service model. Total company amounts shall be reconciled to the Trial Balances provided in item 3.
3	Monthly Trial Balances by detail general ledger subaccount number for the Test Year.
4	Identify all construction projects or purchases that closed to plant during the Test Year greater than $1 million on a total basis. Include the project number, project description, start date, completion date, date closed to plant, cost to complete, and plant accounts where it was closed. Provide the costs, including the AFUDC calculation, included in the five (5) largest projects completed during the year.
5	Rules of Practice and Procedure, Appendix 8-1 Minimum Filing Requirements (MFR) Schedules, as modified for the Test Year, B-1, B-2, B-4, B-5, B-10, C-2, C-4, C-5, C-8, C-9, C-10, C-11, C-12, D-2, D-3, D-5, D-6.1, D-6.2, D-6.3, D-7, F-1, G-1, G-2, G-3 and G-4, including the supporting cost of service study (Jurisdictional Only). For the F-1 Schedule, provide a reconciliation to Schedule B-1 and the plant amounts in the monthly trial balance (item 3 above).
6	Detailed chart of accounts, including subaccounts and detailed description (i.e. MFR E-9). List of project codes, activity codes, resource codes and detailed description for each.
7	Web access to SWEPCO's general ledger for the Test Year including capablility to view supporting invoices.
8	For the Test Year, by rate class and rate schedule, provide a monthly statement showing customer count, kWh, coincident and non-coincident kW demands, base rate revenues, and rider revenues.
9	For the 12 month's prior to the Test Year, provide actual revenues by rate class.
10	SWEPCO/AEPSC internal and external audit reports for the Test Year and any proposed auditor's adjustments to be filed confidentially.
11	The most recently filed State and Federal Income Tax Returns for SWEPCO and AEP to be filed confidentially. Also provide any return that becomes available during the discovery period related to the Test Year.

Attachment E

FORMULA RATE REVIEW PROTOCOLS
Section I. General Provisions

1. Applicability and Scope

A. The following protocols shall apply to the annual Evaluation Report filings made pursuant to the Formula Rate Review (FRR) Rider approved by the Commission in Docket No. 19-008-U.

B. The Rules of Practice and Procedure (RPPs) shall apply to all annual Evaluation Report filings, except the following for which the Commission has granted an exemption by approving the FRR:

Rule 3.08;
Rule 4.02 (a)(2)(A);
Rule 4.02 (a)(3);
Rule 4.02 (a)(4);
Rule 4.03 (c);
Rule 4.04 (a)(2);
Rule 4.10 (a)(2) & (3); and
Rule 5.05(b), (c), & (d).

C. Any proposed modification of the FRR Rider, including these protocols, is outside the scope of an annual Evaluation Report filing and as such, no Party shall seek to modify the FRR Tariff, including these protocols, as part of any annual Evaluation Report filing. Proposed modifications to the FRR Tariff, including these protocols, shall be brought in a separate docket.

D. The filing of an annual Evaluation Report is a Formal Application. The filings of an annual Evaluation Report are not to be construed as a General Rate Change Application, nor are adjustments to rates that result from the filings of an annual Evaluation Report to be construed as a general change in rates pursuant to any provision of the Arkansas Code that references a general change in rates.

E. The Commission may grant an exemption from compliance with these Protocols if the exemption is found to be in the public interest and for good cause shown.

2. Public Notice

A. At least thirty (30) days prior to filing an annual Evaluation Report, SWEPCO shall give public notice of its intent to file.

B. The notice shall indicate that it is from SWEPCO and shall include: the docket number, if known; the date on or about which the annual Evaluation Report is to be filed; the effective date of FRR rates; reference to the RPPs and these protocols for persons interested in intervening, making a limited appearance, or submitting public comments in writing or orally at the hearing; deadlines for intervention as provided herein; the name, address, phone number and email address of the Secretary of the Commission and the URL address of the Commission website; and that further information may be obtained by contacting the Secretary of the Commission or viewing the Commission's website.

C. Public notice shall be given by any method including but not limited to: bill notation, direct mail, email exploder list, publication on SWEPCO's website, through social media, or publication in a newspaper of general circulation in SWEPCO's service area.

D. An annual Evaluation Report filing shall include a declaration that these notice provisions have been complied with.

3. Intervention

A. A Petition to Intervene shall be filed within ten (10) calendar days from the date the annual Evaluation Report is filed.

B. Any Party desiring to file a Response to a Petition to Intervene shall file the Response within five (5) calendar days of the filing of the Petition. No additional responses or replies shall be permitted unless specifically authorized by the Commission.

C. The Commission shall rule on the Petition to Interveners within seven (7) calendar days from the date the Petition is filed. If the Commission does not rule within that time frame, the Petition to Intervene shall be deemed denied.

4. Discovery

A. Time Within Which to Respond or Object

1. The Party upon whom discovery is sought shall serve a written response or objection within ten (10) calendar days after service of the discovery. Responses or objections to requests for admission shall be served within ten (10) calendar days of service of the requests. The Commission may prescribe a shorter or longer time. Any objections shall state the specific reasons for such objection.

2. If the response to the discovery request contains protected information for which no Protective Order has been issued, the responsive Party shall apply for a Protective Order as soon as reasonably practicable after receipt of the discovery request so as to avoid any delays in responding to discovery, and to the greatest extent practicable no later than five (5) calendar days after receipt of the discovery request. SWEPCO shall respond to the discovery request on the next business day after the Protective Order is issued or on the date the discovery response is due.

B. Discovery Initiation

Unless otherwise ordered, a Party may initiate discovery at any time after filling of an annual Evaluation Report so long as responses or objections and depositions shall be completed at least sixty (60) days before the date on which rates determined by the formula rate review mechanism will go into effect for each year or ten (10) days before a hearing on the merits, whichever is earlier.

C. Service and Format

1. Service shall be made by electronic mail, facsimile transmission, hand delivery, or overnight delivery service unless unusual circumstances otherwise justify delivery by another method and the Parties agree to the method chosen.

2. Attachments to documents shall be provided in native electronic format, with formulae and viable links intact.

3. Any discovery document served electronically or by facsimile after Commission Business Hours but before midnight or received on a non-business day shall be deemed served on Persons on the Official Service List with electronic mail on the next business day. Any discovery document served electronically or by facsimile between midnight and the beginning of Commission Business Hours on a business day shall be deemed served on Persons on the Official Service List on that business day. Any discovery document served by hand delivery or overnight delivery service shall be deemed served pursuant to Rule 3.07 of the RPPs.

D. Computation of Time for Performance or Response

In computing the time within which an act must be performed or a response made, the Day of the act from which the designated period of time begins to run shall not be included and the last Day shall be included unless it is a Saturday, Sunday, Legal Holiday, or other Day in which the Commission's office is closed, in which event the period shall extend to the next business Day. Service by mail or commercial delivery service is prohibited; therefore no additional response time as contemplated by the RPPs is necessary.

5. General Filing Matters

A. Beginning with the initial annual Evaluation Report filing after the FRR is approved by the Commission in Docket No. 19-008-U, a separate docket shall be established by the Secretary of the Commission for the annual Evaluation Report filings with an "FR" docket designation.

B. The initial and all subsequent annual Evaluation Reports filed in the "FR" docket. SWEPCO shall submit the annual Evaluation Report with a Commission-approved tariff Docket Summary Cover Sheet. In addition to any other information required by the coversheet, SWEPCO shall reference Docket No. 19-008-U.

C. Stipulations or Settlements

1. Parties shall propose by written motion that the Commission adopt stipulations or settlements. Such motion shall be filed, along with supporting testimony, no later than seven (7) calendar days prior to the hearing scheduled in the annual Evaluation Report filing. If the seventh day falls on a weekend or state holiday such settlement agreement and supporting testimony shall be filed on the last business day prior to the seventh day. The motion shall set forth the factual, legal, policy, and other consideration which form the basis for the Parties' recommendation that the stipulation or agreement be adopted, and shall be supported by written testimony.

2. A Party not joining a proposed stipulation or settlement may file a response no later than five (5) calendar days prior to the scheduled date of the hearing.

3. Such a response shall set forth the factual, legal, policy, and other consideration which form the basis for the Party's opposition to the proposed stipulation or settlement or portions thereof.

Section II. Filing Requirements

1. Testimony and Exhibits

A. Testimony with or without Exhibits shall be filed simultaneously with the annual Evaluation Report and address, at a minimum:

1. A description of the filed schedules and all of the adjustments proposed;

2. A description of any significant cost drivers;

3. A description of any changes in accounting policies, practices, and procedures if they affect inputs to the FRR or the rate redetermination to be made under the FRR; and

4. A narrative explanation of the rate impact.

2. Workpapers and Supporting Documentation

A. The annual Evaluation Report and any revisions thereto shall include:

1. Data-populated schedules including fully functioning EXCEL spreadsheet with all formulas and links intact, showing all calculations in the annual Evaluation Report;

2. Sufficient information to enable the Parties to replicate the calculation of the formula results from the applicable schedules; and

3. Documentation fully supporting all calculations and adjustments.

B. Workpapers shall be provided to the Parties simultaneously with the filing of the annual Evaluation Report and any revisions thereto, and shall include:

1. All supporting calculations and documents that explain the calculations in the annual Evaluation Report;

2. Both references to and support from detailed source information; and

3. A complete description of any statistical model used, the data used, and the results of the analysis if not addressed in testimony or exhibits.

C. With respect to any change in accounting that affects inputs to the FRR or the resulting rate redetermination to be billed under the FRR, SWEPCO shall identify and provide narrative explanation of the individual impact of such changes on rate redetermination to be billed under the FRR including:

1. The initial implementation of an accounting standard or policy;

2. The initial implementation of accounting practices for unusual or unconventional items where the Commission has not provided specific accounting direction;

3. Correction of errors and prior period adjustments that impact the FRR;

4. The implementation of new estimation methods or policies that change prior estimates; and

5. Changes to income tax elections.

D. SWEPCO shall identify any reorganization or merger transaction and explain the effect of the accounting for such transaction(s) on the inputs to the FRR or the resulting rate determination to be billed under the FRR.

3. Waiver of Requirements

SWEPCO may omit specific items of information from the annual Evaluation Report filing only with prior Commission approval.

4. Filing Deficiencies

A. The Arkansas Public Service Commission General Staff ("Staff") may review each annual Evaluation Report filing to ascertain whether it complies with the provisions of these Filing Requirements and the FRR, including the provisions of all of the Attachments thereto.

B. If Staff determines that any deficiencies exist, Staff shall file a notice detailing the deficiencies within seven (7) calendar days from the date the annual Evaluation Report is filed.

C. SWEPCO shall correct the deficiencies, within seven (7) calendar days of filing of the notification of deficiency, or upon objection being filed by SWEPCO within that timeframe; the Commission may set a longer period as may be reasonable.

D. Staff shall review corrections made by SWEPCO to determine compliance with all information required by the Filing Requirements and the FRR, including the provisions of all of the Attachments thereto.

E. No more than three (3) business days from the filing of corrections, Staff may file a (1) statement of compliance or (2) a second notice of deficiencies, listing each requirement not met and a brief explanation in support.

F. The Commission shall resolve any dispute as to deficiencies within seven (7) calendar days of the filing of the second notice of deficiencies by either accepting the corrections made by SWEPCO or by directing additional corrections to be filed by SWEPCO.

5. Dispute Procedures

A. Any Party filing with the Commission a statement of errors or objections to the Evaluation Report shall file Testimony with or without Exhibits simultaneously with the statement of errors or objections and the filing shall:

1. Clearly identify and explain the error in or objection to the annual Evaluation Report;

2. Make a good faith effort to quantify the financial impact of the error or objection;

3. State specifically any proposed changes to the annual Evaluation Report that the Party recommends; and

4. Include all documents and workpapers that support the calculation of the error or the facts supporting the objection.

B. SWEPCO shall file a corrected FRR rate or Rebuttal Testimony with or without Exhibits to the errors and objections raised by the Parties.

6. Extension of Term

A. If SWEPCO requests an extension of the initial term of the FRR, SWEPCO shall include such request as part of its fourth annual Evaluation Report filing.

B. SWEPCO shall provide a class cost of service study for historical year-end 2023.

C. The Commission shall enter a decision on SWEPCO's request no later than 30 days after SWEPCO's request for an extension of the term.

ARKANSAS PUBLIC SERVICE COMMISSION

Original	Sheet No. R-51.1 Sheet 1 of 1	
Replacing:	Sheet No.	
Name of Company SOUTHWESTERN ELECTRIC POWER COMPANY		
Kind of Service: Electric	Class of Service: As Applicable	
Part III. Rate Schedule No. 51		
Title: DISTRIBUTION RELIABILITY RIDER (DRR)		PSC File Mark Only

AVAILABILITY

The Distribution Reliability Rider is designed to recover Arkansas costs associated with vegetation management and tree trimming incremental to Arkansas jurisdictional costs recovered in base rates for vegetation management. The Arkansas jurisdictional portion of distribution reliability costs are those that are directly assigned to the Arkansas jurisdiction. The class allocators will be determined using the most recently approved FERC account 593 allocation factors for SWEPCO Arkansas. The Distribution Reliability Rider is applicable to and becomes part of each SWEPCO Arkansas jurisdictional rate schedule. This Rider is applicable to energy consumption of retail customers served at secondary and primary service levels and to facilities, premises and loads of such retail customers.

For service billed under applicable rate schedules for which there is not metering, the monthly kilowatt-hour (kWh) usage shall be estimated by the Company and the Distribution Reliability Factor shall be applied to the estimated kWh usage. The Distribution Reliability billing shall be determined by multiplying the total billing kWh for each applicable customer by the Reliability Surcharge Factor for that customer's class for the current month.

ANNUAL DETERMINATION

The initial period for the DRR Factors shall be the forecasted initial 12 months of distribution reliability costs. A True-up Adjustment shall be calculated and reflected in the following year's DRR factor calculation. The True-up Adjustment shall be defined as the difference between the actual DRR costs for the prior year and the revenue received from the DRR Factors. DRR factors shall be filed by the Company with the Commission and shall be accompanied by a set of workpapers sufficient to fully document the calculations of the DRR Factors including any potential True-up Adjustment.

DISTRIBUTION RELIABILITY FACTORS

Major Rate Class	Factors
Residential - Secondary	\$0.004713 per kWh
Commercial/Small Industrial – Secondary	\$0.003375 per kWh
Commercial/Small Industrial - Primary	\$0.001682 per kWh
Municipal – Secondary	\$0.003379 per kWh
Lighting – Secondary	\$0.004594 per kWh

Part III. Policy Schedule No. 1		
Title: EXTENDED ABSENCE PAYMENT PLAN (General Service Rule 5.11)		PSC File Mark Only

The following options are available to customers to avoid suspension of service during extended absences.

Bills coming due during the customer's absence may be paid in advance. The amount of the advance payment will be based on the customer's average monthly bill for the most recent 12 months. If less than 12 months usage history is available, the advance payment will be based on the number of months of usage history available. If the advance payment is more than the actual bill for service, the overpayment will be credited to the customer's account. If the advance payment is less than the actual bill for service, the balance due will be carried forward each month until the customer returns. Delayed payment agreements will be available for any underpayments.

The customer will be given the opportunity to enroll in the Company's Bank Draft Payment Plan whereby the monthly service bill will be paid automatically through the customer's checking or savings account.

The customer can arrange to have bills coming due during the period of the absence mailed to an alternate address or third party during the absence.

The customer must notify the Company in order to take advantage of any of these extended absence payment plans.

Title: BUDGET PLAN (EQUAL PAYMENT PLAN)		

PSC File Mark Only

A "Budget", or Equal Payment Plan, is available upon request to residential Customers or churches having established satisfactory credit and having a net average monthly billing of $10.00 or more. The purpose of this plan is to provide a means of budgeting or leveling monthly payment amounts on an annual basis to avoid extreme seasonal billing fluctuations. The Equal Payment Plan is not to be used to defer payment of delinquent bills.

Company, by agreement with Customer, may accept payment for electric service in twelve (12) equal monthly payments to approximately equal the anticipated average of the next twelve (12) month billings for service. Monthly payments are determined by dividing annual billings plus a nominal growth factor by twelve. Annual billing is based upon actual history, if available, or from estimated use. Monthly payments are subject to review and quarterly adjustment, if needed, to break even at the end of each twelve (12) month period. Application may be made in person at Company's office or by mail or telephone. After Company accepts an application, Customer must sign an agreement before the plan becomes effective. The Agreement may be canceled by either party upon notice to the other party. If the Customer meets the conditions in GSR 4.02A., the plan may be cancelled. Customer may not apply for Equal Payment Plan more than one time in a twelve (12) month period at the same location. At the end of each twelve (12) month period or in the case of cancellation, the accumulated amount by which Customer's payments are more than or are less than the amount accumulated by monthly billings will be refunded or credited to Customer's account, upon request, or shall become due from Customer as of the date of cancellation or the date of the last bill rendered for the twelve (12) month period.

Title: RETIREMENT PLUS PLAN		PSC File Mark Only

The Retirement Plus Plan is available to qualified residential customers who make application for the Plan. To qualify, the applicant must provide evidence to SWEPCO that he or she is in one of the following categories:

1) Age 62 or above and receiving Social Security, Governmental, Military, or other retirement income;
2) Receiving Aid to Families with Dependent Children (AFDC), or Aid to the Aged, Blind and Disabled (AABD);
3) Persons receiving Supplemental Security Income;
4) Persons whose primary source of income is Social Security or Veterans Administration disability or retirement benefits;
5) Persons receiving disability income; or
6) Persons receiving survivor’s income.

Evidence of any of these can be supplied by providing one or more of the following:

1) Drivers license;
2) Birth certificate;
3) A copy of their check; or
4) A letter or other document to the recipient indicating that payment is being made.

The applicant also must be the SWEPCO customer of record at his or her address.

When a customer is placed on the Plan, his or her monthly electric bill will be due 30 days after the date of the mailing of the bill. This time period is applicable irrespective of contrary wording concerning due dates which may be found elsewhere in these tariffs.

Part III. Policy Schedule No. 4			
Title: AVERAGE MONTHLY PAYMENT PLAN (Levelized Billing)			PSC File Mark Only

An Average Monthly Payment Plan is available upon request to residential customers or churches who do not have past-due accounts. The purpose of this plan is to provide a means of budgeting or leveling monthly payment amounts on an annual basis to avoid extreme seasonal billing fluctuations. The Average Monthly Payment Plan is not to be used to defer payment of delinquent bills.

Company, by agreement with customer, may accept an average payment amount for electric service that is based on the current month's billing, plus the eleven (11) preceding months, divided by twelve (12). At the next billing period, the oldest month's billing history is dropped, the current month's billing is added, and the total is again divided by twelve (12) to find a new average payment amount. In such instances where sufficient billing history is not available, an Average Monthly Payment Plan amount may be established by using an estimated average payment amount. When sufficient billing history (six months) has been attained, the system will automatically compute the new average payment amount based on actual billing history.

The difference between actual billings and the averaged billings under the Average Monthly Payment Plan will be carried in a deferred balance that will accumulate both debit and credit differences for the duration of the Average Monthly Payment Plan year -- twelve (12) consecutive billing months. At the end of the Average Monthly Payment Plan year (anniversary month), the current month's billing, the eleven (11) preceding month's billing, and the net accumulated deferred balance will be summed, and the totals divided by twelve (12) to derive a new average for the new plan year. The deferred balance (debit or credit) is then applied to the billing amount due.

Settlement occurs only when participation in the plan is terminated. Settlement happens if an account is final billed, if the customer requests termination, or if terminated by the Company as a result of past-due amounts on an account. In the case of termination, the accumulated amount by which customer's payments are more than or are less than the amount accumulated by monthly billings will be refunded or credited to customer's account, or shall become due from customer as of the date of termination or the date of the last bill rendered for the twelve (12) month period.

Title: SUMMARY BILLING PROGRAM		PSC File Mark Only

The Summary Billing Program is available upon request to multi-account commercial, industrial and municipal customers with a single monthly statement for all accounts. The Summary Billing Program will be a completely voluntary service.

The commercial, industrial and municipal customers who elect to participate in the Summary Billing Program will be required to sign an agreement for one (1) year, which may be extended by consent of the parties. Either party may cancel the agreement upon thirty (30) days written notice to the other party.

Participants in the Summary Billing Program will receive a single monthly statement which indicates, as line items, the amounts owed for each separate account. The customer will also be provided a separate report which details individual activity.

There will be no charge to the customer for the summary billing service.

Customer summary bill will be due within sixteen (16) days from the date of issuance of the summary bill.

Title: CUSTOMER PAYMENT CENTERS		PSC File Mark Only

The Company has made arrangements with a network of merchants throughout the service territory to accept SWEPCO customers' electric bill payments. The Company has contracted with a vendor to offer this service, and the vendor is responsible for securing, contracting, training, monitoring, auditing, and paying all pay station agents. A list of these authorized pay stations including hours of service, and applicable fees can be found on the Company's website at http://www.swepco.com/account/bills/pay/PayInPerson.aspx. This information can also be obtained by calling 1-888-216-3523 for English or 1-888-216-3505 for Spanish.

Most pay stations charge the customer a fee of $1.50 per transaction, but there are also locations with no fee. The customer must provide either their 11-digit electric account number or a bill stub when making payment and SWEPCO receives immediate electronic notification of the payment.

The Policy Schedule does not modify or supercede any of the provisions of any of SWEPCO's filed and approved rate schedules, in particular, the requirement that the Customer must pay the full amount of the invoice by its due date to avoid penalty remains unchanged. The Company assumes no responsibility for late payments when such payments are received after the due date.

This Policy Schedule is subject to the Standard Terms and Conditions of the Company and the rules of the Arkansas Public Service Commission.

This contract cancels and supersedes previous contract with (name, date, contract number): ________

____

Southwestern Electric Power Company

CONTRACT FOR ELECTRIC SERVICE

Arkansas

Contract Number ____________

____
hereinafter called "Customer", and Southwestern Electric Power Company, hereinafter called "Company", enter into the following contract:

The Company will sell and deliver to the Customer at ____

____
and the Customer will receive and pay for electric service for a period of _____________ years beginning ____, and thereafter, in automatically recurring yearly periods, unless and until terminated at the end of any yearly period by 30 days prior written notice from either party to the other. Electric service will be delivered and received hereunder in accordance with the standard Terms and Conditions which are attached and made a part of this contract, and Customer agrees to observe and be bound by them.

Electric service delivered by the Company to the Customer will be _______________ wire __________________ phase, 60 cycle, alternating current at a nominal voltage of ____________________, in the amount of approximately __________________________ kilowatts, and will be metered at ______________________ volts.

The Customer will use such electric service in the operation of __________________________________ ____ and will be billed and will pay for this service in accordance with the rate schedule attached to this contract and made a part hereof.

The following rate schedule and any special terms are applicable to this contract: _______________ ____ ____ ____

In consideration of the investment on the part of the Company to make electric service available under this contract, the minimum monthly bill will not be less than the charge for _________________________ plus the fuel and tax adjustment clauses provided in the rate schedule.

In the event a new or revised rate schedule applicable to service under this contract is authorized and made effective by the duly constituted regulatory authority or authorities having jurisdiction in the premises, which said rate schedule supersedes or modifies the rate schedule which is attached to this contract, then from and after the date upon which said new or revised rate schedule becomes authorized and effective, electric service to Customer will be billed and Customer will pay for such service in accordance with such new or revised rate schedule.

If Customer fails to perform any of his obligations under this contract, including the prompt payment of monthly bills, or fails to observe or comply with any of the attached Terms and Conditions, the Company may suspend delivery of electric service and will not be liable in any manner for loss or damage arising through such suspension. No such suspension will interfere with the enforcement by the Company of any other legal right or remedy nor relieve the Customer from liability to pay the minimum charge during any suspension. No delay by the Company in enforcing any of its rights hereunder will be deemed a waiver of such rights nor will waiver by the Company of any default by Customer be deemed a waiver of any other or subsequent default.

The Customer will indemnify and save the Company harmless from all loss on account of injury or damage to persons or property on the Customer's premises, and at and from the point of delivery of power if such point is located off the Customer's premises, growing out of any accident or mishap relating to the electric service provided by the Company to the Customer hereunder, other than any such injury or damage growing out of the gross negligence or willful misconduct of the Company or any employee or agent of the Company.

This agreement may be assigned by the Customer only with the written consent of the Company. This contract will bind and benefit the successors and assigns of the Company, and, at the option of the Company, the successors and assigns of the Customer. This contract supersedes all prior agreements between the Customer and the Company for the service specified herein.

In witness whereof, the parties hereto have caused this contract to be executed on (X) ____________________________, 20 ______.

Name of Company SOUTHWESTERN ELECTRIC POWER COMPANY		
Kind of Service: Electric	Class of Service: As Applicable	
Part III. Policy Schedule No. 12		
Title: EMERGENCY CURTAILMENT POLICY		PSC File Mark Only

APPLICABILITY

The provisions of this Emergency Curtailment Policy Schedule shall apply at any time, and for such periods of time, when in the judgment of the Company, it is necessary to reduce the use of electricity when emergency conditions exist on the electrical system as described below. This plan is to mitigate the effects of the event relative to the transmission system, generator capacity and energy emergencies of the Company.

SYSTEM EMERGENCY

Immediate and appropriate action shall be taken by the Company should a system emergency exist. A system emergency condition is defined by one or more of the conditions below.

- Serious shortages of generation capacity
- Loss of generation units
- Loss of bulk transmission
- Suspected or confirmed activity (e.g., terrorist activity, sabotage, equipment failure) which appears aimed at causing instability on the transmission system.

EMERGENCY PROCEDURES - CAPACITY SHORTAGE

The following curtailment steps will be implemented in the order listed and as necessary to reduce system loads within the capability of available generation and interconnected system purchases. Every reasonable effort will be made to assure the electrical service is not interrupted to critical customers and other loads vital to human and public needs.

1. Operating Reserve Warning
    a. First step in our Capacity Deficiency emergency procedures.
    b. SCC (System Control Center) to issue notification of ORW.

APSC FILED Time: 2/28/2019 2:15:14 PM: Recvd 2/28/2019 2:14:10 PM: Docket 19-008-U-Doc. 39

2. Maximum Emergency Generation
   a. The use of oil firing to regain lost generation that has occurred due to curtailments caused solely from loss of gas firing capability. Larger orifice plates in the oil lighter tips are required. If the unit is at full load (wide-open valves), no additional capacity is available.
   b. All units with hot start capability will be brought on-line.
   c. The utilization of overpressure and/or the removal of feedwater heaters results in additional capability that may be utilized for limited daily periods depend on unit condition and frequency of use.

3. Curtailment of Generating Plant Use
   Limiting the operation of non-critical plant activities brings about the curtailment of generating plant use. This would usually consist of the curtailment of coal handling, the shutting down of the machine shop to the extent practical, and the curtailment of lighting or air conditioning load.

4. Curtailment of Non-Essential Building Load in all SWEPCO facilities
   Request our employees cut back usage to the greatest extent possible in Company facilities.

5. Curtailment of Short Term Deliveries (SCC dispatcher notifies FERC)
   The curtailment of Non-Firm transactions supplied from AEP generation.

6. Interruptible Customers (SCC dispatcher notifies FERC)
   Curtail electric service to customers whose contracts provide for interruption under these conditions.

7. Public Appeal (SCC dispatcher notifies FERC)
   a. Appeal to all customers via press, radio, and television to cut back use of energy during the period of the emergency.
   b. Request bulk power users (municipalities and REA cooperatives) to which the Company supplies power on a wholesale basis to request their customers to cut back use of electric energy to the greatest extent possible.
   c. Request certain large industrial customers to curtail use of electric power by shifting loads to off-peak periods, to stagger operation of equipment, and to take whatever additional steps are possible to reduce electric use.

8. Purchase Non-Firm and/or Firm emergency energy to supply AEP - SWEPCO internal load requirements (if available).

.

9. Mandatory Load Shed (manual load shed)
Implement if steps 1 through 8 do not provide the necessary reduction in load. (DOE Report Required)
   a. This program utilizes distribution feeders that can be manually interrupted upon order of the SCC and/or TDC. This order may be given under conditions of extreme capacity deficiency and declining frequency. In case of a sudden deterioration of frequency or overloaded ties, it may be necessary to start this step
   b. Before the preceding step is utilized the order to interrupt will specify the amount of load or number of blocks\steps to be interrupted in order to relieve the emergency.
   c. The periods of interruption will be approximately two-hours. During the circuit rotation the circuits in one step will be opened before previously opened ones are reclosed. Interruption of distribution feeders will normally be done on a rotational basis to minimize cold-load pickup problems and to minimize interruption to Customers.

Replacing: Sheet No.

Name of Company SOUTHWESTERN ELECTRIC POWER COMPANY

Kind of Service: Electric Class of Service: As Applicable

Part III. Policy Schedule No. 12

Title: EMERGENCY CURTAILMENT POLICY

PSC File Mark Only

LOAD SHEDDING CRITERIA

The circuits should be prioritized by the following guidelines. Priority 3 circuits will be shed first, then Priority 2, and if more load is needed, even Priority 1. Stations that have at least 2 feeders will be selected and each feeder should have at least 3000 kW of load. Stations with supervisory control and meeting the above criteria should be selected since we can ultimately utilize them in a computer program. At least 25% of SWEPCO's peak summer/winter internal load is included in the manual load shed plan.

Priority 1 – "Hospitals" which shall be limited to major institutions providing critical care to patients.

Priority 2 – Police, fire, communication services, water and sewer services, government, transportation, emergency medical services, alternate energy and food services.

Piority 3 – All other customers.

Life Support

Due to the vast number of distribution circuits with life support; if a circuit only has life support on it, it should be classified as a Priority 3. The life support equipment is required to have a backup power supply and will ride through any of the abnormal circuit outages experienced everyday.

CUSTOMER COMPLIANCE

In the event any customer above who has been requested to reduce or reschedule use of power and energy, fails to comply with a request of a Company representative to do so pursuant to this plan, the Company shall have the right to totally discontinue service to said customer without further notice during the period this plan is in effect. Such discontinuance shall not be deemed a violation of law or the Rules and Regulations of the Commission, and the Company shall not be liable for penalties or damages, direct or indirect, by reason thereof; provided, however, that upon taking such action, the Company shall forthwith notify the Commission of the identity and location of the customer and the circumstances leading to such discontinuance.

REPORT TO COMMISSION

As soon as practical after the implementation of all or any part of this plan, the Company shall report to the Commission in writing the reason for the emergency curtailment, the substations and circuits affected, the number of customers affected along with the beginning and ending time and duration of the emergency curtailment.

AEP EMERGENCY OPERATING PLAN (EOP)

The AEP Emergency Operating Plan (EOP) provides the guidance for Southwestern Electric Power Company (SWEPCO) during any type of bulk power interruption to the reliable power supply for the SWEPCO service territory.

A copy of the current EOP is filed in Docket No. 10-059-U with the Arkansas Public Service Commission.

The plan provides for the following:

(a) The procedures that will be employed by the utility to communicate with the public concerning an impending and/or during a system emergency or power shortage including public appeals for voluntary load reductions and energy conservation and educational messages on how to accomplish such load reduction and conservation. The EOP also addresses notification of appropriate government agencies as the various steps of the emergency plan are implemented.

(b) The procedures that will be employed by the utility for load management, voltage reductions, and curtailment of power of its retail load that will minimize adverse impacts to customers while maintaining overall system reliability. The EOP also addresses the needs of critical loads essential to the health, safety and welfare of the community.
